
Estates Management record 2013/14

Table of Contents (by entity)

All occupational diseases.....	39
Total number of occupational diseases reportable under RIDDOR.....	40
Another kind of accident.....	41
Number of other persons injuries from another kind of accident.....	42
Number of staff injuries from another kind of accident.....	43
Number of student injuries from another kind of accident.....	44
Area cleaned - D15.....	45
Non-residential external site cleaned.....	46
Non-residential GIA cleaned.....	47
Building condition assessment condition - D20a.....	48
Non-residential building condition assessment condition A.....	51
Non-residential building condition assessment condition B.....	52
Non-residential building condition assessment condition C.....	53
Non-residential building condition assessment condition D.....	54
Residential building condition assessment condition A.....	55
Residential building condition assessment condition B.....	56
Residential building condition assessment condition C.....	57
Residential building condition assessment condition D.....	58
Building condition assessment cost to upgrade - D20b.....	59
Non-residential building condition assessment cost to upgrade condition C to B.....	60
Non-residential building condition assessment cost to upgrade condition D to B.....	61
Residential building condition assessment cost to upgrade condition C to B.....	62
Residential building condition assessment cost to upgrade condition D to B.....	63
Buildings and functionality.....	64
Capital expenditure buildings - D25.....	65
Non-residential capital expenditure buildings.....	66
Residential capital expenditure buildings.....	67
Total capital expenditure buildings.....	68
Carbon reduction commitment.....	69
Carbon reduction commitment energy efficiency scheme cost.....	70
Carbon reduction commitment energy efficiency scheme participation.....	71
Carbon reduction target.....	72
Total carbon reduction target.....	73
Central post room and internal distribution services costs - D62.....	74
Non-residential central post room and internal distribution services costs.....	75
Residential central post room and internal distribution services costs.....	76
Total central post room and internal distribution services costs.....	77
Cleaning costs - D34.....	78
Non-residential cleaning costs external.....	80
Non-residential cleaning costs internal.....	81

Non-residential cleaning costs total.....	82
Residential cleaning costs external.....	83
Residential cleaning costs internal.....	84
Residential cleaning costs total.....	85
Total cleaning costs.....	86
Total cleaning costs external.....	87
Total cleaning costs internal.....	88
Construction date - D22.....	89
Non-residential construction date 1840-1914.....	90
Non-residential construction date 1915-1939.....	91
Non-residential construction date 1940-1959.....	92
Non-residential construction date 1960-1979.....	93
Non-residential construction date 1980-1999.....	94
Non-residential construction date before 1840.....	95
Non-residential construction date since 2000.....	96
Residential construction date 1840-1914.....	97
Residential construction date 1915-1939.....	98
Residential construction date 1940-1959.....	99
Residential construction date 1960-1979.....	100
Residential construction date 1980-1999.....	101
Residential construction date before 1840.....	102
Residential construction date since 2000.....	103
Contact with electricity or an electrical discharge.....	104
Number of other persons injuries from contact with electricity or an electrical discharge.....	105
Number of staff injuries from contact with electricity or an electrical discharge.....	106
Number of student injuries from contact with electricity or an electrical discharge.....	107
Contact with moving machinery or material being machined.....	108
Number of other persons injuries from contact with moving machinery or material being machined.....	109
Number of staff injuries from contact with moving machinery or material being machined.....	110
Number of student injuries from contact with moving machinery or material being machined.....	111
Dangerous occurrences.....	112
Directly exposed to fire or smoke.....	113
Number of other persons directly exposed to fire or smoke.....	114
Number of staff directly exposed to fire or smoke.....	115
Number of students directly exposed to fire or smoke.....	116
Drowned or asphyxiated.....	117
Number of other persons injuries from being drowned or asphyxiated.....	118
Number of staff injuries from being drowned or asphyxiated.....	119
Number of student injuries from being drowned or asphyxiated.....	120
Energy consumption - D38a.....	121
Energy consumption biofuels.....	124
Energy consumption biomass.....	125

Energy consumption burning oil.....	126
Energy consumption coal (industrial).....	127
Energy consumption compressed natural gas.....	128
Energy consumption electricity consumed from onsite CHP.....	129
Energy consumption fuel oil.....	130
Energy consumption gas oil.....	131
Energy consumption grid electricity.....	132
Energy consumption heat consumed from onsite CHP.....	133
Energy consumption liquefied natural gas.....	134
Energy consumption liquefied petroleum gas.....	135
Energy consumption lubricants.....	136
Energy consumption natural gas excluding that used as input for a CHP unit.....	137
Energy consumption natural gas used as input for a CHP unit.....	138
Energy consumption onsite photovoltaic.....	139
Energy consumption onsite wind.....	140
Energy consumption other onsite renewables.....	141
Energy consumption other petroleum gas.....	142
Energy consumption petroleum coke.....	143
Energy consumption steam and hot water.....	144
Non-residential energy consumption total.....	145
Residential energy consumption total.....	146
Total energy consumption.....	147
Energy costs - D31.....	148
Non-residential energy costs biomass.....	150
Non-residential energy costs coal (industrial).....	151
Non-residential energy costs electricity.....	152
Non-residential energy costs gas.....	153
Non-residential energy costs oil.....	154
Non-residential energy costs onsite photovoltaic.....	155
Non-residential energy costs onsite wind.....	156
Non-residential energy costs other.....	157
Non-residential energy costs steam and hot water.....	158
Non-residential energy costs total.....	159
Residential energy costs biomass.....	160
Residential energy costs coal (industrial).....	161
Residential energy costs electricity.....	162
Residential energy costs gas.....	163
Residential energy costs oil.....	164
Residential energy costs onsite photovoltaic.....	165
Residential energy costs onsite wind.....	166
Residential energy costs other.....	167
Residential energy costs steam and hot water.....	168

