Access programmes

Short Name	ACCESS	
Туре	field	
Description	This field records whether entrants have entered HE via SWAP courses.	
Applicable to	Scotland	
Coverage	All entrants to institutions in Scotland where EntryProfile.QUALENT2 = 44 or 45	
Base Data Type	ACCESSCodeType	
Field Length	1	
Part Of	Entry profile	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	QUALENT2	
Reason Required	To monitor the success of SWAP.	
Notes	Access to HE programmes have played an important role in widening access to higher education in Scotland. The majority of Scottish Access Programmes are run under the auspices of the Scottish Wider Access Programme (SWAP) and Continuing Education Departments in Scottish HEIs.	
Owner	HESA	
Version	1.1	
Date modified	2008-02-28	
Change management notes	Business rule 2 added	
Business rules	1 Error EntryProfile.ACCESS must exist for institutions in Scotland where EntryProfile.QUALENT2 = 44 or 45 2 Error EntryProfile.ACCESS must not exist for institutions in England, Northern Ireland or Wales	
Valid Entries and Labels	1 Entered HE via the SWAP 2 Entered HE via other access programme excluding SWAP	

Additional support cost

Short Name	ADDSUPCT	
Туре	field	
Description	This field indicates the level of additional support the provider is claiming for the learner.	
Applicable to	England	
Coverage	All instances at institutions in England where Instance.FESTUMK = 1,3 or 4 and Instance.REDUCEDI = 00	
Base Data Type	xs:nonNegativeInteger	
Field Length	6	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	FESTUMK	
Reason Required	For the management of additional financial support for students with learning difficulties and/or disabilities.	
Notes	Where no additional support costs have been incurred zero should be returned.	
	The additional support costs correspond to the amount of extra resource identified by the institution as required to meet the needs of learners such as those with learning difficulties and/or disabilities per year.	
	Additional funding may be claimed where an institution provides additional support to a learner and the extra costs of doing so are above a threshold level.	
	Where a learner for whom additional support costs are incurred withdraws, the actual - not projected - support cost should be recorded.	
Additional support is defined as any activity which provides direct support for le individual learners, which is over and above that which is normally provided in a standard learning programme which leads to their primary learning goal. The asupport is required to help learners gain access to, progress towards and successive their learning goals. The need for additional support may arise from a lifficulty or disability or from literacy, numeracy or language support requirements.

Version	1.2	
Date modified	2008-05-30	
Change management notes	Datatype updated from xs:PositiveInteger to xs:nonNegativeInteger to allow 0 as valid value	
Business rules	1 Error Instance.ADDSUPCT must exist for institutions in England where Instance.FESTUMK = 1, 3 or 4 and Instance.REDUCEDI = 00 2 Error Instance.ADDSUPCT must not exist for institutions not in England	

3 Error	Instance.ADDSUPCT must not exist for institutions in England where Instance.FESTUMK = 2
---------	---

Amount of tuition fees received/expected for the student

Short Name	RECFEE		
Туре	field		
Description	This field records the actual amount of tuition fees the institution expects to receive (or has received) for the student.		
Applicable to	England Wales		
Coverage	All instances where <u>Instance.FESTUMK</u> = 1, 3 or 4 and where <u>Instance.REDUCEDI</u> = 00		
Base Data Type	RECFEEType		
Field Length	5		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	FESTUMK		
Reason Required	To determine the extent of remission of fees in the sector.		
Examples	Where a learning aim has tuition fees of £780 this would appear as 780.		
Notes	Not applicable to economic cost recovery fees.		
	The length of this field is 5 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 00780 or 780		
Owner	HESA

Business rules	1 Error Instance.RECFEE must exist for institutions in England and Wales where Instance.FESTUMK = 1, 3 or 4 and Instance.REDUCEDI = 00 2 Error Instance.RECFEE must not exist for institutions in Northern Ireland or Scotland 3 Error Instance.RECFEE must not exist for institutions in England and Wales where Instance.FESTUMK = 2		

Articulation

Short Name	ARTICLN		
Туре	field		
Description	This field identifies whether a student has been admitted to the current instance with advanced standing; the advanced standing having been awarded on the basis of an HND/HNC qualification and the student has not previously studied at degree or post-graduate level		
Applicable to	Scotland		
Coverage	All entrants to institutions in Scotland where EntryProfile.DOMICILE = XF, XG, XH, XI, XK, XL, GG, JE, IM and on courses where Course.COURSEAIM = M22, H00, H11, H16, H18, H22, H23, H24, I00, I11, I16 and Instance.COMDATE is after 2007-07-31		
Base Data Type	ARTICLNCodeType		
Field Length	1		
Part Of	Entry profile		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	YRLLINST		
Reason Required	To assess the effectiveness of measures to improve access to degree level study through recruitment to HNC/HND programmes in colleges; the student has to demonstrate that they are moving up, not sideways, i.e. no previous degree level study has taken place.		
Notes	The information for this field should come from the institutions' admissions office and reflect the reasons why a student has been granted advanced standing i.e. is allowed to start part-way through the course. Usually this will be under formal articulation arrangements for the course, but any entry with advanced standing where the advanced standing was granted because of an HND/HNC qualification (including partial completion) and the student has never studied at degree level should be included. Where previous qualifications/HE experience is not known some students may have to be asked a direct question along the lines of: "Have you ever started a degree level course before?" those answering yes would not be regarded as articulating for this field. The outcome of any previous study is not relevant to this particular field nor is whether the degree level study was before or after obtaining the HND/HNC. All first degree students should have one of the codes 1 to 8. Code 7 'First degree level student who is/was not articulating in this programme' covers both students coming in with qualifications other than HND/HNC and also those who are coming in with those qualifications but who are excluded on the grounds of having previously started a course at degree level.

Bilingual ITT marker

Short Name	BITTM		
Туре	field		
Description	This field is a one digit field giving details about whether the ITT course is bilingual.		
Applicable to	NI Scotland Wales		
Coverage	All courses at institutions in Wales, Scotland and Northern Ireland where Course.TTCID = 1 or 2 and Course.REDUCEDC = 00, 01 or 04		
Base Data Type	BITTMCodeType		
Field Length	1		
Part Of	Course		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To indicate whether ITT is bilingual.		
Notes	In this context: • Bilingual means English/Welsh for institutions in Wales. • Bilingual means English/Gaedhlig for institutions in Scotland. • Bilingual means English/Irish for institutions in Northern Ireland. For further guidance on the completion of this field please refer to HEFCW/SEETLLD/DEL.		
Owner	HESA		
Version	1.1		
Date modified	2008-02-26		
Change management notes	Amended business rule 2 and created business rule 3 to enforce coverage		
Business rules Valid Entries and	1 Error Course.BITTM must exist for institutions in Wales, Northern Ireland or Scotland where Course.TTCID = 1 or 2 and Course.REDUCEDC = 00, 01 or 04 2 Error Course.BITTM must not exist for institutions in Wales, Northern Ireland or Scotland where Course.TTCID does not equal 1 or 2 3 Error Course.BITTM must not exist for institutions in England 0 Course does not lead to a formal certificate of bilingual education nor is it		
Labels	designed to enable students to teach bilingually Course does not lead to a formal certificate in bilingual education but is designed to enable students to teach bilingually Course leads to a formal certificate of bilingual education		

Campus identifier

Short Name	CAMPID		
Туре	field		
Description	This field identifies the campus with which a student instance is associated		
Applicable to	England NI Scotland Wales		
Coverage	All instances		
Base Data Type	xs:string		
Field Length	1		
Part Of	Instance		
Minimum Occurrences	1		
Maximum Occurrences	1		
Reason Required	To allow breakdown by campus, and hence geographical location of study, for multi-campus institutions.		
Notes	 A separate campus identifier should be used if a substantial number of students are studying on a campus at a substantial distance from where the main institution is based, such that it would be regarded as not being in the same city/town. Greater London can be treated as a single location. This is to facilitate analysis of geographic patterns of study. A separate campus identifier should be used when a merger takes place, to identify any merged institutions as separate campuses if they fit the criteria specified. Campus identifiers can only be used where a student can be associated with a single site. It is recognised that because of the flexibility of study patterns adopted by some institutions, it will be impossible to say categorically that some students are assigned to a particular campus. Although this field is compulsory, in the majority of cases, it will default to the generic value A indicating the entire institution or main campus. HEFCE expect separate campus identifiers for any part of the institution funded separately e.g. within 0151 London University (Institutes and activities) An institution that wishes separately to identify campuses may do so by using any alphanumeric character except for A in this field. Only those CAMPID codes submitted to HESA as part of the Campus Information System can be returned in this field. 		
Owner	HESA		
Version	1.0		
Business rules			

Change of mode date

Short Name	MCDATE		
Туре	field		
Description	This field records the date when a postgraduate student formally moves from an active study mode to 'writing-up' (Instance.MODE =43 or 44), 'changed to dormant' (Instance.MODE =51) or the date when such a student returns to an active study mode.		
Applicable to	England NI		
Coverage	All instances at institutions in England and Northern Ireland where Course.COURSEAIM begins D, E, L or M (excluding M22) and Instance.REDUCEDI = 00 and Instance.MODE is not equal to 63 or 64		
Base Data Type	DateWithNullStructure9		
Field Length	10		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	MODE		
Reason Required	As dormant and writing-up students are not funded it is necessary to identify the point which they move to these modes.		
Notes	This is only applicable to postgraduate students in institutions in England and Northern Ireland.		
	All date fields in the Student Record must be completed using the ISO8601 format of YYYY-MM-DD. The specification of this field follows the data policies set out in the MIAP Common Data Definitions project.		
	If the mode has not changed, an empty element should be returned with the ReasonForNull attribute set to 9 (not applicable), i.e:		
	<mcdate reasonfornull="9"></mcdate>		
	Only mode changes within the reporting year need be recorded.		
	Where a student starts and finishes the reporting year with an active mode, this field is not required regardless of any mode changes during the year.		
	Where a student finishes the year with a non-active mode but has had an active mode at some point in the year then the last change from active to non-active mode should be returned, changes between different non-active modes should be ignored.		
	Where a student finishes the year with an active mode the last date they moved from a non-active to active mode should be recorded.		

	Non-active modes for the purpose of this field are defined as dormant, writing up and sabbatical. Further guidance is available on the completion of this field.	
Owner	HESA	
Version	1.8	
Date modified	2008-07-31	
Change management notes	Coverage amended to match Business rule 1	
Business rules	1 Error Instance.MCDATE must exist for institutions in England or Northern Ireland and Course.COURSEAIM begins D, E, L or M (excluding M22) and Instance.REDUCEDI = 00 and Instance.MODE is not equal to 63 or 64 2 Error Instance.MCDATE must not be null except when ReasonForNull = 9 Instance.MCDATE must be null when ReasonForNull = 9 Instance.MCDATE must be ReasonForNull=9 for institutions in England and Northern Ireland and Course.COURSEAIM begins D, E, L or M (excluding M22) and Instance.MODE = 63 or 64 Instance.MCDATE must not exist for institutions in Scotland or Wales	

Classification

Short Name	CLASS		
Туре	field		
Description	This field is used to indicate the qualification class that the student obtained.		
Applicable to	England NI Scotland Wales		
Coverage	Compulsory for all qualifications awarded records where (QualificationsAwarded.QUAL = M22, H00, H11, H16, H18, H22, H23, H24, H50, I00, I11, I16). Also compulsory for those students who have achieved a relevant FE qualification (i.e. where a grade is meaningful) at institutions in England and Wales, that is with QUAL codes beginning, P, Q, R, S and X		
Base Data Type	CLASSCodeType		
Field Length	2		
Part Of	Qualifications awarded		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To monitor achievement.		
Notes	Only codes 01-11 should be used for students who have achieved an undergraduate degree qualification.		
	Enhanced degrees should be coded 07 'Unclassified honours', if not classified.		
	HESA aggregates codes 07, 08, 10 and 11 as "unclassified".		
	Medical degrees which are not honours programmes should be coded 10 or 11.		
	Codes 51-90 are the codes to be used for FE level students at institutions in England and Wales. A grade should be returned for all qualifications where the grade is meaningful. Other codes should not be used for FE level students.

Closed course

Short Name	CLSDCRS		
Туре	field		
Description	This field identifies courses that are restricted to certain groups of people and are not available to any suitably qualified candidate.		
Applicable to	England		
Coverage	All courses at institutions in England where <u>Course.REDUCEDC</u> = 00		
Base Data Type	CLSDCRSCodeType		
Field Length	1		
Part Of	Course		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To allow monitoring of provision that is provided for specific groups		
Notes	Closed courses are those courses that are not open to any suitably qualified candidate, for example where a course is only available to employees of particular companies that course is closed. A course is defined as closed where the syllabus (and/or examinations) is specifically designed for a certain group of people and the course is not also available to other suitably qualified candidates. A course may be designed for a particular company (with examples and/or timings altered to suit the company). However if the same course is also run for other suitably qualified candidates, not employed by the company, then the		
	course is not closed and should be coded 0 'Not a closed course'.		
Owner	HESA

Date modified	2007-09-07		
Change management notes	Clarification of notes and description		
Business rules	1 Error Course.CLSDCRS must exist for institutions in England where Course.REDUCEDC = 00 2 Error Course.CLSDCRS must not exist for institutions not in England		
Valid Entries and Labels	0 Not a closed course 1 Closed course		

Collaborating organisation

Short Name	COLLORG		
Туре	field		
Description	This field identifies a collaborating organisation providing significant input to a course.		
Applicable to	England		
Coverage	All courses at institutions in England where Course.REDUCEDC = 00 except where Course.COURSEAIM = D00, D90, L00, L80, L90, L91		
Base Data Type	COLLORGCodeType		
Field Length	4		
Part Of	Course		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To identify partner organisations in collaborative provision.		
Notes	HEFCE will be developing new funding routes for collaborative provision and consequently needs information about the types of organisations institutions collaborate with. In future it may be necessary to expand this coding frame to collect detailed information about individual named organisations. Collaboration with external organisations should only be included where the external organisation has made a significant input to the course that affects the course for all, or nearly all, students on the course. This could include: • Input to course content/curriculum or assessment • Contribution to the startup or ongoing costs of the course, this may include sponsoring a number of places on the course but would exclude paying the fees for individual students on the course • Provision of work based or project work opportunities • A significant and ongoing contribution of staff time and/or resources to support course delivery Collaboration does not cover the following activities: • Franchised provision • Input to course and curriculum design by professional bodies

Completion of year of instance

Short Name	FUNDCOMP
Туре	field
Description	This field refers to the year of instance being funded. The field records the student's completion status with respect to that year.
Applicable to	England NI Wales
Coverage	All instances at institutions in England, Northern Ireland and Wales where Instance.REDUCEDI = 00 or 01
Base Data Type	FUNDCOMPCodeType
Field Length	1
Part Of	Instance
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	For alignment with funding definitions.
Notes	Coding should be consistent with funding council early statistics. Refer to relevant funding council for full definitions.
	Normally when code 2 is returned, then either Instance.RSNEND and Instance.ENDDATE will be completed to end the student instance, or Instance.NOTACT will be completed to show the study is suspended. It has become more common for students to fail to complete the current year of instance but continue to study with the institution, this is particularly true of part-time students who drop a module.
	Code 4 'is as defined in HEFCW HESES, and should be used for students studying full-time on taught courses only.
	Code 9 can be used if the HESA reporting year does not contain, in part or in whole, a year of instance which has previously, is, or will be, returned to HESES. However, use of code 9 is an option. Institutions can, if they so wish, use the other codes for all records.
	Where a student undertakes a foundation degree and bridging course in the same HESA reporting year Instance.FUNDCOMP , should reflect whether the student completed the foundation degree and will therefore usually be returned with a value of 1. Similarly where the student progresses to a degree after completion of the bridging course this field should reflect the completion status of the degree.
	Any queries on this field should be addressed to <u>HEFCE</u> . Some additional guidance can be found in <u>HESES</u> .

Completion status

Short Name	CSTAT	
Туре	field	
Description	This field provides an indication of the degree of completion of the learning activities leading to the qualification aim.	
Applicable to	England Wales	
Coverage	All instances where <u>Instance.FESTUMK</u> = 1, 3 or 4 and where <u>Instance.REDUCEDI</u> = 00, 01 or 02	
Base Data Type	CSTATCodeType	
Field Length	1	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	FESTUMK	
Reason Required	To monitor completion.	
Notes		
Owner	HESA	
Version	1.1	
Date modified	2008-02-28	
Change management notes	Business rules 2 and 3 added	
Business rules	1 Error Instance.CSTAT must exist for institutions in England or Wales where Instance.FESTUMK = 1, 3 or 4 and Instance.REDUCEDI = 00, 01 or 02 2 Error Instance.CSTAT must not exist for institutions in Northern Ireland or Scotland 3 Error Instance.CSTAT must not exist for institutions in England or Wales where Instance.FESTUMK = 2	
Valid Entries and Labels	The student is continuing or intending to continue, the learning activities leading to the qualification aim The student has completed all the learning activities leading to the qualification aim The student has withdrawn from the learning activities leading to the qualification aim The student has transferred to a new qualification aim. That is the student has withdrawn from this qualification aim & as a direct result has at the same time started studying for another qualification aim	

Cost centre

Short Name	COSTCN
Туре	field
Description	This field describes the academic cost centre in which the module is being taught. It is up to institutions to decide whether or not to return details of cost centres which are contributing teaching/learning amounting to less than 5% of the proportion of the module.
Applicable to	England NI Scotland Wales
Coverage	All module subject records
Base Data Type	COSTCNCodeType
Field Length	2
Part Of	Module subject
Minimum Occurrences	1
Maximum Occurrences	1
Reason Required	To calculate the student load split out across the academic cost centres, and split across JACS2 codes.
Notes	This field forms one third of a triplet of fields with ModuleSubject.MODSBJ and ModuleSubject.MODSBJP
	Where two different subjects are taught in the same cost centre, there should be separate occurrences of Module-ModuleSubject for each.
	These cost centres should have been agreed with the funding councils as outlined in the Circular Letter 32/2005 http://www.hefce.ac.uk/pubs/circlets/2005/cl32 05.
	The cost centre should relate to where resources deployed to teach the student are located. Effectively the cost centre follows the money and will be reconcilable with the institutions finance statistics return. For example, if a member of staff based in the General Engineering cost centre takes a group of engineering students for a mathematics lecture, the cost centre should be General Engineering (16). However, if a member of staff based in the mathematics cost centre takes a group of engineering students for a mathematics lecture, the cost centre should be Mathematics (24).
	Where a department buys in the services of a member of staff based in a department in a non-academic cost centre, the cost centre to be returned would be that of the buying in department. For example, a member of staff based in the computing service takes a group of engineering students for a lecture and is paid for under a servicing agreement by the engineering department, then the cost centre returned should be General Engineering (16).
	The most important consideration in taking decisions about the attribution of students to cost centres should be the correspondence with the HESA Finance record.
	Where a part of the module is taught by another reporting institution, expenditure related to this provision must be included against academic cost centres under Head 1

	of Table 6 of the Finance Record. It has been agreed that the cost centre on the Student Record should match this allocation, i.e. institutions should code cost centre according to the organising department at their institution. Cost centre 99 is 'not assignable' and should only be used in cases where it is not possible to allocate the activity to an academic cost centre, e.g. where the appropriate cost centre is a non-academic cost centre. For institutions in England, HEFCE make use of cost centres in their funding allocations. HEFCE have stated that provision returned under cost centre 99 will be allocated to the lowest price group for funding.

Course

Short Name	Course
Туре	entity
Description	A combination of subject and qualification that defines what a student is aiming for.
Applicable to	England NI Scotland Wales
Coverage	Compulsory for all returns
Part Of	Institution
Minimum Occurrences	1
Maximum Occurrences	unbounded
Has Parts	Course identifier (COURSEID) Reduced course return indicator (REDUCEDC) General qualification aim of course (COURSEAIM) Course title (CTITLE) Teacher training course (TTCID) Bilingual ITT marker (BITTM) Teaching qualification sought sector (TQSSEC) Teaching qualification sought subject (TQSSUB) Collaborating organisation (COLLORG) Closed course (CLSDCRS) FE general qualification aim (FEQAIMC) Major source of funding (MSFUND) Regulatory body for health and social care students (REGBODY) Course subject
Reason Required	This entity exists to hold fields that describe courses without having to repeat the fields on individual instances.
Notes	Every Instance must be linked to one (and only one) course. Course records can exist without links to any Instances if it is easier for an institution to return all courses rather than just those that are active in the reporting year. The Course.COURSEID field is the primary key for the course entity. It also exists on the Instance as a foreign key. Where provision within the institution allows multiple possible qualification outcomes, institutions must return separate course records for each. Even where groups of students aiming for different qualification outcomes are taught in the same classes, each group must be returned on a different course with a different course aim. Further detailed notes are available in the supporting documents
Owner	HESA
Version	1.1
Date modified	2006-12-15
Change management notes	Notes amended and linked to supporting documentation

Business rules	

Course identifier

Short Name	COURSEID
Туре	field
Description	This field records the institution's own unique internal identifier for the course. The Course identifier is the <u>primary key</u> for the <u>Course</u> entity and exists as a foreign key on <u>Instance</u> .
Applicable to	England NI Scotland Wales
Coverage	All courses
Base Data Type	COURSEIDType
Field Length	30
Part Of	Course
Minimum Occurrences	1
Maximum Occurrences	1
Reason Required	To facilitate linkage with the Instance entity.
Notes	Course identifiers will be allocated by the institution and should be unique for each course.
	The term 'course' in this context relates to the combination of subject and qualification that defines what a student is aiming for and which are described in fields Course.COURSEAIM and Course.COURSEAIM and Course.Subject.SBJCA .
	The Course identifier links the course entity and the instance entity for the reporting period . There must be an entry in the course entity with a matching identifier in the instance entity to provide this link, and so give details about the student's study in the current year. Where a student changes course within an instance by changing either course aim (at the same level) or subject, the Course.COURSEID should be updated to reflect the course that is applicable at the end of the reporting period.
	Where the student continues on the same course, the same COURSEID should be kept for all years of the course. It is intended that in the future for some onward uses data from the student record should be aggregated to allow publication at a Course level. For the UNISTATS (TQI) site, for example, information about entrants, continuation, outcomes and destinations will be published together. If the COURSEID is not consistent throughout the course it will not be possible to compile a complete set of statistics as relating to a single course. Course.CTITLE will not allow for this aggregation: it is a text field and not suitable for the necessary validation. From 2008/09, HESA will introduce a HIN validation warning when there is a HIN link but COURSEID changes.
	Year-on-year linking will continue by the HIN mechanism.
	Valid characters
	The valid characterset available for this field has been defined by a specific study undertaken as a part of the MIAP Common Data Definitions (CDD) project. The

conclusions of this study were:

- The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters.
- All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007F and U+00A0 to U+024F.
- Schemas are built in such a way that an individual project can further restrict the set if required.

The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.

The Unicode charts that list each of the characters in this range can be found on the <u>Unicode web site</u>. The specific sets that are defined here are shown in the following PDF documents:

- Basic Latin
- Latin-1
- Latin Extended A
- Latin Extended B
- Latin Extended Additional

Institutions are advised to specify the encoding used in their XML files (i.e. <?xml version="1.0" encoding="UTF-8" ?>) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.

Version	1.5	
Date modified	2008-06-30	
Change management notes	Note added to highlight change in data type requirement and the need to specify file encoding	
Business rules	1 Error This entry must exist in Course.COURSEID	

Course subject

Short Name	CourseSubject	
Туре	entity	
Description	The subject descriptors for this course.	
Applicable to	England NI Scotland Wales	
Coverage	All courses at institutions in Scotland and Northern Ireland. All courses at institutions in England and Wales where (any Instance.FESTUMK = 2 or Course.FEQAIMC = '66666666')	
Part Of	Course	
Minimum Occurrences	0	
Maximum Occurrences	3	
Has Parts	Subject of course (SBJCA) Subject percentage (SBJPCNT) Subject of ITT Specialism indicator (ITTSUBJECT)	
Reason Required	This repeating element exists to allow a course to hold up to three sets of subject information.	
Notes		
Owner	HESA	
Version	1.3	
Date modified	2007-10-18	
Change management notes	Clarification of business rule 2	
Business rules	1 Error CourseSubject entity must exist for all courses at institutions in Scotland or Northern Ireland. 2 Error CourseSubject entity must exist for all courses at institutions in England or Wales where (any Instance.FESTUMK = 2 or 3 or Course.FEQAIMC = '66666666')	

Course title

Short Name	CTITLE	
Туре	field	
Description	This field will be determined by the institution and in this context relates to the complete programme of study leading to the qualification aim referred to in fields Course.COURSEAIM and Course.COURSEAIM and Course.Subject .	
Applicable to	England NI Scotland Wales	
Coverage	All courses	
Base Data Type	TitleType	
Field Length	255	
Part Of	Course	
Minimum Occurrences	1	
Maximum Occurrences	1	
Related Fields	COURSEAIM CourseSubject	
Reason Required	To facilitate HESA cross-checking with institutions and to identify courses in onward analyses.	
Notes	Although a compulsory field, this field will not be subject to specific checks regarding its validity. The only validation checks will be that the field contains at least one character. Feedback from users of the TQI site has indicated that they would want to see information at the course level. With the introduction of the course entity it is likely that the funding councils will want to explore this option further. Should users of the HESA data choose to publish course level information it is likely that the course title will form a critical part of this. Therefore institutions need to ensure that the CTITLE field contains course titles that would be meaningful to a wide range of stakeholders including potential students It is intended that this field can be used by the institution as a cross-check to fields Course.COURSEAIM and CourseSubject.

Credit transfer scheme

Short Name	CRDTSCM		
Туре	field		
Description	This field denotes the credit point transfer scheme that Module.CRDTPTS, and Module.LEVPTS, apply to.		
Applicable to	England NI Scotland Wales		
Coverage	All modules		
Base Data Type	CRDTSCMCodeType		
Field Length	1		
Part Of	Module		
Minimum Occurrences	1		
Maximum Occurrences	1		
Reason Required	To identify and monitor the use of credit transfer schemes and to monitor the actual flow of credits.		
Notes	Credit accumulation and transfer schemes allow students to collect credit for work already completed, if they decide to terminate their study before achieving a complete award. If and when they resume their studies, not necessarily at the previous institution, they may be able to carry forward the credits from their previous study.		
	HESA may seek extra information about schemes coded 7 or 8.		
	Modules which do not have a credit transfer scheme should be coded 9.		
	Institutions in Wales cannot use code 9 No scheme.		
	For institutions in Scotland this field must be coded 2 Scotland (SCOTCAT). The only exception to this rule is students for whom Course.COURSEAIM begins D or L, who can be coded 9 in this field.		
Owner	HESA		
Version	1.1		
Change management notes	Additional code A added for use in reporting FE students by institutions in Wales		
Business rules	1 Error Module.CRDTSCM cannot be coded 9 for institutions in Wales 2 Error Module.CRDTSCM cannot be coded 2 for institutions in England, Wales or Northern Ireland

Α	GNVQ units/OCN credits

Credit value of module

Short Name	CRDTPTS		
Туре	field		
Description	This field indicates the number of credit points a student gains on successful completion of the module.		
Applicable to	England NI Scotland Wales		
Coverage	All modules		
Base Data Type	xs:nonNegativeInteger		
Field Length	3		
Part Of	Module		
Minimum Occurrences	1		
Maximum Occurrences	1		
Related Fields	LEVLPTS		
Reason Required	To identify and monitor the use of credit transfer schemes and to monitor the actual flow of credits.		
Notes	Institutions in England and Northern Ireland may use code 999 as a default for all programmes of study, and it is suggested that this default is used for schemes coded 7 or 8 in Module.CRDTSCM.		
	Institutions in Wales cannot use code 999.		
	Fractional credit points should be rounded to the nearest whole number.		
	The length of this field is 3 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 003 or 3.		
Owner	HESA		
Version	1.5		
Date modified	2008-05-30		
Change management notes	Coverage amended to state that it covers all modules, and guidance added on the format for numeric data		
Business rules	1 Error Module.CRDTPTS must be coded 999 where Module.CRDTSCM = 9 2 Error Module.CRDTPTS cannot be coded 999 where Welsh institution 3 Warning Module.CRDTPTS should be coded 999 where English or Northern Irish institution and Module.CRDTSCM = 7 or 8 4 Warning Module.CRDTPTS should contain a value greater than 0		

Date of birth

Short Name	BIRTHDTE		
Туре	field		
Description	This field records the date of birth of the student.		
Applicable to	England NI Scotland Wales		
Coverage	All students		
Base Data Type	DateWithNullStructure1		
Field Length	10		
Part Of	Student		
Minimum Occurrences	1		
Maximum Occurrences	1		
Reason Required	The date of birth is required to generate the student's age and to provide an additional item of information for record linkage. To permit age-based analysis and also facilitate record linkage across collections.		
Notes	All date fields in the Student Record must be completed using the <u>ISO8601</u> format of YYYY-MM-DD. The specification of this field falls within the scope of the <u>MIAP Common Data Definitions</u> project.		
	If the date of birth is not known, an empty element should be returned with the ReasonForNull attribute set to 1 (not known), i.e:		
	<pre><birthdte reasonfornull="1"></birthdte></pre>		
	HESA monitors the number of unknown birth dates submitted by each institution.		
	For students entering through UCAS this information will be available from UCAS via the *J transaction.		
	Where Y0/Y1/Y2 appear in business rules, these refer to the reporting period Y1-Y2 (e.g. for the 2007-08 reporting period, Y0 is 2006, Y1 is 2007 and Y2 is 2008).		
Owner	Managing Information Across Partners - Common Data Definitions

Destination of outward credit mobile students

Short Name	DESTOCM		
Туре	field		
Description	This field identifies the country or countries where an outwards credit mobile student is undertaking a credit-bearing part of their course at one or more institutions overseas.		
Applicable to	England NI Wales		
Coverage	All instances at institutions in England, Wales and Northern Ireland where Instance.EXCHANGE = 5 or 7 or Instance.LOCSDY = F or G and Instance.REDUCEDI = 00		
Base Data Type	DESTOCMCodeType		
Field Length	2		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	3		
Related Fields	EXCHANGE LOCSDY		
Reason Required	This information is required by DIUS to identify details of student migration patterns.		
Notes	Up to three occurrences of this field can be included in the data for a reporting period where the student has spent parts of the year in different countries. EU, XP-XX, ZZ: Obsolete Countries, Regions, Stateless, and Unknown The regional codes EU and XP to XX may be used if information is known only to this level of accuracy, in preference to using ZZ which should be a last resort. EU should be used in preference to XP if appropriate.

