

Product catalogue

2012

Products overview

From 2011 HESA has moved to paperless publication for most of our current range of information products. This change is in response to feedback obtained through a customer survey.

Products will therefore be available in an electronic format for download from the HESA website.

Only 'Higher Education Statistics for the UK', the official statistical overview of HE in the UK, will continue to be published as a printed publication, whilst also being available to download.

What are the benefits for customers?

More timely publication

Removing the printing phase of production means that we can publish earlier than in previous years. The splitting of some publications into data stream specific publications also results in earlier publication, since data relating to each stream will be published as soon as possible.

Instant access

With no postal delays, customers will be able to access products online immediately upon release.

Enhanced content

Content will be enhanced to provide comprehensive data in an easy to use format.

More flexibility

Data stream specific publications will provide users with more flexibility to choose the data products they really need.

Better for the environment.

Products in detail - Students, Staff, Finance and Planning Plus

Month of release February 2012

Students in Higher Education Institutions 2010/11

£55.00 + VAT

This product contains detailed analysis of the student dataset that HESA collects. Much of the data are cross tabulated by institution and include breakdowns by subject of study, level of study, mode of study, age, gender and much more. Data on ethnicity and disability are also included and new this year are much more data on equality.

Students in Higher Education Institutions also contains tables which provide a comprehensive look at the qualifications obtained by students at all levels of higher education including class of first degree.

Analysis of overseas student numbers including country of domicile is featured alongside other student attributes.

Month of release March 2012

Staff in Higher Education Institutions 2010/11

£45.00 + VAT

This new product (formerly part of the Resources of Higher Education Institutions reference volume) concentrates on academic and non-academic staff data from both UK universities and HE colleges.

Staff data tabulations include details on gender, ethnicity, disability, age and much more. Many of the tables are presented by institution. Data on non-academic staff are covered with breakdowns by standard occupational classification group and gender.

New data included look at academic staff highest qualification held and nationality.

Month of release March 2012

HE Finance Plus 2010/11

£295.00 + VAT Commercial
£150.00 + VAT Institution

Finance Plus contains the full finance statistics return for UK higher education institutions.

Data include detailed income and expenditure analysis and balance sheet information. The most recent editions include financial profile ratios.

Institutions whose data is included within this product will qualify for a discounted 'institution price'.

Month of release April 2012

HE Planning Plus 2012

£295.00 + VAT Commercial
£150.00 + VAT Institution

HE Planning Plus contains data relating to students, academic staff and finance. Student and staff data are presented in Microsoft[®] Excel PivotTables[®]. Data include student numbers by subject, level of study and age, academic staff by cost centre and academic employment function.

This product is only available for institutional planning and research purposes. Institutions whose data is included within this product will qualify for a discounted 'institution price'.

Products in detail - Finance, HEBCI and Destinations

Month of release May 2012

Finances of Higher Education Institutions 2010/11

£35.00 + VAT

A new product, Finances of Higher Education Institutions contains a subset of the finance data returned. It focuses on income and expenditure figures with breakdowns by source and category of spend. The tables can be used to examine income from funding council grants, tuition fees & education grants, research grants & contracts and endowment & investment income.

Detail on how much universities and HE colleges spend on academic staff costs and the cost of depreciation is also included. Many of these tables are also cross-tabulated by cost centre and institution.

Month of release May 2012

HE Business and Community Interaction Survey 2010/11

£225.00 + VAT Commercial
£100.00 + VAT Institution

The HE-BCI Survey is the main vehicle for measuring the volume and direction of interactions between UK HEIs and business and the wider community.

HESA took over this collection from HEFCE from the 2008/09 academic year. These data are invaluable as management information, in policy development and, more latterly, as metrics driving the allocation of public funds to further develop HEIs' infrastructures in this area.

This product includes a full set of data from both part A and part B of the survey.