Residential energy costs total.....	169
Total energy costs.....	170
Total energy costs biomass.....	171
Total energy costs coal (industrial).....	172
Total energy costs electricity.....	173
Total energy costs gas.....	174
Total energy costs oil.....	175
Total energy costs onsite photovoltaic.....	176
Total energy costs onsite wind.....	177
Total energy costs other.....	178
Total energy costs steam and hot water.....	179
Energy generated onsite by CHP - D72c.....	180
Total energy generated onsite by CHP.....	181
Environment, energy, emissions and waste.....	182
Environmental management system - D74d.....	183
Environmental management system existence.....	184
Environmental management system external verification.....	185
Environmental management system external verification coverage.....	186
Environmental reporting - D74e.....	187
Environmental reporting total.....	188
Estatesmanagement.....	189
EU Emissions Trading Scheme - D80.....	190
EU Emissions Trading Scheme carbon allowance.....	191
EU Emissions Trading Scheme carbon allowance bought or sold.....	192
EU Emissions Trading Scheme cost.....	193
EU Emissions Trading Scheme participation.....	194
Expenditure - D02.....	195
Non-residentialexpenditure.....	196
Residentialexpenditure.....	197
Totalexpenditure.....	198
Exposed to fire.....	199
Number of other persons injuries from being exposed to fire.....	200
Number of staff injuries from being exposed to fire.....	201
Number of student injuries from being exposed to fire.....	202
Exposed to or in contact with a harmful substance.....	203
Number of other persons injuries from being exposed to or in contact with a harmful substance.....	204
Number of staff injuries from being exposed to or in contact with a harmful substance.....	205
Number of student injuries from being exposed to or in contact with a harmful substance.....	206
Externally-provided property management costs - D36.....	207
Non-residential Externally-provided property management costs.....	208
Residential Externally-provided property management costs.....	209
Total Externally-provided property management costs.....	210

Fairtrade accreditation - D74f.....	211
Fairtrade accreditation existence.....	212
Fatalities.....	213
Number of other persons fatalities.....	214
Number of staff fatalities.....	215
Number of student fatalities.....	216
Fell from a height.....	217
Number of other persons injuries from falling from a height.....	218
Number of staff injuries from falling from a height.....	219
Number of student injuries from falling from a height.....	220
Finance.....	221
Fire and Rescue Services attendance.....	222
Non-residential Fire and Rescue Services attendance.....	223
Residential Fire and Rescue Services attendance.....	224
Total Fire and Rescue Services attendance.....	225
Frequency rate - D16.....	226
Teaching not offices frequency rate percentage.....	228
Teaching not offices frequency rate survey date.....	229
Teaching not offices hours per working week.....	230
Frequency rate calculation - D45.....	231
Teaching not offices frequency rate calculation.....	232
Fuel used in HEP owned vehicles - D38a.....	233
Fuel used in HEP owned vehicles aviation spirit.....	234
Fuel used in HEP owned vehicles aviation turbine fuel.....	235
Fuel used in HEP owned vehicles biofuels.....	236
Fuel used in HEP owned vehicles diesel.....	237
Fuel used in HEP owned vehicles liquefied petroleum gas.....	238
Fuel used in HEP owned vehicles petrol.....	239
Total fuel used in HEP owned vehicles.....	240
Functional suitability - D21.....	241
Non-residential functional suitability grade 1.....	243
Non-residential functional suitability grade 2.....	244
Non-residential functional suitability grade 3.....	245
Non-residential functional suitability grade 4.....	246
Residential functional suitability grade 1.....	247
Residential functional suitability grade 2.....	248
Residential functional suitability grade 3.....	249
Residential functional suitability grade 4.....	250
Generation of electricity exported to grid.....	251
Total generation of electricity exported to grid.....	252
Gross Internal Area - D11.....	253
Non-residentialGIA.....	254

Residential GIA.....	255
Total GIA.....	256
Gross Internal Area commercial space.....	257
Non-residential GIA commercial space.....	258
Residential GIA commercial space.....	259
Total GIA commercial space.....	260
Gross Internal Area in DEC or EPC - D78 and D79.....	261
Non-residential GIA in DEC or EPC category A.....	262
Non-residential GIA in DEC or EPC category B.....	263
Non-residential GIA in DEC or EPC category C.....	264
Non-residential GIA in DEC or EPC category D.....	265
Non-residential GIA in DEC or EPC category E.....	266
Non-residential GIA in DEC or EPC category F.....	267
Non-residential GIA in DEC or EPC category G.....	268
Residential GIA in DEC or EPC category A.....	269
Residential GIA in DEC or EPC category B.....	270
Residential GIA in DEC or EPC category C.....	271
Residential GIA in DEC or EPC category D.....	272
Residential GIA in DEC or EPC category E.....	273
Residential GIA in DEC or EPC category F.....	274
Residential GIA in DEC or EPC category G.....	275
Grounds area - D09.....	276
Grounds area listed or heritage.....	277
Grounds area water.....	278
Total grounds area.....	279
Hazardous waste.....	280
Total hazardous waste.....	281
Health and Safety.....	282
Hit by a moving vehicle.....	283
Number of other persons injuries from being hit by a moving vehicle.....	284
Number of staff injuries from being hit by a moving vehicle.....	285
Number of student injuries from being hit by a moving vehicle.....	286
Hit by a moving, flying, or falling object.....	287
Number of other persons injuries from being hit by a moving, flying, or falling object.....	288
Number of staff injuries from being hit by a moving, flying, or falling object.....	289
Number of student injuries from being hit by a moving, flying, or falling object.....	290
Hit something fixed or stationary.....	291
Number of other persons injuries from hitting something fixed or stationary.....	292
Number of staff injuries from hitting something fixed or stationary.....	293
Number of student injuries from hitting something fixed or stationary.....	294
Incidents involving fire.....	295
Incidents involving injury.....	296