Disability

Short Name	DISABLE			
Туре	field			
Description	This field records the type of disability that a student has, on the basis of the student's own self-assessment.			
Applicable to	England NI Scotland Wales			
Coverage	All students where any <u>Instance.REDUCEDI</u> = 00 or 01			
Base Data Type	DISABLECodeType			
Field Length	2			
Part Of	Student			
Minimum Occurrences	0			
Maximum Occurrences	1			
Reason Required	To permit disability-based analysis; for monitoring levels and trends in participation by particular groups of people; to monitor take-up of Disabled Students' Allowance as Disabled Students' Allowance is now not means tested; to permit analysis based on type of disability.			
Notes	Code 00 'No known disability' should be returned when the student indicates that they do not have a disability.			
	Code 10 'Autistic Spectrum Disorder' is to include Asperger Syndrome, as an example of an ASD.			
	Code 96 'A disability not listed above' may be used where it is known that the student has a disability, but what type is not known.			
	Code 97 'Information refused' should be used in all cases where the student has explicitly refused to provide disability information.			
	Code 98 'Information not sought' may be used for continuing students in cases where the institution does not already hold the information.			
	Code 99 'Not known' includes all cases where the information has been sought but is missing.			
	If this field is coded 02-96 indicating that the student has a disability, then Instance.DISALL should be coded 4, 5 or 9.			
	For students entering through UCAS this information will be available from UCAS via the *J transaction.			
Owner	HESA			
Version	1.0			
Business rules	1 Error Student.DISABLE must exist where any Instance.REDUCEDI = 00 or 01			

Valid Entries and	00	No known disability
Labels	02	Blind/partially sighted
	03	Deaf/hearing impairment
	04	Wheelchair user/mobility difficulties
	05	Personal care support
	06	Mental health difficulties
	07	An unseen disability, e.g. diabetes, epilepsy, asthma
	08	Multiple disabilities
	10	Autistic Spectrum Disorder
	11	A specific learning difficulty e.g. dyslexia
	96	A disability not listed above
	97	Information refused
	98	Information not sought
	99	Not known

Disabled Student Allowance

Short Name	DISALL		
Туре	field		
Description	This field identifies whether the student with a disability is in receipt of Disabled Students' Allowance (DSA) or not.		
Applicable to	England NI Scotland Wales		
Coverage	All Instances where <u>Student.DISABLE</u> is between 02 and 96 inclusive and where <u>Instance.REDUCEDI</u> = 00		
Base Data Type	DISALLCodeType		
Field Length	1		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To permit disability-based analysis; for monitoring levels and trends in participation by particular groups of people; to monitor take-up of Disabled Students' Allowance as Disabled Students' Allowance is now not means tested; to support the allocation for disability premium by HEFCW; to permit analysis based on type of disability.		
Notes	If <u>Student.DISABLE</u> is coded 02-96 indicating that the student has a disability, then this field should be coded 4, 5 or 9. Code 9 should be used for all cases where it is known that the student has a disability,		
	but it is not known whether or not they are in receipt of Disabled Students' Allowance.		
Owner	HESA		
Version	1.1		
Change management notes	Minimum occurrences reduced to 0		
Business rules	1 Error Instance.DISALL must exist where Student.DISABLE = 02 - 96 and Instance.REDUCEDI = 00 2 Error Instance.DISALL code 4 is only available where Course.COURSEAIM begins D, E, L, M, H, I, J or C 3 Error Instance.DISALL must not exist where Student.DISABLE = 00, 97, 98 or 99 4 Error Instance.DISALL can not be coded 4 where (EntryProfile.DOMICILE exists and is not coded GG, JE, XL, XK, IM, XF, XI, XH, XG)		
Valid Entries and Labels	In receipt of Disabled Students' Allowance Not in receipt of Disabled Students' Allowance Information about Disabled Students' Allowance is not known/not sought		

Disadvantage uplift factor

Short Name	DISUPFAC		
Туре	field		
Description	This field records the disadvantage uplift factor for a learner for whom a disadvantage uplift is being claimed.		
Applicable to	England		
Coverage	All instances at institutions in England where <u>Instance.FESTUMK</u> = 1,3 or 4 and <u>Instance.REDUCEDI</u> = 00		
Base Data Type	DISUPFACType		
Field Length	6		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	FESTUMK		
Reason Required	To calculate LSC funding for the institution.		
Notes	For many learners eligible for widening participation funding, the factor can be entered automatically from the file of postcodes and factors available on the LSC website. Where a learner comes from a ward eligible for widening participation funding and the postcode is not on the LSC file of postcodes and widening participation factors, the factor can be entered manually from the file of wards and widening participation factors also available on the website. The revised index should be used for special cases and where the postcode is not on the LSC file. Institutions should keep evidence of the learner's eligibility for widening participation funding. Where a learner is not eligible for a disadvantage uplift, 0.0000 should be returned.		
Owner	LSC		
Version	1.2		
Date modified	2007-09-17		
Change management notes	Business rules 2 and 3 added		
Business rules	1 Error Instance.DISUPFAC must exist for institutions in England where Instance.FESTUMK = 1, 3 or 4 and Instance.REDUCEDI = 00 2 Error Instance.DISUPFAC must not exist for institutions not in England Instance.DISUPFAC must not exist for institutions in England where Instance.FESTUMK = 2		

Domicile

Short Name	DOMICILE		
Туре	field		
Description	This field holds the country code of the student's permanent or home address prior to entry to the course. It is not necessarily the correspondence address of the student.		
Applicable to	England NI Scotland Wales		
Coverage	All entrants		
Base Data Type	DOMICILECodeType		
Field Length	2		
Part Of	Entry profile		
Minimum Occurrences	1		
Maximum Occurrences	1		
Reason Required	To distinguish between home and overseas students and to disaggregate students by origin.		
	To obtain the numbers of students domiciled in particular EC countries and elsewhere abroad, and hence calculate participation rates.		
	To forecast the demand for student allowances and grants.		
	To record cross-border flows.		
Examples			
Notes	For students entering through UCAS this information will be available from UCAS via the *J transaction. UCAS will first use the complete new code list for entrants in 2009. Therefore in 2007/08 (and 2008/09) institutions can use the more limited codes as provided in the *J, however, institutions can recode if they choose. The details of the coding that will be provided by UCAS can be found in the *J specification.		
	HESA Guidance		
	Note: 'no settled inhabitants' means no inhabitants apart from military and scientific personnel, staff of contractors, and seasonal residents.		
	GB, XF, XG, XH, XI, XJ, XK: United Kingdom		
	For domicile the separate country codes XF, XG, XH, XI must be used, and if domicile is known to be United Kingdom but the individual country is not known, XK must be used. The code GB is invalid for domicile. For nationality the code GB must be used. The codes XF, XG, XH, XI, XK are invalid for nationality. The code XJ is invalid for both domicile and nationality. Note that the code UK is not on the ONS list and is invalid for both domicile and nationality.		

GG, JE, XL: Guernsey and Jersey (Channel Islands)

The Channel Islands are not part of the United Kingdom and not part of the European Union. United Kingdom codes must not be used for either domicile or nationality. The Bailiwicks of Guernsey (which includes the smaller islands of Alderney and Sark) and of Jersey must be treated separately, and the codes GG and JE must be used for both **domicile** and **nationality**. The code XL may be used for either domicile or nationality, but only for student instances from 2007/08 onwards that are already current in 2006/07, to avoid the need for re-coding.

IM: Isle of Man

The Isle of Man is not part of the United Kingdom and not part of the European Union. United Kingdom codes must not be used either for domicile or nationality. The code IM must be used for both **domicile** and **nationality**.

CY, XA, XB, XC: Cyprus

The following treatment does not imply any recognition that the *de facto* Turkish occupation and control of northern Cyprus is legitimate, but does deal with the practical need to record the source of students. The separate codes Cyprus (European Union) (XA) and Cyprus (non European Union) (XB) must be used for both **domicile** and **nationality**. The code XC may be used for either domicile or nationality, but only for student instances from 2007/08 that are already current in 2006/07, to avoid the need for re-coding, or for new entrants in 2007/08 who entered through UCAS. Note that an appropriate United Kingdom code should be used for both domicile and nationality for students from the British sovereign military areas on Cyprus. The code CY is invalid for both domicile and nationality unless and until there is any change in the political situation, in which case the coding arrangements will be reviewed.

FI, AX: Finland and the Aland Islands

The Åland Islands (Ahvenamaa) are an autonomous demilitarised region of Finland, and are part of the European Union subject to some derogations and special provisions. For **domicile** the code FI must be used only for Finland excluding the Åland Islands, and the code AX must be used for the Åland Islands. The passport held by Åland Islanders is an EU-style passport distinguished from the normal Finnish passport by the addition of the word 'Åland' below 'FINLAND', but this does not imply a separate nationality. Accordingly, for **nationality** only the code FI is to be used, and the code AX is invalid.'

FO, GL: Faroe Islands and Greenland

The Faroe Islands and Greenland must be treated separately, and the codes FO and GL must be used for both **domicile** and **nationality**. Note that, despite their relationship with Denmark, neither Greenland nor the Faroe Islands are part of the European Union.

FR, GF, GP, MQ, RE, PM, YT, PF, TF, NC, WF: French Republic

The French Republic comprises Metropolitan France (France Métropolitain) [including Corsica], the four Overseas Departments (Départements d'Outre-Mer, or D.O.M.) of French Guiana (GF), Guadeloupe [including St Martin (North)] (GP), Martinique (MQ), and Réunion (RE), the four Overseas Collectivities (Collectivités d'Outre-Mer, or C.O.M.) of Mayotte (YT), St Pierre & Miquelon (PM), French Polynesia (PF) [also designated as a Pays d'Outre-Mer], and Wallis & Futuna (WF), the Overseas Territory

(Territoire d'Outre-Mer, or T.O.M.) of the French Southern Territories (TF), and finally New Caledonia (NC) which has a special status similar to a T.O.M.. Metropolitan France and the four Overseas Departments are all part of the European Union. For **domicile**, the code FR must be used **only** for Metropolitan France, and other codes must be used with their natural meaning, except that there are no settled inhabitants in the French Southern Territories, so code TF is invalid. For **nationality** the code FR must be used throughout, and all the other codes in this group are invalid.

IT, VA: Italy and Vatican City (Holy See)

Italy and Vatican City must be treated separately, and the codes IT and VA must be used for both **domicile** and **nationality**.

NL, AW, AN: Kingdom of the Netherlands

The Kingdom of the Netherlands comprises the European country of The Netherlands and the Caribbean countries of Aruba (AW) and Netherlands Antilles (AN). For **domicile**, the code NL must be used only for The Netherlands in Europe, and the codes AW and AN must be used with their natural meaning. For **nationality** the code NL must be used throughout, and codes AW and AN are invalid. Netherlands Antilles is to be further subdivided on 1 July 2007, and this may require further codes to be allocated in ISO 3166, but this had not been done as at mid-2006.

ES, IC, XD, XE: Spain and the Canary Islands

The Canary Islands are part of Spain, and hence of the European Union, but with some special derogations and provisions particularly relating to customs and fiscal matters. For **domicile**, the code ES must be used for mainland Spain and the code IC must be used for the Canaries. For **nationality**, the code ES must be used for both mainland Spain and the Canaries. The codes XD and XE, although listed, are invalid for both domicile and nationality. No separate codes are provided in the ONS list for the exclaves of Ceuta and Melilla on the coast of north Africa, and for both domicile and nationality purposes they should be regarded as part of mainland Spain.

NO, SJ, BV: Norway and Svalbard

Svalbard (Spitzbergen) is an inhabited Norwegian territory in the Arctic Ocean. For **domicile** the code SJ must be used for Svalbard, and the code NO must be used only for Norway excluding Svalbard. For **nationality** the code NO must be used throughout, and SJ is invalid. Jan Mayen Island is included with Svalbard under code SJ, but has no settled inhabitants. Bouvet Island (BV) is a Norwegian island in the South Atlantic Ocean, but has no settled inhabitants, so code BV is invalid for both domicile and nationality.

MA, EH; Morocco, Western Sahara

Western Sahara (EH) is a disputed territory occupied and administered by Morocco (MA). The code EH should be used where appropriate for both **domicile** and **nationality**.

PS: West Bank and Gaza Strip

This is a new code not provided for under the old HESA code system. It must be used where appropriate for both **domicile** and **nationality**.

US, PR, VI, GU, MP, AS, UM, MH, FM, PW: United States, Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, American Samoa, United States Minor Outlying Islands, Marshall Islands, Micronesia, Palau

The Commonwealth of Puerto Rico is an Unincorporated Organized Territory of the United States; its current Commonwealth status grants it a measure of internal self-government, and its longer-term status is the subject of active debate in 2006. Puerto Ricans are citizens of the United States. For **domicile** the code PR must be used. For **nationality** the code US must be used and the code PR is invalid.

The US Virgin Islands (the former Danish West Indies, purchased from Denmark by the United States in 1916) is an Unincorporated Organized Territory of the United States. US Virgin Islanders are citizens of the United States. For **domicile** the code VI must be used. For **nationality** the code US must be used and the code VI is invalid.

Guam (formerly part of the UN Trust Territory of the Pacific) is an Unincorporated Organized Territory of the United States. For **domicile** and **nationality** the code GU must be used.

The Commonwealth of the Northern Mariana Islands (formerly part of the UN Trust Territory of the Pacific) is an Unincorporated Organized Territory of the United States; its Commonwealth status grants it a measure of internal self-government. For **domicile** and **nationality** the code MP must be used.

American Samoa is an Unincorporated Unorganized Territory of the United States. For **domicile** and **nationality** the code AS must be used The United States Minor Outlying Islands comprise Baker Island, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Atoll, Palmyra Atoll and Wake Island in the Pacific, and Navassa Island in the Caribbean. They are Unincorporated (Incorporated in the case of Palmyra Atoll) Unorganized Territories of the United States. They have no settled inhabitants and the code UM is accordingly invalid for both **domicile** and **nationality**.

The Marshall Islands (formerly part of the UN Trust Territory of the Pacific) are a self-governing state in free association with the United States. For **domicile** and **nationality** the code MH must be used.

The Federated States of Micronesia (formerly part of the UN Trust Territory of the Pacific) are a self-governing state in free association with the United States. For **domicile** and **nationality** the code FM must be used.

Palau (formerly part of the UN Trust Territory of the Pacific) is a self-governing state in free association with the United States. For **domicile** and **nationality** the code PW must be used.

The use of the code US for **domicile** is accordingly limited to the United States only.

CN, TW, HK, MO: China, China (Taiwan), Hong Kong, Macao

China (CN) should be used for both **domicile** and **nationality** where relevant in cases not covered by the following guidance. China (Taiwan) (TW) - The United Kingdom acknowledges the position of the Chinese Government that Taiwan is a province of China and recognises the Chinese Government as the sole legal government of China. The United Kingdom does not recognise Taiwan as a state and does not have diplomatic relations with Taiwan. However, because the United Kingdom accepts passports issued by the Taiwanese Authorities for immigration purposes, it is necessary

to use a separate country code TW for China (Taiwan) in both the **domicile** and **nationality** fields. This has no bearing on the United Kingdom's position on Taiwan's status.

Hong Kong (Special Administrative Region of China) (HK) appears separately for historical and immigration reasons as this Special Administrative Region issues different passports from those of the PRC. This code is not regarded as having any implications for issues of nationality, but should continue to be used in both the **domicile** and **nationality** fields.

Macao (Special Administrative Region of China) (MO) appears separately for historical and immigration reasons as this Special Administrative Region issues different passports from those of the PRC. This code is not regarded as having any implications for issues of nationality, but should continue to be used in both the **domicile** and **nationality** fields.

AU, CX, CC, NF, HM: Australia, Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Heard Island and MacDonald Islands.

Christmas Island is a non-self-governing territory of Australia. For **domicile** the code CX must be used. For **nationality** the code AU must be used and the code CX is invalid.

Cocos (Keeling) Islands is a non-self-governing territory of Australia. For **domicile** the code CC must be used. For **nationality** the code AU must be used and the code CC is invalid.

Norfolk Island is a non-self-governing territory of Australia. For **domicile** the code NF must be used. For **nationality** the code AU must be used and the code NF is invalid.

Heard Island and MacDonald Islands are a territory of Australia with no settled inhabitants. The code HM is accordingly invalid for both **domicile** and **nationality**

The use of the code AU for domicile is accordingly limited to Australia only.

NZ, CK, NU, TK: New Zealand ,Cook Islands, Niue, and Tokelau

The Cook Islands are a self-governing state in free association with New Zealand; they form part of the Realm of New Zealand and Cook Islanders are New Zealand citizens. Accordingly, for **domicile** the code CK must be used for the Cook Islands, but for **nationality** the code NZ must be used and the code CK is invalid.

Niue is a self-governing state in free association with New Zealand; it forms part of the Realm of New Zealand and Niueans are New Zealand citizens. Accordingly, for **domicile** the code NU must be used for Niue, but for **nationality** the code NZ must be used and the code NU is invalid.

Tokelau is a New Zealand territory whose future status is currently under discussion; a proposal for free association with New Zealand on a basis similar to that of the Cook Islands and Niue was rejected by referendum in 2006. As an interim arrangement pending the determination of the future status of Tokelau, for **domicile** the code TK must be used, but for **nationality** the code NZ must be used and the code TK is invalid.

The use of the code NZ for **domicile** is accordingly limited to New Zealand only.

IO: British Indian Ocean Territory (BIOT)

The Chagos Islands form the principal part of this territory, and these include the island of Diego Garcia which is a leased to the United States of America as a major military base. The indigenous inhabitants of BIOT have been displaced elsewhere, and the territory accordingly has no settled inhabitants at present (on the above definition). Accordingly the code IO is invalid for **domicile**, but may be used as a **nationality** code for displaced indigenous inhabitants. IO will be made valid for domicile if at some point return of the indigenous inhabitants is permitted.

AQ: Antarctica

Since there are no settled inhabitants in Antarctica, code AQ is invalid for both domicile and nationality. Although there are a number of national territorial claims to parts of Antarctica, these have been in abeyance since the coming into force of the Antarctic Treaty in 1961.

XM, XN, XO, EU, XP–XX, XY, XZ, AA, ZZ: Obsolete Countries, Regions, Stateless, and Unknown

Codes XM, XN, XO, AA may not be used for **domicile**, for which they are invalid. The regional codes EU and XP to XX may be used if domicile is known only to this level of accuracy, in preference to using ZZ which should be a last resort. EU should be used in preference to XP if appropriate. For **nationality**, codes XM, XN, XO may be used only for students who hold these obsolete nationalities and no other, presumably because they emigrated at a time when the nationalities were current and they have never acquired any other nationality. Codes EU and XP to XX may not be used for nationality, for which they are invalid. Code AA should be used only when a student is known to be stateless, and code ZZ should be used when nationality is not known or when it is impossible from the available documentation to assign a nationality from the above list. Codes XY and XZ although listed, are invalid for both domicile and nationality.

QO: Kosovo

A new code for Kosovo (QO) has been added to the classification in acknowledgement of the UK's recognition of Kosovo as an independent nation. This code is available for use for 2007-08, but institutions are not required to re-code existing students.

Eligibility for disadvantage uplift

Short Name	ELIDISUP	
Туре	field	
Description	This field records whether the learner is eligible for disadvantage uplift	
Applicable to	England	
Coverage	All instances at institutions in England where Instance.FESTUMK = 1,3 or 4 and Instance.REDUCEDI = 00	
Base Data Type	ELIDISUPCodeType	
Field Length	2	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	FESTUMK	
Reason Required	To calculate LSC funding and to monitor disadvantage.	
Notes	Some learners will qualify for a disadvantage uplift for two or even three reasons. Nearly half of basic skills learners are already eligible for an uplift. In these circumstances, the provider may claim the highest uplift factor.	
	Learners benefiting directly from single regeneration budget (SRB) funding will also be eligible for the disadvantage uplift. Where a provider intends to use this reason for claiming disadvantage uplift funds, it should first discuss the matter with its local LSC to establish which SRB project is being used to justify additional funds and how the learners affected are to be identified.	
Owner	LSC	
Version	1.1	
Date modified	2008-02-28	
Change management notes	Business rules 2 and 3 added	
Business rules	1 Error Instance.ELIDISUP must exist for institutions in England where Instance.FESTUMK = 1, 3 or 4 and Instance.REDUCEDI = 00 2 Error Instance.ELIDISUP must not exist for institutions not in England 3 Error Instance.ELIDISUP must not exist for institutions in England where Instance.FESTUMK = 2	
Valid Entries and Labels	From deprived area (ward based uplift) postcode on LSC's file From deprived area (ward based uplift) postcode not on LSC's file Studying Basic Skills programme Supported by Single Regeneration Budget (SRB) Learner group eligible for disadvantage uplift according to LSC funding guidance Other - further information may be requested Not eligible for disadvantage uplift	

Eligibility for enhanced funding

Short Name	ELIGENFD	
Туре	field	
Description	This field records whether or not the student is eligible for enhanced funding.	
Applicable to	England	
Coverage	All instances at institutions in England where <u>Instance.FESTUMK</u> =1,3 or 4 and <u>Instance.REDUCEDI</u> = 00	
Base Data Type	ELIGENFDCodeType	
Field Length	2	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	FESTUMK	
Reason Required	To calculate LSC funding for the institution and to monitor eligibility for enhanced funding.	
Notes	Where code 12 '16-18 Funding entitlement and programme includes key skills' is used the record should include details of the key skills unless the learner is in the second year and completed one or more of the key skills in year one.	
Owner	LSC	
Version	1.1	
Date modified	2008-02-28	
Change management notes	Business rules 2 and 3 added	
Business rules	1 Error Instance.ELIGENFD must exist for institutions in England where Instance.FESTUMK = 1, 3 or 4 and Instance.REDUCEDI = 00 2 Error Instance.ELIGENFD must not exist for institutions not in England Instance.ELIGENFD must not exist for institutions in England where Instance.FESTUMK = 2	
Valid Entries and Labels	12 16-18 Funding entitlement & programme includes key skills 13 16-18 Funding entitlement & the learner's learning difficulties and/or disabilities are such that the QCA key skills qualification is inappropriate Not eligible for enhanced funding	

Employer role

Short Name	EMPROLE
Туре	field
Description	This field records the role of the employer in the learning aim of the learner.
Applicable to	England Wales
Coverage	All instances at institutions in England or Wales where Instance.FESTUMK = 1,3 or 4 and Instance.REDUCEDI = 00 or 02
Base Data Type	EMPROLECodeType
Field Length	1
Part Of	Instance
Minimum Occurrences	0
Maximum Occurrences	1
Related Fields	FESTUMK
Reason Required	To identify the different types of employment-related learning.
	To monitor the role that employers play in the learner's attendance to study learning aims and to calculate funds for dedicated employer provision.
Notes	Codes 6 - 8 can be used only by institutions in England.
	For learners at institutions in England, this field should be completed for employed learners who are studying learning aims relevant to their employment. The field should be completed for all learners at institutions in Wales.
	Where a learner is employed and released by their employer to study a vocational learning aim which is relevant to their employment, code 6 'The LSC learner is employed and released by the employer to study a vocational learning aim relevant to that employment' should be used.
	Where a learner is employed and studying a vocational learning aim relevant to that employment and their employer has not released the learner to attend, code 7 'The LSC learner is employed and studying a vocational learning aim relevant to that employment. The employer has not released the learner to attend' should be used.
	Where a learner is attending dedicated employer provision, code 8 'The LSC learner is attending dedicated employer provision' should be used. Dedicated provision refers to learning aims which are delivered for an employer, normally on the employers premises, either by direct or franchised provision.
	Code 9 'None of the above' should be used for all 16 -19 year old learners following a programme of 450 or more guided learning hours per year, learners studying learning aims unrelated to their employment and the unemployed.
	Where a provider is not aware of the learners employment or is unable to establish a

	·	
	link between the learning aim and the learners employment, code 9 'None of the above' should be used.	
	Codes 1 - 5 can be used only by institutions in Wales.	
	This employer role should be as at the beginning of the learning aim. Do not amend this field if the learners employment status changes during the programme.	
Owner	LSC/DCELLS in WAG	
Version	1.2	
Date modified	2008-06-30	
Change management notes	Valid entries updated to reflect change to DCELLS	
Business rules	1 Error Instance.EMPROLE must exist for institutions in England or Wales where Instance.FESTUMK = 1, 3 or 4 and Instance. REDUCEDI = 00 or 02 2 Error Instance.EMPROLE codes 1 - 5 are only available to institutions in Wales 3 Error Instance.EMPROLE codes 6 - 8 are only available to institutions in England 4 Error Instance.EMPROLE must not exist for institutions in Northern Ireland or Scotland 5 Error Instance.EMPROLE must not exist for institutions in England or Wales where Instance.FESTUMK = 2	
Valid Entries and Labels	The DCELLS learner is employed & is on a WBL programme The DCELLS learner is not on a WBL programme, but is employed & released by the employer to study on a vocational programme relevant to that employment The DCELLS learner is not on a WBL programme but is employed & studying on a vocational programme relevant to that employment. The employer has not released the learner to attend but is providing other support (eg payment of fees) The DCELLS learner is not on a WBL programme, but is attending dedicated employer provision The DCELLS learner is not employed, but is on a WBL programme The LSC learner is employed & released by the employer to study a vocational learning aim relevant to that employment The LSC learner is employed & studying a vocational learning aim relevant to that employment. The employer has not released the learner to attend The LSC learner is attending dedicated employer provision None of the above	

End date of instance

Short Name	ENDDATE
Туре	field
Description	This field records the date the student left the student instance detailed in this return.
Applicable to	England NI Scotland Wales
Coverage	All instances
Base Data Type	DateWithNullStructure
Field Length	10
Part Of	Instance
Minimum Occurrences	1
Maximum Occurrences	1
Related Fields	RSNEND
Reason Required	To determine whether to include a student in any particular population definition.
Notes	All date fields in the Student Record must be completed using the <u>ISO8601</u> format of YYYY-MM-DD. The specification of this field falls within the scope of the <u>MIAP Common Data Definitions</u> project.
	If the instance has not ended, an empty element should be returned with the ReasonForNull attribute set to 9 (not applicable), i.e:
	<enddate reasonfornull="9"></enddate>
	A date is not required in cases where a student transfers from one course to another within the same student instance. Guidance on when a new student instance is required is given in Instance.NUMHUS . Normally where a student progresses from one course directly onto another at the same level (e.g. HND to Degree, MPhil to PhD) a new student instance is not required and hence this field would not be completed
	An entry in this field means that an entry in Instance.RSNEND will also be expected.
	Sometimes there will be a delay in knowing whether or not a student has left a course. Where the precise date of the student leaving is not known, the date of the end of the month, term or semester in which the student last attended should be given.
	Where Y0/Y1/Y2 appear in business rules, these refer to the reporting period Y1-Y2 (e.g. for the 2007-08 reporting period, Y0 is 2006, Y1 is 2007 and Y2 is 2008).
	Taught students
	For the purpose of HESA returns, completing an instance is defined as being the point at which the taught or structured part of the instance, including any formal writing-up period, is completed, ie. once the student is no longer actively following the course, and not any later stage such as, for example, final confirmation of award. This may mean

that <u>Instance.RSNEND</u> is completed using code 98 'Completion of course - result unknown'.

Resit Exams and/or Results from Late Exam Boards

Students who complete their instance by 31 July but who have resit examinations to take and/or whose final confirmation of award by exam boards may be after this date should be returned to HESA as leavers, with a dateleft in the reporting period ending 31 July. If their results are known before the Student Record data collection closes, these results should be included in the return. Records for such students will be included in the POPDLHE (assuming that they meet all other criteria). However, if the results are not known before the Student Record data collection closes, a record should be submitted with a dateleft in the reporting period ending 31 July completed and code 98 'Completion of course - result unknown' in Instance.RSNEND. Once known, these results should be returned in the next reporting period by submitting a record with the appropriate dormant code in Instance.MODE. The date returned in Instance.ENDDATE must be the original dateleft and not be up-dated. Records returned in this way will not be included in the POPDLHE.

Institutions may wish to decommit their return late in the data collection period in order to include results from late exam or re-sit boards.

This same guidance applies to **ITT TDA** students where the award of QTS may be delayed.

ITT TDA students may finish their course in June/July of the HESA reporting year. This date should be date recorded in ENDDATE. However the institution may not know whether the student has been awarded QTS until later. If award information is known before the HESA data collection closes at the end of November, then this should be included in QUAL and OUTCOME. TDA have confirmed that trainees who obtain a successful award up until 1 November, and are shown as such in the main HESA return, will be counted in the profiles publication. Award dates after 31 October should be included in the following HESA data collection. In neither case should ENDDATE be up-dated.

It is expected that students coded other than 1 or 4 in OUTCOME who are subsequently awarded QTS should have this recorded in QualificationsAwarded.QUAL and QualificationsAwarded.OUTCOME in a subsequent return to HESA as an award from dormant status.

Research students

For research students the award should be recorded when the institution's Senate, or other body or person empowered, formally approves the award. For such students this field should be completed with the same date.

Dormant students

This field should reflect the date the student was last active on the instance and should not be updated.

Owner	Managing Information Across Partners - Common Data Definitions	
Version	1.7	
Date modified	2008-06-30	

Change management notes	Text amended for clarification in Business rule 7
Business rules	Instance.ENDDATE must not be null where Instance.RSNEND exists Instance.ENDDATE must not be null where Instance.CSTAT = 2 or 3 Instance.ENDDATE must be null where Instance.CSTAT = 1 Where exists, Instance.ENDDATE must be less than Y2-08-01 If Instance.MODE is not equal to 63 or 64, then Instance.ENDDATE (where exists) must be greater than Y1-07-31 Where exists, Instance.ENDDATE must be greater than (Y2-6)-07-31 where Instance.MODE = 63 or 64 Instance.ENDDATE (where exists) must be greater than or equal to Instance.COMDATE (where exists) unless (Instance.MODE = 63 or 64 and Instance.ENDDATE = Y0-08-01) Warning Where exists, Instance.ENDDATE must be completed with a date equal to or before 31 July of the reporting period where QualificationsAwarded.QUAL begins D, E, L, M, H, I, J or C

Entry profile

Short Name EntryProfile		
Туре	entity	
Description	This describes a student's academic and personal history as at the beginning of the Instance.	
Applicable to	England NI Scotland Wales	
Coverage	Compulsory for instances where <u>Instance.COMDATE</u> is in the current reporting year or where the Instance has not been previously reported and <u>Instance.REDUCEDI</u> = 00, 01, 03 or 04. Optional in cases where previously supplied EntryProfile data needs to be corrected.	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Has Parts	Domicile (DOMICILE) Postcode (POSTCODE) Highest qualification on entry (QUALENT2) UCAS Application Number (UCASAPPID) Parental education (PARED) Dependents on entry (NIDEPEND) Marital status (MARSTAT) Religion (RELIGION) Socio-economic classification (SEC) Occupation code (SOC2000) Year left last institution (YRLLINST) Last institution attended (PREVINST) Articulation (ARTICLN) Access programmes (ACCESS) New entrant to higher education (NEWENT) PGCE subject of undergraduate degree (PGCESBJ) PGCE class of undergraduate degree (PGCECLSS) Welsh Baccalaureate Advanced Diploma (WELBACC) Qualifications on entry	
Reason Required	This entity is defined to hold those fields that describe the situation at the beginning of the instance.	
Notes	An Entry Profile is required for all entrants, that is instances with a	

Date modified	2008-04-30	
Change management notes	Business rules 2 and 3 moved to Commit-stage validation	
Business rules	1 Error	EntryProfile must exist where corresponding Instance.COMDATE is in the current reporting year and Instance.REDUCEDI = 00, 01, 03 or 04

Ethnicity

Short Name	ETHNIC		
Туре	field		
Description	This field records a student's ethnicity.		
Applicable to	England NI Scotland Wales		
Coverage	All students where EntryProfile.DOMICILE in the current submission as well as those previously submitted = XF, XG, XH, XI, XK, XL, GG, JE, IM and Instance.REDUCEDI = 00 or 01		
Base Data Type	ETHNICCodeType		
Field Length	2		
Part Of	Student		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To permit ethnicity-based analysis.		
	The adoption of a national classification allows for comparability of sector data with that from other areas of the economy.		
Notes	It is HESA's intention to adopt national classifications where they exist and are appropriate. The use of Census 2001 ethnicity coding in the Student Record is an example of this practice.		
	The coding frame is that recommended by ONS for UK-wide data collection. However, there is one specific additional category: code 14 'Irish Traveller', which must be used when appropriate by institutions in Northern Ireland. This code should not be used by institutions not in Northern Ireland.		
	In addition, institutions in Scotland and Northern Ireland do not need to code the detail for those from mixed ethnic backgrounds. Institutions in Scotland and Northern Ireland can code all such students as 49 'Other Mixed background'.		
	For students entering through UCAS this information will be available from UCAS via the *J transaction with the exception of code 14.		
	Code 98 'Information refused' includes all cases where the information has been actively sought but is still missing.		
Owner	HESA		
Version	1.1		
Date modified	2008-10-07		
Change management notes	Clarification of Coverage to include EntryProfile.DOMICILE in the current submission as well as those previously submitted = XF, XG, XH, XI, XK, XL, GG, JE, IM		
Business rules	1 Error Student.ETHNIC code 14 is only available for institutions in Northern		

	2 Error	Ireland Student.ETHNIC must exist where (EntryProfile.DOMICILE exists and is coded XF, XG, XH, XI, XK, XL, GG, JE, IM) and Instance.REDUCEDI = 00 or 01
Valid Entries and Labels	10 14 21 22 29 31 32 33 34 39 41 42 43 49 80 90 98	White Irish Traveller Black or Black British - Caribbean Black or Black British - African Other Black background Asian or Asian British - Indian Asian or Asian British - Pakistani Asian or Asian British - Bangladeshi Chinese Other Asian background Mixed - White & Black Caribbean Mixed - White & Black African Mixed - White & Asian Other Mixed background Other Ethnic background Not known Information refused

Exchange programmes

Short Name	EXCHANGE		
Туре	field		
Description	This field identifies whether the student is an exchange student.		
Applicable to	England NI Scotland Wales		
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00 or 03		
Base Data Type	EXCHANGECodeType		
Field Length	1		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To identify students involved in specific exchange programmes.		
Notes	Incoming SOCRATES/LEONARDO/ERASMUS students should be split between code 1, 'Incoming SOCRATES/LEONARDO/ERASMUS student - ICP' (Inter College Programme) and code 6, 'Incoming SOCRATES/LEONARDO/ERASMUS student - Free mover'.		
	A <u>reduced return</u> will be acceptable for incoming exchange and visiting students (codes 1,2,3,4 or 6).		
	Code 5 'Outgoing ERASMUS/SOCRATES student' allows exchange-out students under the ERASMUS/SOCRATES programmes to be unambiguously identified. Therefore all outgoing ERASMUS/SOCRATES students, whether for part or all of a year, should be coded as 5. Students who are outgoing for the whole year will be separately identified using code 3 in Instance.SPECFEE .		
Owner	HESA		
Version	1.1		
Date modified	2008-04-30		
Change management notes	New business rule 2 added		
Business rules	1 Error Instance.EXCHANGE must exist where Instance.REDUCEDI = 00 or 03 2 Error Instance.EXCHANGE must be coded 5 when Instance.SPECFEE= 3		
Valid Entries and Labels	Not an exchange student Incoming SOCRATES/LEONARDO/ERASMUS student -ICP Incoming TEMPUS student Incoming LINGUA student Other incoming exchange or visiting student Outgoing ERASMUS/SOCRATES student Incoming SOCRATES/LEONARDO/ERASMUS student - Free mover Other outgoing exchange student		

Expected length of study

Short Name	SPLENGTH		
Туре	field		
Description	This field is used to indicate the normal elapsed time in the units indicated by Instance.UNITLGTH from the commencement of study, (the first learning/teaching week) to completion of the instance. This will normally include time for examinations. It does not purport to indicate the amount of study time, learning time or contact time.		
Applicable to	England NI Scotland Wales		
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00, 01 or 02		
Base Data Type	PositiveIntegerWithNullStructure2		
Field Length	2		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	UNITLGTH		
Reason Required	To monitor patterns of study.		
Examples	An instance lasting for two and a half years would be coded 30 months.		
Notes	This should be the length applicable to the instance as a whole even if particular students may have different lengths of study, e.g. because of direct entry into the second year.		
	Where there are both part-time and full-time students following a programme of study, the expected length of study should be the normal length applicable for the mode of study of the student.		
	Cases where there is not a defined normal length for the programme of study, or where the programme of study is self-paced with an indefinite length, should have an empty element returned with the ReasonForNull attribute set to 9 (not applicable), i.e:		
	<pre><splength reasonfornull="9"></splength></pre>		
	Validation will ensure that if this field is an empty string then <u>Instance.UNITLGTH</u> must be coded 9.		
	Length of study includes holiday time.		
	For postgraduate research students, any extra writing-up period must be ignored. For example, a full-time PhD would typically be coded 3 years.		
	Foundation years		

	It is not expected that the length of study be adjusted for individual students. However where there are different options that students can take, for example, foundation year and sandwich placements, it is expected that the length reflects the options taken. For example, where a student undertakes an integrated foundation year it is normally expected that the length be recorded as one year longer than if the student had just taken a stand-alone degree.	
	Sandwich courses	
	Where the option of a sandwich course is available but it is not taken up by a student then Instance.SPLENGTH should be revised at the point where the student makes a decision not to take-up the sandwich option, normally by the end of their second year, to reflect the expected length excluding the sandwich year. For example students coded 4 in Instance.SPLENGTH and 1 in Instance.SPLENGTH and 1 in Instance.UNITLGTH in the first year should be recoded 3 in Instance.SPLENGTH at the end of the second year if they are not expected to take the sandwich option. This re-coding is required to ensure that the correct cohort of student is identified in the National Student Survey (NSS) target list. The length of this field is 2 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 03 or 3.