Month of release July 2012

Destinations of Leavers from Higher Education Institutions 2010/11

£55.00 + VAT

Destinations data provide information on the activities of students after leaving a higher education institution. The data are collected through a survey carried out approximately six months after students leave. Information includes the type of work a leaver has entered or what sort of further study they may be engaged in where relevant.

Data also include the type of industry sector and occupation type that leavers enter and geographical distribution. Much of the data are also linked to data from the HESA Student Record allowing analysis of destinations by students' attributes such as gender, subject of study and qualification obtained.

Month of release September 2012

Higher Education Statistics for the UK 2009/10

£38.00 Book
£38.00 + VAT Download

Higher Education Statistics for the UK is published in conjunction with the Government Statistical Service and is a National Statistics product. A wide variety of data are presented from all of HESA's data streams and other organisations. Much of the data are shown at sector level. This product serves as a quick reference guide to high-level data on all aspects of higher education in the UK.

Tables featuring applications and admissions data from the Universities and Colleges Admissions Service (UCAS), data from the Student Loans Company on student support provision and information on participation and graduate rates for 30 countries sourced from the Organisation for Economic Co-operation and Development (OECD), and data from the Labour Source Survey are also included.

Further information

How to order

Order online at www.hesa.ac.uk/publications or contact Customer Services by email customer.services@hesa.ac.uk or call 01242 211155.

If you regularly purchase HESA products and would like the convenience of paying by Standing Order, contact HESA Customers Services.

VAT rates

VAT will be added to Product Download orders at the prevailing UK rate. Prior to 2011 our products were sold as a combination of a book and a CD, only the CD part of the product is VAT chargeable. If you have any queries please call our Customer Services team.

File formats

Product Downloads and CD products, unless otherwise stated, are presented in HTML format (.htm extension), viewable using most internet browsers. All HTML files conform to W3C[®] specification for HTML version 4.01 Strict. Tables are presented in Microsoft Excel 2003[®] (.xls). Older editions use Excel version 5.

Product licences

Each electronic product has a maximum of 5 downloads. For further licensing information and requests please contact a member of the Information Provision team on 01242 211133.

Release dates

In order to keep you up to date, HESA will endeavour to announce our publication dates in a timely manner;

1. Within 12 months of the proposed release date, we will advise the month of release
2. Four weeks before the planned release date we will confirm the exact date of release.

HESA reserves the right at all times to amend publication dates as necessary and will update the Publications schedule webpage accordingly.

Information & Analysis Team

What if you can't find what you need in our published tables?

Information Provision Team

HESA's Information Provision Service can answer specific queries and provide customised tabulations to meet your requirements.

We can supply detailed data tables sourced from the four main data streams currently held: students and qualifiers, destinations of leavers, staff and finance.

Data are available for each academic year from 1994/95. More information about data available can be found at www.hesa.ac.uk/products/adhoc/.

How can the data be supplied?

Data can be provided in a variety of formats. Small data tabulations will usually be supplied in a flat spreadsheet. Larger amounts of data can be supplied as ASCII text files (for import into a variety of software programs) or Microsoft[®] Excel PivotTables[®].

PivotTables[®] can be used to quickly summarise large amounts of data. You can rotate rows and columns to see different summaries of the source data, filter the data according to your chosen criteria, or display various details for areas of specific interest.

How do I order data?

To place a request for data you will need to fill in a **Data Request Form** which you can complete online or by contacting the team directly. We will then prepare a specification and quotation to cover the information you require.

Contact the Information Provision team on **01242 211133** or email us at information.provision@hesa.ac.uk

Analytical Services

For more in-depth analysis of HESA data, our dedicated **Analytical Services team** are on hand to offer assistance and advice. Email analytical.services@hesa.ac.uk or if you would prefer to talk to a member of the team call **01242 211115**.

More information

Find out more information about our range of products, including full contents listings of all publications, by visiting our web site at www.hesa.ac.uk/publications.

To improve access to our data we have made earlier versions of many of our products available to download for free via our website www.hesa.ac.uk/publications_archive. These currently include product years 1994/95 to 2003/04.