Income - D01.....	297
Non-residential income total.....	298
Other non-residential income.....	299
Research income.....	300
Residences and catering income.....	301
Teaching income.....	302
Total income.....	303
Injured by an animal.....	304
Number of other persons injuries from an animal.....	305
Number of staff injuries from an animal.....	306
Number of student injuries from an animal.....	307
Injured while handling, lifting, or carrying.....	308
Number of other persons injuries while handling, lifting, or carrying.....	309
Number of staff injuries while handling, lifting, or carrying.....	310
Number of student injuries while handling, lifting, or carrying.....	311
Institution.....	312
Insurance premiums and contributions - D29.....	313
Non-residential insurance premiums and contributions.....	314
Residential insurance premiums and contributions.....	315
Total insurance premiums and contributions.....	316
Insurance replacement value - D24.....	317
Non-residential insurance replacement value.....	318
Residential insurance replacement value.....	319
Total insurance replacement value.....	320
Internally-incurred property management costs - D35.....	321
Non-residential Internally-incurred property management costs.....	324
Residential Internally-incurred property management costs.....	325
Total Internally-incurred property management costs.....	326
Listed building coverage - D70.....	327
Commercial listed building coverage.....	328
Non-residential listed building coverage.....	329
Residential listed building coverage.....	330
Total listed building coverage.....	331
Method of floor area measurement - D13.....	332
Total method of floor area measurement.....	333
Method of scope 3 carbon emissions from waste.....	334
Non-residential method used to calculate scope 3 carbon emissions from waste.....	335
Residential method used to calculate scope 3 carbon emissions from waste.....	336
Total method used to calculate scope 3 carbon emissions from waste.....	337
Method of space apportionment - D41.....	338
Total method of space apportionment.....	339
Net Internal Area - D12.....	340

Non-residential NIA other.....	343
Non-residential NIA total.....	344
Non-residential NIA vacant.....	345
Research NIA total.....	346
Research not offices NIA.....	347
Research offices NIA.....	348
Residential NIA.....	349
Support NIA associated with catering.....	350
Support NIA learning centre space.....	351
Support NIA total.....	352
Support not offices NIA.....	353
Support offices NIA.....	354
Teaching NIA total.....	355
Teaching not offices NIA.....	356
Teaching offices NIA.....	357
Total NIA.....	358
Net Internal Area commercial space.....	359
Non-residential NIA commercial space.....	360
Residential NIA commercial space.....	361
Total NIA commercial space.....	362
Net service charge and miscellaneous PFI and PPP costs - D30.....	363
Non-residential net service charge and miscellaneous PFI and PPP costs.....	364
Residential net service charge and miscellaneous PFI and PPP costs.....	365
Total net service charge and miscellaneous PFI and PPP costs.....	366
Non-employee hospital treatment for reportable injuries.....	367
Number of other non-employees requiring hospital treatment for reportable injuries.....	368
Number of students requiring hospital treatment for reportable injuries.....	369
Number of automatic detectors.....	370
Non-residential number of automatic detectors.....	371
Residential number of automatic detectors.....	372
Total number of automatic detectors.....	373
Number of bed spaces - D23.....	374
Residential number of bed spaces.....	375
Number of bed spaces health and safety.....	376
Residential number of bed spaces health and safety.....	377
Number of buildings - D07.....	378
Non-residential number of buildings.....	379
Residential number of buildings.....	380
Total number of buildings.....	381
Number of car parking spaces - D71.....	382
Non-residential number of car parking spaces.....	383
Residential number of car parking spaces.....	384

Total number of car parking spaces.....	385
Number of cycle spaces - D76.....	386
Total number of cycle spaces.....	387
Number of external fires.....	388
Total number of external fires.....	389
Number of internal fires that did not sound the fire alarm.....	390
Total number of internal fires that did not sound the fire alarm.....	391
Number of major fires.....	392
Nature of major fires a source which cannot be determined.....	394
Nature of major fires car fire.....	395
Nature of major fires cooking.....	396
Nature of major fires electrical.....	397
Nature of major fires hot works contract or activity.....	398
Nature of major fires laboratory activity.....	399
Nature of major fires malicious.....	400
Nature of major fires naked flame.....	401
Nature of major fires other.....	402
Nature of major fires smoking.....	403
Non-residential number of major fires a source which cannot be determined.....	404
Non-residential number of major fires car fire.....	405
Non-residential number of major fires cooking.....	406
Non-residential number of major fires electrical.....	407
Non-residential number of major fires hot works contract or activity.....	408
Non-residential number of major fires laboratory activity.....	409
Non-residential number of major fires malicious.....	410
Non-residential number of major fires naked flame.....	411
Non-residential number of major fires other.....	412
Non-residential number of major fires smoking.....	413
Non-residential number of major fires total.....	414
Residential number of major fires a source which cannot be determined.....	415
Residential number of major fires car fire.....	416
Residential number of major fires cooking.....	417
Residential number of major fires electrical.....	418
Residential number of major fires hot works contract or activity.....	419
Residential number of major fires laboratory activity.....	420
Residential number of major fires malicious.....	421
Residential number of major fires naked flame.....	422
Residential number of major fires other.....	423
Residential number of major fires smoking.....	424
Residential number of major fires total.....	425
Total number of major fires.....	426
Number of malicious fire alarms.....	427