FE general qualification aim

Short Name	FEQAIMC		
Туре	field		
Description	This field describes the learning aim as listed on the Learning Aims Database (LAD).		
Applicable to	England Wales		
Coverage	All courses where for any linked instance <u>Instance.FESTUMK</u> = 1, 3 or 4		
Base Data Type	LearningAimReferenceType		
Field Length	8		
Part Of	Course		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	FESTUMK		
Reason Required	To allow monitoring of FE students by qualification aim.		
Notes	For internally validated courses not funded by LSC or Welsh Assembly Government DCELLS, institutions can use the ILR non-specific code of '666666666' to identify these courses in this field.		
	Where there are any HE level students on an instance linked to this course and funded by LSC or Welsh Assembly Government DCELLS, (code 3 'The student is an LSC/Welsh Assembly Government DCELLS funded learner studying at HE level' in Instance.FESTUMK) then Course.FEQAIMC , and Course subject must all be completed.		
	If (after a discussion with Welsh Assembly Government DCELLS) a generic code or '666666666' is used within this field then Welsh Assembly Government DCELLS requires institutions to also complete Course subject in order to give detail of the subject area of the qualification.		
Owner	LSC/WAG-DCELLS		
Version	1.4		
Date modified	2008-05-30		
Change management notes	Business rule 2 moved to Commit-stage validation as rule 2		
Business rules	1 Error Course.FEQAIMC must exist for institutions in England or Wales where any Instance.FESTUMK = 1,3 or 4 3 Error The first three characters of Course.FEQAIMC must not be 000 4 Error Course.FEQAIMC must not exist for institutions in Northern Ireland or Scotland		

FE student marker

Short Name	FESTUMK		
Туре	field		
Description	This field identifies students at HE institutions who are studying at FE level or are funded by LSC or WAG-DCELLS		
Applicable to	England Wales		
Coverage	All Instances at institutions in England and Wales		
Base Data Type	FESTUMKCodeType		
Field Length	1		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To distinguish between FE and HE level of study, and between FE and HE funding, so as to allow separation of HE and FE work and funding in HEIs.		
Notes	For England and Wales, an LSC/DCELLS student is defined as a student following a course leading to a general qualification aim at FE level and any other student following a course funded by LSC or WAG-DCELLS (and which may be at FE or HE level). Students coded 1, 3 or 4 will be regarded as FE funding council students. Students coded 2 will be assumed to be HE level students, with no LSC/DCELLS funding.		
	Code 3 'The student is an LSC/DCELLS funded student studying at HE level' The funding councils have advised that LSC and WAG-DCELLS do not ordinarily fund students studying at HE level within HEIs. It is therefore recommended that any institution who believes they have students in this category contact HESA before coding.		
	Access to HE courses are regarded as FE level courses.		
	'Foundation years that are not integrated into an HE level course are generally considered to be FE level'.

FTE in year A

Short Name	LOADYRA
Туре	field
Description	This field together with Instance.LOADYRB describes the split of student FTE (as reported in Instance.STULOAD) between years of instance, in cases where two years of instance are contained within a reporting period.
	This field contains the amount of FTE in Instance.STULOAD attributable to the year continuing from the previous reporting period. The value can be recorded to one decimal place and must be between 0 and 300.
Applicable to	England NI
Coverage	Compulsory where <u>Institution.INSTAPP</u> = 1 and <u>Instance.TYPEYR</u> = 2, 3, 4 or 5
Base Data Type	FTEType
Field Length	5
Part Of	Instance
Minimum Occurrences	0
Maximum Occurrences	1
Related Fields	LOADYRB STULOAD MODYR
Reason Required	To allow detailed allocation of FTE to years of instance where an institution has opted to provide this information.
Notes	This field allows the allocation of student load to years of instance where these span HESA reporting years. Completion of these fields will allow HEFCE to remove the approximations that are currently included in their re-creation of the HESES returns which counts FTE against years of instance rather than HESA reporting years. This will affect mainly students who are on courses of more than one years duration where any of the following are true:
	(a) the intensity of the course varies over time
	(b) the student drops out or takes a break in study
	(c) the mix of cost centres in which the student is active varies over the duration of the course
	(d) activity is not spread evenly throughout the HESA reporting year
	An example of how years may overlap the HESA reporting year is given below:
	The FTE in student year A is reported in this field, and the load in student year B in Instance.LOADYRB .

	The following example illustrates how these fields should be coded.				
	For a studin Year 1	For a student studying an MSc part-time delivered over two years starting on 1 January in Year 1			
		Instance.LO	ADYRA <u>Instance.LC</u>	ADYRB Instance.STULO	<u>DAD</u>
	Year 1	0	42.5	42.5	
	Year 2	7.5	42.5	50.0	
	Year 3	7.5	0	7.5	
	Thus in Year 2 HEFCE is able to determine that the FTE for the student's year A was Instance.LOADYRB in Year 1 and LOADYRA in Year 2. This field should contain 0 where a student is starting an instance that will have years that span reporting periods.

Family name

Short Name	SURNAME		
Туре	field		
Description	This field is the student's family name.		
Applicable to	England NI Scotland Wales		
Coverage	All students where any <u>Instance.REDUCEDI</u> = 00, 01 or 04		
Base Data Type	NameType		
Field Length	35		
Part Of	Student		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To facilitate HESA checking data with institutions and for Statutory Customers to link student records collected by HESA for statistical purposes.		
Notes	In cases where the student does not split their name between family and forenames, the whole name should be entered in Student.FNAMES should be returned as an empty element with the ReasonForNull attribute set to 9 (not applicable), i.e.:		
	<pre><fnames reasonfornull="9"></fnames></pre>		
	For students entering through UCAS this information will be available from UCAS via the *J transaction.		
	The field length has been set to 35 characters to align this field with MIAP definitions.		
	Valid characters		
	The question of valid characters is significant in this field since many names include characters with accents and other diacritics that are not supported by the standard ASCII characterset. The valid characterset available for this field has been defined by a specific study undertaken as a part of the MIAP Common Data Definitions (CDD) project. The conclusions of this study were:		
	 The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007F and U+00A0 to U+024F. Schemas are built in such a way that an individual project can further restrict the set if required. 		
	The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.		

	The Unicode charts that list each of the characters in this range can be found on the Unicode web site. The specific sets that are defined here are shown in the following PDF documents: • Basic Latin • Latin-1 • Latin Extended A • Latin Extended B • Latin Extended Additional Institutions are advised to specify the encoding used in their XML files (i.e. xml version="1.0" encoding="UTF-8" ?) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.

Foundation degree to degree bridging course

Short Name	BRIDGE		
Туре	field		
Description	This field identifies instances where any part of the instance involves a foundation degree to degree bridging course		
Applicable to	England NI Scotlar	nd Wales	
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00		
Base Data Type	BRIDGECodeType	;	
Field Length	1		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To identify students who undertook bridging courses.		
Examples	A student completes a foundation degree in June 2008 and then undertakes a bridging course from July to September and then joins the final year of a degree which they complete in June 2009.		
	Field	2007/08	2008/09
	COURSEAIM	J10	H00
	STULOAD	100.0	130.0
	TYPEYR	1	1
	BRIDGE	0	1
	Example for institutions in Wales A student completes a foundation degree in June 2008 and then undertakes a bridging course from July to September and then joins the final year of a degree which they complete in June 2009.		
	Field	2007/08	2008/09
	COURSEAIM	J10	H00
	STULOAD	110.0	120.0
	TYPEYR	2	1
	BRIDGE	1	0
Notes	degree to enable s	tudents to join the	ng courses are taken after completing a foundation e final year of an honours degree. They are short art of the course they are bridging from, although

progression from a successful completion of the bridging course to the final year of an honours degree is assured.

Where a student's studies include, within the same instance, a foundation degree to degree bridging course this bridging course element will be shown by code 1 'Foundation degree to degree bridging course' in Instance.BRIDGE and an increased FTE in Instance.STULOAD.

Where a student studies only a bridging course within the HESA reporting year Course.COURSEAIM should be returned with a value of H90.

Where a student undertakes a foundation degree and bridging course in the same HESA reporting year Instance.FUNDCOMP, should reflect whether the student completed the foundation degree and will therefore usually be returned with a value of 1. Similarly where the student progresses to a degree after completion of the bridging course Instance.FUNDCOMP should reflect the completion status of the degree.

Guidance from HEFCE

Where the bridging course spans HESA reporting years, HEFCE advise that the FTE must all be returned in the second HESA reporting year; this differs from the method used for other non-standard course academic years. Institutions should also indicate in Instance.BRIDGE that the student has studied a foundation degree to degree bridging course only in the year in which the FTE is increased. It may be that the inclusion of a foundation degree to degree bridging course means that the year of instance becomes non-standard ie. no longer contained within the HESA reporting year. However, where the year would otherwise have been recorded as a standard academic year the year should still be recorded as such.

Guidance from HEFCW

Where the bridging course spans HESA reporting years, HEFCW advise that the FTE must be split between the years, as for other courses. Institutions should also indicate in Institutions should also indicate in Instance.BRIDGE that the student has studied a foundation degree to degree bridging course, in the year in which the bridging course started.

Franchised out arrangements

Short Name	FROUTARR		
Туре	field		
Description	This field records franchised out arrangements.		
Applicable to	England		
Coverage	All instances at institutions in England where <u>Instance.FESTUMK</u> = 1,3 or 4 and <u>Instance.REDUCEDI</u> = 00		
Base Data Type	FROUTARRCodeType		
Field Length	2		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	FESTUMK		
Reason Required	To monitor the nature of franchised out provision and to support planning.		
Notes	Information about learners who are studying on provision delivered by the provider on behalf of another provider, that is franchised in to the provider, should be supplied in aggregate using an LSC form.		
	If the learner is studying for this learning aim on provision franchised out for part of the learning aim this should only be recorded in the field where the other provider delivers more than 50% of the guided learning hours for the learning aim.		
	Code 27 should be used where franchised provision is community based and normall with non-profit making bodies and would therefore be eligible to be funded at the full rate without a discount, as described at b in paragraph 18 of FEFC circular 99/09.		
	The LSC requests additional information on organisations with which providers have franchising arrangements. This information should be returned to the LSC using the register of franchise and other partners. A sample file can be found on the LSC webs and should be sent with each ILR return.		
	If a student is coded 01 - 80 in this field then Module.TINST must be coded 4001 - 4004.		
Owner	HESA

Date modified	2008-02-28		
Change management notes	Business rules 2 and 3 added		
Business rules	1 Error Instance.FROUTARR must exist for institutions in England where Instance.FESTUMK = 1, 3 or 4 and Instance.REDUCEDI = 00 2 Error Instance.FROUTARR must not exist for institutions not in England		

	3 Error	Instance.FROUTARR must not exist for institutions in England where Instance.FESTUMK = 2
Valid Entries and Labels	01	Learner is studying for this learning aim on provision delivered by an FE sector provider under franchised out provision
	02	Learner is studying for this learning aim on provision delivered by an HE institution under franchised out provision
	03	Learner is studying for this learning aim on provision delivered by a school under franchised out provision
	21	Learner is studying for this learning aim on provision delivered by a local authority maintained organisation under franchised out provision
	22	Learner is an employee of a private sector organisation studying for this learning aim on provision delivered by that employer under franchised out provision
	23	Learner is an employee of a public sector organisation studying for this learning aim on provision delivered by that employer under franchised out provision
	24	Learner is studying for this learning aim on provision delivered by a private sector training organisation under franchised out provision
	25	Learner is studying for this learning aim on provision delivered by a voluntary sports organisation under franchised out provision
	26	Learner is studying for this learning aim on provision delivered by a sports organisation run on a commercial basis under franchised out provision
	27	Learner is studying for this learning aim on franchised provision which is community based & normally with non-profit-making bodies
	28	Learner is studying for this learning aim on provision which is community or voluntary based & which is eligible for funding at the discounted rate for franchised provision
	80	Learner is studying for this learning aim on provision which is delivered by a partner & which is not a franchised out arrangement
	99	Learner is studying for this learning aim on provision delivered by the institution which is not franchised provision or delivered by a partner

Fundability code

Short Name	FUNDCODE	
Туре	field	
Description	This field indicates whether the student is counted as 'fundable', ie. 'eligible for funding' for the course by the appropriate funding council/body. The definition therefore may vary between England, Scotland, Northern Ireland and Wales, in line with their funding methods.	
Applicable to	England NI Scotland Wales	
Coverage	All instances where Instance.REDUCEDI = 00 or 01	
Base Data Type	FUNDCODECodeType	
Field Length	1	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Reason Required	To assess accuracy of early returns (Early Statistics), and to identify health and social care students and teacher training students.	
Examples	A non-EU overseas student is an example of a particular student who is not eligible for funding, even if the course that they are following has funding for student places.	
	This should be consistent with the HESES and Early Statistics Returns.	
Notes	This field must be coded at the individual student instance level.	
	Fundable means eligible for funding by the appropriate funding council/body, as defined by that council/body.	
	This field should be consistent with the year's early student statistics returns to the funding councils.	
	Eligible students on courses funded by LSC or WAG-DCELLS should be coded 1 'Fundable by funding council'.	
	For institutions in England and Northern Ireland the definition of fundable postgraduate research students should be taken from the most recent Research Activity Survey and not HESES. Such students should have this field returned as 1 'Fundable by funding council' for all years of course irrespective of how they are returned on HESES. Code 4 'Fundable by funding council but funds not sought' should not be used for such students.	
	Please refer any queries about whether or not students on a particular course or students of a particular type are eligible for funding to the appropriate funding council/body rather than to HESA.	

To be consistent with the year's early statistics, this field applies to 'eligible for core funding' (in the HESES returns for England, Wales and Northern Ireland) or to 'eligible for funding' (in SFC's 'Early Statistics' return). It has been confirmed by the funding councils that it is possible for students coded 01-04 (funding councils) in Course.MSFUND to be returned as 2 'Not fundable by funding council'. An example of where this is applicable is courses funded through special funding initiatives.

The guidance for coding non-fundable students on funded courses should be to code to the appropriate funding council in Course.MSFUND and code as 2 'Not fundable by funding council' in this field.

Code 3 'Not eligible for funding (as defined for the SFC 'Early Statistics') but is a Continuing Professional Development course (as defined by SFC)' is for use by institutions in Scotland only. Where code 3 is applicable it should be used in preference to code 2 'Not fundable by funding council'.

Code 7 'Fundable by Training and Development Agency for Schools' is not available for institutions in Wales.

Institutions funded by SFC should note that a particular funding cell may have 100 'fundable' students, but the funding council may provide funding for only 80 student places in that cell. Provided that they satisfy the conditions for being counted in the 'Early Statistics' figures, all 100 students should be identified as eligible for funding: one cannot say which of them were 'fees only' students, as the funding relates to the cell as a whole.

For institutions in England, where the major source of funding for the course is HEFCE, but there is another EU public source funding a certain number of places then this number of places must be shown as non-fundable in this field. In most cases, it is expected that it will be clear from payment of tuition fees which individual student places are being funded from another source and so are not fundable by HEFCE. For the small number of cases where this is not so, institutions shall have the discretion as to which individual students to return as fundable, and which as not fundable, provided that the total student numbers conform to the split between fundable and non-fundable places.

General qualification aim of course

Short Name	COURSEAIM					
Туре	field					
Description	This field describes the general qualification aim of the course and is intended to record the qualification that will be attained as a result of successful completion of studies.					
Applicable to	England NI Scotland Wales					
Coverage	All courses					
Base Data Type	COURSEAIMCodeType					
Field Length	3					
Part Of	Course					
Minimum Occurrences	1					
Maximum Occurrences	1					
Reason Required	To allow analysis of the student population by level of study.					
Examples	With a course leading to an HND, where some of the students may subsequently carry on to take a degree, the current general qualification aim of HND should be recorded.					
Notes	Course aim describes the qualification that will be attained as a result of successful completion of the course.					
	Overall framework and alignment with existing frameworks.					
	The most relevant are the UK frameworks. For England, Wales and NI the HE qualifications framework identifies five levels (C, I, H, M, D) and these are aligned with the NVQ levels 4 to 8. The Scottish Credit and Qualifications Framework (SCQF), which is not HE-specific, is aligned with this except that the lower boundary of Scottish Level 7 is apparently slightly lower than the lower boundary of Level C / NVQ 4 (this is the lower cutoff for what may be regarded as HE in England and Wales, but, significantly, Scottish Advanced Highers fall into Level 7), and Level I /NVQ 5 is split into two levels in Scotland, Level 8 and 9.					
	The ISCED framework is used for international reporting, and four levels within it are relevant, Levels 4, 5B, 5A and 6. The Bologna framework for European HE harmonisation is still in process of development, but the current state may be summarised as recognising four levels: short-cycle, first-cycle, second-cycle, and third cycle.					
	HESA SCQF E/W/NI HE NVQ HE ISCED

Χ	-	-	-	-

This coding frame is designed to support the alignment of course qualifications with the frameworks, with the first letter indicating the level. Codes of similar type at different levels have the same two-digit suffix.

Please note that although the first letter of the code identifies a framework level, institutions in England will identify the funding level appropriate to a student following a course using Instance.FUNDLEV. This may be different to the level identified in this coding frame.

The codes for visiting students can be used as alternatives to institutional credit codes, particularly for informal credit. Students are specifically identified as exchange students in Instance.EXCHANGE.

For programmes of study where there may be multiple possible qualification outcomes, institutions must return these as different courses.

Additional guidance on specific codes:

D00 Doctorate degree obtained primarily through advanced supervised research written up as a thesis/dissertation.

This would typically require three years of supervised work or the equivalent (typical title PhD, DPhil).

E00 Doctorate degree NOT obtained primarily through advanced supervised research written up as a thesis/dissertation.

Use this code for 'professional' Doctorates with major coursework and professional practice components, for example DBA, EdD.

L00 Master's degree obtained primarily through advanced supervised research written up as a thesis/dissertation.

This would typically require two years of supervised work or the equivalent (for example MPhil, possibly MSc, MA, MLitt but excluding a taught Master's as usually understood).

L99 Advanced supervised research at Levels D or L with an unspecified qualification aim.

Use this code for beginning research students not yet specifically registered for either a Master's or Doctorate degree.

M00 Master's degree obtained typically by a combination of coursework and thesis/dissertation, and NOT primarily through advanced supervised research written up as a thesis/dissertation.

Use this code for taught Master's degrees (typical title MSc or MA). Post-experience Master's degrees should be coded below

M01 Taught Master's degree designed specifically as a training in research methods and intended as a preparation for advanced supervised research.

Use this code only for MRes degrees and similar.

M10 Post-experience taught Master's degree

(MEd, for example). 'Post-experience' implies a period of at least two years' relevant work experience as a pre-requisite for entry to the programme leading to the qualification. Do not use this category simply because a qualification is being taken post-experience.

M11 Master of Business Administration.

Use this code rather than M10 for post-experience MBA.

M22 Integrated undergraduate/postgraduate taught Master's degree on the enhanced/extended pattern.

Use this code for MEng and similar.

M50 Postgraduate Bachelor's degree at level M obtained typically by a combination of coursework and thesis/dissertation, and NOT primarily through advanced supervised research written up as a thesis/dissertation.

Use this code for degrees such as BPhil, BMus if at Level M.

M70 Professional taught qualification at Level M other than a Master's degree.

Use M71, M72, M76, M78 in preference if applicable.

M71 Postgraduate Certificate in Education or Professional Graduate Diploma in Education.

See H71 for Professional Graduate Certificate in Education. See http://www.gaa.ac.uk/academicinfrastructure/FHEQ/PGCEstatement.asp

M76 Post-registration health and social care qualification at level M.

This code includes Continuing Professional Development (CPD).

H00 First degree with honours.

This could be MA in Scotland.

H11 First degree with honours leading to QTS/registration with a GTC.

This code should only be used for BEd if it is at level H.

H61 Graduate Diploma/Certificate at Level H.

Use this code where a previous qualification at Level H is a pre-requisite for course entry; use H50 in preference if applicable.

H70 Professional qualification at Level H other than a first degree with honours.

Use H71, H72, H76, H88 in preference if applicable.

H71 Professional Graduate Certificate in Education.

See code M71 for Postgraduate Certificate in Education. See http://www.qaa.ac.uk/academicinfrastructure/FHEQ/PGCEstatement.asp

H76 Post-registration health and social care qualification at Level H other than a first degree with honours.

This code includes Continuing Professional Development (CPD).

H81 Other qualification at Level H but where a previous qualification at Level H is a pre-requisite for course entry.

Use H50, H71, H72, H76 in preference if applicable.

I11 Ordinary (non-honours) first degree leading to QTS/registration with a GTC.

Code BEd here unless it is at level H.

I70 Professional qualification at Level I other than an ordinary (non-honours) first degree.

Use I76 in preference if applicable.

I76 Post-registration health and social care qualification at Level I other than an ordinary (non-honours) first degree.

This code includes Continuing Professional Development (CPD).

J76 Post-registration health and social care qualification at level J.

This code includes Continuing Professional Development (CPD).

Health and Social Care courses

Courses which lead to a qualification to teach nursing, midwifery or health visiting courses should be coded 2 in Course.TTCID.

Post-Registration health and social care codes ('__76') should be returned for post-registration health and social care students taking continuing professional updating modules. Post-registration health and social care students studying for other qualifications should be coded to the appropriate code for that qualification. For example, a post-registration health and social care student studying for a first degree should be coded 'H00' for First degree, rather than H76. Validation rules have been relaxed to allow regulatory body information to be returned for these post-registration students.

H16 'First degree leading towards obtaining eligibility to register to practice with a Health or Social Care or Veterinary statutory regulatory body' will be used in combination with the subject code or codes to identify those degrees which lead to eligibility to register to practice with a Health or Social Care or Veterinary statutory regulatory body.

Social work courses

HESA has been advised by the Department of Health that courses leading to eligibility to register to practice with a social care statutory regulatory body will not necessarily be coded with a '_16' code in this field. Institutions offering courses leading to eligibility to register to practice with a social care statutory regulatory body should return regulatory body information in Course.REGBODY and Instance.DHREGREF irrespective of the code used in this field.

Architecture courses

Codes are specifically set up for courses leading to registration with the Architects Registration Board. Use code H18 for Part 1 (even if your institutional assessment of the course is that it is at another level, such as level I). For parts 2 and 3, use the appropriate code to indicate the level of course as assessed by the institution (H88 or M88 for part 2, H78 or M78 for part 3).

Non-accredited and non-approved qualifications

QCA is nearing completion of its process of accrediting external awarding bodies (i.e. awarding bodies other than HEIs). It is important that qualifications made by external awarding bodies are distinguished between those with and those without QCA recognition.

Once completed, the HEFCE will only fund courses leading to qualifications made by external awarding bodies if they have received the appropriate QCA accreditation, or if the continued funding has been approved as part of transition arrangements. Codes for professional qualifications ('_70') should only be used for qualifications that have been accredited by QCA. Students who are on courses that are not QCA accredited should be indicated by code '99' in Instance.FUNDLEV.

For Welsh institutions to be eligible for funding, it is expected that qualifications made by external awarding bodies will be included (or awaiting inclusion) in the QCA framework.

Access courses

A recognised Access to HE course is one validated by an Authorised Validating Agency that has been licensed for the purpose by the Quality Assurance Agency for Higher Education (QAA), under the terms of the QAA Recognition Scheme for Access to Higher Education in England, Wales and Northern Ireland. Relevant Access courses are recorded on the UCAS Access Courses Database. QAA does not licence any AVAs in Scotland.

Welsh for Adults

There is no generic code for Welsh for Adults courses, these are coded at five levels plus a separate code for Specialist/Arbennig courses. The definition of a Specialist/Arbennig course is: a taster, revision or residential course; a Saturday school; a coffee club, and any other short course that is organised in addition to the main programme of Welsh for Adults courses.

Other guidance

The General qualification aim of course should be consistent with funding council HESES/Early Statistics.

Higher bachelors degrees at undergraduate level should be coded H81.

M22 includes Finniston degrees and other 'undergraduate masters' degrees, e.g. MEng. Such courses should be coded M22 throughout.

An intercalated first degree (H24) is where students on a first degree, usually in medicine, dentistry or veterinary medicine, interrupt their studies to complete a one-year course of advanced studies in a related topic, usually to Honours standard. On completion of the intercalated year, the student resumes studies on their original course.

J10 and J16, Foundation Degrees, are intended to cover those programmes which HEIs are running as Foundation Degrees which are consistent with the 'Statement of Design Principles' for Foundation Degrees issued by UUK and SCOP.

Postgraduate professional qualifications are those which, regardless of their level, normally require the possession of a first degree for admission. Undergraduate professional diplomas and certificates should be coded to the appropriate '_70' code.

Where a student is following a programme of study leading potentially to two or more qualifications concurrently, and that combination is not specified under valid entries,

please return the qualification the code of which is highest in level.

For HE level students funded by the LSC or WAG-DCELLS (coded 3 in Instance.FESTUMK) both this field and Course.FEQAIMC must be completed in full.

For FE level students in England and Wales (codes 1 or 4 in <u>Instance.FESTUMK</u>) both this field and <u>Course.FEQAIMC</u> must be completed in full.

However, codes P80, Q80 or R80 for Other qualification below HE level' may be returned as a default in this field provided a valid learning aims database reference is given Course-FEQAIMC for all FE level courses except for courses at institutions in Wales or Welsh for Adults courses which should be coded X41 - X46.

Certificate in Further Education should be coded M80 if at postgraduate level or H80 if at undergraduate level.

If a foundation course or year is integrated into another qualification e.g. a first degree, code H00 'First degree' should be returned in this field.

Post/Higher Doctorates should not be included in the return.

The HESA record for a Foundation Degree bridging course should indicate this Instance.BRIDGE. The FTE recorded in Instance.STULOAD should be increased to reflect the additional FTE of the bridging course. Where the bridging course spans two academic years, the first of these academic years should be returned as 'non-standard' in Instance.TYPEYR. Where a student is only active for the bridging course during the academic year, this field should be completed with the code for the appropriate level of credit (i.e. when a student withdraws during or following completion of the course, or where they transfer in from another institution prior to commencing the course). In comparing HESA data to HESES, HEFCE will use the above information to generate two countable years for such students.

A <u>mapping</u> from the old QUALAIM coding frame is available to assist institutions in the transition. However, this is not a one-to-one mapping and institutions should use it only as a guide, paying particular attention to the COURSEAIM codes included in the <u>definition of the population</u> to be surveyed as part of the Destinations of Leavers from Higher Education (DLHE) record.

Students entering with enhanced first degrees, that is qualifications that would be coded H22/M22 in the COURSEAIM field, should be recorded as having a higher degree (01) in the QUALENT2 field.

Guided learning hours

Short Name	GLHRS	
Туре	field	
Description	The actual number of guided learning hours for the whole qualification aim to the nearest whole hour	
Applicable to	England Wales	
Coverage	All instances where <u>Instance.FESTUMK</u> = 1, 3 or 4 and where <u>Instance.REDUCEDI</u> = 00 or 02	
Base Data Type	xs:positiveInteger	
Field Length	5	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	FESTUMK	
Reason Required	To determine use of guided learning hours.	
Notes	Guided learning hours are defined as all times when a member of staff is present to give specific guidance towards the qualification aim being studied. This includes lectures, tutorials and supervised study in, for example, libraries, open learning centres and learning workshops. It also includes time spent by staff assessing students' achievements, for example in the assessment of competence for NVQs. It does not include hours where supervision or assistance is of a general nature and is not specific to the study of the students. The length of this field is 5 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 00005 or 5

HESA unique student identifier

Short Name	HUSID
Туре	field
Description	This field records the student identifier which is to be unique to each student. It is intended that the identifier is to be transferred with the student to each institution of higher education he or she may attend. The objective is that the use of this number will facilitate the accurate tracking of students throughout their experience within the sector for which HESA collects data.
Applicable to	England NI Scotland Wales
Coverage	All students
Base Data Type	HUSIDType
Field Length	13
Part Of	Student
Minimum Occurrences	1
Maximum Occurrences	1
Reason Required	The most significant key into the set of records for file management and record linkage.
Examples	An entrant to Leeds Metropolitan University in 2007 might have a HUSID of 0710641234565
	A student who entered through UCAS in 1997 might have a HUSID of 0000971234566
Notes	Students included on a previous year's return must retain the previously used HUSID.
	Previously, students entering higher education through UCAS have had their HUSID automatically derived from their UCAS application number. Development of the new UCAS Application Identifier means that it is no longer possible to generate a unique HUSID in this manner. Therefore all students having a HUSID allocated from 2007/08 onwards should now have a HUSID allocated using the same algorithm, irrespective of how they came to enter HE. The algorithm to use is the one previously used for students that did not enter through UCAS.
	Students entering a course of study should be asked whether they have a previous HESA unique student identifier, and if so this identifier should be used. This will commonly be the situation for new postgraduates moving on from undergraduate study. If students are unable to recall their student identifier, the HUSID look-up service should be used to determine any previously allocated HUSID.
	Students whose details have previously been returned to HESA by the reporting institution MUST keep the same unique student identifier in future returns. For students whose details have previously been returned to HESA by another institution, the same unique student identifier should be used if this is known. This is to facilitate the possibility of backward tracking within previous data sets. Where the previous number is not known, or there is any doubt about its accuracy, institutions are NOT expected to seek student identifiers from previous institutions but should use the

For direct entrants, once a number has been allocated it should never be re-used, even in the case of students who leave the institution without completing their studies.