Non-residential number of malicious fire alarms.....	428
Residential number of malicious fire alarms.....	429
Total number of malicious fire alarms.....	430
Number of minor fires.....	431
Nature of minor fires a source which cannot be determined.....	433
Nature of minor fires car fire.....	434
Nature of minor fires cooking.....	435
Nature of minor fires electrical.....	436
Nature of minor fires hot works contract or activity.....	437
Nature of minor fires laboratory activity.....	438
Nature of minor fires malicious.....	439
Nature of minor fires naked flame.....	440
Nature of minor fires other.....	441
Nature of minor fires smoking.....	442
Non-residential number of minor fires a source which cannot be determined.....	443
Non-residential number of minor fires car fire.....	444
Non-residential number of minor fires cooking.....	445
Non-residential number of minor fires electrical.....	446
Non-residential number of minor fires hot works contract or activity.....	447
Non-residential number of minor fires laboratory activity.....	448
Non-residential number of minor fires malicious.....	449
Non-residential number of minor fires naked flame.....	450
Non-residential number of minor fires other.....	451
Non-residential number of minor fires smoking.....	452
Non-residential number of minor fires total.....	453
Residential number of minor fires a source which cannot be determined.....	454
Residential number of minor fires car fire.....	455
Residential number of minor fires cooking.....	456
Residential number of minor fires electrical.....	457
Residential number of minor fires hot works contract or activity.....	458
Residential number of minor fires laboratory activity.....	459
Residential number of minor fires malicious.....	460
Residential number of minor fires naked flame.....	461
Residential number of minor fires other.....	462
Residential number of minor fires smoking.....	463
Residential number of minor fires total.....	464
Total number of minor fires.....	465
Number of near miss fire incidents.....	466
Nature of near miss fire incidents car fire.....	468
Nature of near miss fire incidents cooking.....	469
Nature of near miss fire incidents electrical.....	470
Nature of near miss fire incidents hotworks contract or activity.....	471

Nature of near miss fire incidents laboratory activity.....	472
Nature of near miss fire incidents malicious.....	473
Nature of near miss fire incidents naked flame.....	474
Nature of near miss fire incidents not able to determine.....	475
Nature of near miss fire incidents other.....	476
Nature of near miss fire incidents smoking.....	477
Non-residential number of near miss fire incidents car fire.....	478
Non-residential number of near miss fire incidents cooking.....	479
Non-residential number of near miss fire incidents electrical.....	480
Non-residential number of near miss fire incidents hotworks contract or activity.....	481
Non-residential number of near miss fire incidents laboratory activity.....	482
Non-residential number of near miss fire incidents malicious.....	483
Non-residential number of near miss fire incidents naked flame.....	484
Non-residential number of near miss fire incidents not able to determine.....	485
Non-residential number of near miss fire incidents other.....	486
Non-residential number of near miss fire incidents smoking.....	487
Non-residential number of near miss fire incidents total.....	488
Residential number of near miss fire incidents car fire.....	489
Residential number of near miss fire incidents cooking.....	490
Residential number of near miss fire incidents electrical.....	491
Residential number of near miss fire incidents hotworks contract or activity.....	492
Residential number of near miss fire incidents laboratory activity.....	493
Residential number of near miss fire incidents malicious.....	494
Residential number of near miss fire incidents naked flame.....	495
Residential number of near miss fire incidents not able to determine.....	496
Residential number of near miss fire incidents other.....	497
Residential number of near miss fire incidents smoking.....	498
Residential number of near miss fire incidents total.....	499
Total number of near miss fire incidents.....	500
Number of other false fire alarm activations.....	501
Non-residential number of other false fire alarm activations.....	502
Residential number of other false fire alarm activations.....	503
Total number of other false fire alarm activations.....	504
Number of people injured as a result of fire.....	505
Non-Residential number of people injured as a result of fires.....	506
Number of people injured as a result of fires car fire.....	507
Number of people injured as a result of fires cooking.....	508
Number of people injured as a result of fires electrical.....	509
Number of people injured as a result of fires hotworks contract or activity.....	510
Number of people injured as a result of fires laboratory activity.....	511
Number of people injured as a result of fires malicious.....	512
Number of people injured as a result of fires naked flame.....	513

Number of people injured as a result of fires not able to determine.....	514
Number of people injured as a result of fires other.....	515
Number of people injured as a result of fires smoking.....	516
Residential number of people injured as a result of fires.....	517
Total number of people injured as a result of fire.....	518
Number of sites - D06.....	519
Total number of sites.....	520
Number of third party bed spaces - D23a.....	521
Residential number of third party bed spaces.....	522
Occupancy rate - D18.....	523
Residential occupancy rate percentage.....	525
Teaching not offices occupancy rate percentage.....	526
Teaching not offices occupancy rate survey date.....	527
Occupancy rate calculation - D46.....	528
Teaching not offices occupancy rate calculation.....	529
Occupational diseases reportable under RIDDOR.....	530
Occupational injuries reportable under RIDDOR.....	531
Other dangerous occurrences.....	532
Total other dangerous occurrences.....	533
Other injuries involving more than seven days incapacitation.....	534
Number of staff other injuries involving more than seven days incapacitation.....	535
Overall number of fire alarm activations.....	536
Non-residential number of fire alarm activations.....	537
Residential number of fire alarm activations.....	538
Total number of fire alarm activations.....	539
Percentage modal split for commuting by staff - D75.....	540
Percentage modal split for commuting by staff bus.....	541
Percentage modal split for commuting by staff car share.....	542
Percentage modal split for commuting by staff cycle.....	543
Percentage modal split for commuting by staff motorbike.....	544
Percentage modal split for commuting by staff other.....	545
Percentage modal split for commuting by staff single occupancy car journey.....	546
Percentage modal split for commuting by staff train.....	547
Percentage modal split for commuting by staff walk.....	548
Percentage modal split for commuting by students - D75.....	549
Percentage modal split for commuting by students bus.....	550
Percentage modal split for commuting by students car share.....	551
Percentage modal split for commuting by students cycle.....	552
Percentage modal split for commuting by students motorbike.....	553
Percentage modal split for commuting by students other.....	554
Percentage modal split for commuting by students single occupancy car journey.....	555
Percentage modal split for commuting by students train.....	556

Percentage modal split for commuting by students walk.....	557
Percentage of Net Internal Area used for time-tabled teaching - D44.....	558
Teaching not offices percentage of all NIA used for time-tabled teaching.....	559
Persons at risk.....	560
Number of other persons at risk.....	561
Number of staff at risk.....	562
Number of students at risk.....	563
Physically assaulted by a person.....	564
Number of other persons injuries from being physically assaulted by a person.....	565
Number of staff injuries from being physically assaulted by a person.....	566
Number of student injuries from being physically assaulted by a person.....	567
Playing fields area - D10.....	568
Total playing fields area.....	569
Porterage costs - D61.....	570
Non-residential porterage costs.....	571
Residential porterage costs.....	572
Total porterage costs.....	573
Private finance initiative or public private partnership - D19a.....	574
Commercial PFI or PPP.....	575
Non-residential PFI or PPP.....	576
Residential PFI or PPP.....	577
Property costs - D26.....	578
Non-residential property costs.....	579
Residential property costs.....	580
Total property costs.....	581
Property management staffing - D37.....	582
Total property management staffing.....	584
Purchase of renewable energy through green tariffs - D72a.....	585
Total percentage of renewable energy purchased through green tariffs.....	586
Rateable value - D27.....	587
Non-residential rateable value.....	588
Rates paid - D28.....	589
Non-residential rates paid.....	590
Renewable energy generated onsite or offsite - D72d.....	591
Total renewable energy generated onsite or offsite.....	592
Repairs and maintenance costs - D33.....	593
Non-residential repairs and maintenance costs grounds.....	595
Non-residential repairs and maintenance costs playing fields.....	596
Non-residential repairs and maintenance costs total.....	597
Residential repairs and maintenance costs grounds.....	598
Residential repairs and maintenance costs playing fields.....	599
Residential repairs and maintenance costs total.....	600

Total repairs and maintenance costs.....	601
Total repairs and maintenance costs grounds.....	602
Total repairs and maintenance costs playing fields.....	603
Residential space - D99.....	604
Residential space total.....	605
RIDDOR reportable dangerous occurrences.....	606
Total RIDDOR reportable dangerous occurrences.....	607
RIDDOR reportable injuries.....	608
Number of other persons RIDDOR reportable injuries.....	609
Number of staff RIDDOR reportable injuries.....	610
Number of student RIDDOR reportable injuries.....	611
Total RIDDOR reportable injuries.....	612
Scope 1 and 2 carbon emissions - D38c.....	613
Non-residential scope 1 and 2 carbon emissions total.....	615
Residential scope 1 and 2 carbon emissions total.....	616
Scope 1 and 2 carbon emissions biofuels.....	617
Scope 1 and 2 carbon emissions biomass.....	618
Scope 1 and 2 carbon emissions burning oil.....	619
Scope 1 and 2 carbon emissions coal (industrial).....	620
Scope 1 and 2 carbon emissions compressed natural gas.....	621
Scope 1 and 2 carbon emissions fuel oil.....	622
Scope 1 and 2 carbon emissions gas oil.....	623
Scope 1 and 2 carbon emissions grid electricity.....	624
Scope 1 and 2 carbon emissions liquefied natural gas.....	625
Scope 1 and 2 carbon emissions liquefied petroleum gas.....	626
Scope 1 and 2 carbon emissions lubricants.....	627
Scope 1 and 2 carbon emissions natural gas.....	628
Scope 1 and 2 carbon emissions onsite photovoltaic.....	629
Scope 1 and 2 carbon emissions onsite wind.....	630
Scope 1 and 2 carbon emissions other onsite renewables.....	631
Scope 1 and 2 carbon emissions other petroleum gas.....	632
Scope 1 and 2 carbon emissions petroleum coke.....	633
Scope 1 and 2 carbon emissions steam and hot water.....	634
Scope 1 and 2 carbon emissions vehicles aviation spirit.....	635
Scope 1 and 2 carbon emissions vehicles aviation turbine fuel.....	636
Scope 1 and 2 carbon emissions vehicles biofuels.....	637
Scope 1 and 2 carbon emissions vehicles diesel.....	638
Scope 1 and 2 carbon emissions vehicles liquefied petroleum gas.....	639
Scope 1 and 2 carbon emissions vehicles petrol.....	640
Total scope 1 and 2 carbon emissions.....	641
Scope 3 carbon emissions from business travel.....	643
Scope 3 carbon emissions from business travel air.....	645

Scope 3 carbon emissions from business travel coach.....	646
Scope 3 carbon emissions from business travel company cars.....	647
Scope 3 carbon emissions from business travel ferry.....	648
Scope 3 carbon emissions from business travel grey fleet.....	649
Scope 3 carbon emissions from business travel leased buses.....	650
Scope 3 carbon emissions from business travel leased motorcycles or mopeds.....	651
Scope 3 carbon emissions from business travel leased pools cars.....	652
Scope 3 carbon emissions from business travel leased vans.....	653
Scope 3 carbon emissions from business travel public bus.....	654
Scope 3 carbon emissions from business travel rail.....	655
Scope 3 carbon emissions from business travel taxi.....	656
Scope 3 carbon emissions from business travel tram.....	657
Scope 3 carbon emissions from business travel underground.....	658
Scope 3 carbon emissions from staff commuting.....	659
Scope 3 carbon emissions from staff commuting by air.....	661
Scope 3 carbon emissions from staff commuting by car.....	662
Scope 3 carbon emissions from staff commuting by coach.....	663
Scope 3 carbon emissions from staff commuting by ferry.....	664
Scope 3 carbon emissions from staff commuting by motorcycle or moped.....	665
Scope 3 carbon emissions from staff commuting by public bus.....	666
Scope 3 carbon emissions from staff commuting by rail.....	667
Scope 3 carbon emissions from staff commuting by taxi.....	668
Scope 3 carbon emissions from staff commuting by trams.....	669
Scope 3 carbon emissions from staff commuting by underground.....	670
Scope 3 carbon emissions from student commuting.....	671
Scope 3 carbon emissions from students commuting by air.....	673
Scope 3 carbon emissions from students commuting by car.....	674
Scope 3 carbon emissions from students commuting by coach.....	675
Scope 3 carbon emissions from students commuting by ferry.....	676
Scope 3 carbon emissions from students commuting by motorcycle or moped.....	677
Scope 3 carbon emissions from students commuting by public bus.....	678
Scope 3 carbon emissions from students commuting by rail.....	679
Scope 3 carbon emissions from students commuting by taxi.....	680
Scope 3 carbon emissions from students commuting by trams.....	681
Scope 3 carbon emissions from students commuting by underground.....	682
Scope 3 carbon emissions from supply chain.....	683
Scope 3 carbon emissions from supply chain business services.....	685
Scope 3 carbon emissions from supply chain construction.....	686
Scope 3 carbon emissions from supply chain food and catering.....	687
Scope 3 carbon emissions from supply chain information and communication technologies.....	688
Scope 3 carbon emissions from supply chain manufactured fuels, chemicals, and gases.....	689
Scope 3 carbon emissions from supply chain medical and precision instruments.....	690