Students who move from one institution to another should keep their original student identifier. Where the previous HE student identifier is in direct entry format, the number must NOT be changed to reflect the current institution's identifier. This is to ensure that the student identifier remains unique and to allow tracking of the student through the use of the same unique student identifier.

Linkage between different years of a student instance will be through the HIN. The HIN is a combination of three main identifier fields, the <u>Student.HUSID</u> (person), <u>Institution.UKPRN</u> (institution) and <u>Instance.NUMHUS</u> (instance), which uniquely identify a student on a course leading to a course aim. Further guidance on the importance of maintaining the HIN link across years can be found <u>here</u>.

A national framework for post-compulsory education student identifiers is being developed as a part of the <u>Managing Information Across Partners (MIAP)</u> programme. It is envisaged that the HESA student identifier will be replaced in due course.

The structure of the HESA student identifier is created as follows:

First 2 digits: Year of entry into institution (last 2 digits of year)

Next 4 digits: HESA Institution identifier + 1000

Next 6 digits: 6 digit reference number internally allocated by

institution.

Last digit: Check digit.

Although the Student Record now utilises the <u>Institution.UKPRN</u> as an institution identifier, institutions should continue to use the old <u>HESA identifier</u> code for this calculation since the structure of the new identifier is not compatible with this algorithm.

Calculation of Check Digit

The check digit is calculated using the first 12 digits and provides a means of detecting errors of transcription. To calculate the check digit, each of the first 12 digits is multiplied by a weight which depends on its position in the number, and the resulting products added. The check digit is then obtained by subtracting the final digit of the resulting sum from ten.

If the final digit of the sum of the products is 0, the check digit would be the final digit after the subtraction i.e. 10 - 0 = 10, check digit is 0.

The weights used are:

Position 1 2 3 4 5 6 7 8 9 10 11 12 Weight 1 3 7 9 1 3 7 9 1 3 7 9

For example, in October 2007 a student enters Leeds Metropolitan University is allocated the internal number 123456. The check digit calculation for the student's reference number, 071064123456, would be calculated as:

Number 0 7 1 0 6 4 1 2 3 4 5 6 Weight 1 3 7 9 1 3 7 9 1 3 7 9

	Product 0 21 7 0 6 12 7 18 3 12 35 54 The sum of the products is 175, the final digit being 5, so the check digit is 10 - 5, or 5. The full identifier is therefore 0710641234565.
Owner	HESA
Version	1.3
Date modified	2008-05-30
Change management notes	Business rule 4 added
Business rules	1 Error Student.HUSID must not contain all zeros 2 Error If characters 1-4 are not 0000 then chars 3-6 of Student.HUSID must be a valid INSTID plus 1000. 3 Error Student.HUSID must pass the checksum test given in the coding manual If characters 1 - 4 of Student.HUSID are not 0000 then characters 3 - 6 of Student.HUSID must not be 3001 when Instance.COMDATE is after 2007-07-31 (this HESA identifier is now invalid).

Highest qualification on entry

Short Name	QUALENT2
Туре	field
Description	This field indicates the highest qualification that a student holds on entry, not necessarily that applicable for entry to the course.
Applicable to	England NI Scotland Wales
Coverage	All entrants where Instance.REDUCEDI = 00 or 01
Base Data Type	QUALENT2CodeType
Field Length	2
Part Of	Entry profile
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	This field, together with information in QualificationsOnEntry gives information about a student's qualifications on entry to a course. It is also used to identify students with tariff-bearing qualifications.
Notes	For students entering through UCAS this information will be available from UCAS via the *J transaction.
	Code 99 'Not known' should not be used as a standard default. Institutions are expected to seek and code 'Highest qualification on entry'.
	Should a student have more than one of the qualifications listed, it is for the institution to decide which is the 'highest'. In cases where it is unclear which qualification is the 'highest', enter the code which is closest to '01'.
	Codes 37 GNVQ/GSVQ level 3 and 38 NVQ/SVQ level 3 may be used where a student holds both level 3 qualifications and GCE 'A' Level/SCE 'Higher' qualifications, if it is the institution's judgement that these the GNVQ/GSVQ/NVQ/SVQ qualifications are 'highest'. Such students will not normally be included in tariff calculations.
	Code 31 Foundation Degree covers those programmes which HEIs are running as Foundation Degrees which are consistent with the 'Statement of Design Principles' for Foundation Degrees issued by UUK and SCOP.
	GNVQ qualifications are being phased out, but are included as these may be the students highest qualification on entry.
	Further guidance for codes
	44 Access course validated by QAA
	45 Access course not validated by QAA

	A recognised Access to HE course is one listed under the DIUS's List of Access Courses Preparing Students for Entry to Courses of Higher Education. To qualify for inclusion on the list, an Access course must be validated by an Authorised Validating Agency which has been licensed for the purpose by the Quality Assurance Agency for Higher Education (QAA), under the terms of the QAA Recognition Scheme for Access to Higher Education in England, Wales and Northern Ireland. This list is available in hard copy from the DIUS and is also recorded on the UCAS Access Courses Database (http://www.ucas.ac.uk/access). Access courses at institutions in Scotland can only be coded 45 'Access course not validated'.
	HEFCE use qualification on entry data to inform funding. Since 2005-06 funding students with unknown entry qualifications have received zero weighting in the widening participation and improving retention funding streams. In particular, where students have entered via UCAS with qualifications that are made available by UCAS for inclusion on the HESA student record which are not returned by institutions HEFCE expect them to receive a zero weight.
	Students entering with enhanced first degrees, that is qualifications that would be coded H22/M22 in the COURSEAIM field, should be recorded as having a higher degree (01) in the QUALENT2 field.

	Institutions in England can only use codes 51 to 57 where the <u>Instance.COMDATE</u> is after 31 July 2002 and before 1 August 2007.	
	Codes 61 to 65 can only be used by institutions in Wales.	
	Codes 71 to 82 can only be used by institutions in England where <u>Instance.COMDATE</u> is after 31 July 2007.	
	For other initial teacher training courses not leading to Qualified Teacher Status, codes 31 and 49 should be used.	
	For institutions in England code 31 'Further education' should be used only for:	
	any initial teacher training qualification (Stage 1, 2 or 3) for the learning and skills sector in England with current endorsement from Standards Verification UK or FENTO	
	and/or	
	any integrated subject based qualification for Skills for Life teachers in the learning and skills sector in England with current approval and endorsement from Standards Verification UK or FENTO.	

	Since January 2004, Lifelong Learning UK (LLUK) has taken over the work of the former national training organisation, Further Education National Training Organisation (FENTO). Standards Verification UK (SVUK), a wholly owned subsidiary of LLUK will continue the verification of initial teacher training, formerly undertaken by FENTO.

Implied rate of council partial funding

Short Name	IMPRATE		
Туре	field		
Description	This field records the implied rate of Learning and Skills Council (LSC) partial funding.		
Applicable to	England		
Coverage	All students at institutions in England where <u>Instance.FESTUMK</u> = 1,3 or 4 and where <u>Course.MSFUND</u> = 86, 87, 88, AA, AB, AC or AD and <u>Instance.REDUCEDI</u> = 00		
Base Data Type	xs:nonNegativeInteger		
Field Length	3		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	FESTUMK MSFUND		
Reason Required	To calculate LSC funding for the institution.		
Notes	The implied rate of LSC FE funding must be entered in this field for ESF funded provision that is not LSC ESF co-financed. The implied rate of LSC FE funding is the inverse of the ESF intervention rate, that is:		
	Implied rate of LSC FE funding = 100 - ESF intervention rate		
	For example if the ESF intervention rate is 45% the implied rate of LSC FE funding is 55%. The valid entry would be 055.		
	Where no ESF funding is indicated, this field should return 000.		
	The length of this field is 3 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 003 or 3.		
Owner	LSC

Indicator for HEFCE funding approximations

Short Name	INSTAPP
Туре	field
Description	This field describes whether an institution is opting to complete the fields Instance.LOADYRA , Instance.LOADYRB and StudentOnModule.MODYR that will allow HEFCE to remove the approximations that are currently included in their re-creation of the HESES return which counts FTE against years of instance rather than HESA reporting years.
Applicable to	England NI
Coverage	Institutions in England and Northern Ireland
Base Data Type	INSTAPPCodeType
Field Length	1
Part Of	Institution
Minimum Occurrences	0
Maximum Occurrences	1
Related Fields	LOADYRA LOADYRB MODYR STULOAD
Reason Required	To allow institutions to provide information to be used in HEFCE HESES recreation algorithms.
Notes	Institutions can opt to provide additional information in the Student Record which HEFCE will then use to count FTE against years of instance in place of the approximations used in the HESES recreation algorithms.
	If institutions do opt to provide this information, then the fields Instance.LOADYRA , Instance.LODYRB and StudentOnModule.MODYR must be completed for all student instances in the record. Institutions would indicate this by completing this field with code 1 'Institution choosing to provide additional information in records and not rely on HEFCE approximations for HESES recreation'.
	If institutions are content to continue using the HEFCE algorithms, then this field will be completed with Code 0 'Institution relying on HEFCE algorithms for HESES recreation'
	HEFCE advises that provision of the additional information is only likely to make a significant difference for institutions with high numbers of student instances with non-standard academic years and where these numbers are changing substantially year on year or the intensity of study or cost centre mix changes over the duration of the programme.

Instance

Short Name	Instance
Туре	entity
Description	This records a coherent engagement with the institution aiming towards the award of a qualification(s) or credit.
Applicable to	England NI Scotland Wales
Coverage	All students
Part Of	Student
Minimum Occurrences	1
Maximum Occurrences	unbounded
Has Parts	Student instance identifier (NUMHUS) Reduced instance return indicator (REDUCEDI) Course identifier (COURSEID) Campus identifier (CAMPID) Institutions own campus identifier (INSTCAMP) Research council student (RCSTDNT) Research council student identifier (RCSTDID) Start date of instance (COMDATE) Mode of study (MODE) Change of mode date (MCDATE) Student instance FTE (STULOAD) FTE method (FTEMETHOD) FTE in year A (LOADYRA) FTE in year A (LOADYRA) FTE in year B (LOADYRA) FTE In year

	Supposion of active studies (NOTACT)
	Suspension of active studies (NOTACT) Destination (DESTIN)
	Regulatory body reference number (DHREGREF)
	NHS employer (NHSEMP)
	Eligibility for enhanced funding (ELIGENFD) Additional support cost (ADDSUPCT)
	Learning difficulty (LEARNDIF)
	Implied rate of council partial funding (IMPRATE)
	Government initiatives (GOVINIT)
	Number of units completed (NUMUNITS) Number of units to achieve full qualification (NOUNTACH)
	Eligibility for disadvantage uplift (ELIDISUP)
	Disadvantage uplift factor (DISUPFAC)
	Employer role (EMPROLE)
	Qualified Teacher Status (QTS) Entry profile
	Qualifications awarded
	Student on module
	RAE Data
	ITT phase/scope (ITTPHSC) Foundation degree to degree bridging course (BRIDGE)
	Department of Health funding body (DHFUND)
Reason Required	The instance is the central concept in the specification of the HESA Student Record.
Notes	A student undertakes a course; the course being a combination of subject and qualification that define what the student is aiming for e.g. BSc degree in English Literature. A student on a course is referred to as an instance. Since it is possible for a student to undertake more than one course during the reporting year, there may be more than one instance for a student in an institution's return.
	An instance is tracked over time using <u>HIN linking</u> . An instance can be linked to different course records in different years but these course records must all be at the same level (i.e. undergraduate or postgraduate).

Institution's own identifier for student

Short Name	OWNSTU
Туре	field
Description	This field records the institution's own internal identifier for the student.
Applicable to	England NI Scotland Wales
Coverage	All students (optional)
Base Data Type	OWNSTUType
Field Length	20
Part Of	Student
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	To facilitate HESA checking data with institutions, for example, validation reports, etc.
Notes	Valid characters
	 The valid characterset available for this field has been defined by a specific study undertaken as a part of the MIAP Common Data Definitions (CDD) project. The conclusions of this study were: The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007F and U+00A0 to U+024F. Schemas are built in such a way that an individual project can further restrict the set if required. The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set. The Unicode charts that list each of the characters in this range can be found on the
	Unicode web site. The specific sets that are defined here are shown in the following PDF documents: • Basic Latin • Latin-1 • Latin Extended A • Latin Extended B • Latin Extended Additional Institutions are advised to specify the encoding used in their XML files (i.e. xml version="1.0" encoding="UTF-8" ?) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when

	submitting these files for validation.

Last institution attended

Short Name	PREVINST	
Туре	field	
Description	This field describes previous institution attended by the student.	
Applicable to	England NI Scotland Wales	
Coverage	All entrants where <u>EntryProfile.DOMICILE = XF, XG, XH, XI, XK, XL, GG, JE or IM and Course.COURSEAIM = M22, H00, H11, H16, H18, H22, H23, I00, I11, I16, J10, J16, J20, J26, J30, C20, C30 and <u>Instance.REDUCEDI</u> = 00</u>	
Base Data Type	PrevInstType	
Field Length	8	
Part Of	Entry profile	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	YRLLINST	
Reason Required	To monitor school, etc, background of students and to assist the tracking of students through their experience of higher education.	
Notes	This field seeks to categorise types of expected code, and uses the first character to indicate from which code set the institute identifier belongs. Thus, H will signify either an HEI or an FEC, D signifies a government school number, and U a UCAS school number. The remaining characters in the field are used to insert the actual institution identifier.	
	For students entering through UCAS this information will be available from UCAS via the *J transaction.	
	UCAS will make available an HEI, FEC or government number, if they have one, or in the absence of same, default to the five digit UCAS number, but the letter prefixing the code will differentiate between type of institution.	
	UCAS holds the school/FE/HE or other institution from which the UCAS application was received. HESA recognises that this will give a small percentage statistical error in the data for this field.	
	For non-UCAS entrants institutions may use the generic codes and not provide details of individual named institutions. The generic codes are:	
	4901 UK state school	
	4911 UK independent school	
	4921 UK FE college	
	4931 Any non-UK institution	
	4941 UK HEI	
	If the previous institution is not known and none of the other generic codes are suitable,	

	code as H9999, U99999, U00000, D99999999 or D0000000 or 0000.

Length of current year of instance

Short Name YEARLGTH			
Туре	field		
Description	This field is used to indicate the normal number of weeks (excluding holidays and placements) from the commencement of study, the first teaching week, to the completion within the current year of the course. It does not purport to indicate the amount of study time or contact time. The field should reflect the length of the whole of the current year of the course and not just the part which is in the current reporting period 1 August - 31 July.		
Applicable to	Scotland Wales		
Coverage	All instances at institutions in Wales and Scotland where <u>Instance.REDUCEDI</u> = 00		
Base Data Type	PositiveIntegerWithNullStructure2		
Field Length	2		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To assist Statutory Customers to monitor programme patterns.		
Notes	The value should exclude holidays and placements.		
	Years of course out on placement should have an empty element returned with the ReasonForNull attribute set to 9 (not applicable), i.e:		
	<yearlgth reasonfornull="9"></yearlgth>		
	This approach can also be followed by institutions in Scotland, in cases where there is not a defined normal length for the year of the course.		
	The length of this field is 2 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 03 or 3.		
Owner	HESA

Level applicable to funding council HESES

Short Name	FUNDLEV		
Туре	field		
Description	This field is an indicator of the level of the instance, expressed in terms of HEFCE HESES definitions.		
Applicable to	England NI		
Coverage	All instances at institutions in England and Northern Ireland where <u>Instance.REDUCEDI</u> = 00 or 01		
Base Data Type	FUNDLEVCodeType		
Field Length	2		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To support reconciliation of Early Statistics and HESA.		
Notes	Coding should be consistent with the allocation of the student in the HEFCE HESES return. Refer to HEFCE for full definitions.		
	Long refers to any course with instance year of over 45 weeks. Not in the HESES population. This value can be used if the HESA reporting year does not contain, in part or in whole, a year of instance which has previously, is, or will be, returned to HESES. However, use of code 99 is an option. Institutions can, if they so wish, use the other codes for all records.

Location of study

Short Name	LOCSDY	
Туре	field	
Description	This field describes the location at which the student is studying.	
Applicable to	England NI Scotland Wales	
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00 or 01	
Base Data Type	LOCSDYCodeType	
Field Length	1	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	STULOAD CAMPID ModuleSubject	
Reason Required	To track student migration, placements, etc., and to support population definitions.	
Notes	Location of study - The studies described should relate to the FTE reported in field Instance.STULOAD which in turn are described in detail in fields ModuleSubject.MODSBJ and ModuleSubject.MODSBJP . Codes A - C and H - R can be used only for FE students at institutions in England and Wales. Code E, 'On industrial placement for a proportion of the year' should be used where the student undertakes a full-time placement lasting for at least 10 weeks. Where a student undertakes a placement on a part-time basis this should only be included if, when	
	Summed, it is equivalent to 10 weeks full-time work. Where both code E 'On industrial placement for a proportion of the year' and code G 'On study year abroad for a proportion of the year' apply in the same academic year, code E 'On industrial placement for a proportion of the year' should be used in preference to code G 'On study year abroad for a proportion of the year'. Information about students studying for the whole of their programme of study (to date) outside of the UK, and those not funded for study by distance learning overseas should be returned on the Aggregate Overseas Record and not included in the Student Record.	
	There is no requirement to send an individualised student record for any student studying for the whole of their programme of study (to date) outside of the UK and those not funded for study by distance learning overseas. However, there are a small number of distance learning students studying outside the UK who are funded - e.g. Crown servants overseas and the Services. For these students a full record is needed, and is collected through the individualised Student Record. Such students should be coded 9 'Distance Learning - Non-UK based student (funded only)' in this field.

Major source of funding

Short Name	MSFUND	
Туре	field	
Description	This field indicates the primary source of funding for the course. This field is not necessarily the main source of finance as it excludes the tuition fee element. In the majority of cases, the source of funding will be the appropriate funding council. The predominant source of funding should be selected where there is more than one source.	
Applicable to	England NI Scotland Wales	
Coverage	All courses where Course.REDUCEDC = 00, 01, 02 or 04	
Base Data Type	MSFUNDCodeType	
Field Length	2	
Part Of	Course	
Minimum Occurrences	0	
Maximum Occurrences	1	
Reason Required	To allow monitoring of actual student funding sources against funding.	
Notes	The funding councils and DELNI fund places for students or credits associated with students, most home and EC students being 'fundable' (eligible for funding).	
	The guidance for coding non-fundable students on funded courses should be to code to the appropriate funding council in this field and code as 2 'Not fundable by funding council' in Instance.FUNDCODE .	
	Institutions funded by SFC should note that their funding from the Council is provided for a total number of student places, and cannot necessarily be related to particular students or to particular courses. For example, if funding is provided for 80 student places, and there are 100 students whose places are eligible for funding in that funding cell, one cannot identify 20 particular people as being 'fees only' students. Nor could one identify some of the courses which are eligible for funding in that cell as being 'fully-funded' and the rest 'partially funded' or 'unfunded': the funding is for the cell as a whole, not for any specific part of it. All students on courses which are eligible for funding in the funding cell would be returned with SFC shown as the major source of funding, code 03 'SFC'.	
	Nurses and Midwives at institutions funded by SFC who are on courses directly funded through contracts with the Health Authorities should be coded 31 'Departments of Health/NHS/Social Care'. These are primarily courses formerly taught by the Nursing Colleges. Most other Medical, Dentistry, Nursing and Midwifery courses and courses for professions associated with medicine at SFC funded institutions, will be funded through SFC and students should usually be coded 03 'SFC'.	
	Code 34 'Other HM government departments' includes local government and non-departmental public bodies (NDPBs) including the British Council and the Royal Society.	
	Codes 71 'Joint between two sources including a funding council' and 72 'Joint between two bodies excluding a funding council' should be interpreted as equal 50:50 funding	

	between two bodies. In cases where the split is not exactly 50:50, the guidance is to code on the basis of the largest source.
	Codes 47, 62-65, 73-79, 83, 85-89, AA, AB, AC, AD can be used only for students at institutions in England and Wales who are following programmes of study at FE level, ie. shown as code 1 or 4 in Instance.FESTUMK
	Codes 47, 62-65, 73-79, 83, 85-89, AA, AB, AC, AD are the codes to be used in preference to other codes for FE level students in England and Wales. 'Joint with LSC/DCELLS' in codes 73-79 indicates a source of funding in addition to a LSC/DCELLS and applies whether LSC/DCELLS or the other body is the major source of funding
	Codes 86-88 'European Social Fund' apply to FE level students only. For any students at HE level European Social Fund should be coded as 46 'EU commission (EC)'.
	Code 91 'Funded entirely by student tuition fees' will include some (but not all) 'cost recovery' courses, for example, cost recovery courses provided for particular firms migh be covered by code 42 'UK private industry/commerce'. Code 91 may also cover a few 'fees only' students (in cells for which the institution receives no funding at present).

Major source of tuition fees

Short Name	MSTUFEE	
Туре	field	
Description	This field indicates the major source of tuition fees for the student where this is known. The predominant source should be selected where there is more than one source of award or financial backing. The field relates to the current year of study.	
Applicable to	England NI Scotland Wales	
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00, 01 or 02	
Base Data Type	MSTUFEECodeType	
Field Length	2	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Reason Required	To allow financial calculations to be made and for the monitoring of numbers of students receiving awards.	
Notes	Code 01 should be used for cases where the student pays the full fees upfront with no SLC/SAAS funding.	
	Codes 02, 03 or 04 cover cases where the SLC/SAAS fund full fees through a grant, or SLC/SAAS fund full fees through a fee loan, or SLC/SAAS fund full fees through a mixture of SLC/SAAS grant and SLC/SAAS fee loan.	
	Codes 52, 53 or 54 cover cases with a mixture of SLC/SAAS funding and student contribution (including cases where (i) the SLC/SAAS pays part fees and the student pays part fees, (ii) where the SLC/SAAS pays nil fees and the student pays part fees upfront and receives a fee loan for the remainder or (iii) the SLC/SAAS pays part fees, the student pays part fees and receives a part fee loan for the remainder.)	
	Code 01: No award or financial backing, pay own fees. Students who are financially assessed by an LA/SAAS/DELNI/NI Education and Library Boards/SLC to pay the full fee themselves (i.e. no public support for fees) should be included here. This code should only be used where there is no award, fee loan or financial backing at all. Where there is some award, fee loan or financial backing, even if this is the minor source compared with the contribution of the student, then the coding should reflect the source of the award, fee loan or financial backing.	
	Codes 02-04 includes those students whose fee is met in full by the body shown - through a grant and/or through a fee loan. In the case of payments by the SLC, students should be recorded against the body which made the financial assessment: code 02 for students from England and Wales and for EU students studying in England and Wales, code 03 for students from Scotland and for EU students studying in Scotland or code 04 for students from Northern Ireland and EU students studying in Northern Ireland. Where the financial assessment has resulted in the fee being partly paid by the public body shown in codes 02-04 and partly by the student or their families, the student should be included in either codes 52, 53 or 54 regardless of which contribution is the greater.	

Code 02 includes students aged under 19 who pay registration fees only. Code 02 excludes LA acting as employer.

Students in exempt years from liability to pay fees should be coded 02, 03 or 04 as appropriate.

Code 05 'Institutional waiver of support costs' includes University Scholarships or awards of current institution.

Code 07 'Fee waiver under government unemployment students scheme' is to cover the proposal that part-time students who are in employment at the start of a course but who become unemployed during it may have their fees waived - possibly subject to means testing. Institutions will be able to reclaim from funding councils.

Code 09 covers cases where fee remission is granted to employees of small and medium sized businesses who are studying part-time towards an HE qualification as part of a recognised Graduate Apprenticeship.

Code 25 should be used when the charity paying the fees is listed as a member of Association of Medical Research Charities

Code 31 'Departments of Health/NHS/Social Care'. Any student whose fees are directly paid by NAW should be included in code 34 'Other HM government departments/public bodies'.

Code 41 'EU Commission (EC)' applies specifically to the EU Commission. In codes 42-48 'overseas' means 'non-UK'.

Code 42 'Overseas student award from HM government/British Council' includes the Association of Commonwealth Universities.

Code 49 identifies Overseas Research Student Award Scheme, and these awards are not included in Code 42.

Code 81, 'Student's Employer' should be used in preference to other codes if it is known that the major source of tuition fees is the student's employer. Codes such as 61, 'UK industry/commerce' and 34, 'Other HM government departments/public bodies' therefore apply where these are the sponsor of the student rather than their employer.

Incoming Erasmus, Tempus and other exchange students should be coded 98 'No fees'.

The code closest to 05 should be returned if there is a 50/50 split on the source of tuition fees, with the exception of students funded 50/50 by a Research Council and another body, in which case the Research Council code should be returned.

Field Length	2	
Part Of	Instance	
Minimum Occurrences	1	
Maximum Occurrences	1	
Related Fields	MCDATE LOCSDY STULOAD NOTACT SPLENGTH UNITLGTH	
Reason Required	To allow standard populations to be defined and financial calculations to be made	
Notes	Where a student has changed their mode of study within the reporting period, the record should show the current or latest position. With reference to code 01, the funding councils have agreed that a common definition of full-time is that course years must involve a minimum of 24 weeks study (note that this definition does not apply to full-time final year students in institutions in Wales). Each funding council may also have further additional conditions. HESA will apply the 24 week rule to its definition of full-time in publications i.e. full-time will be all those students	
	coded 01 in this field, together with all those students coded 02 and whose expected length of study (fields Instance.SPLENGTH and Instance.UNITLGTH) is over 24 weeks. With reference to codes 23 and 24, these programmes are covered by the definition of sandwich under the award regulations as set out by the funding council. Years of instance must involve a minimum of 24 weeks study/placement. HESA's definition of sandwich students will be all those students coded 23 or 24 in this field, together with all those students coded 25 and whose expected length of study (fields Instance.SPLENGTH and Instance.UNITLGTH) is over 24 weeks. Code 23, Thick sandwich students are those for which an industrial (or other) placement causes a continuous absence from full-time study of at least one academic year. A record must be returned for every student enrolled on a sandwich course irrespective of whether they are in attendance at the institution or engaged in industrial training. Students should be coded as sandwich for every year of the course and not just those in which industrial experience takes place. The students who are actually out on placement can be identified via Instance.LOCSDY. Code 24, A thin sandwich must involve the student in an average of more than 21 hours study a week for a minimum of 24 weeks study/placement.	

Students who meet the definition of sandwich should be coded as either 23 or 24 (and not codes 52 or 53) irrespective of whether the year is spent abroad or is optional/compulsory.

Students who are actively writing-up are not considered to be dormant by HESA. A record is required for such students, with this field coded as 43 or 44 'Writing-up'. 'Writing-up' is generally associated with research students. Students on taught masters courses should not typically have their mode of study changed to 'writing-up', at least within the registration period, e.g. students on a one year taught masters course should be shown as full-time mode for both the taught and the dissertation phases of the course. Any change to show mode as writing-up would be expected only after the completion of the 12 month registration period.

Code 51 should be used for students on sabbatical years e.g. holding Student Union office.

Codes 52 and 53 should only be used for study related years out which count towards the course aim. Language years out that are not classed as thick sandwich programmes should be coded 53 in the year the student is abroad.

Years out for any other reason should be coded 63 or 64, Dormant.

Codes 65, 66, 68 and 69 are available to institutions in England and Wales only. Code 67 is available for institutions in Wales only.

Codes 73 and 74 are available to postgraduate students at institutions in England only. Postgraduate students who become dormant part way through the reporting year will need a full HESA record reflecting their current status as code 73 or 74. Instance.MCDATE will record the date when the postgraduate student formally moves from an active study mode to 'dormant'. Instance.STULOAD should be reduced to reflect the fact that the student was not active for the whole reporting period.

All other who become dormant part way through the reporting year (that is, all students at institutions in Wales, Northern Ireland and Scotland and Undergraduate and FE students at institutions in England) will need a full HESA record in the July data collection reflecting their status whilst active (i.e. the position that applied just before they became dormant). This field should record their mode of study whilst active (and not code 63 or 64 'Dormant' which should only be used for students who are dormant for the whole reporting period). Instance.STULOAD should potentially be reduced to reflect the fact that the student was not active for the whole reporting period. A student who was actively studying at sometime during the reporting period but who has now suspended studies, will have an active mode of study and will be identified through Instance.NOTACT.

Any students with a mode of study 63 or 64 'Dormant' will be excluded from the HESA standard registration population used for analysis purposes. A record is not required for such students except in the case where awards have been made to students from dormant status. Institutions with awards made in a reporting period to students not active in the reporting period should include a record for these students in the reporting period July data collection, showing mode of study 63 or 64 'dormant'. This may either be via a full record (all fields will be validated and Student FTE must be) or through a reduced record for dormant students (only the specified fields will be validated and Student FTE will be assumed to be 0) - see dormant students reduced record.

Codes 63 and 64 for dormant can be used only if the student was not actively studying at anytime during the reporting period.

Where a student has changed their mode of study within the reporting year, the record should show the current or latest position. However students involved in re-sits after the completion of the taught or structured part of their course should not have their mode of study up-dated. For example a full-time student who finishes the courses in June but has to take resits in September should not be re-coded; whilst they were active on the course they were a full-time student.

The use of the specific full-time codes 12 to 14 is compulsory for all students at institutions in England or Wales who are following programmes of study at FE level or funded by LSC or WAG-DCELLS.

Code 31, 'Part-time' is assumed to include all the specific types of part-time study detailed in codes 32 to 35. The use of the specific part-time codes 32 to 35 (not the generic part-time code 31) is compulsory for all students at institutions in England or Wales who are following programmes of study at FE level or funded by LSC or WAG-DCELLS. In all other cases whether institutions in England, Wales or Northern Ireland use the generic or the specific part-time codes is optional.

Institutions in Scotland should use part-time codes 38 or 39.

Codes 12 -14 and 32 - 37 can only be used by institutions in England and Wales.

When using the specific part-time codes, if there is uncertainty about whether a student is released from employment, code as 34, 'Part-time, not-released from employment'.

Code 32, Block release students are those who attend full-time for a period less than 24 weeks per academic/financial year and where study,

- is broken by a period of industrial training or employment and
- may be additional to study on one or two days a week during another part of the session.

FE students at institutions in England and Wales only may be coded 36. All other distance learning students should be coded according to their individual mode/pattern of study, e.g. full-time or part-time.

FE students at institutions in England and Wales only may be coded 37.

Part-time courses/programmes of study which involve a mixture of day and evening attendance should be recorded under whichever of codes 32-34 is most appropriate, e.g. a day release course which also involves evening attendance should be coded 33. 'Twilight only' courses should be counted as 'evening only' and coded 35.

Where Y0/Y1/Y2 appear in business rules, these refer to the reporting period Y1-Y2 (e.g. for the 2007-08 reporting period, Y0 is 2006, Y1 is 2007 and Y2 is 2008).