Scope 3 carbon emissions from supply chain other manufactured products.....	691
Scope 3 carbon emissions from supply chain other procurement.....	692
Scope 3 carbon emissions from supply chain paper products.....	693
Scope 3 carbon emissions from supply chain unclassified.....	694
Scope 3 carbon emissions from supply chain waste and water.....	695
Scope 3 carbon emissions from waste.....	696
Non-residential scope 3 carbon emissions from waste.....	698
Residential scope 3 carbon emissions from waste.....	699
Total scope 3 carbon emissions from waste.....	700
Scope 3 carbon emissions from wastewater treatment.....	701
Total scope 3 carbon emissions from wastewater treatment.....	702
Scope 3 carbon emissions from water supply.....	703
Non-residential scope 3 carbon emissions from water supply.....	704
Residential scope 3 carbon emissions from water supply.....	705
Total scope 3 carbon emissions from water supply.....	706
Scope 1 and 2 emission baseline for 2005.....	707
Total scope 1 and 2 emission baseline for 2005.....	708
Security costs - D61.....	709
Non-residential security costs.....	710
Residential security costs.....	711
Total security costs.....	712
Site area - D08.....	713
Total site area.....	714
Slipped, tripped, or fell on the same level.....	715
Number of other persons injuries from slipping, tripping, or falling on the same level.....	716
Number of staff injuries from slipping, tripping, or falling on the same level.....	717
Number of student injuries from slipping, tripping, or falling on the same level.....	718
Space charging system - D43.....	719
Non-residential space charging system.....	720
Spacemeasurement.....	721
Space utilisation survey area covered - D17.....	722
Teaching area covered by the Space Utilisation Survey.....	723
Specialist academic area - D14.....	724
Research not offices specialist academic area.....	725
Teaching not offices specialist academic area.....	726
Total specialist academic area.....	727
Specified major injuries.....	728
Number of other persons specified major injuries.....	729
Number of staff specified major injuries.....	730
Number of student specified major injuries.....	731
Staff FTE - D05.....	732
Non-residential staff FTE other.....	734

Non-residential staff FTE total.....	735
Research staff FTE.....	736
Residential staff FTE.....	737
Support not offices staff FTE.....	738
Support offices staff FTE.....	739
Support staff FTE total.....	740
Teaching staff FTE.....	741
Total staff FTE.....	742
Total teaching and research staff FTE.....	743
Student and bed space counts.....	744
Student and staff counts.....	745
Student FTE - D04.....	746
FE student FTE.....	747
Research student FTE.....	748
Teaching student FTE.....	749
Total student FTE.....	750
Student headcount - D03.....	751
FE student headcount.....	752
Research student headcount.....	753
Teaching student headcount.....	754
Total student headcount.....	755
Student headcount health and safety.....	756
Total student headcount health and safety.....	757
Tenure - D19.....	758
Commercial tenure freehold.....	759
Commercial tenure leasehold.....	760
Commercial tenure licence.....	761
Commercial tenure long leasehold.....	762
Non-residential tenure freehold.....	763
Non-residential tenure leasehold.....	764
Non-residential tenure licence.....	765
Non-residential tenure long leasehold.....	766
Residential tenure freehold.....	767
Residential tenure leasehold.....	768
Residential tenure licence.....	769
Residential tenure long leasehold.....	770
Trapped by something collapsing.....	771
Number of other persons injuries from being trapped by something collapsing.....	772
Number of staff injuries from being trapped by something collapsing.....	773
Number of student injuries from being trapped by something collapsing.....	774
Use of renewable energy generated onsite or offsite - D72e.....	775
Use of renewable energy generated onsite or offsite where the ROCs are retained or not claimed.....	776

Use of renewable energy generated onsite or offsite where the ROCs are sold.....	777
Volume of wastewater.....	778
Non-residential volume of wastewater.....	779
Residential volume of wastewater.....	780
Total volume of wastewater.....	781
Waste mass - D73.....	782
Non-residential waste mass anaerobic digestion.....	784
Non-residential waste mass composting.....	785
Non-residential waste mass incineration.....	786
Non-residential waste mass landfill.....	787
Non-residential waste mass other.....	788
Non-residential waste mass recycled.....	789
Non-residential waste mass total.....	790
Non-residential waste mass used to create energy.....	791
Other works waste mass anaerobic digestion.....	792
Other works waste mass composting.....	793
Other works waste mass incineration.....	794
Other works waste mass landfill.....	795
Other works waste mass other.....	796
Other works waste mass recycled.....	797
Other works waste mass total.....	798
Other works waste mass used to create energy.....	799
Residential waste mass anaerobic digestion.....	800
Residential waste mass composting.....	801
Residential waste mass incineration.....	802
Residential waste mass landfill.....	803
Residential waste mass other.....	804
Residential waste mass recycled.....	805
Residential waste mass total.....	806
Residential waste mass used to create energy.....	807
Total waste mass.....	808
Total waste mass anaerobic digestion.....	809
Total waste mass composting.....	810
Total waste mass incineration.....	811
Total waste mass landfill.....	812
Total waste mass other.....	813
Total waste mass recycled.....	814
Total waste mass used to create energy.....	815
Water and sewerage costs - D32.....	816
Non-residential sewerage costs.....	817
Non-residential water and sewerage costs total.....	818
Non-residential water costs.....	819

Residential sewerage costs.....	820
Residential water and sewerage costs total.....	821
Residential water costs.....	822
Total sewerage costs.....	823
Total water and sewerage costs.....	824
Total water costs.....	825
Water borehole extraction - D77b.....	826
Borehole water used for irrigation.....	827
Total water borehole extraction.....	828
Water consumption - D38b.....	829
Non-residential water consumption.....	830
Residential water consumption.....	831
Total water consumption.....	832
Water supply grey water and rain water - D77a.....	833
Total water supply grey water and rain water.....	834

Table of Contents (alphabetical)

Fields that are displayed here are sorted alphabetically by field description for ease of searching. Please note that C13042.xsd defines the order that entities and fields must be included within the xml file, which is different to this display order.

All occupational diseases.....	39
Another kind of accident.....	41
Area cleaned - D15.....	45
Borehole water used for irrigation.....	827
Building condition assessment condition - D20a.....	48
Building condition assessment cost to upgrade - D20b.....	59
Buildings and functionality.....	64
Capital expenditure buildings - D25.....	65
Carbon reduction commitment.....	69
Carbon reduction commitment energy efficiency scheme cost.....	70
Carbon reduction commitment energy efficiency scheme participation.....	71
Carbon reduction target.....	72
Central post room and internal distribution services costs - D62.....	74
Cleaning costs - D34.....	78
Commercial listed building coverage.....	328
Commercial PFI or PPP.....	575
Commercial tenure freehold.....	759
Commercial tenure leasehold.....	760
Commercial tenure licence.....	761
Commercial tenure long leasehold.....	762
Construction date - D22.....	89
Contact with electricity or an electrical discharge.....	104
Contact with moving machinery or material being machined.....	108
Dangerous occurrences.....	112
Directly exposed to fire or smoke.....	113
Drowned or asphyxiated.....	117
Energy consumption - D38a.....	121
Energy consumption biofuels.....	124
Energy consumption biomass.....	125
Energy consumption burning oil.....	126
Energy consumption coal (industrial).....	127
Energy consumption compressed natural gas.....	128
Energy consumption electricity consumed from onsite CHP.....	129
Energy consumption fuel oil.....	130
Energy consumption gas oil.....	131
Energy consumption grid electricity.....	132
Energy consumption heat consumed from onsite CHP.....	133
Energy consumption liquefied natural gas.....	134
Energy consumption liquefied petroleum gas.....	135

Energy consumption lubricants.....	136
Energy consumption natural gas excluding that used as input for a CHP unit.....	137
Energy consumption natural gas used as input for a CHP unit.....	138
Energy consumption onsite photovoltaic.....	139
Energy consumption onsite wind.....	140
Energy consumption other onsite renewables.....	141
Energy consumption other petroleum gas.....	142
Energy consumption petroleum coke.....	143
Energy consumption steam and hot water.....	144
Energy costs - D31.....	148
Energy generated onsite by CHP - D72c.....	180
Environment, energy, emissions and waste.....	182
Environmental management system - D74d.....	183
Environmental management system existence.....	184
Environmental management system external verification.....	185
Environmental management system external verification coverage.....	186
Environmental reporting - D74e.....	187
Environmental reporting total.....	188
Estatesmanagement.....	189
EU Emissions Trading Scheme - D80.....	190
EU Emissions Trading Scheme carbon allowance.....	191
EU Emissions Trading Scheme carbon allowance bought or sold.....	192
EU Emissions Trading Scheme cost.....	193
EU Emissions Trading Scheme participation.....	194
Expenditure - D02.....	195
Exposed to fire.....	199
Exposed to or in contact with a harmful substance.....	203
Externally-provided property management costs - D36.....	207
Fairtrade accreditation - D74f.....	211
Fairtrade accreditation existence.....	212
Fatalities.....	213
FE student FTE.....	747
FE student headcount.....	752
Fell from a height.....	217
Finance.....	221
Fire and Rescue Services attendance.....	222
Frequency rate - D16.....	226
Frequency rate calculation - D45.....	231
Fuel used in HEP owned vehicles - D38a.....	233
Fuel used in HEP owned vehicles aviation spirit.....	234
Fuel used in HEP owned vehicles aviation turbine fuel.....	235
Fuel used in HEP owned vehicles biofuels.....	236

Fuel used in HEP owned vehicles diesel.....	237
Fuel used in HEP owned vehicles liquefied petroleum gas.....	238
Fuel used in HEP owned vehicles petrol.....	239
Functional suitability - D21.....	241
Generation of electricity exported to grid.....	251
Gross Internal Area - D11.....	253
Gross Internal Area commercial space.....	257
Gross Internal Area in DEC or EPC - D78 and D79.....	261
Grounds area - D09.....	276
Grounds area listed or heritage.....	277
Grounds area water.....	278
Hazardouswaste.....	280
Health and Safety.....	282
Hit by a moving vehicle.....	283
Hit by a moving, flying, or falling object.....	287
Hit something fixed or stationary.....	291
Incidents involving fire.....	295
Incidents involving injury.....	296
Income - D01.....	297
Injured by an animal.....	304
Injured while handling, lifting, or carrying.....	308
Institution.....	312
Insurance premiums and contributions - D29.....	313
Insurance replacement value - D24.....	317
Internally-incurred property management costs - D35.....	321
Listed building coverage - D70.....	327
Method of floor area measurement - D13.....	332
Method of scope 3 carbon emissions from waste.....	334
Method of space apportionment - D41.....	338
Nature of major fires a source which cannot be determined.....	394
Nature of major fires car fire.....	395
Nature of major fires cooking.....	396
Nature of major fires electrical.....	397
Nature of major fires hot works contract or activity.....	398
Nature of major fires laboratory activity.....	399
Nature of major fires malicious.....	400
Nature of major fires naked flame.....	401
Nature of major fires other.....	402
Nature of major fires smoking.....	403
Nature of minor fires a source which cannot be determined.....	433
Nature of minor fires car fire.....	434
Nature of minor fires cooking.....	435