Module

Short Name	Module	
Туре	entity	
Description	A discrete unit of learning and/or research	
Applicable to	England NI Scotland Wales	
Coverage	Compulsory for all returns	
Part Of	Institution	
Minimum Occurrences	1	
Maximum Occurrences	unbounded	
Has Parts	Module identifier (MODID) Module title (MTITLE) Module taught in a Celtic language (MODLANG) Percentage of module taught in Celtic language (LANGPCNT) Module FTE (FTE) Percentage not taught by this institution (PCOLAB) Credit transfer scheme (CRDTSCM) Credit value of module (CRDTPTS) Level of credit points (LEVLPTS) Other institution providing teaching (TINST) Module subject	
Reason Required	This entity exists to hold information about modules/units of activity that students undertake.	
Notes	Although the term 'Module' is used to describe this entity, the definition covers any discrete unit of learning and/or research. The aim of collecting this information is to provide a greater level of detail about the student's activity than can be ascertained from the course-level information. Specifically, this includes the detail of subjects studied during the year, credit scheme information and cost centre information that is used in conjunction with the FTE value shown in Instance.STULOAD . In cases where students are studying within academic structures that are not 'modular', the module could be defined as a single unit to cover a year's worth of activity on a course.	
	It is recommended that in cases where a module is used in both HE and FE instances, institutions return two separate module records because different validation needs to be applied.

Business rules		

Module FTE

Short Name	FTE	
Туре	field	
Description	This field indicates the proportion of a full-time equivalent year attributed to the module. It shows the proportion of an instance year's full-time study for this qualification aim that the module would represent.	
	A year's full-time study for this qualification aim is a programme of study year (instance year), regardless of how this fits with institution's academic sessions or HESA reporting periods.	
	Students on instance years which overlap HESA reporting years (e.g. many PGT students) should be attached to the same module in both HESA reporting years, with a full Module.FTE in both reporting years. This is not overcounting, as Module.FTE applies to the instance year of study. Instance.STULOAD will show the proportion taken in each reporting year.	
	The value in Module.FTE can be recorded to one decimal place and must be between 0 and 300.	
Applicable to	England NI Scotland Wales	
Coverage	All modules	
Base Data Type	FTEType	
Field Length	5	
Part Of	Module	
Minimum Occurrences	1	
Maximum Occurrences	1	
Related Fields	STULOAD	
Reason Required	To support student load calculations; used in splitting student load across cost centres and hence in England and NI allocating FTE to price groups for funding purposes.	
Notes	This field, together with Instance.STULOAD endeavours to capture more sensitive information than has previously been available about students whose study pattern cannot be categorised as typically full-time, i.e. equivalent in total to 1 FTE per year. It provides a numerical measure of the contents of Instance.MODE . It does not seek to record the teaching load, nor the contact time associated with a student or the course, nor the learning hours, since each of these quantities is subject to variation between institutions, and cannot be related to a national norm. No weighting should be given, therefore, to take account of the resourcing requirements of different modules.	
	For institutions operating a credit points system, the proportion of FTE can be calculated from the number of credit points that may be obtained from the module compared with the number of credit points obtainable for that year of the course. Proportion of FTE can also be calculated by reference to a conventional full-time student following the qualification aim. For example, if it is the institution's normal requirement that a student should complete 12 (equally-weighted) modules for a degree which would typically take 3 years for a normal full-time student, then each module would have proportion of FTE calculated as 25% (25). For degrees requiring 12 (equally-weighted) modules over 4	

full-time years, each module would have an FTE calculated as 33% (33). This could serve as a benchmark for calculating the FTE of non-standard modules, or modules falling within other programmes of study. For professional courses, the advice of the professional awarding body can be sought. Otherwise institutions are asked to make an academic judgement in relating the module to another module of a similar level, and similar academic subject category, which can be related to a 'standard' full-time course.

HESA accepts that the full-time equivalence will not be exact in all cases, but the aim is to give a better approximation than the use of arbitrary conversion factors. It is recognised that the actual student FTE associated with a course may not simply be the aggregation of all modules followed by that student, and it is not expected that there will always be a precise correspondence between the aggregate proportion of FTE fields and Instance.STULOAD. Further guidance on FTE reporting is available here.

In cases where a module is available in two or more qualification aims, with different course requirements, separate module entities are required to be returned.

For example:

Module: Introduction to biogenetics (40 credits)

MODID: PGMIntrobiogenetics

Masters degree course module worth 40 credits of a 180 credit course

MODFTE: 22

In this instance the module's weighting accounts for 22% of the course year.

MODID: PGCIntrobiogenetics

Post Graduate Certificate course module worth 40 credits of a 120 credit course

MODFTE: 33

In this instance the module's weighting accounts for 33% of the course year.

Although the students on these courses may be attending the same lectures, because the outcome weighting of the module differs between qualification aims, separate module entities are required.

The length of this field is 5 characters, however the move to XML enables data to be returned with or without leading zeros or the decimal place, e.g. 005.0 or 5.0 or 5

Owner	HESA
Version	1.7
Date modified	2008-10-07
Change management notes	Description amended to highlight that this field relates to the instance year
Business rules	1 Warning Module.FTE should contain a value greater than 0

Module identifier

Short Name	MODID
Туре	field
Description	This field is the <u>primary key</u> for the <u>Module</u> entity and exists as a <u>foreign key</u> on <u>StudentOnModule</u> .
Applicable to	England NI Scotland Wales
Coverage	All modules
Base Data Type	MODIDType
Field Length	30
Part Of	Module
Minimum Occurrences	1
Maximum Occurrences	1
Reason Required	To facilitate linkage with the Instance entity.
Notes	Any MODID returned on the StudentOnModule element must exist on the Module entity. Modules that have not been taken up in the reporting year can be included on the Module entity if this is easier.
	Valid characters
	The valid characterset available for this field has been defined by a specific study undertaken as a part of the MIAP Common Data Definitions (CDD) project. The conclusions of this study were:
	 The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007F and U+00A0 to U+024F. Schemas are built in such a way that an individual project can further restrict the set if required.
	The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.
	The Unicode charts that list each of the characters in this range can be found on the Unicode web site. The specific sets that are defined here are shown in the following PDF documents:
	 Basic Latin Latin-1 Latin Extended A Latin Extended B Latin Extended Additional

	Institutions are advised to specify the encoding used in their XML files (i.e. xml version="1.0" encoding="UTF-8" ?) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.

Module outcome

Short Name	MODOUT
Туре	field
Description	This field records if the student completed the module and if so whether they gained credit or not. There should be a Module Outcome field for each module taken by the student.
Applicable to	England NI Scotland Wales
Coverage	All student on module records
Base Data Type	MODOUTCodeType
Field Length	1
Part Of	Student on module
Minimum Occurrences	1
Maximum Occurrences	1
Related Fields	MODSTAT
Reason Required	To allow monitoring of completion and achievement.
Notes	Code 3 'Partial completion' is as defined in HEFCW HESES, and should be used for modules associated with full-time taught courses only.
	Code 4 'Student did not complete module' includes cases where the student withdrew from the module or transferred from this module to another.
	Code 5 'Module taken on a not-for-credit basis' should be used for a student who takes optional modules on a not for credit basis in addition to compulsory modules for their course, or for modules which do not have any form of assessment.
	Code 6 'Module Outcome not yet known' should be used for cases where, for example, a student was ill and has been allowed to defer.
	Code 6 'Module Outcome not yet known' should be used for modules continuing into the next reporting year. <u>StudentOnModule.MODSTAT</u> code 3 or 6 will show that the reason that these module outcomes is not yet known is because the module is continuing into the next reporting year.
	Code 7 'Not coded' is an acceptable default code for use in this field unless otherwise indicated by the institution's funding council. Institutions in Wales must not use code 7. Institutions in England are encouraged to complete module information on the Student Record, to enable HEFCE to take this information into account in the future distribution of funding. HEFCE plan to include in funding from 2009/10 onwards additional FTE for students who are non-completers in terms of their original study intentions but who nevertheless have completed individual modules. For students who complete according to the current HESES rules there should be no funding implications in using code 7 in this field. However for students who do not complete HEFCE expect to count only modules with outcomes coded 1 or 2 in this field in funding additional FTE for partial completion.

Resit exams, late submission of assessments and/or results from late exam boards; Students who complete their module studies by 31 July but who have resit/first sit examinations to take, assessments to submit and/or whose final confirmation of award by exam boards may be after this date: If the Module Outcome is known before the Student Record data collection closes, these outcomes should be treated as if they had sat the exam in July and included in the return. However, if the outcome is not known before the Student Record data collection closes, code 6 'Module Outcome not yet known' should be used in the current reporting year and the data should be returned in the next reporting year by submitting a record with code 4 'Taken in a previous reporting year (outcome only)' in StudentOnModule.MODSTAT. The requirement to return late module outcomes is compulsory for institutions in Wales. However until the wider adoption of the part-time performance indicator, the completion of late module outcomes will be optional for other institutions. Completion should be as defined by the relevant funding council. For institutions in England this includes the requirement that the student either took the final module assessment or passed it. In England where students have resits (after having taken the final assessment) but the result is unknown, code 2 should be used in preference to Code 6, although a record should be returned in the next year showing the credit gained with StudentOnModule.MODSTAT of 4. **HESA** Owner Version 1.4 Date modified 2008-05-30 Change management Business rule 3 added notes **Business rules** 1 Error Institutions in Wales cannot use StudentOnModule.MODOUT code 7 2 Error StudentOnModule.MODOUT must be coded 6 where Welsh institution and StudentOnModule.MODSTAT = 3 3 Error Institutions not in Wales cannot use StudentOnModule.MODOUT code 3 Valid Entries and 1 Completion - gained full credit Labels 2 Completion - did not gain credit 3 Partial completion (HEFCW HESES Rules) 4 Student did not complete module 5 Module taken on a not-for-credit basis 6 Module outcome not yet known 7 Not coded

Module status

Short Name	MODSTAT
Туре	field
Description	This field records detail of whether modules span HESA reporting years.
Applicable to	England NI Scotland Wales
Coverage	All student on module records
Base Data Type	MODSTATCodeType
Field Length	1
Part Of	Student on module
Minimum Occurrences	1
Maximum Occurrences	1
Related Fields	MODOUT
Reason Required	Collection of this data will allow more accurate allocation of modules to reporting years for monitoring of completion and achievement, and of funding.
Notes	Code 5 'Not coded' is an acceptable default code for use in this field unless otherwise indicated by the institution's funding council. Institutions in Wales must not use code 5. Institutions in England are encouraged to complete module information on the Student Record, to enable HEFCE to take this information into account in the future distribution of funding. Code 6 should normally only be used where students have modules which genuinely span 3 reporting years. This is likely to be relatively rare, and will most likely be relevant to Postgraduate research students where a single module is being used to represent a programme of study.
Owner	HESA
Version	1.3
Date modified	2008-05-30
Change management notes	Updated notes for institutions in Wales with modules spanning more than 2 reporting years
Business rules	StudentOnModule.MODSTAT cannot be coded 5 where institution is in Wales
Valid Entries and Labels	Continuing from previous reporting year Contained within reporting year Continuing into next reporting year Taken in a previous reporting year (outcome only) Not coded Continuing from previous reporting year and into next reporting year

Module subject

Short Name	ModuleSubject
Туре	entity
Description	Subject descriptor for the Module
Applicable to	England NI Scotland Wales
Coverage	All modules
Part Of	Module
Minimum Occurrences	1
Maximum Occurrences	16
Has Parts	Subject of module (MODSBJ) Cost centre (COSTCN) Subject / cost centre percentage (MODSBJP)
Reason Required	This repeating element exists to allow a module to hold up to sixteen sets of cost centre and subject information.
Notes	Institutions may code up to 16 occurrences of module subject. It is up to institutions to decide whether or not to return details of cost centres which are contributing teaching/learning amounting to less than 5% of the proportion of the module.
	An entry is required for each subject area of study of the module regardless of whether this subject area of study is taught by the reporting institution or not.
	Where 2 different subjects are taught in the same cost centre, there should be separate entries for each.
	A breakdown at instance level will be acceptable for students out on placement or exchange out.
	Where the sum of percentages does not equal 100% (e.g. because of the exclusion of cost centres contributing less than 5% of the teaching/learning) then the percentage of the subjects returned should be pro-rated so that the total becomes 100%. However, there will be a tolerance of totals between 98% and 102%.

Module taught in a Celtic language

Short Name	MODLANG
Туре	field
Description	This field is used to indicate that the module that is taught, at least in part, through the medium of a Celtic language.
Applicable to	NI Scotland Wales
Coverage	All modules at institutions in Wales, Scotland and Northern Ireland
Base Data Type	MODLANGCodeType
Field Length	1
Part Of	Module
Minimum Occurrences	0
Maximum Occurrences	1
Related Fields	LANGPCNT
Reason Required	To monitor pattern of provision in a Celtic language.
Notes	Modules taught partly in English (or another language) and partly in a Celtic language should be coded 1 Welsh, 2 Gaidhlig or 3 Irish appropriately. Field Module.LANGPCNT will show the proportion of the module that is taught in the Celtic language.
	Code 9 'Not available through the medium of Welsh, Gaidhlig or Irish' indicates that no part of the module is taught through the medium of a Celtic language
	For institutions in Wales, when using code 1, this field should indicate where the module is delivered wholly or partly through the medium of Welsh.
	For further guidance on the completion of this field, and in particular with reference to activities which constitute learning through the medium of a Celtic language, please refer to the institution's funding council.

National identity

Short Name	NATIOND		
Туре	field		
Description	This field records the national identity of the student. National identity is different from both ethnicity and nationality and could be based on many things including, for example, culture, language or ancestry/family history. National identity reflects how an individual chooses to classify himself or herself.		
Applicable to	Wales		
Coverage	All students at institutions in Wales where EntryProfile.DOMICILE = XI and any Instance.REDUCEDI = 00 or 02		
Base Data Type	NATIONDCodeType		
Field Length	1		
Part Of	Student		
Minimum Occurrences	0		
Maximum Occurrences	2		
Reason Required	To monitor the impact of policies and practices on students of Welsh or other UK background.		
	To compare sector data with that from other areas of the economy.		
Notes	The coding structure reflects that used in other national surveys and so allows comparative statistics to be derived both within and outside the sector.		
	A student can identify himself or herself as having up to two national identities.		
	Code 'U' Unknown should be used where a student has either not been asked or has failed to respond to a request for information about his or her national identity.		
	Code 'R' Information refused should be used when the student has explicitly refused to provide the information.		
Owner	HESA		
Version	1.1		
Date modified	2008-02-29		
Change management notes	Business rule 2 added		
Business rules	1 Error Student.NATIOND must exist for institutions in Wales where any (EntryProfile.DOMICILE exists and is coded XI) and the corresponding Instance.REDUCEDI = 00 or 02 2 Error Student.NATIOND must not exist for institutions in England, Northern Ireland or Scotland		
Valid Entries and Labels	B British E English		

I O R S U W	Irish Other Information refused Scottish Unknown Welsh	
----------------------------	---	--

Nationality

Short Name	NATION		
Туре	field		
Description	This field defines the country of legal nationality.		
Applicable to	England NI Scotland Wales		
Coverage	Compulsory for all students where any Instance.COMDATE is on or after 2007-08-01. Optional but strongly encouraged for all other students. This field is optional for all students at institutions in Northern Ireland.		
Base Data Type	NATIONCodeType		
Field Length	2		
Part Of	Student		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To enable the UK contribution to the higher education of nationals of other countries to be determined; used by Statutory Customers and others with a legitimate interest to analyse this contribution.		
	To meet EC and OECD requests for information.		
Notes	For students entering through UCAS this information will be available from UCAS via the *J transaction. UCAS will first use the complete new code list for entrants in 2009. Therefore in 2007/08 (and 2008/09) institutions can use the more limited codes as provided in the *J, however, institutions can recode if they choose. The details of the coding that will be provided by UCAS can be found in the *J specification.		
	Where a student has dual nationality including British, they should be coded as United Kingdom (GB). If a dual nationality, not including British, but including non-UK EU country then use relevant EU country code. If neither British or non-UK EU country then code as either nationality.		
	HESA Guidance		
	Note: 'no settled inhabitants' means no inhabitants apart from military and scientific personnel, staff of contractors, and seasonal residents.		
	GB, XF, XG, XH, XI, XJ, XK: United Kingdom		
	For domicile the separate country codes XF, XG, XH, XI must be used, and if domicile is known to be United Kingdom but the individual country is not known, XK must be used. The code GB is invalid for domicile. For nationality the code GB must be used. The codes XF, XG, XH, XI, XK are invalid for nationality. The code XJ is invalid for both domicile and nationality. Note that the code UK is not on the ONS list and is invalid for both domicile and nationality.		

GG, JE, XL: Guernsey and Jersey (Channel Islands)

The Channel Islands are not part of the United Kingdom and not part of the European Union. United Kingdom codes must not be used for either domicile or nationality. The Bailiwicks of Guernsey (which includes the smaller islands of Alderney and Sark) and of Jersey must be treated separately, and the codes GG and JE must be used for both **domicile** and **nationality**. The code XL may be used for either domicile or nationality, but only for student instances from 2007/08 onwards that are already current in 2006/07, to avoid the need for re-coding.

IM: Isle of Man

The Isle of Man is not part of the United Kingdom and not part of the European Union. United Kingdom codes must not be used either for domicile or nationality. The code IM must be used for both **domicile** and **nationality**.

CY, XA, XB, XC: Cyprus

The following treatment does not imply any recognition that the *de facto* Turkish occupation and control of northern Cyprus is legitimate, but does deal with the practical need to record the source of students. The separate codes Cyprus (European Union) (XA) and Cyprus (non European Union) (XB) must be used for both **domicile** and **nationality**. The code XC may be used for either domicile or nationality, but only for student instances from 2007/08 that are already current in 2006/07, to avoid the need for re-coding, or for new entrants in 2007/08 who entered through UCAS. Note that an appropriate United Kingdom code should be used for both domicile and nationality for students from the British sovereign military areas on Cyprus. The code CY is invalid for both domicile and nationality unless and until there is any change in the political situation, in which case the coding arrangements will be reviewed.

FI, AX: Finland and the Aland Islands

The Åland Islands (Ahvenamaa) are an autonomous demilitarised region of Finland, and are part of the European Union subject to some derogations and special provisions. For **domicile** the code FI must be used only for Finland excluding the Åland Islands, and the code AX must be used for the Åland Islands. The passport held by Åland Islanders is an EU-style passport distinguished from the normal Finnish passport by the addition of the word 'Åland' below 'FINLAND', but this does not imply a separate nationality. Accordingly, for **nationality** only the code FI is to be used, and the code AX is invalid.'

FO, GL: Faroe Islands and Greenland

The Faroe Islands and Greenland must be treated separately, and the codes FO and GL must be used for both **domicile** and **nationality**. Note that, despite their relationship with Denmark, neither Greenland nor the Faroe Islands are part of the European Union.

FR, GF, GP, MQ, RE, PM, YT, PF, TF, NC, WF: French Republic

The French Republic comprises Metropolitan France (France Métropolitain) [including Corsica], the four Overseas Departments (Départements d'Outre-Mer, or D.O.M.) of French Guiana (GF), Guadeloupe [including St Martin (North)] (GP), Martinique (MQ), and Réunion (RE), the four Overseas Collectivities (Collectivités d'Outre-Mer, or C.O.M.) of Mayotte (YT), St Pierre & Miquelon (PM), French Polynesia (PF) [also designated as a Pays d'Outre-Mer], and Wallis & Futuna (WF), the Overseas Territory

(Territoire d'Outre-Mer, or T.O.M.) of the French Southern Territories (TF), and finally New Caledonia (NC) which has a special status similar to a T.O.M.. Metropolitan France and the four Overseas Departments are all part of the European Union. For **domicile**, the code FR must be used **only** for Metropolitan France, and other codes must be used with their natural meaning, except that there are no settled inhabitants in the French Southern Territories, so code TF is invalid. For **nationality** the code FR must be used throughout, and all the other codes in this group are invalid.

IT, VA: Italy and Vatican City (Holy See)

Italy and Vatican City must be treated separately, and the codes IT and VA must be used for both **domicile** and **nationality**.

NL, AW, AN: Kingdom of the Netherlands

The Kingdom of the Netherlands comprises the European country of The Netherlands and the Caribbean countries of Aruba (AW) and Netherlands Antilles (AN). For **domicile**, the code NL must be used only for The Netherlands in Europe, and the codes AW and AN must be used with their natural meaning. For **nationality** the code NL must be used throughout, and codes AW and AN are invalid. Netherlands Antilles is to be further subdivided on 1 July 2007, and this may require further codes to be allocated in ISO 3166, but this had not been done as at mid-2006.

ES, IC, XD, XE: Spain and the Canary Islands

The Canary Islands are part of Spain, and hence of the European Union, but with some special derogations and provisions particularly relating to customs and fiscal matters. For **domicile**, the code ES must be used for mainland Spain and the code IC must be used for the Canaries. For **nationality**, the code ES must be used for both mainland Spain and the Canaries. The codes XD and XE, although listed, are invalid for both domicile and nationality. No separate codes are provided in the ONS list for the exclaves of Ceuta and Melilla on the coast of north Africa, and for both domicile and nationality purposes they should be regarded as part of mainland Spain.

NO, SJ, BV: Norway and Svalbard

Svalbard (Spitzbergen) is an inhabited Norwegian territory in the Arctic Ocean. For **domicile** the code SJ must be used for Svalbard, and the code NO must be used only for Norway excluding Svalbard. For **nationality** the code NO must be used throughout, and SJ is invalid. Jan Mayen Island is included with Svalbard under code SJ, but has no settled inhabitants. Bouvet Island (BV) is a Norwegian island in the South Atlantic Ocean, but has no settled inhabitants, so code BV is invalid for both domicile and nationality.

MA, EH; Morocco, Western Sahara

Western Sahara (EH) is a disputed territory occupied and administered by Morocco (MA). The code EH should be used where appropriate for both **domicile** and **nationality**.

PS: West Bank and Gaza Strip

This is a new code not provided for under the old HESA code system. It must be used where appropriate for both **domicile** and **nationality**.

US, PR, VI, GU, MP, AS, UM, MH, FM, PW: United States, Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, American Samoa, United States Minor Outlying Islands, Marshall Islands, Micronesia, Palau

The Commonwealth of Puerto Rico is an Unincorporated Organized Territory of the United States; its current Commonwealth status grants it a measure of internal self-government, and its longer-term status is the subject of active debate in 2006. Puerto Ricans are citizens of the United States. For **domicile** the code PR must be used. For **nationality** the code US must be used and the code PR is invalid.

The US Virgin Islands (the former Danish West Indies, purchased from Denmark by the United States in 1916) is an Unincorporated Organized Territory of the United States. US Virgin Islanders are citizens of the United States. For **domicile** the code VI must be used. For **nationality** the code US must be used and the code VI is invalid.

Guam (formerly part of the UN Trust Territory of the Pacific) is an Unincorporated Organized Territory of the United States. For **domicile** and **nationality** the code GU must be used.

The Commonwealth of the Northern Mariana Islands (formerly part of the UN Trust Territory of the Pacific) is an Unincorporated Organized Territory of the United States; its Commonwealth status grants it a measure of internal self-government. For **domicile** and **nationality** the code MP must be used.

American Samoa is an Unincorporated Unorganized Territory of the United States. For **domicile** and **nationality** the code AS must be used The United States Minor Outlying Islands comprise Baker Island, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Atoll, Palmyra Atoll and Wake Island in the Pacific, and Navassa Island in the Caribbean. They are Unincorporated (Incorporated in the case of Palmyra Atoll) Unorganized Territories of the United States. They have no settled inhabitants and the code UM is accordingly invalid for both **domicile** and **nationality**.

The Marshall Islands (formerly part of the UN Trust Territory of the Pacific) are a self-governing state in free association with the United States. For **domicile** and **nationality** the code MH must be used.

The Federated States of Micronesia (formerly part of the UN Trust Territory of the Pacific) are a self-governing state in free association with the United States. For **domicile** and **nationality** the code FM must be used.

Palau (formerly part of the UN Trust Territory of the Pacific) is a self-governing state in free association with the United States. For **domicile** and **nationality** the code PW must be used.

The use of the code US for **domicile** is accordingly limited to the United States only.

CN, TW, HK, MO: China, China (Taiwan), Hong Kong, Macao

China (CN) should be used for both **domicile** and **nationality** where relevant in cases not covered by the following guidance. China (Taiwan) (TW) - The United Kingdom acknowledges the position of the Chinese Government that Taiwan is a province of China and recognises the Chinese Government as the sole legal government of China. The United Kingdom does not recognise Taiwan as a state and does not have diplomatic relations with Taiwan. However, because the United Kingdom accepts passports issued by the Taiwanese Authorities for immigration purposes, it is necessary

to use a separate country code TW for China (Taiwan) in both the **domicile** and **nationality** fields. This has no bearing on the United Kingdom's position on Taiwan's status.

Hong Kong (Special Administrative Region of China) (HK) appears separately for historical and immigration reasons as this Special Administrative Region issues different passports from those of the PRC. This code is not regarded as having any implications for issues of nationality, but should continue to be used in both the **domicile** and **nationality** fields.

Macao (Special Administrative Region of China) (MO) appears separately for historical and immigration reasons as this Special Administrative Region issues different passports from those of the PRC. This code is not regarded as having any implications for issues of nationality, but should continue to be used in both the **domicile** and **nationality** fields.

AU, CX, CC, NF, HM: Australia, Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Heard Island and MacDonald Islands.

Christmas Island is a non-self-governing territory of Australia. For **domicile** the code CX must be used. For **nationality** the code AU must be used and the code CX is invalid.

Cocos (Keeling) Islands is a non-self-governing territory of Australia. For **domicile** the code CC must be used. For **nationality** the code AU must be used and the code CC is invalid.

Norfolk Island is a non-self-governing territory of Australia. For **domicile** the code NF must be used. For **nationality** the code AU must be used and the code NF is invalid.

Heard Island and MacDonald Islands are a territory of Australia with no settled inhabitants. The code HM is accordingly invalid for both **domicile** and **nationality**

The use of the code AU for domicile is accordingly limited to Australia only.

NZ, CK, NU, TK: New Zealand ,Cook Islands, Niue, and Tokelau

The Cook Islands are a self-governing state in free association with New Zealand; they form part of the Realm of New Zealand and Cook Islanders are New Zealand citizens. Accordingly, for **domicile** the code CK must be used for the Cook Islands, but for **nationality** the code NZ must be used and the code CK is invalid.

Niue is a self-governing state in free association with New Zealand; it forms part of the Realm of New Zealand and Niueans are New Zealand citizens. Accordingly, for **domicile** the code NU must be used for Niue, but for **nationality** the code NZ must be used and the code NU is invalid.

Tokelau is a New Zealand territory whose future status is currently under discussion; a proposal for free association with New Zealand on a basis similar to that of the Cook Islands and Niue was rejected by referendum in 2006. As an interim arrangement pending the determination of the future status of Tokelau, for **domicile** the code TK must be used, but for **nationality** the code NZ must be used and the code TK is invalid.

The use of the code NZ for **domicile** is accordingly limited to New Zealand only.

IO: British Indian Ocean Territory (BIOT)

The Chagos Islands form the principal part of this territory, and these include the island of Diego Garcia which is a leased to the United States of America as a major military base. The indigenous inhabitants of BIOT have been displaced elsewhere, and the territory accordingly has no settled inhabitants at present (on the above definition). Accordingly the code IO is invalid for **domicile**, but may be used as a **nationality** code for displaced indigenous inhabitants. IO will be made valid for domicile if at some point return of the indigenous inhabitants is permitted.

AQ: Antarctica

Since there are no settled inhabitants in Antarctica, code AQ is invalid for both domicile and nationality. Although there are a number of national territorial claims to parts of Antarctica, these have been in abeyance since the coming into force of the Antarctic Treaty in 1961.

XM, XN, XO, EU, XP–XX, XY, XZ, AA, ZZ: Obsolete Countries, Regions, Stateless, and Unknown

Codes XM, XN, XO, AA may not be used for **domicile**, for which they are invalid. The regional codes EU and XP to XX may be used if domicile is known only to this level of accuracy, in preference to using ZZ which should be a last resort. EU should be used in preference to XP if appropriate. For **nationality**, codes XM, XN, XO may be used only for students who hold these obsolete nationalities and no other, presumably because they emigrated at a time when the nationalities were current and they have never acquired any other nationality. Codes EU and XP to XX may not be used for nationality, for which they are invalid. Code AA should be used only when a student is known to be stateless, and code ZZ should be used when nationality is not known or when it is impossible from the available documentation to assign a nationality from the above list. Codes XY and XZ although listed, are invalid for both domicile and nationality.

QO: Kosovo

A new code for Kosovo (QO) has been added to the classification in acknowledgement of the UK's recognition of Kosovo as an independent nation. This code is available for use for 2007-08, but institutions are not required to re-code existing students.

New entrant to higher education

Short Name	NEWENT		
Туре	field		
Description	This field indicates if a student has previously studied at HE level in the UK for six months or more.		
Applicable to	England NI Scotland Wales		
Coverage	All entrants to courses where Course.COURSEAIM begins D, E, L, M, H, I, J or C and Instance.REDUCEDI = 00		
Base Data Type	NEWENTCodeType		
Field Length	1		
Part Of	Entry profile		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To analyse patterns of entry into HE, including the Higher Education Initial Participation Rate (HEIPR) calculation made by DIUS		
Notes	Institutions should request new entrant to HE information directly from students during the enrolment/registration process, and not infer it from information in the QualificationsOnEntry entity fields. The DIUS are keen to encourage capture of this information directly rather than by inference, and so have offered the following further guidance to reinforce this requirement.		
	Institutions should ask students a direct question along the lines of: 'Have you ever started a higher education course (i.e. above A level or equivalent) in the UK before, and if so did you attend this course for 6 months or more?'		
	The outcome of any previous HE study is not relevant to this particular field. This field is very important to the DIUS because it is used to identify "initial entrants" and it helps to inform the monitoring of progress towards the Government's HE participation targets.		
	What is important is whether or not the student is new to HE level courses, not whether the student is new to the HE institution sector. For example, a student who has already taken an HNC or HND at a UK FE college is not a new entrant to HE. HE, for the purposes of this field, is defined as those programmes of study for which the level of instruction is above that of courses leading to GCE 'A' levels, SCE 'Highers' and the Certificate of Sixth Year Studies, ONC and OND.		
	Code A includes all students who have previously studied a course at HE level for a minimum of six months either at the reporting institution or at another UK institution.		
	Code A should be used for all students who have previously studied at higher education level for a minimum of six months, at a UK institution, whether or not the course resulted in success.		
	A student who started an HE course but subsequently left within six months should be coded B.		

	Overseas students who have previously studied at HE level but not in the UK should be coded B. Where a student transfers from one course to another, this field should NOT be updated where the same Instance.NUMHUS is kept.	
	Code C should not be used as a standard default but only in cases where the information has been sought but is still unknown.	
Owner	HESA	
Version	1.3	
Date modified	2008-08-20	
Change management notes	Amended COMDATE clause in business rule 1	
Business rules	1 Error EntryProfile.NEWENT must exist where Course.COURSEAIM begins D, E, L, M, H, I, J or C and corresponding Instance.REDUCEDI = 00 and Instance.COMDATE is after 31 July 2007 2 Error EntryProfile.NEWENT cannot be coded B or C if EntryProfile.QUALENT2 is 01, 03, 04, 10, 11, 25 or 29 3 Warning EntryProfile.NEWENT should not be coded B or C if EntryProfile.QUALENT2 is 02, 05, 16, 23, 24, 28, 30, 15, 21, 22 or 27	
Valid Entries and Labels	A This student has had prior HE experience in the UK lasting six months or more B This student has not had prior HE experience in the UK lasting six months or more C It is not known whether this student has had prior HE experience in the UK lasting six months or more	

Number of units completed

Short Name	NUMUNITS		
Туре	field		
Description	This field records the number of units completed and achieved from a full qualification or learning aim.		
Applicable to	England Wales		
Coverage	All instances at institutions in England and Wales where Instance.FESTUMK = 1,3 or 4 and Instance.REDUCEDI = 00		
Base Data Type	xs:nonNegativeInteger		
Field Length	2		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	FESTUMK		
Reason Required	To calculate LSC funding for partially completed learning aims.		
Notes	This field and Instance.NOUNTACH will be used to identify the proportion of units achieved by the learner when partially achieving.		
	The length of this field is 2 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 03 or 3.		
Owner	LSC		
Version	1.3		
Date modified	2008-05-30		
Change management notes	Guidance added on the format for numeric data		
Business rules	1 Error Instance.NUMUNITS must exist for institutions in England or Wales where Instance.FESTUMK = 1, 3 or 4 and Instance.REDUCEDI = 00 2 Error Instance.NUMUNITS must not exist for institutions in Northern Ireland or Scotland 3 Error Instance.NUMUNITS must not exist for institutions in England or Wales where Instance.FESTUMK = 2		

Number of units to achieve full qualification

Short Name	NOUNTACH		
Туре	field		
Description	This field records the number of units or modules that are to be completed to achieve the full qualification or learning aim.		
Applicable to	England		
Coverage	All instances at institutions in England where Instance.FESTUMK = 1,3 or 4 and Instance.REDUCEDI = 00

Occupation code

Short Name	SOC2000		
Туре	field		
Description	This field holds the 4-digit SOC2000 occupation code for the student if aged 21 or over at the start of their course, or parental occupation code if the student is under 21.		
Applicable to	England NI Scotland Wales		
Coverage	All entrants where <u>EntryProfile.UCASAPPID</u> exists and <u>Course.COURSEAIM</u> begins with H, I, J or C or is M22 and <u>EntryProfile.DOMICILE</u> = XF, XG, XH, XI, XK, XL, GG, JE or IM		
Base Data Type	SOC2000CodeType		
Field Length	4		
Part Of	Entry profile		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	SEC		
Reason Required	To monitor social background of students in a standard way.		
Notes	A <u>full coding frame for SOC2000</u> can been obtained from <u>The Office for National Statistics</u> UCAS codes 0000 (Not stated), 0007 (Retired), 0008 (Unemployed) and 0009 (Not known) will be accepted as valid entries.		
	For students entering through UCAS this information will be available from UCAS via the *J transaction. Institutions are encouraged to provide this information for other full-time undergraduates		
	In order to provide more complete statistical information for the sector. The student should be asked for parental occupation or, if 21 or over, for their own occupation. For example, "If you are under 21, please give the occupation of your parent, step-parent or guardian who earns the most. If he or she is retired or unemployed, give their most recent occupation. If you are 21 or over, please give your own occupation."		
Owner	Office for National Statistics		
Version	1.2		
Date modified	2008-07-31		
Change management notes	Coverage and Business rule 1 amended to include UK domicile codes		
Business rules	1 Error EntryProfile.SOC2000 must exist where EntryProfile.UCASAPPID exists and Course.COURSEAIM begins H, I, J or C or is M22 and EntryProfile.DOMICILE = XF, XG, XH, XI, XK, XL, GG, JE or IM

<u> </u>	

Other institution providing teaching

Short Name	TINST
Туре	field
Description	This field identifies collaborating institutions with a UK Provider Reference Number (UKPRN) from the UK Register of Learning Providers or a generic code.
Applicable to	England NI Scotland Wales
Coverage	All module where Module.PCOLAB is greater than zero
Base Data Type	TINSTCodeType
Field Length	8
Part Of	Module
Minimum Occurrences	0
Maximum Occurrences	2
Related Fields	PCOLAB
Reason Required	To monitor patterns of collaborative study.
Notes	In cases where there are more than two other institutions providing teaching, those with the most input should be selected.
	The Valid entry codes have been created for HEIs and certain FECs using the <u>UK</u> Register of Learning Providers. Where Other institution providing teaching does not appear in the Valid entries list please code:
	Generic codes:
	 4001 Other UK institution 4002 Other Non-UK institution 4003 Other public body in the UK 4004 Other private body in the UK
	Code 4001 should be used only exceptionally for a UK HEI or FEC that has not been included under the valid entries, but which would be expected to be included in such a list in future years.
	Code 4002 should be used for any body (educational or other) based outside the UK.
	If the institution is providing teaching at the workplace then no entry is required in this field. Where the institution is buying in teaching from another body, which could be the students employer, these cases will be identified by the codes 4003 and 4004.
	If a student is coded 01 - 80 in <u>Instance.FROUTARR</u> then this field must be coded 4001 - 4004.

Outcome of ITT instance

Short Name	ОИТСОМЕ
Туре	field
Description	This field describes the course outcome for an initial teacher training student.
Applicable to	England Wales
Coverage	All qualification awarded records at institutions in England and Wales where Course.TTCID = 1 or 8
Base Data Type	OUTCOMECodeType
Field Length	1
Part Of	Qualifications awarded
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	For TDA and HEFCW to monitor the outcome of ITT courses.
Notes	In codes 6, 7, 8, A and B 'Other standards met/not met' refers to the academic standards of the institution's ITT course, including the teaching practice element, which are monitored by the institution. 'Skills test' refers to the national skills tests in numeracy, literacy and information and communications technology (ICT) which are assessed externally via TDA.
	Students who fail their teaching practice should be coded 7 or 8.
	Either of codes A and B should be used when the skills test has not yet been taken.
	Codes 6 - 8 and A - B are available only to institutions in England.
	Code C 'QTS withheld' should be used by institutions in Wales only where QTS is withheld, including those cases where students are awarded a degree or other qualification but not QTS and where students fail their teaching practice. It is expected that students coded as C who are subsequently awarded QTS should have this recorded in a subsequent return to HESA as an award from dormant status.
	Resit Exams and/or Results from Late Exam Boards: Students who complete their instance by 31 July but who have resit examinations to take and/or whose final confirmation of award by exam boards may be after this date should be returned to HESA as leavers, with a dateleft in the reporting period ending that 31 July. If their results are known before the Student Record data collection closes, these results should be included in the return. Records for such students will be included in the POPDLHE (assuming that they meet all other criteria). However, if the results are not known before the Student Record data collection closes, a record should be submitted with a dateleft in the reporting period ending that 31 July completed and code 98 'Completion of course - result unknown' in RSNEND. Once known, these results should be returned in the next reporting period by submitting a record with the appropriate dormant code in Instance.MODE. The date returned in Instance.ENDDATE must be the original dateleft and not be up-dated. Records returned in this way will not be included in the POPDLHE.

	Institutions may wish to decommit their return late in the data collection period in order to include results from late exam or re-sit boards.		
	This same guidance applies to ITT TDA students where the award of QTS may be delayed. ITT TDA students may finish their course in June/July of the HESA reporting year. This date should be date recorded in ENDDATE. However the institution may not know whether the student has been awarded QTS until later. If award information is known before the HESA data collection closes at the end of November, then this should be included in QUAL and OUTCOME. TDA have confirmed that trainees who obtain a successful award up until 1 November, and are shown as such in the main HESA return, will be counted in the profiles publication. Award dates after 31 October should be included in the following HESA data collection. In neither case should ENDDATE be up-dated.		
	It is expected that students coded other than 1 in OUTCOME who are subsequently awarded QTS should have this recorded in QualificationsAwarded.QUAL and QualificationsAwarded.OUTCOME in a subsequent return to HESA as an award from dormant status. In this case, the QUAL code may reflect award of QTS only, i.e. code I71.

Short Name	PGCESBJ		
Туре	field		
Description	This field holds the subject(s) of the student's undergraduate degree.		
Applicable to	England NI Scotland Wales		
Coverage	All entrants where Course.COURSEAIM =M71 or H71 and Instance.REDUCEDI = 00		
Base Data Type	PGCESBJCodeType		
Field Length	4		
Part Of	Entry profile		
Minimum Occurrences	0		
Maximum Occurrences	3		
Related Fields	COURSEAIM		
Reason Required	To provide data on the qualifications of teachers		
Examples	R110 - French language		
Notes	Code 9999 is to be used for 'Not known' and code 9998 is to be used for 'Not applicable'.		
	This field should be completed for all postgraduate course entrants, including where the previous degree is a higher or overseas degree.		
	Not applicable includes those students who do not have a UK undergraduate degree. This may be the case, for example, with students studying for PGCE (FE).		
	Codes G000 and G900 are not valid entries in this field.		
	Joint honours degrees must be returned with up to three occurrences if this field. The generic codes that consist of a subject group and letter (and Y000) can be used in this field to describe a truly interdisciplinary programme.		
	The TDA have advised that their preference is for institutions to code subjects at 3-digit JACS2 level, e.g. R110 and F160 - French language and Organic chemistry. The balance between two subjects cannot be separately indicated, and so it will have to be assumed to be equal		
Owner	HESA/UCAS		
Version	1.2		
Date modified	2008-06-30		
Change management notes	Label for T900 amended in Valid entries		

Business rules	1 Error	EntryProfile.PGCESBJ must exist where Course.COURSEAIM = M71 or H71 and corresponding Instance.REDUCEDI = 00

Parental education

Short Name	PARED
Туре	field
Description	This field records information about whether an entrant's parents have higher education qualifications.
Applicable to	England Scotland
Coverage	All entrants to institutions in England and Scotland where EntryProfile.DOMICILE = XF, XG, XH, XI, XK, XL, GG, JE or IM and Course.COURSEAIM = M22, H00, H11, H16, H18, H22, H23, I00, I11, I16, J10, J16, J20, J26, J30, C20, C30 and Instance.REDUCEDI = 00 and Instance.COMDATE is after 2007-07-31
Base Data Type	PAREDCodeType
Field Length	1
Part Of	Entry profile
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	This data will allow monitoring of another aspect of widening participation and may be used for the production of performance indicators.
Notes	Institutions should ask the following question of all entrants for whom this information is required:
	The following question is about your parents' level of education. This includes natural parents, adoptive parents, step-parents or guardians who have brought you up.
	Do any of your parents (as defined above) have any higher education qualifications, such as a degree, diploma or certificate of higher education?
	Yes No Don't know Information refused
	Provision of this information does not constitute the disclosure of third party personal information as defined in the Data Protection Act 1998. This is because the question does not relate to a specific person.
	Note: From 2008/09 onwards this question will be asked on the UCAS application form and the data for UCAS entrants provided to institutions by UCAS. As a consequence coverage of the field will be extended in 2008/09 to include UCAS entrants to institutions in Wales and Northern Ireland. Institutions in England and Scotland will still need to collect this information directly from relevant non-UCAS entrants.

Percentage not taught by this institution

Short Name	PCOLAB
Туре	field
Description	This field indicates the percentage of the module in this reporting period for which other arrangements for teaching have been made, e.g. taught collaboratively between two institutions. The percentage represented by this field denotes the proportion not taught by the returning institution.
Applicable to	England NI Scotland Wales
Coverage	All modules
Base Data Type	PercentType
Field Length	5
Part Of	Module
Minimum Occurrences	1
Maximum Occurrences	1
Related Fields	TINST
Reason Required	To monitor patterns of collaborative study.
Notes	Proportion not taught by this institution should relate to the FTE reported in Module.FTE.
	If this field is anything but zero, indicating that some part of the course is taught elsewhere then Module.TINST must be completed.
	This field relates to the proportion not taught by the reporting institution's staff, and not the location at which the teaching takes place.
	It is expected that students out on placement or exchange will be shown as zero in this field.
	The length of this field is 5 characters, however the move to XML enables data to be returned with or without leading zeros or the decimal place, e.g. 005.0 or 5.0 or 5
Owner	HESA
Version	1.1
Date modified	2008-05-30
Change management notes	Guidance added on the format for numeric data
Business rules	1 Error Module.PCOLAB must be greater than 0 where Module.TINST exists

Percentage of module taught in Celtic language

Short Name	LANGPONT		
Туре	field		
Description	This field is used to indicate the percentage of the module that is taught through the medium of a Celtic language. It can contain a value between 0 and 100 and can be recorded to one decimal place.		
Applicable to	NI Scotland Wales		
Coverage	All modules at institutions in Wales, Scotland and Northern Ireland		
Base Data Type	PercentType		
Field Length	5		
Part Of	Module		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	MODLANG		
Reason Required	To monitor pattern of provision in a Celtic language.		
Notes	Celtic languages are Welsh, Gaidhlig and Irish.		
	A 0 entry in this field indicates that the module is taught entirely in English (or another non-Celtic language).		
	For institutions in Wales, the percentage should be based on all delivery that is through the medium of Welsh.		
	For further guidance on the completion of this field, and in particular with reference to activities which constitute learning through the medium of a Celtic language, please refer to the institution's funding council.		
Owner	HESA		
Version	1.3		
Date modified	2008-05-30		
Change management notes	Guidance notes updated for institutions in Wales		
Business rules	1 Error Module.LANGPCNT must exist for institutions in Scotland, Wales or Northern Ireland 2 Error Module.LANGPCNT must be greater than 0 where Module.MODLANG = 1, 2 or 3 3 Error Module.LANGPCNT must not exist for institutions in England		

PhD submission date

Short Name	PHDSUB		
Туре	field		
Description	This field holds the date of first submission of thesis.		
Applicable to	England NI Scotland Wales		
Coverage	All instances where <u>Instance.RCSTDNT</u> is not 99 and <u>Course.COURSEAIM</u> = D00 and <u>Instance.REDUCEDI</u> = 00 or 04. Optional for all other instances where <u>Course.COURSEAIM</u> = D00 and <u>Instance.REDUCEDI</u> = 00 or 04		
Base Data Type	DateWithNullStructure9		
Field Length	10		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	RCSTDNT RCSTDID		
Reason Required	To assess time taken by students to submit.		
Notes	All date fields in the Student Record must be completed using the ISO8601 format of YYYY-MM-DD. The specification of this field follows the data policies set out in the MIAP Common Data Definitions project. If the thesis has not been submitted an empty element should be returned with the ReasonForNull attribute set to 9 (not applicable), i.e: <pre></pre> <pre></pre> <pre></pre> <pre>CPHDSUB ReasonForNull="9"></pre> <pre>PHDSUB ReasonForNull="9"></pre> <pre>This date should not be updated if a thesis is resubmitted.</pre>		
	Where Y0/Y1/Y2 appear in business rules, these refer to the reporting period Y1-Y2 (e.g. for the 2007-08 reporting period, Y0 is 2006, Y1 is 2007 and Y2 is 2008).		
Owner	HESA		
Version	1.4		
Date modified	2008-05-30		
Change management notes	Datatype updated from DateWithNullStructure to DateWithNullStructure9 to restrict ReasonForNull to 9		
Business rules	1 Error Instance.PHDSUB must exist where Instance.RCSTDNT is not 99 and Course.COURSEAIM = D00 and Instance.REDUCEDI = 00 or 04 2 Error Where Instance.PHDSUB exists then Course.COURSEAIM must = D00 3 Error Instance.PHDSUB must not be null except when ReasonForNull = 9 4 Error Instance.PHDSUB must be null when ReasonForNull = 9 5 Error Instance.PHDSUB must not be greater than Y2-07-31		

Postcode

Short Name	POSTCODE
Туре	field
Description	This field identifies the postcode of the student's permanent or home address prior to entry to the course. It is not necessarily the correspondence address of the student.
Applicable to	England NI Scotland Wales
Coverage	All entrants where EntryProfile.DOMICILE = XF, XG, XH, XI, XK, XL, GG, JE or IM and Instance.REDUCEDI = 00 or 01
Base Data Type	PostCodeWithNullStructure
Field Length	8
Part Of	Entry profile
Minimum Occurrences	0
Maximum Occurrences	1
Related Fields	DOMICILE
Reason Required	To monitor student population by source location, especially in the widening participation context.
Examples	A typical postcode such as GL50 3DA would be coded with a blank in the fifth character position. A postcode such as B1 6SR would have a blank in position 3. The part of the postcode before the space is known as the outward part of the postcode and can be 2, 3 or 4 characters long. The part of the postcode after the space is known as the inward part of the postcode and is a fixed length of 3 characters. The space between the outward and inward parts of the postcode must always be shown as part of the postcode.
Notes	UK domiciled, for the purposes of this field, means domiciled in England, Wales, Scotland, Northern Ireland, Channel Islands or Isle of Man. In the event that the full postcode is not known, institutions must return at least the outward part. The first part of the postcode (the outward part) is essential for allowing HESA to do geographic analysis.
	For students entering through UCAS this information will be available from UCAS via the *J transaction
	Information about postcodes and postcodes for known addresses can be obtained from Postcodes Online at: www.royalmail.com .
	Country of domicile is collected in EntryProfile.DOMICILE.
	If no valid postcode (full or outward only) can be ascertained an empty element should be returned with the ReasonForNull attribute set to 1 (not known), i.e:
	<postcode reasonfornull="1"></postcode>

	Note that for funding allocations HEFCE, HEFCW and WAG-DCELLS can only use data that includes both the outward and inward parts of the postcode.

Date modified	2007-09-19	
Change management notes	Added new business rules 2, 3 and 4	
Business rules	1 Error EntryProfile.POSTCODE must exist where EntryProfile.DOMICILE = XF, XG, XH, XI, XK, XL, GG, JE or IM and corresponding Instance.REDUCEDI = 00 or 01 2 Error EntryProfile.POSTCODE must not be null except when ReasonForNull = 1 3 Error EntryProfile.POSTCODE must be null when ReasonForNull = 1 4 Error EntryProfile.POSTCODE must not exist where EntryProfile.DOMICILE is not in (XF, XG, XH, XI, XK, XL, GG, JE or IM)	

Qualification awarded

Short Name	QUAL	
Туре	field	
Description	This field records the qualification awarded.	
Applicable to	England NI Scotland Wales	
Coverage	All qualification awarded records	
Base Data Type	QUALCodeType	
Field Length	3	
Part Of	Qualifications awarded	
Minimum Occurrences	1	
Maximum Occurrences	1	
Related Fields	COURSEAIM	
Reason Required	To allow analysis of qualifications awarded	
Notes	For some students whose course qualification aim may be, for example, first degree but who terminate their studies after a successful second year, occasionally a different qualification such as an HND or DipHE may be awarded. It is the awarded qualification which must be coded here.	
	This field records the qualification obtained by the student during the reporting year. If a student is awarded more than one qualification during the reporting year then the QualificationsAwarded element should be repeated. A qualification obtained is not assumed from Instance.RSNEND and Instance.ENDDATE	
	This field may be left blank for FE level students in England and Wales who are coded 6, A or B in Instance.PROGRESS.	
	Some professional awarding bodies do not currently release results information to institutions. Where this is the case, institutions should leave this field blank and complete field Instance.RSNEND with code 98 'Completion of course - result unknown'.	
	Interim Awards: In most cases qualifications are obtained at the end of a course. Therefore typically where there is a QualificationsAwarded a reason for leaving and a date left would be expected. It is recognised, however, that there are a few courses where interim qualifications are actually awarded and so these fields may not be completed. Institutions that award interim qualifications for students who are continuing on a course can return this information to HESA in the reporting year in which the interim qualification is awarded if they wish, in which case Instance.ENDDATE should not be completed in order to indicate that these students are continuing on the course. However records returned in this way will not be included in the POPDLHE. Alternatively institutions can return interim qualifications when the student completes the course by completing the QualificationsAwarded fields and indicating the date the student completed the course in Instance.ENDDATE . Records returned in this way will be included in the POPDLHE (assuming that all other criteria are met).	
	Resit exams and/or results from late exam boards: Students who complete their	

instance by 31 July but who have resit examinations to take and/or whose final confirmation of award by exam boards may be after this date should be returned to HESA as leavers, with a dateleft in the reporting period ending that 31 July. If their results are known before the Student Record data collection closes, these results should be included in the return. Records for such students will be included in the POPDLHE (assuming that they meet all other criteria). However, if the results are not known before the Student Record data collection closes, a record should be submitted with a dateleft in the reporting period ending that 31 July completed and code 98 'Completion of course - result unknown' in RSNEND. Once known, these results should be returned in the next reporting period by submitting a record with the appropriate dormant code in Instance.MODE. The date returned in Instance.ENDDATE must be the original dateleft and not be up-dated. Records returned in this way will not be included in the POPDLHE.

Institutions may wish to decommit their return late in the data collection period in order to include results from late exam or re-sit boards.

This same guidance applies to **ITT TDA** students where the award of QTS may be delayed.

ITT TDA students may finish their course in June/July of the HESA reporting year. This date should be date recorded in ENDDATE. However the institution may not know whether the student has been awarded QTS until later. If award information is known before the HESA data collection closes at the end of November, then this should be included in QUAL and OUTCOME. TDA have confirmed that trainees who obtain a successful award up until 1 November, and are shown as such in the main HESA return, will be counted in the profiles publication. Award dates after 31 October should be included in the following HESA data collection. In neither case should ENDDATE be up-dated.

It is expected that students coded other than 1 or 4 in OUTCOME who are subsequently awarded QTS should have this recorded in QualificationsAwarded.QUAL and QualificationsAwarded.OUTCOME in a subsequent return to HESA as an award from dormant status.

Qualification grade

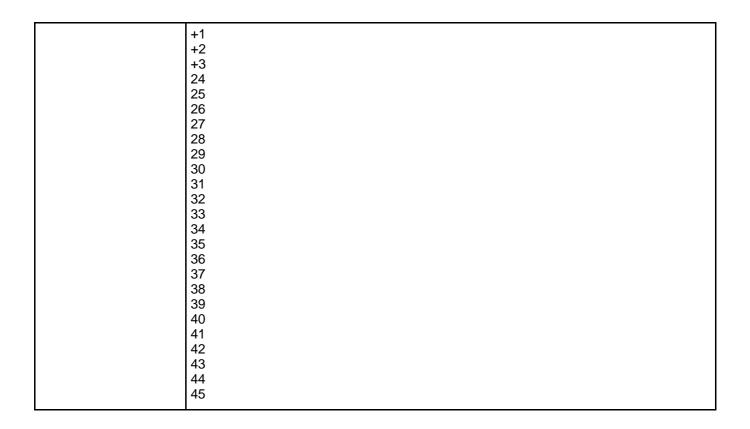

Short Name	QUALGRADE		
Туре	field		
Description	This field collects the grade of qualification obtained on entry to the instance		
Applicable to	England NI Scotland Wales		
Coverage	All Qualification on entry records		
Base Data Type	QUALGRADECodeType		
Field Length	11		
Part Of	Qualifications on entry		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	To allow detailed analysis of qualifications on entry and consequent progression.		
Notes	The awarding bodies have given their consent, via the Joint Council for Qualifications (JCQ), for some of the results data that they forward to UCAS to be shared with HEIs for admission purposes, to also be used in preparing the Student Record from 2007/08. The detail of the agreement is still to be finalised.		
	This data will be made available to institutions by UCAS (through the *J transaction). The HESA record will work to the existing UCAS coding frame.		
	Grades may be valid with a number of qualifications, so the list below is a list of all grades valid in this field. The meaning of each grade can vary depending on which qualification it is associated with.		
	Further explanation of which grades belong to which qualification is available from the UCAS website.		
	Institutions are encouraged to provide this information for other full-time undergraduate students, in order to contribute more complete statistical information for the sector

Qualification sitting

Short Name	QUALSIT	
Туре	field	
Description	This field identifies which exam sitting the qualification on entry to the instance was obtained.	
Applicable to	England NI Scotland Wales	
Coverage	All Qualification on entry records	
Base Data Type	QUALSITCodeType	
Field Length	1	
Part Of	Qualifications on entry	
Minimum Occurrences	0	
Maximum Occurrences	1	
Reason Required	To allow detailed analysis of qualifications on entry and consequent progression.	
Notes	The awarding bodies have given their consent, via the Joint Council for Qualifications (JCQ), for some of the results data that they forward to UCAS to be shared with HEIs for admission purposes, to also be used in preparing the Student Record from 2007/08. The detail of the agreement is still to be finalised. This data will be made available to institutions by UCAS (through the *J transaction). The HESA record will work to the existing UCAS coding frame.	
	Institutions are encouraged to provide this information for other full-time undergraduate students, in order to contribute more complete statistical information for the sector	
Owner	UCAS	
Version	1.2	
Date modified	2008-05-30	
Change management notes	Updated datatype from xs:string to QUALSITCodeType	
Business rules		
Valid Entries and Labels	S Summer W Winter 9 Not known

Qualification type

Short Name	QUALTYPE		
Туре	field		
Description	This field identifies the type of qualification obtained on entry to the instance, for example 'A' Level, Higher.		
Applicable to	England NI Scotland Wa	ales	
Coverage	All Qualification on entry	y records	
Base Data Type	QUALTYPECodeType		
Field Length	2		
Part Of	Qualifications on entry		
Minimum Occurrences	1		
Maximum Occurrences	1		
Reason Required	To allow detailed analys	sis of qualifications on entry and consequent progression	
	The awarding bodies have given their consent, via the Joint Council for Qualifications (JCQ), for some of the results data that they forward to UCAS to be shared with HEIs for admission purposes, to also be used in preparing the Student Record from 2007/08. The detail of the agreement is still to be finalised. This data will be made available to institutions by UCAS (through the *J transaction). The HESA record will work to the existing UCAS coding frame. There are three cases where for 2006-07 there are two codes for the same qualification. From 2008-09, the UCAS code only will be available for these qualifications.		
	Qualificatio Code	Other code	
	Certification of Personal CO Effectiveness	PE	
	OCR National Certificate	ОС	
	OCR National Diploma	OD	
	students, in order to cor order for institutions to b in the UCAS Tariff, but t	iged to provide this information for other full-time undergraduate intribute more complete statistical information for the sector. In the be able to add information about qualifications that are included for which UCAS do not provide electronic results information, been added to the end of the list.

Qualifications awarded

Short Name	QualificationsAwarded	
Туре	entity	
Description	Qualification or credit obtained during – or at the end of – an instance	
Applicable to	England NI Scotland Wales	
Coverage	Compulsory for all instances where <u>Instance.ENDDATE</u> is not null and <u>Instance.RSNEND</u> = 01 and <u>Instance.REDUCEDI</u> = 00, 01 or 04 (Optional for all other instances)	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	2	
Related Fields	ENDDATE RSNEND	
Has Parts	Qualification awarded (QUAL) Classification (CLASS) Outcome of ITT instance (OUTCOME) Teaching qualification gained sector (TQGSEC) Teaching qualification gained subject (TQGSUB)	
Reason Required	This entity is defined to hold information about the qualifications awarded and to allow multiple awards to be recorded in the hierarchical data structure.	
Notes	Qualifications should be returned in the reporting year in which they are awarded. Return of one or more qualifications does not indicate the end of an instance.	
Owner	HESA	
Version	1.4	
Date modified	2008-09-24	
Change management notes	Business rule 1 re-worded for further clarity	
Business rules	1 Error QualificationsAwarded entity must exist where Instance.ENDDATE is not null and Instance.RSNEND = 01 and Instance.REDUCEDI = 00, 01 or 04 unless either Course.COURSEAIM ends in 99 or (English or Welsh institution and Instance.FESTUMK = 1 or 4 and Instance.PROGRESS = 6, A or B) 2 Warning QualificationsAwarded.QUAL should exist where Instance.RSNEND = 98 and Course.COURSEAIM begins D, E, L, M, H, I, J or C and Instance.REDUCEDI = 00, 01 or 04.	

Qualifications on entry

Short Name	QualificationsOnEntry	
Туре	entity	
Description	Detail of the qualifications held by the student when the instance begins	
Applicable to	England NI Scotland Wales	
Coverage	All entrants where EntryProfile.UCASAPPID exists and this data has been provided by UCAS	
Part Of	Entry profile	
Minimum Occurrences	0	
Maximum Occurrences	unbounded	
Has Parts	Qualification type (QUALTYPE) Qualification subject (QUALSBJ) Qualification grade (QUALGRADE) Qualification year (QUALYEAR) Qualification sitting (QUALSIT)	
Reason Required	This entity exists to hold information about the individual qualifications a student holds when they begin an instance.	
Notes	The awarding bodies have given their consent, via the Joint Council for Qualifications (JCQ), for some of the results data that they forward to UCAS to be shared with HEIs for admission purposes, to also be used in preparing the Student Record from 2007/08. The detail of the agreement is still to be finalised.	
	This information is only required for UCAS entrants {full-time undergraduate students} with tariff-bearing qualifications.	
	Institutions are however encouraged to provide the same information for other {non-UCAS} full-time undergraduate students, in order to contribute more complete statistical information for the sector.	
	If returning qualification on entry data for a continuing student in order to add to or correct data returned in a previous year, then the complete set of qualifications should be returned not just the updated ones.	
	The existence of this entity cannot be tested by validation rules. However, submissions will be compared with the data supplied to HESA by UCAS for quality assurance purposes.

Qualified Teacher Status

Short Name	QTS		
Туре	field		
Description	This field indicates whether a student on an INSET teacher training course holds Qualified teacher status (QTS) or not.		
Applicable to	England NI		
Coverage	All instances at institutions in England or Northern Ireland where Course.TTCID = 5 and Instance.REDUCEDI = 00, 01 or 04		
Base Data Type	QTSCodeType		
Field Length	1		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	TTCID		
Reason Required	To distinguish INSET provision that HEFCE is responsible for (students not holding QTA) and provision that TDA are responsible for (students holding QTS).		
Notes	TDA and HEFCE have given a working definition of an INSET course as: An INSET/In-service course is one for which the primary (but not necessarily the only) purpose is to improve the effectiveness of teachers, lecturers or trainers. In considering whether this is the purpose of particular course, institutions may wish to consider the content of the course and course literature, including prospectuses and any other marketing material.		
Owner	HESA		
Version	1.1		
Date modified	2008-02-29		
Change management notes	Business rules 4 and 5 added		
Business rules	1 Error Instance.QTS must exist for institutions in England and Northern Ireland where Course.TTCID = 5 and Instance.REDUCEDI = 00, 01 or 04 2 Error Instance.QTS cannot be coded 4 where (EntryProfile.QUALENT2 exists and is coded 03 or 10) 3 Error Instance.QTS cannot be coded 3 where (EntryProfile.QUALENT2 exists and is coded 04, 37 - 98) 4 Error Instance.QTS must not exist for institutions in Scotland or Wales 5 Error Instance.QTS must not exist for institutions in England and Northern Ireland where Course.TTCID not = 5		
Valid Entries and Labels	Student holding QTS on an in-service/education of teachers (INSET) course Student not holding QTS on an in-service/education of teachers (INSET) course		

RAE Data

Short Name	RAEData	
Туре	entity	
Description	A set of fields that describe the RAE unit of assessment relating to an Instance	
Applicable to	England NI Scotland Wales	
Coverage	All instances where <u>Course.COURSEAIM</u> =L00, L80, L90 or L99 or begins with D and <u>Instance.REDUCEDI</u> = 00	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	3	
Has Parts	RAE unit of assessment (UOA2008) Unit of assessment percentage (UOAPCNT)	
Reason Required	This repeating element exists to allow an instance to be linked to more than one RAE unit of assessment.	
Notes	The sum of RAEData.UOAPCNT must equal 100 for each instance in which it occurs.	
Owner	HESA	
Version	1.2	
Date modified	2008-06-30	
Change management notes	Business rule 2 amended for clarification	
Business rules	1 Error RAEData entity must exist where Course.COURSEAIM = L00, L80, L90 or L99 or begins with D and corresponding Instance.REDUCEDI = 00 RAEData entity must not exist unless (Course.COURSEAIM = L00, L80, L90 or L99 or Course.COURSEAIM begins with D)	

RAE unit of assessment

Short Name	UOA2008		
Туре	field		
Description	This field should record the Unit of Assessment (UOA) to which the student's supervisor was returned in the 2008 Research Assessment Exercise (RAE2008).		
Applicable to	England NI Scotland Wales		
Coverage	All RAEData records		
Base Data Type	UOA2008CodeType		
Field Length	2		
Part Of	RAE Data		
Minimum Occurrences	1		
Maximum Occurrences	1		
Related Fields	UOAPCNT		
Reason Required	Collection of this information will allow better monitoring of funding allocations by units of assessment.		
Notes	A students should be allocated to the same Unit of Assessment as their supervisor(s). For the 2007/08 HESA Staff Record all academic staff are required to be allocated to RAE Units of Assessment, even if they are not to be submitted to the RAE. Therefore all students will be able to be allocated appropriately regardless of whether their supervisor is submitted.		
	Where a student was supervised by more than one member of staff and/or these supervisors are returned in more than one UOA, the student may be returned split either according to the agreed division of responsibility, or in proportion to the number of supervisors.		
	If the student's supervisor was not employed by the reporting institution at the time of most recent RAE, then the student should be assigned to the unit of assessment which is closest in academic content to their subject of study. (The unit of assessment chosen should be from the list of subjects defined by the most recent RAE, not any future RAE.)		
	This field occurs as a pair with <u>RAEData.UOAPCNT</u> with a maximum of 3 pairs permitted.

Reason for ending instance

Short Name	RSNEND	
Туре	field	
Description	This field is used to indicate for what reason the student left the student instance detailed in this return.	
Applicable to	England NI Scotland Wales	
Coverage	All instances where <u>Instance.ENDDATE</u> is completed and where <u>Instance.REDUCEDI</u> = 00, 01, 02 or 04	
Base Data Type	RSNENDCodeType	
Field Length	2	
Part Of	Instance	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	ENDDATE	
Reason Required	To monitor transfer/progression/completion.	
Notes	Institutions should only complete this field where they are completing a student instance, guidance on when a new student instance is required is given in Instance.NUMHUS. Normally where a student progresses from one course directly onto another at the same level (e.g. HND to Degree, MPhil to PhD) a new student instance is not required and hence this field would not be completed although the QualificationsAwarded fields may be. If a student gains a qualification after completing a course, but not the qualification they were aiming for, then they should be coded 01 'Successful completion of course'. Code 02 'Academic failure/left in bad standing/not permitted to progress' is considered to be different from simply dropping out, code 07, which may be more closely related to personal reasons. Code 02 is intended to be for a fail at any stage. It is the code to be used for those students who fail assessment at, for example, the end of the first or second year of a three-year course and therefore leave the course, as well as for those students who have unsuccessfully completed their qualification aim. Code 08 'Written off after lapse of time': it is at the institutions discretion whether to write-off an inactive student after a period of time. Code 09 'Exclusion' is the breaking of institutional rules, either behavioural or financial. Code 98 'Completion of course - result unknown' implies that there will be further returns for the student - through a dormant record for example - to report results and reason for leaving.	
	In onwards analysis Statutory Customers and HESA may group codes 03, 04, 06, 07, 08, 09, 10 and 11 into a single category of 'Other'.	

	An entry in this field means that an entry in Instance.ENDDATE will also be expected.
Owner	HESA
Version	1.0
Business rules	1 Error Instance.RSNEND must exist where Instance.ENDDATE is not null and Instance.REDUCEDI = 00, 01, 02 or 04 2 Error Instance.RSNEND must not exist where Instance.FUNDCOMP = 3 3 Warning Instance.RSNEND should exist where QualificationsAwarded.QUAL exists
Valid Entries and Labels	01 Successful completion of course 02 Academic failure/left in bad standing/not permitted to progress 03 Transferred to another institution 04 Health reasons 05 Death 06 Financial reasons 07 Other personal reasons & dropped out 08 Written off after lapse of time 09 Exclusion 10 Gone into employment 11 Other 98 Completion of course - result unknown 99 Unknown

Reason for partial or full non-payment of tuition fees

Short Name	NONPAY		
Туре	field

Research council student

Short Name	RCSTDNT		
Туре	field		
Description	This field indicates whether a student has at any point during this instance been funded in whole or part by a Research Council.		
Applicable to	England NI Scotland Wales		
Coverage	All instances where Course.COURSEAIM begins D, E, L or M (except M22) and Instance.REDUCEDI = 00 or 04		
Base Data Type	RCSTDNTCodeType		
Field Length	2		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	RCSTDID		
Reason Required	To allow identification of Research Council funded students for linking to RC data.		
Notes	Once this field has been recorded as anything other than 99, it should not be changed to 99 for this instance. This field covers all RC studentship schemes.		
	All Research Council funded students must be coded to the appropriate Research Council irrespective of whether they are named in the award or are allocated a studentship from Research Council funding made available to the institution.		
	Although a student may not be in receipt of a full award via a Research Council funding mechanism or scheme, the appropriate Research Council coding 01-09 below is required in all cases.		
	EPSRC/MRC students can receive funding via a Doctoral Training Account, on a variety of funding patterns. See below for funding patterns as at October 2006.		
	 Fees only basis Full award (stipend and fees @ UK rate) 50/50 (stipend and fees) e.g. RC/ industrial partner or split between two RCs. 		
	Students holding Dorothy Hodgkin postgraduate awards should be coded according to the Research Council providing the funding, 01-09 below and Student.NATION must be completed.		
	Research students at institutions in Northern Ireland who are funded by DELNI should be coded 99, Not a Research Council student in this field.

Related Fields	RCSTDNT	
Reason Required	To allow linking of HESA data to that held by the Research Councils.	
Notes	This field records the Personal identifier issued by the Je-S (Joint electronic System) used since December 2004 to capture student and researcher details by EPSRC (for all student schemes) and MRC (for DTG students). Identifiers can be obtained from the Je-S Student\Researcher details screens on the Je-S Portal.	
	Only personal identifiers in the format XnnnnnC, where X is an alpha character, n is numeric and C is an alpha check digit, should be returned.	
	There is a joint Research Council project that is due to complete during 2007 (on current plans) on a phased implementation basis for the remaining Research Councils. PIDs will therefore become available for new Research Council (RC) PhD students as the project progresses – NERC will implementing the project initially with the capture of MSc students. The provision of PIDS for former RC students will be dependant on the migration of data into a common data source.	
Owner	The Research Councils	
Version	1.4	
Date modified	2008-03-30	
Change management notes	Amended guidance to clarify that only identifiers in the format XnnnnnC should be returned, and that identifiers can be obtained from the Je-S Student\Researcher details screens on the Je-S Portal

Scottish Candidate Number

Short Name	SCN
Туре	field
Description	This field records the Scottish Candidate Number (formerly SCOTVEC number) which is allocated to pupils at school and in FE colleges who undertake Scottish Qualifications Authority (formerly SCOTVEC or SEB Scottish Examination Board) courses. Many Scottish students will therefore have a Scottish Candidate Number, and coverage should increase over the next few years to cover almost all Scottish entrants. The Scottish Candidate Number should be completed for all students who have one.
Applicable to	England NI Scotland Wales
Coverage	All students where EntryProfile.DOMICILE = XH and EntryProfile.DOMICILE = XH and EntryProfile.DOMICILE = XH and Course.COURSEAIM begins H, I, J, C, P, Q, R or S
Base Data Type	SCNWithNullStructure
Field Length	9
Part Of	Student
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	Allows linkage between HESA records and earlier records of achievement on pre-HE Scottish courses. Such linkages can provide additional information about the flows between school, further education and higher education.
Notes	The Scottish Candidate Number consists of eight decimal data digits followed by a decimal check digit. The first two data digits are the final two digits of the year of issue (so 2004/05 is 05); note that this implies the occurrence of leading zeroes on numbers issued during the current decade, which must be retained. The next six digits are arbitrary, and are unique within the year but are not guaranteed to be unique across years. The final digit is a check digit calculated according to a modulus 11 algorithm using the weights 3 2 7 6 5 4 3 2. • Each digit is multiplied by its weight factor and the results totalled • The total is divided by 11 • Take the remainder from this division and subtract it from 11
	The result of the subtraction is the check digit If the remainder from the division is 1 and result of the subtraction is therefore 10 the number is incorrect. If there is no remainder from the division, the check digit will be 0. All UCAS entrants domiciled in Scotland require a Scottish Candidate Number irrespective of whether they are studying in Scotland or elsewhere in the United Kingdom. A Scottish Candidate Number is not applicable to non-Scottish domiciled entrants studying at institutions in Scotland. UCAS collects the Scottish candidate number for all Scottish domiciled new entrants. Institutions in Scotland will need to collect this information for direct entrants of Scottish domicile.
	For students entering through UCAS this information will be available from UCAS via the *J transaction.

	I	
	If the Scottish Candidate Number is not known, an empty element should be returned with the ReasonForNull attribute set to 1 (not known), i.e:	
	<scn reasonfornull="1"></scn>	
	A Scottish Candidate Number is not required for those students entering postgraduate courses.	
Owner	Scottish Qualifications Authority

Special fee indicator

Short Name	SPECFEE
Туре	field
Description	This field records where a special or 'non-standard' fee is due - in line with the student support regulations.
Applicable to	England NI Scotland Wales
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00
Base Data Type	SPECFEECodeType
Field Length	1
Part Of	Instance
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	To allow financial calculations to take account of fee offsets.
Notes	Standard/prescribed fee refers to the prescribed fee for students who entered before 2006/07 or the standard variable fee charged by the institution for those who entered in or after 2006/07.
	Special or 'non-standard' fees - in line with the student support regulations
	For sandwich placements these are:
	An academic year: (i) during which any periods of full-time study are in aggregate less than 10 weeks; or (ii) if in respect of that academic year and any previous academic years of the course the aggregate of any one or more periods of attendance which are not periods of full-time study at the institution (disregarding intervening vacations) exceeds 30 weeks.
	For language year abroad these are:
	An academic year: (i) during which any periods of full-time study at the institution in the United Kingdom are in aggregate less than 10 weeks; or (ii) if in respect of that academic year and any previous academic years of the course the aggregate of any one or more periods of attendance which are not periods of full-time study at the institution in the United Kingdom (disregarding intervening vacations) exceeds 30 weeks.
	Code 4 'Final year of full-time course lasting less than 15 weeks' and Code 5 'Final year of a full-time lasting more than 14 weeks but less than 24 weeks' apply to final year students only and should only be used where Instance.MODE is coded 02.
	Institutions are not required to adjust this field to account for individual waived fees.
	Postgraduate students who are subject to regulated fees should be coded as 0-5 depending on the fees. The only postgraduate students to be recorded as subject to

	regulated fees are those:	
	a. On a full-time or part-time PGCE. Such students should be recorded as subject to the regulated full or regulated half fees, respectively.	
	b. On a full-time course in preparation for a professional examination at postgraduate level, for which a first degree is not a normal requirement for entry. This applies to students on a course leading successively to Parts 1 and 2 of the Royal Institute of British Architects examination, for whom undergraduate-level fees are payable. Such students should be recorded as subject to regulated full fees.	
	All other postgraduate students should be coded 09 Other fee.	
	Part-time students where the institution has discretion over the fee charged should be coded 09 Other fee.

Start date of instance

Short Name	COMDATE
Туре	field
Description	This field indicates the date of the student's initial commencement of studies for this student instance and may relate to a date prior to the current academic/financial year. Exchange-in students should have the date they commenced their studies at the reporting institution.
Applicable to	England NI Scotland Wales
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00, 01, 02 or 03
Base Data Type	xs:date
Field Length	10
Part Of	Instance
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	To determine whether to include a student in any particular population definition; to calculate the duration of a student's education
Examples	A student obtains a first degree and then enrols for a one year Masters course. These are two distinct courses at different levels (undergraduate/postgraduate) and therefore would have two Student instance numbers. In this case:
	 Instance.COMDATE is up-dated to commencement date of Masters Instance.YEARPRG = 1 Instance.YEARSTU = 1 EntryProfile.QUALENT2 is up-dated to degree Instance.NUMHUS has a new number allocated.
	2. A student transfers after two years from an HND course to the second year of a degree course (with or without being awarded the HND). This may be represented in two different ways, depending on how it is viewed by the institution.
	If within the institution this is regarded as a seamless continuation of studies, then it is the same student instance and the same Instance.YEARSTU increments by one year. In this case:
	 Instance.COMDATE is not up-dated Instance.YEARPRG = 2 Instance.YEARSTU = 3 EntryProfile.QUALENT2 is not up-dated Instance.NUMHUS is not up-dated.
	However, if within the institution this is regarded as two student instances, then a new Instance.NUMHUS is allocated and Instance.YEARSTU re-sets to 01. In this case:
	 Instance.COMDATE is up-dated to commencement date of degree Instance.YEARPRG = 2

 Instance.YEARSTU = 1 • EntryProfile.QUALENT2 is up-dated to HND if appropriate • Instance.NUMHUS has a new number allocated. When an institution does not have a clear preference between the two methods of reporting the progression to degree via study for an HND, it is recommended that the first method, using a single student instance, is used. This general guidance would also apply to other similar cases. Notes If a student transfers from one HEI to another, the date they entered the current HEI for this qualification aim should be returned in this field. All date fields in the Student Record must be completed using the ISO8601 format of YYYY-MM-DD. The specification of this field falls within the scope of the MIAP Common **Data Definitions** project. Relationship with <u>Instance.NUMHUS</u> and <u>Instance.YEARSTU</u>: For a single student instance, the same Student instance number is kept. Instance.YEARSTU would be expected to increment each year. However there would be no up-dating of <u>Instance.COMDATE</u> nor of other fields in the <u>Entry profile</u> - an exception being, if, for example, an error had been found in the information provided in the previous year). With the commencement of a new student instance, a new Instance.NUMHUS would be allocated. Instance.YEARSTU would be expected to be 01. Instance.COMDATE should all be up-dated and a new Entry profile should be submitted. Where a student transfers from one course to another, the date should not be updated if the same Instance.NUMHUS is kept. For example, changes of subject without change of general qualification aim will not usually reset date of commencement of instance. Neither should the field be re-set where a student registers for an 'intermediate' qualification aim with the clear intention (acknowledged by both student and institution) that, subject to satisfactory performance, s/he will progress seamlessly (and usually without being awarded the intermediate qualification) onto a 'higher' qualification aim. For example, if a student registers first for an MPhil then switches to a PhD, and this is regarded as normal progression in the institution, such that the same Student instance number is kept, the Instance.COMDATE should not be reset. Where Y0/Y1/Y2 appear in business rules, these refer to the reporting period Y1-Y2 (e.g. for the 2007-08 reporting period, Y0 is 2006, Y1 is 2007 and Y2 is 2008). Owner Managing Information Across Partners - Common Data Definitions Version 1.2 Date modified 2008-04-30 Change management Note added to clarify meaning of Y0/Y1/Y2 in business rules notes Business rules 1 Error Instance.COMDATE must exist where Instance.REDUCEDI = 00, 01, 02 or 03 2 Error Instance.COMDATE must not be less than 1991-01-31 4 Error Instance.COMDATE must be less than Y2-08-01

Student

Short Name	Student	
Туре	entity	
Description	This describes a person undertaking a course, i.e. a student	
Applicable to	England NI Scotland Wales	
Coverage	All institutions	
Part Of	Institution	
Minimum Occurrences	1	
Maximum Occurrences	unbounded	
Has Parts	HESA unique student identifier (HUSID) Unique Learner Number (ULN) UCAS Personal Identifier (UCASPERID) Scottish Candidate Number (SCN) Institution's own identifier for student (OWNSTU) Date of birth (BIRTHDTE) Family name (SURNAME) Forenames (FNAMES) Family name on 16th birthday (SNAME16) Gender (GENDER) Nationality (NATION) Ethnicity (ETHNIC) Disability (DISABLE) Dependants in reporting year (SDEPEND) Welsh speaker indicator (WELSSP) National identity (NATIOND) Term-time accommodation (TTACCOM) Term-time postcode (TTPCODE) Instance	
Reason Required	This entity exists to hold elements that describe the student and to hold the instances relating to the student.	
Notes	A student can only be included once on this entity. Student.HUSID is the primary key for this entity. Although many of the fields in this entity will not change from one year to the next, institutions must return all required fields in each year.

Business rules		

Student instance FTE

Short Name	STULOAD
Туре	field
Description	This field holds the student FTE, representing the institution's best academic judgement of the full-time equivalence of the student (for this instance) during the reporting year 1 August - 31 July. The value can be recorded to one decimal place and must be between 0 and 300.
Applicable to	England NI Scotland Wales
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00, 01, 02 or 03
Base Data Type	FTEType
Field Length	5
Part Of	Instance
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	To allow analysis by FTE, representing student load, rather than by headcount or apportioned numbers; particularly significant for analysing PT load.
Examples	Example A student studying the equivalent of a three year course over five years would be returned as 60.
	A student studying 30 credits in the current year, in the case where 120 credits is the norm for a full-time student, would be returned as 25.
Notes	Full-time, full year students would normally be returned as 100 and part-time students returned as a proportion of an equivalent full-time course. Comparisons and weightings of different full-time, full year courses are not expected. The proportion of part-time study can be estimated on either a 'time' or a 'credit' basis. The FTE should not be weighted to take account of any resourcing implications of different courses.
	All students following a course would initially be assumed to have the same FTE. An adjustment may need to be made at individual student level if a student did not actually follow the whole course academic year, e.g. because they left half way through. This individual student adjustment need only be at a very broad-brush level.
	The calculation of FTE therefore becomes a function of proportion (that the course represents of a full-time benchmark course) x time (amount of the course that the student followed in the HESA reporting year).
	It is recognised that this cannot be exact in all cases and a strict pro-rata model is not expected. The aim is to give a better approximation than the use of arbitrary conversion factors.
	In the case of years of programme which span two HESA reporting years (for example an MSc student with a 01 October - 30 September year) institutions in Scotland can return the FTE using either the pro-rata (50:50), 100:0 or 0:100 method as indicated in Instance.FTEMETHOD . However for institutions in England, Wales and Northern

	Ireland the Student FTE should be split across the two HESA reporting years. This does not have to be an exact pro-rata split: a reasonable approximation is sufficient (for example the institution might assume that 85% of the FTE related to the period October - July and 15% to the period August - September).
	Institutions in England, Wales or Northern Ireland who previously did not return student load using the pro-rata (50:50) method should return the 2007-08 record as if they had always used this method, and HEFCE have indicated that the same guidance will apply to the 2007 HESES return. Further detail is included in the summary of main changes document.
	Further detailed notes are available in the supporting documents.
	The length of this field is 5 characters, however the move to XML enables data to be returned with or without leading zeros or the decimal place, e.g. 005.0 or 5.0 or 5
Owner	HESA
Version	1.4
Date modified	2008-08-20
Change management notes	Added check for REDUCEDI in business rule 5 and 6
Business rules	 1 Error Instance.STULOAD must exist where Instance.REDUCEDI = 00, 01, 02 or 03 2 Error Instance.STULOAD must be 0 where Instance.MODE = 63 or 64 3 Error Instance.STULOAD must not be 0 where Instance.MODE =01, 02, 23, 24, 25, 31, 52, 53, 73 or 74 and Instance.TYPEYR = 1 4 Warning Instance.STULOAD should not be 0 where Course.COURSEAIM begins D or L and Instance.MODE = 01 or 02 and Instance.YEARSTU = 01, 02 or 03 5 Warning Where REDUCEDI = 00 or 01, Instance.STULOAD+100.0 is less than sum of Module.FTE for the student instance: check modules linked to this instance 6 Error Where REDUCEDI = 00 or 01, Instance.STULOAD is greater than 0 where sum of Module.FTE for the student instance is 0

Student instance identifier

Short Name	NUMHUS
Туре	field
Description	This field complements the <u>HUSID</u> field to identify the separate courses that individuals take. <u>HUSID</u> + <u>Institution identifier</u> + NUMHUS together form a unique identifier known as HIN. An identification of the basic unit of 'a coherent engagement with the institution aiming towards the award of a qualification(s) or credit' which is described in the <u>HIN guidance</u> section of this documentation.
Applicable to	England NI Scotland Wales
Coverage	All instances
Base Data Type	NUMHUSType
Field Length	20
Part Of	Instance
Minimum Occurrences	1
Maximum Occurrences	1
Reason Required	To distinguish - and between years, link - episodes of study by the same student at the same institution; a vital tool (through the generation of HIN) to support year-on-year linkage, for example to link entities in the HESA record and for Teaching Quality Information (TQI); used in the Higher Education Initial Participation Rate (HEIPR) calculation by DIUS.
Examples	Detailed examples of HIN linking can be found in the HIN guidance document.
Notes	Field length 20 is to allow institutions to use an instance identifier already held internally. Where a instance identifier held internally is used, institutions must continue to use this number even when transfers or natural progressions occur. As a consequence of this institutions may find it easier to number student instances sequentially starting from 1 or A etc. A new instance number format can only be introduced for instances that have not been returned to HESA. This will be the case for new entrants and for continuing students commencing courses that have not previously been returned to HESA.
	Further guidance on the importance of maintaining the HIN link across years can be found in the HIN guidance document.
	Valid characters
	The valid characterset available for this field has been defined by a specific study undertaken as a part of the MIAP Common Data Definitions (CDD) project. The conclusions of this study were:
	 The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007F and U+00A0 to

U+024F.

 Schemas are built in such a way that an individual project can further restrict the set if required.

The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.

The Unicode charts that list each of the characters in this range can be found on the <u>Unicode web site</u>. The specific sets that are defined here are shown in the following PDF documents:

- Basic Latin
- Latin-1
- Latin Extended A
- Latin Extended B
- Latin Extended Additional

Institutions are advised to specify the encoding used in their XML files (i.e. <?xml version="1.0" encoding="UTF-8" ?>) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.

Notes	The Joint Academic Coding System (JACS2) provides for all subjects to be coded according to a common, truly hierarchical, four-character subject code. JACS2 will be used substantially in subject representation across the sector, including for provision of quality assurance information. As a result of the joint UCAS/HESA Subject Code Harmonisation Project, it is intended that at the subject or module level all subjects should be classified within the JACS2 hierarchical academic subject structure. The funding councils' advice is to consider the most detailed coding that can be used without unduly raising the burden, since there is an increasing interest in niche provision which often cannot be captured at the JACS2 principal subject level. For example, a progressively more detailed coding of 'microbiology' could be: The scientific study of micro-organisms encompassing major components of genetics and molecular biology. Includes bacteriology, virology, cell structure and function, and may include some immunology.		
	C520 Medical and veterinary microbiology	The study of the interactions between micro-organisms and their hosts.	
		The study of the interactions between micro-organisms and their human hosts.	
	C522 Veterinary microbiology The study of the interactions between micro-organisms and their animal hosts. The generic codes that consist of a subject group and letter (and Y000) can be uthis field to describe a truly interdisciplinary programme.		
	Codes G000 and G900 are not valid entries in this field.		
	For students entering through UCAS this information will be available from U the *J transaction.		

Where students are coded using codes in the B group or C8 or L5 groups and are DH funded (<u>Course.MSFUND</u> = 31) the Department of Health requires that students be coded to the full four digits of JACS2, where these exist, or to three digits otherwise.

Where courses are taken by students funded by Research Councils, (Code Instance.RCSTDNT of 01 to 09) then this field must be coded to JACS2 Principal subject level, that is, using the first two characters of the code (the second digit cannot be 0, so generic codes cannot be used for such courses).

For institutions in England and Northern Ireland, codes A3, A4 and C840 can only be used for postgraduate taught students if

- The course bears very high costs comparable to the clinical unit of resource, or
- A substantial proportion of the staff teaching time contributed to the course is provided by medically or dentally qualified university funded clinical academic staff, who hold honorary contracts with the NHS. This includes general practitioners.
- The course is normally taught in a clinical environment.

For institutions in England and Northern Ireland, codes A3, A4 and C840 can only be used for research students if focus of their research is in a clinical environment and the lead supervisor should be a clinical academic.

Codes A200 and A400 must only be used for pre-clinical and clinical dentists: other courses must use either A900 (Others in medicine & dentistry) or B750 Dental nursing.

For undergraduate medical and dental courses where students move from pre-clinical to clinical subjects in later years of the course, this should normally be recorded as one course for all years of the programme. CourseSubject.SBJCA should in this case be coded as joint clinical/pre-clinical ie both A100 and A300 or both A200 and A400. It may, in some cases, be appropriate to code this as two separate courses where there is a clear separation between the two parts of the course.

This field must be completed for HE level students funded by the LSC or DCELLS (Instance.FESTUMK = 3).

For FE level students in England and Wales (<u>Instance.FESTUMK</u> = 1 or 4) for whom <u>Course.FEQAIMC</u> is completed, CourseSubject entity must not be returned.

However, if a generic code is used within <u>Course.FEQAIMC</u> then the LSC requires institutions to also complete this field in order to give detail of the subject area of the qualification.

For initial teacher training students in England and Wales

The TDA needs to be able to link ITT students in England to the intake target from which the TDA has allocated numbers. In addition, only a subset of JACS2 codes are appropriate for ITT programmes. The TDA wants to ensure that only appropriate subjects are recorded. There is a similar requirement from HEFCW for ITT students in Wales. At institutions in England and Wales students identified as being initial teacher training students (Course.TTCID = 1 or 8) must be coded using this subset of JACS2. Further details are given below.

Primary ITT Programmes (<u>Course.ITTPHSC</u> = 15, 16, 17, 18, 19, 51, 52, 53, 61, 62,

63, 64, 65, 71, 72, 73, 74, 75, 76, 77)

Subject

Revised Standards for Qualified Teacher Status and revised Requirements for Initial Teacher Training took effect from September 2007 The new standards can be viewed on the TDA web site at

http://www.tda.gov.uk/partners/ittstandards.aspx?keywords=ITT+requirements

The Training and Development Agency for Schools has published a handbook of guidance and support which is available on the TDA web site at http://www.tda.gov.uk/partners/ittstandards.aspx?keywords=ITT+requirements

The requirement on primary programmes to train students in at least one specialism is no longer compulsory.

Students commencing programmes of study after 1 September 2002 who choose not to study a primary specialism should use code X120 in this field.

Where trainees continue to study a primary specialism, a valid JACS2 code should be used in this field as follows:

JACS2 code:

Art	W900
Design and technology	W200
English	Q300
Geography	L700
German	R200
History	V100
Information and communications technology	G500
Mathematics	G100
Music	W300
Physical education	C600
Religious education	V600
Science (Biology, Chemistry, Physics)	C100, F100, F300
Spanish	R400
French	R100
Portuguese	R500
Welsh	Q560

Advanced study of early years

Drama Dance

Citizenship PHSE

No primary specialism X120 (code available for students where <u>Instance.COMDATE</u> is after 1 September 2002 only).

X900 W400

W500 L230

L390

Where the specialism is not restricted to a subject (e.g. humanities) JACS2 code Y000 may be used in this field.

Where a primary specialism is being studied institutions must enter the code of the main specialism in this field and indicate 'S' in CourseSubject.ITTSUBJECT. If a second specialism is offered, institutions should also record this.

Institutions should ensure that codes relating to the subject the student is funded for are returned. Any institution wishing to enter a code not included in the current subject list should contact the TDA or HEFCW directly.

Secondary ITT Programmes and ITT Programmes Covering the 7-14 Age Range (<u>Course.ITTPHSC</u> = 24, 25, 26, 54, 55, 56, 57, 78, 79, 80, 81 or 82)

All programmes must train students in at least one specialism. It is essential that this specialism corresponds to the target from which the TDA has allocated numbers. Some programmes will train students to teach additional specialisms.

For the specialisms: The table below sets out the list of subjects appropriate to secondary ITT programmes with corresponding JACS2 codes.

Subject	JACS2 code:
Art	W900
Design and technology	W200
Graphics	W210

	Vocational - Applied business	N190	
	If a second, or third, specialism is offered institutions should also record it in a repeat occurrence of this field.		
	HESA will introduce validation checks to ensure that only those codes listed above can be recorded.		
	Institutions should ensure that codes relating to the subject the student is funded for ar returned. Any institution wishing to enter a code not included in the current subject list should contact the TDA or HEFCW directly.

Subject of module

Short Name	MODSBJ				
Туре	field				
Description	This field records the sub code.	ject descriptors for the module, and is a four character JACS2			
Applicable to	England NI Scotland Wal	es			
Coverage	All module subject records				
Base Data Type	MODSBJCodeType				
Field Length	4				
Part Of	Module subject				
Minimum Occurrences	1				
Maximum Occurrences	1				
Related Fields	MODSBJP				
Reason Required	To calculate the student load split out across the academic cost centres, and split across JACS2 codes.				
Notes	The Joint Academic Coding System (JACS2) provides for all subjects to be coded according to a common, truly hierarchical, four-character subject code. JACS2 will be used substantially in subject representation across the sector, including for provision of quality assurance information. The funding councils' advice is to consider the most detailed coding that can be used without unduly raising the burden, since there is an increasing interest in niche provision which often cannot be captured at the JACS2 principal subject level. For example, a progressively more detailed coding of 'microbiology' could be:				
	C500 Microbiology	The scientific study of micro-organisms encompassing major components of genetics and molecular biology. Includes bacteriology, virology, cell structure and function, and may include some immunology.			
	C520 Medical and veterinary microbiology	The study of the interactions between micro-organisms and their hosts.			
	C521 Medical microbiology	The study of the interactions between micro-organisms and their human hosts.			
	C522 Veterinary microbiology	The study of the interactions between micro-organisms and their animal hosts.			
	The generic codes that consist of a subject group and three zeroes (including Y000) cannot be used in this field.				
	Code G900 is not a valid	entry for this field.			
Owner	HESA/UCAS

Subject percentage

Short Name	SBJPCNT
Туре	field
Description	This field indicates the proportion of time allocated for each subject studied on a course. It should contain an integer between 1 and 100.
Applicable to	England NI Scotland Wales
Coverage	All course subject records
Base Data Type	SBJPCNTType
Field Length	3
Part Of	Course subject
Minimum Occurrences	1
Maximum Occurrences	1
Related Fields	SBJCA
Reason Required	To allow analysis and monitoring of the student population by subject of study.
Notes	This field allows institutions to assign their own percentages for joint honours courses. It is not expected that these percentages will be derived from a detailed analysis of the contributions of subjects to individual students' programmes of study but will instead be based on a broad assessment of the relative contributions of each subject. It is therefore expected that most institutions will apply the same percentages to all courses and only vary this where there is a substantially different expectation. For institutions in England, Northern Ireland and Wales the listed standard percentages are recommended. Where broad assessment of the subject contributions markedly differs from these standard percentages alternative values can be returned. For institutions in Scotland the listed standard percentages are obligatory. Balanced 50 for each of the two subjects Major - Minor 67 and 33 Triple 34, 33 and 33 For each Course entity the sum of SBJPCNT must equal 100. The length of this field is 3 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 003 or 3.
Owner	HESA
Version	1.5
Date modified	2008-05-30
Change management notes	Business rule 2 amended to re-instate Instance.ITTPHSC codes 51 and 52, and guidance added on the format for numeric data

Business rules	1 Error	For each Course entity the sum of CourseSubject.SBJPCNT must equal 100
	2 Error	All CourseSubject.SBJPCNT must be coded '50' where any CourseSubject.SBJCA = F000 or C000 and Course.TTCID = 1 or 8 and any Instance.ITTPHSC = 24 - 26, 51 - 57, or 78 - 82
	3 Error	CourseSubject.SBJPCNT must contain 33, 34, 50, 67 or 100 for institutions in Scotland

Suspension of active studies

Short Name	NOTACT
Туре	field
Description	This field indicates whether a student has suspended study and is no longer actively studying on this student instance. In these cases Instance.RSNEND and Instance.ENDDATE would not be completed.
Applicable to	England NI Scotland Wales
Coverage	Compulsory where the student has suspended studies on this student instance and fields Instance.RSNEND and Instance.RSNEND and Instance.ENDDATE are not completed
Base Data Type	NOTACTCodeType
Field Length	1
Part Of	Instance
Minimum Occurrences	0
Maximum Occurrences	1
Reason Required	To allow institutions to temporarily complete a record where Reason for leaving and Date left are not completed.
	For progression monitoring and linkage, and for supporting population definitions.
Notes	This field is used to indicate a student was active during the reporting period but has now suspended studies. A student who was not active at any time during the reporting year should be returned as code 63 or 64 'dormant' in Instance.MODE .
	An entry in this field is not required if the student has completed/left the student instance (Instance.RSNEND and Instance.ENDDATE completed). Similarly an entry in this field is not required if the student has been dormant for the whole year (Instance.MODE codes 63 or 64). However, students with Instance.MODE of 73 and 74 should be coded 1 Student has suspended studies.
	Once a record has been returned with an entry in this field, a record with the same HIN will not be required in subsequent years unless the student returns to resume the instance or a record is being returned to end the instance (by completing (Instance.RSNEND , Instance.ENDDATE and QualificationsAwarded.QUAL (where relevant)).
	Code 2 DH/NHS student temporarily stepping-off HIN
	The reasons for stepping-on and off are many and varied. The DH core definition of such stepping-off points would be: 'a student who takes a break in study, at an agreed appropriate time, and who plans to return to join a later cohort from the one with which they originally started'.
	This provides individuals with the ability to enter or leave a programme of education at a given point, providing maximum flexibility, thereby enabling an individual to consider alternative options of employment and education.

	For example, the new nursing programme allows for stepping-off points at the end of Year 1 (following successful completion of the Common Foundation Programme) and throughout the course.
Owner	HESA
Version	1.1
Date modified	2008-02-29
Change management notes	Business rule 2 added
Business rules	Warning Instance.NOTACT should not exist where Instance.RSNEND exists and Instance.ENDDATE is not null Warning Instance.NOTACT must be 1 where Instance.MODE is 73 or 74
Valid Entries and Labels	1 Student has suspended studies 2 DH/NHS student temporarily stepping-off HIN

Teacher Reference Number

Short Name	TREFNO
Туре	field
Description	This field holds the reference number allocated to each student prior to course completion for the training of teachers.
Applicable to	England Scotland Wales
Coverage	Compulsory for instances at institutions in England, Wales or Scotland where Course.TTCID = 1 or 8 and QualificationsAwarded.OUTCOME = 1 and QualificationsAwarded.QUAL = H11 or I11 and Instance.REDUCEDI = 00 or 04
Base Data Type	xs:string
Field Length	9
Part Of	Instance
Minimum Occurrences	0
Maximum Occurrences	1
Related Fields	TTCID OUTCOME
Reason Required	To link with teaching career information; used by the TDA, and GTCW in Wales.
Notes	This number will stay with the teacher throughout their career within the teaching profession.
	For institutions in Scotland, the reference number required is the six digit number allocated to each student prior to course completion of pre-service courses for the training of teachers. The first 2 digits denote the expected year of qualification (the last 2 digits of the year).
	For institutions in England and Wales the reference number required is the Teacher Reference Number (formerly known as a DfES number). The number is allocated by the GTCE when details of a trainee are entered onto their system and the trainee's record created. The number allocated is a seven digit number.
	Overseas students not allocated a teacher reference number should be coded 999999999.
	A relevant qualification in QualificationsAwarded.QUAL would be code H11 'First degree with honours leading to QTS/registration with a GTC', I11 'Ordinary (non-honours) first degree leading to QTS/registration with a GTC', M71 'Post-Graduate Certificate in Education or Professional Graduate Diploma in Education' or H71 'Professional Graduate Certificate in Education'.
	A code H11 or I11 in <u>QualificationsAwarded.QUAL</u> would generate an error if <u>Instance.TREFNO</u> is blank; codes M71 or H71 in <u>QualificationsAwarded.QUAL</u> would generate a warning if <u>Instance.TREFNO</u> is blank.
Owner	The Teaching Councils

Version	1.4	
Date modified	2008-05-30	
Change management notes	Business rules 1 and 3 amended to restrict to England and Wales, and new rules 4 and 5 added for Scotland	
Business rules	1 Error Instance.TREFNO must exist for institutions in England or Wales where the corresponding (QualificationsAwarded.OUTCOME = 1 and QualificationsAwarded.QUAL = H11 or I11) and Course.TTCID = 1 or 8 and Instance.REDUCEDI = 00 or 04 2 Error Instance.TREFNO must not exist for institutions in Northern Ireland 3 Warning Instance.TREFNO must exist for institutions in England or Wales where the corresponding (QualificationsAwarded.OUTCOME = 1 and QualificationsAwarded.QUAL = M71 or H71) and Course.TTCID = 1 or 8 and Instance.REDUCEDI = 00 or 04 4 Error Instance.TREFNO must exist for institutions in Scotland where QualificationsAwarded.QUAL = H11 or I11 and Course.TTCID = 1 or 8 and Instance.REDUCEDI = 00 or 04 5 Warning Instance.TREFNO must exist for institutions in Scotland where QualificationsAwarded.QUAL = M71 or H71 and Course.TTCID = 1 or 8 and Instance.REDUCEDI = 00 or 04	

Teacher training course

Short Name	TTCID	
Туре	field	
Description	This field is a one character field completed for students on courses that lead to teacher qualifications. The selection will determine the type of the teacher training.	
Applicable to	England NI Scotland Wales	
Coverage	All courses where <u>Course.REDUCEDC</u> = 00, 01 or 04	
Base Data Type	TTCIDCodeType	
Field Length	1	
Part Of	Course	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	QTS ITTPHSC	
Reason Required	To identify and discriminate between teacher training students.	
Notes	Institutions in Wales can only use codes 0, 1, 2 and 5.	
	Students funded by DELNI on courses leading to eligibility to teach in Northern Ireland should be coded 1 in this field.	
	Code 1 includes PGCE, BEd, first degree with Qualified Teacher Status and courses leading concurrently to a degree and to a diploma in Education.	
	Code 2 includes courses leading to Further Education Teacher Qualification and to Nursing and Midwifery Teacher Qualification. FE courses will be specifically identified in Course.ITTPHSC code 31 'Further education'.	
	Code 5: TDA and HEFCE have given a working definition of an INSET course as follows:	
	An INSET/In-service course is one for which the primary (but not necessarily the only) purpose is to improve the effectiveness of teachers, lecturers or trainers. In considering whether this is the purpose of particular course, institutions may wish to consider the content of the course and course literature, including prospectuses and any other marketing material.	
	Institutions are not expected to return a record to HESA for students on employment-based routes (e.g. GTP, OTT and RTP). The TDA collects this data via the Employment Based Routes Data Management System (EBRDMS).

Teaching qualification sought sector

Short Name	TQSSEC	
Туре	field	
Description	This field is used by institutions in Scotland or Northern Ireland for all teacher training courses and indicates the education sector in which teacher training students are pursuing their teaching qualification.	
Applicable to	NI Scotland	
Coverage	All Course records at institutions in Scotland or Northern Ireland where <u>Course.TTCID</u> = 1 or 2 and <u>Course.REDUCEDC</u> = 00	
Base Data Type	TQSSECCodeType	
Field Length	1	
Part Of	Course	
Minimum Occurrences	0	
Maximum Occurrences	1	
Reason Required	To allow monitoring of qualifications sought and gained.	
Notes	Code 1 or 2 should be returned if code 1 is returned in Course.TTCID.	
	Code 3 or 4 should be returned if code 2 is returned in Course.TTCID.	
	If codes 0 or 5 are returned in Course.TTCID then this field must not be completed.	
Owner	HESA	
Version	1.3	
Date modified	2008-02-28	
Change management notes	Business rule 5 created to prevent use of this field in England or Wales	
Business rules	1 Error Course.TQSSEC must exist for institutions in Scotland or Northern Ireland where Course.TTCID = 1 or 2 and Course.REDUCEDC = 00 2 Error Course.TQSSEC must be coded 1 or 2 for institutions in Scotland or Northern Ireland where Course.TTCID = 1 3 Error Course.TQSSEC must be coded 3 or 4 for institutions in Scotland or Northern Ireland where Course.TTCID = 2 4 Error Course.TQSSEC must not exist for institutions in Scotland or Northern Ireland where Course.TTCID = 0 or 5 5 Error Course.TQSSEC must not exist for institutions in England or Wales	
Valid Entries and Labels	1 Primary 2 Secondary 3 Further education/Higher education 4 Nursing & midwifery	

Teaching qualification sought subject

Short Name	TQSSUB	
Туре	field	
Description	This field is used by institutions in Scotland for courses that lead to teacher qualifications and indicates the subject(s) in which teacher training students are pursuing their teaching qualification.	
Applicable to	Scotland	
Coverage	All course records at institutions in Scotland where <u>Course.TQSSEC</u> = 2 and <u>Course.REDUCEDC</u> = 00	
Base Data Type	TQSSUBType	
Field Length	3	
Part Of	Course	
Minimum Occurrences	0	
Maximum Occurrences	3	
Reason Required	To allow monitoring of qualifications sought and gained.	
Notes	When more than one subject is returned the tags surrounding the main subject code should include the attribute Main="1". For example if the subjects of the teaching qualification gained are English and History, with English as the main subject, this should be returned as: <tqssub main="1">>010</tqssub> . When only one subject is returned this subject should include the attribute Main="1"	
Owner	HESA

Term-time accommodation

Short Name	TTACCOM	
Туре	field	
Description	This field records where the student is living during the current year.	
Applicable to	England NI Scotland Wales	
Coverage	All students who are studying where <u>Instance.MODE</u> = 01, 02, 23, 24 or 25 and any <u>Instance.REDUCEDI</u> = 00	
Base Data Type	TTACCOMCodeType	
Field Length	1	
Part Of	Student	
Minimum Occurrences	0	
Maximum Occurrences	1	
Related Fields	TTPCODE	
Reason Required	To monitor student accommodation patterns.	
Notes	This information should be collected once per academic year. If a student is in temporary accommodation at the time of collection but has permanent accommodation agreed, then the planned accommodation should be returned in this field.	
	Full-time for the purpose of this field excludes students on short full-time programmes of study (ie. those of total length 24 weeks or less).	
	Code: 6 'Not in attendance at the institution' to be used for full-time and sandwich students not currently in attendance at the institution for reasons such as industrial placement or language year abroad.	
	Code 7 'Own residence' includes a student's permanent residence, which may be either owned or rented by them.	
	Code 8 'Other rented accommodation' refers to a more temporary arrangement eg. where a number of students each rent a room in the same house on a yearly basis.	
Owner	HESA	
Version	1.0	
Business rules	1 Error Student.TTACCOM must exist where any Instance.MODE = 01, 02, 23, 24 or 25 and the corresponding Instance.REDUCEDI = 00 2 Warning Student.TTACCOM should not be coded 6 where Instance.LOCSDY = X	
Valid Entries and Labels	1 Institution maintained property 2 Parental/guardian home 4 Other 5 Not known 6 Not in attendance at the institution 7 Own residence 8 Other rented accommodation	

1	
9	Private-sector halls

Term-time postcode

Short Name	TTPCODE
Туре	field
Description	This field records a postcode for the student's term-time address at some point during the reporting year
Applicable to	England NI Scotland Wales
Coverage	All students where any (<u>Instance.LOCSDY</u> does not equal 6, 9, D or F and <u>Instance.REDUCEDI</u> = 00)
Base Data Type	PostCodeWithNullStructure
Field Length	8
Part Of	Student
Minimum Occurrences	0
Maximum Occurrences	1
Related Fields	TTACCOM
Reason Required	To allow estimates to be made of local student populations.
Examples	A typical postcode such as GL50 3DA would be coded with a blank in the fifth character position. A postcode such as B1 6SR would have a blank in position 3. The part of the postcode before the space is known as the outward part of the postcode and can be 2, 3 or 4 characters long. The part of the postcode after the space is known as the inward part of the postcode and is a fixed length of 3 characters. The space between the outward and inward parts of the postcode must always be shown as part of the postcode.
Notes	This field is required for all students except those studying by distance learning and those on placements. This can be a postcode from any point during term-time, but should not be a correspondence or summer contact address. It is expected that in many cases the postcode will change between years. Where students spend all or part of the year in a hall of residence the institution will be able to insert a generic postcode for that that hall into all of the relevant records. Although completion of the field will be compulsory for all students, 'Unknown' values will be acceptable. If no valid postcode (full or outward only) can be ascertained an empty element should be returned with the ReasonForNull attribute set to 1 (not known), i.e: <ttpcode reasonfornull="1"></ttpcode>

	generated if validation fails. This is intended to assist institutions that attach importance to the accuracy of their contact information but who may not be in a position to validate postcodes themselves.	
Owner	BS7666	
Version	1.6	
Date modified	2008-09-12	
Change management notes	Postcode structure example added	
Business rules	1 Error Student.TTPCODE must exist where any Instance.LOCSDY does not equal 6, 9, D or F and the corresponding Instance.REDUCEDI = 00 2 Error Where exists, Student.TTPCODE must not equal EntryProfile.POSTCODE where Student.TTACCOM = 1 or 9 3 Error Student.TTPCODE must not be null except when ReasonForNull = 1 4 Error Student.TTPCODE must be null when ReasonForNull = 1	

Type of instance year

Short Name	TYPEYR			
Туре	field			
Description	This field identifies which of the basic types academic year is applicable to the instance.			
Applicable to	England NI Scotlar	nd Wales		
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00 or 01			
Base Data Type	TYPEYRCodeType	Э		
Field Length	1			
Part Of	Instance			
Minimum Occurrences	0			
Maximum Occurrences	1			
Related Fields	STULOAD			
Reason Required	To show the relationship between the instance academic year and the HESA reporting year, to support population definitions and to ensure single-counting.			
Examples	A student completes a foundation degree in June 2008 and then undertakes a bridging course from July to September and then joins the final year of a degree which they complete in June 2009.			
	Field	2007/08	2008/09	
	COURSEAIM	J10	H100	
	STULOAD	100.0	130.0	
	TYPEYR	1	1	
	BRIDGE	0	1	
Notes	otes The HESA reporting year runs from the 1 August - 31 July. Instance academic years that are contained within the HESA reporting year should be coded 1. Instance academic years which overlap HESA reporting years should be sequentially coded 3, (4), 5 in consecutive HESA returns, or may be coded 2.			
	Postgraduate research students would usually be coded as being on non-standard years.			
	Institutions in Scotland and Wales can only use codes 1 or 2.			
	Code 3 implies commencing an instance without having done another year instance in the same HESA reporting period.			

Code 5 implies finishing one instance academic year and not starting a further year of the instance in the same HESA reporting year. Information is required at instance level. It is not expected that adjustments should be made for individual students whose pattern may be slightly different e.g. a student who starts a course late. Where a student's studies include, within the same instance, a foundation degree to degree bridging course this bridging course element will be shown by code 1 'Foundation degree to degree bridging course' in Instance.BRIDGE and an increased FTE in Instance.STULOAD. Where the bridging course spans HESA reporting years the FTE should all be returned in the second HESA reporting year, this may differ from the method used for other non-standard instance academic years. Institutions should also indicate in Instance.BRIDGE that the student has studied a foundation degree to degree bridging course only in the year in which the FTE is increased. It may be that the inclusion of a foundation degree to degree bridging course means that the year of instance becomes non-standard ie. no longer contained within the HESA reporting year. However, where the year would otherwise have been recorded as a standard academic year the year should still be recorded as such in this field. **HESA** Owner Version 1.0 **Business rules** 1 Error Instance.TYPEYR must exist where Instance.REDUCEDI = 00 or 01 2 Error Instance.TYPEYR must be coded 1 or 2 by institutions in Scotland or Wales 3 Error Instance.TYPEYR must not be coded 1 where Instance.FUNDCOMP = 3 4 Error Instance.TYPEYR must be coded 1 where Instance.COMDATE is greater than or equal to 1 August of the reporting period and Instance.ENDDATE (if not null) is less than or equal to 31 July of the reporting period and Instance.FUNDCOMP =1 5 Error Instance.TYPEYR must be coded 1 where Instance.COMDATE in range 01 August - 31 December (regardless of year) and Instance.ENDDATE in range 01 January - 31 July (regardless of year) and Instance.RSNEND is coded 01 or 98 6 Warning Instance.TYPEYR should not be coded 1 where Instance.FUNDLEV = 11, 21 or 31 and anniversary of Instance.COMDATE in academic year > 20 September and Instance.MODE = 01 7 Warning Instance.TYPEYR should not be coded 1 where Course.COURSEAIM begins D or L Valid Entries and 1 Course academic year contained within the HESA reporting year 1 August Labels - 31 July 2 Course academic year not contained within the HESA reporting year 1 August - 31 July 3 Student commencing a course running across HESA reporting years 4 Student mid-way through a course running across HESA reporting years 5 Student finishing a course running across HESA reporting years

UCAS Application Number

Short Name	UCASAPPID		
Туре	field		
Description	This field is the UCAS application code/number, which is a four or nine character code issued by UCAS		
Applicable to	England NI Scotland Wales		
Coverage	All entrants who entered this Instance via a UCAS scheme		
Base Data Type	UCASAPPIDType		
Field Length	9		
Part Of	Entry profile		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	UCASPERID		
Reason Required	To identify students who entered their current instance via a UCAS application system and to facilitate linking between UCAS and HESA records.		
Notes	The UCAS Application Code/Number together with the UCAS Personal identifier (Student.UCASPERID) forms the UCAS Application Identifier. The application code/number will normally be a four character code (two alpha and two numeric) or the old style UCAS Application Number of nine numeric characters.		
Owner	UCAS		
Version	1.4		
Date modified	2008-02-28		
Change management notes	Business rule 1 deleted		
Business rules	2 Error EntryProfile.UCASAPPID must pass the checksum test as applied to Student.HUSID where it is nine characters long and (digits 1-8 are not in the ranges 06000999 to 06009996 inclusive or 06690999 to 06692257 inclusive) 3 Error Where EntryProfile.UCASAPPID digits 1-8 are in ranges (06000999 to 06009996 inclusive or 06690999 to 06692257 inclusive), this field must pass either the checksum test as applied to Student.HUSID or the 'incorrectly calculated checksum' test, details of which are in student circular 06_04		

UCAS Personal Identifier

Short Name	UCASPERID		
Туре	field		
Description	This field records the 10-character code issued by UCAS.		
Applicable to	England NI Scotland Wales		
Coverage	All students who entered any of their current instances from 2007 onwards via a UCAS scheme and who have been issued a UCAS Personal Identifier		
Base Data Type	UCASPERIDType		
Field Length	10		
Part Of	Student		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	UCASAPPID		
Reason Required	To identify students who entered a current instance via a UCAS application system and to facilitate linking between UCAS and HESA records.		
Notes	The UCAS Personal Identifier together with the UCAS application number (EntryProfile.UCASAPPID) forms the UCAS Application Identifier. The UCAS Personal Identifier is sometimes presented using hyphens between characters 3 and 4 and between characters 6 and 7. These hyphens are not to be included in this field in the Student Record.		
	This information will be available from UCAS via the *J transaction.		
Owner	UCAS

UK Provider Reference Number

Short Name	UKPRN
Туре	field
Description	This field records the UK Provider Reference Number which is the unique identifier allocated to institutions by the <u>UK Register of Learning Providers (UKRLP)</u> .
Applicable to	England NI Scotland Wales
Coverage	All institutions
Base Data Type	UKPRNType
Field Length	8
Part Of	Institution
Minimum Occurrences	1
Maximum Occurrences	1
Reason Required	To identify source of record; used by HESA and all Statutory Customers to identify institution of student.
Notes	A single register of learning providers is being developed as a part of the Managing Information Across Partners (MIAP) programme. In the long-term it is anticipated that the UKPRN will replace the plethora of institution identifiers used by different organisations in the education sector. A software developers toolkit - to support the development of UKRLP web services -
	can be found by following the Software Development Kit link from http://schemas.lsc.gov.uk/ .
Owner	UK Register of Learning Providers
Version	1.0

Unique Learner Number

Short Name	ULN	
Туре	field	
Description	This field records a 10-digit numeric identifier.	
Applicable to	England NI Scotland Wales	
Coverage	Compulsory for those students who have been issued with a ULN	
Base Data Type	UniqueLearnerNumberType	
Field Length	10	
Part Of	Student	
Minimum Occurrences	0	
Maximum Occurrences	1	
Reason Required	To facilitate linking between years of HESA data and between the Student Record and other data sources.	
Notes	The Unique Learner Number (ULN) is being developed as a part of the Managing Information Across Partners (MIAP) programme. In the long-term it is anticipated that the ULN will replace the plethora of personal identifiers used by different organisations in the education sector. The ULN is a ten-digit number with a non-zero number in the first position and a check digit in the final position. Further information regarding the ULN from the MIAP web site can be found here. Since the ULN is issued by the Learner Registration Service, an institutions' only obligation will be to check the validity of the number by performing the checksum validation test below. The ULN checksum follows the same basic principles as the NHS number, but has been designed to ensure that there is no replication of ULN and NHS number. The checksum validation process is as follows: • Check that the first digit is nonzero • Sum the product of the digits multiplied by the weights 10, 9, 8, 7, 6, 5, 4, 3, 2, 1 • Divide this number by 11	
	(e.g. ULN 9276308686. (9*10)+(2*9)+(7*8)+(6*7)+(3*6)+(0*5)+(8*4)+(6*3) +(8*2)+(6*1) = 296. 296/11=26, remainder 10) For additional information, an Excel spreadsheet showing how the final check digit (and leading digit for Scottish Candidate Number (SCN) based ULNs) is calculated can be downloaded	

Date modified	2007-06-30	
Change management notes	Clarification of notes for ULN checksum validation	
Business rules	1 Error Student.ULN must pass the checksum test	

Unit of assessment percentage

Short Name	UOAPCNT		
Туре	field		
Description	This field collects the proportion where a student is supervised by more than one member of staff and these supervisors are returned in more than one Unit of Assessment (UOA); the student may be returned split either according to the agreed division of responsibility, or in proportion to the number of supervisors. Research students should be returned to the UOA in which their supervisor is returned. This field can contain a value between 0 and 100 and can be recorded to one decimal place.		
Applicable to	England NI Scotland Wales		
Coverage	All RAEData records		
Base Data Type	PercentType		
Field Length	5		
Part Of	RAE Data		
Minimum Occurrences	1		
Maximum Occurrences	1		
Related Fields	UOA2008		
Reason Required	Collection of this information will allow better monitoring of funding allocations by UOA.		
Notes	This field occurs as a pair with RAEData.UOA2008 with a maximum of 3 pairs permitted. The sum of RAEData.UOAPCNT must equal 100 for each instance in which it occurs.		
Owner	HESA		
Version	1.0		
Business rules	1 Error For each Instance in which it occurs the sum of RAEData.UOAPCNT must equal 100		

Units of length

Short Name	UNITLGTH		
Туре	field		
Description	This field denotes the units of length associated with Instance.SPLENGTH.		
Applicable to	England NI Scotland Wales		
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00, 01 or 02		
Base Data Type	UNITLGTHCodeType		
Field Length	1		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	SPLENGTH		
Reason Required	To monitor patterns of study.		
Notes	Only in cases where <u>Instance.SPLENGTH</u> is null, unknown length, may this field be coded 9.		
	Semesters, trimesters and terms are not of uniform length throughout the sector and should be converted into years/months/weeks.		
	The lowest appropriate value of UNITLGTH should be used e.g. length should be expressed in terms of years, if appropriate, rather than months.		
	Foundation and sandwich years		
	It is not expected that the length of study be adjusted for individual students. However, where there are different options that students can take, for example, foundation years and sandwich placements, it is expected that the length reflects the options taken. For example, where a student undertakes an integrated foundation year it is normally expected that the length be recorded as one year longer than if the student had just taken a stand-alone degree.		
Owner	HESA		
Version	1.1		
Date modified	2006-08-25		
Change management notes	Reference to unknown length now corrected

Welsh Baccalaureate Advanced Diploma

Short Name	WELBACC	
Туре	field	
Description	This field identifies those students who undertook a Welsh Baccalaureate Advanced Diploma course and also distinguishes those students who were awarded the qualification from those students who were not awarded the qualification	
Applicable to	England NI Scotland Wales	
Coverage	All Welsh domiciled entrants at institutions in Wales (and optional for all Welsh domiciled entrants at institutions in England, NI or Scotland) where Course.COURSEAIM begins H, I, J, C, P, Q, R or S and where Instance.REDUCEDI = 00	
Base Data Type	WELBACCCodeType	
Field Length	1	
Part Of	Entry profile	
Minimum Occurrences	0	
Maximum Occurrences	1	
Reason Required	This field is a requirement of the Welsh Assembly Government (WAG) following the introduction of the new Welsh Baccalaureate qualification programme in September 2003. The Welsh Assembly Government has set the target that 25% of students in Wales will be following the Welsh Baccalaureate by 2010. Monitoring and analysis of the numbers of students entering HE with the Welsh Baccalaureate Advanced Diploma.	
Notes	Optional for Welsh domiciled students at institutions in England, Northern Ireland and Scotland. The Welsh Baccalaureate Advanced Diploma is comprised of two parts: Core and Options. Core consisting of four components, i.e. Key Skills, Wales, Europe and the World, Work-related Education and Personal and Social Education. Options courses/programmes currently offered, e.g. GCSE, VGCSE, AS/A levels, VCE (Vocational A levels), GNVQ, NVQ, BTEC. Together, the Core and Options make up the Welsh Baccalaureate Advanced Diploma, a qualification at Level 3 of the National Qualifications Framework.	
	For clarification, any students undertaking a course leading to the Welsh Baccalaureate Intermediate Diploma, a qualification at Level 2 of the National Qualifications Framework, should be coded 3 'Student did not undertake the Welsh Baccalaureate Advanced Diploma course' in this field.

Version	1.3	
Date modified	2008-03-30	
Change management notes	Business rule 2 amended to remove restriction on providing data for FE instances	

Business rules	1 Error 2 Warning	EntryProfile.WELBACC must exist for institutions in Wales where EntryProfile.DOMICILE = XI and Course.COURSEAIM begins H, I, J, C, P, Q, R or S and corresponding Instance.COMDATE is greater than 2005-07-31 and corresponding Instance.REDUCEDI = 00 This element must not exist where Course.COURSEAIM begins D, E, L or M (other than M22)
Valid Entries and Labels	1 2 3	Undertook Welsh Baccalaureate Advanced Diploma awarded qualification Undertook Welsh Baccalaureate Advanced Diploma not awarded qualification Student did not undertake the Welsh Baccalaureate Advanced Diploma course

Welsh speaker indicator

Short Name	WELSSP		
Туре	field		
Description	This field records whether the student deems themselves to be a Welsh speaker.		
Applicable to	Wales		
Coverage	All students at institutions in Wales where EntryProfile.DOMICILE = XI and any Instance.REDUCEDI = 00 or 02		
Base Data Type	WELSSPCodeType		
Field Length	1		
Part Of	Student		
Minimum Occurrences	0		
Maximum Occurrences	1		
Reason Required	Required by the Welsh Assembly Government (WAG) to support the Welsh Language Board in monitoring the number of Welsh speakers continuing their education in Welsh and the potential demand for Welsh medium education. Although the requirement for the data has been stipulated by NAW, HEFCW may also use the data to inform policy development on Welsh medium higher education provision.		
Notes	The level of Welsh speaker should be defined by the student and not the institution.		
Owner	HESA		
Version	1.2		
Date modified	2008-02-29		
Change management notes	Business rule 2 added		
Business rules	1 Error Student.WELSSP must exist for institutions in Wales where any (EntryProfile.DOMICILE exists and is coded XI) and the corresponding Instance.REDUCEDI = 00 or 02 2 Error Student.WELSSP must not exist for institutions in England, Northern Ireland or Scotland		
Valid Entries and Labels	1 Fluent Welsh speaker 2 Welsh speaker not fluent 3 Not Welsh speaker 9 Not known		

Year left last institution

Short Name	YRLLINST		
Туре	field		
Description	This field is a four digit number linked to EntryProfile.PREVINST , denoting the year in which the student left the previous institution.		
Applicable to	Scotland		
Coverage	All entrants to institutions in Scotland where EntryProfile.ARTICLN = 1, 2, 3 or 4		
Base Data Type	YearWithUnknownType		
Field Length	4		
Part Of	Entry profile		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	PREVINST		
Reason Required	This information is used by the Scottish Executive (Scottish Government) in projections and planning for the sector and analysis of trends in the take-up of higher education. Knowing the year left last institution helps with the matching of students to their previous study details at another institution. Information about articulating students is required by the Scottish Executive (Scottish Government) who wish to compare educational outcomes for those students moving without a gap into a course at an HEI and those who have left a gap of a year or more.		
Notes	Code 9999 should be used for 'Not known'.		
Owner	HESA		
Version	1.4		
Date modified	2008-02-28		
Change management notes	Business rule 2 added. Datatype modified to YearWithUnknownType to allow 'unknown' value 9999.		
Business rules	1 Error EntryProfile.YRLLINST must exist for institutions in Scotland where EntryProfile.ARTICLN = 1, 2, 3 or 4 2 Error EntryProfile.YRLLINST must not exist for institutions in England, Northern Ireland or Wales		

Year of course

Short Name	YEARPRG				
Туре	field				
Description	This field indicates the year number of the course that the student is currently studying. This could be different from the year of student if the student has changed course or re-taken a year.				
Applicable to	England NI Scotland Wales				
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00 or 01				
Base Data Type	xs:nonNegativeInteger				
Field Length	2				
Part Of	Instance				
Minimum Occurrences	0				
Maximum Occurrences	1				
Related Fields	YEARSTU				
Reason Required	To track student progression; used in conjunction with YEARSTU, for example, for the identification of direct entrants to later years of programmes, and to identify courses with a foundation year, to support entry qualification calculations, and to identify students for inclusion in the National Students Survey.				
Notes	Courses of less than one year should be coded 1 in this field.				
	Institutions may return code 99 if the course structure does not enable Year of course to be derived. In cases where foundation years are integral to degree programmes, the foundation year should be shown as Year 0 in this field and 'degree' in Course.COURSEAIM . This will allow a clear distinction to be made between stand-alone Foundation courses and those which are integral to degree programmes. The relationship between this field and Instance.YEARSTU in these circumstances is shown in the table below.				
	Year	YEARSTU	YEARPRG		
	Foundation year	1	0		
	First year	2	1		
	Second year	3	2		
	Third year	4	3		
	This field should not increment for students who are writing-up, but Instance.YEARSTU would increment on the anniversary of their starting date.				
	where students do year. In particular, of course should s degree normally ta	not repeat any where students till increment ev ken full-time ov	or each year of a course a student studies. Therefore, studies, year of course will increment each reporting study full-time courses on a part-time basis the year ery year. For example, if a student is studying a er 3 years, over 6 years part-time, the year of course h reporting year to 6.		

	The length of this field is 2 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 03 or 3.		
Owner	HESA		
Version	1.4		
Date modified	2008-07-31		
Change management notes	Business rule 2 downgraded to Warning		
Business rules	Instance.YEARPRG must exist where Instance.REDUCEDI = 00 or 01 Warning Instance.YEARPRG code 0 is only available where Course.COURSEAIM begins H or I Warning Instance.YEARPRG should be less than or equal to Instance.SPLENGTH where Instance.UNITLGTH = 1 and Instance.MODE is less than 40 and Instance.YEARPRG is not coded 99		

Year of student on this instance

Short Name	YEARSTU		
Туре	field		
Description	This field indicates the year number that the student is in since enrolling for a course leading to the student's qualification aim (whether or not the intended subject or class has changed) i.e.number of years on this student instance. This could be different from the year of course if the student has changed course or retaken a year.		
Applicable to	England NI Scotland Wales		
Coverage	All instances where <u>Instance.REDUCEDI</u> = 00		
Base Data Type	YEARSTUType		
Field Length	2		
Part Of	Instance		
Minimum Occurrences	0		
Maximum Occurrences	1		
Related Fields	YEARPRG		
Reason Required	To track student progression; used in conjunction with instance.YEARPRG.		
Examples	Examples of the way in which this updated over time can be found in the HIN guidance document.		
Notes	The year of postgraduate research students should increment on the anniversary of their starting date.		
	Students whose first term is waived should be deemed to have started when that first term would have started.		
	This field should not be incremented for periods of dormancy, i.e. codes 63 or 64 in instance.MODE . For example, if a student becomes dormant after their first year of study, and remains out of the system for one year, on resuming their studies this field would be returned as 02.		
	This field should be incremented for a sandwich placement year and both compulsory and optional years out.		
	In cases where a student has to repeat a year, this field should be incremented.		
	It is not expected that there would be many students where this field is greater than 10 years.		
	Further guidance on the role of this field in HIN linking can be found in the HIN guidance document.		
	For further details of the inter-relationship between YEARPRG and YEARSTU please		

	see notes in Instance.YEARPRG.			
	The length of this field is 2 characters, however the move to XML enables data to be returned with or without leading zeros, e.g. 03 or 3.			
Owner	HESA			
Version	1.4			
Date modified	2008-08-20			
Change management notes	Datatype amended to allow max value of 45			
Business rules	1 Error Instance.YEARSTU must exist where Instance.REDUCEDI = 00 2 Error Value cannot be greater than the difference in years between 31 July of the reporting period and the 01 August before Instance.COMDATE