Nature of minor fires electrical.....	436
Nature of minor fires hot works contract or activity.....	437
Nature of minor fires laboratory activity.....	438
Nature of minor fires malicious.....	439
Nature of minor fires naked flame.....	440
Nature of minor fires other.....	441
Nature of minor fires smoking.....	442
Nature of near miss fire incidents car fire.....	468
Nature of near miss fire incidents cooking.....	469
Nature of near miss fire incidents electrical.....	470
Nature of near miss fire incidents hotworks contract or activity.....	471
Nature of near miss fire incidents laboratory activity.....	472
Nature of near miss fire incidents malicious.....	473
Nature of near miss fire incidents naked flame.....	474
Nature of near miss fire incidents not able to determine.....	475
Nature of near miss fire incidents other.....	476
Nature of near miss fire incidents smoking.....	477
Net Internal Area - D12.....	340
Net Internal Area commercial space.....	359
Net service charge and miscellaneous PFI and PPP costs - D30.....	363
Non-employee hospital treatment for reportable injuries.....	367
Non-residential building condition assessment condition A.....	51
Non-residential building condition assessment condition B.....	52
Non-residential building condition assessment condition C.....	53
Non-residential building condition assessment condition D.....	54
Non-residential building condition assessment cost to upgrade condition C to B.....	60
Non-residential building condition assessment cost to upgrade condition D to B.....	61
Non-residential capital expenditure buildings.....	66
Non-residential central post room and internal distribution services costs.....	75
Non-residential cleaning costs external.....	80
Non-residential cleaning costs internal.....	81
Non-residential cleaning costs total.....	82
Non-residential construction date 1840-1914.....	90
Non-residential construction date 1915-1939.....	91
Non-residential construction date 1940-1959.....	92
Non-residential construction date 1960-1979.....	93
Non-residential construction date 1980-1999.....	94
Non-residential construction date before 1840.....	95
Non-residential construction date since 2000.....	96
Non-residential energy consumption total.....	145
Non-residential energy costs biomass.....	150
Non-residential energy costs coal (industrial).....	151

Non-residential energy costs electricity.....	152
Non-residential energy costs gas.....	153
Non-residential energy costs oil.....	154
Non-residential energy costs onsite photovoltaic.....	155
Non-residential energy costs onsite wind.....	156
Non-residential energy costs other.....	157
Non-residential energy costs steam and hot water.....	158
Non-residential energy costs total.....	159
Non-residential expenditure.....	196
Non-residential external site cleaned.....	46
Non-residential Externally-provided property management costs.....	208
Non-residential Fire and Rescue Services attendance.....	223
Non-residential functional suitability grade 1.....	243
Non-residential functional suitability grade 2.....	244
Non-residential functional suitability grade 3.....	245
Non-residential functional suitability grade 4.....	246
Non-residential GIA.....	254
Non-residential GIA cleaned.....	47
Non-residential GIA commercial space.....	258
Non-residential GIA in DEC or EPC category A.....	262
Non-residential GIA in DEC or EPC category B.....	263
Non-residential GIA in DEC or EPC category C.....	264
Non-residential GIA in DEC or EPC category D.....	265
Non-residential GIA in DEC or EPC category E.....	266
Non-residential GIA in DEC or EPC category F.....	267
Non-residential GIA in DEC or EPC category G.....	268
Non-residential income total.....	298
Non-residential insurance premiums and contributions.....	314
Non-residential insurance replacement value.....	318
Non-residential Internally-incurred property management costs.....	324
Non-residential listed building coverage.....	329
Non-residential method used to calculate scope 3 carbon emissions from waste.....	335
Non-residential net service charge and miscellaneous PFI and PPP costs.....	364
Non-residential NIA commercial space.....	360
Non-residential NIA other.....	343
Non-residential NIA total.....	344
Non-residential NIA vacant.....	345
Non-residential number of automatic detectors.....	371
Non-residential number of buildings.....	379
Non-residential number of car parking spaces.....	383
Non-residential number of fire alarm activations.....	537
Non-residential number of major fires a source which cannot be determined.....	404

Non-residential number of major fires car fire.....	405
Non-residential number of major fires cooking.....	406
Non-residential number of major fires electrical.....	407
Non-residential number of major fires hot works contract or activity.....	408
Non-residential number of major fires laboratory activity.....	409
Non-residential number of major fires malicious.....	410
Non-residential number of major fires naked flame.....	411
Non-residential number of major fires other.....	412
Non-residential number of major fires smoking.....	413
Non-residential number of major fires total.....	414
Non-residential number of malicious fire alarms.....	428
Non-residential number of minor fires a source which cannot be determined.....	443
Non-residential number of minor fires car fire.....	444
Non-residential number of minor fires cooking.....	445
Non-residential number of minor fires electrical.....	446
Non-residential number of minor fires hot works contract or activity.....	447
Non-residential number of minor fires laboratory activity.....	448
Non-residential number of minor fires malicious.....	449
Non-residential number of minor fires naked flame.....	450
Non-residential number of minor fires other.....	451
Non-residential number of minor fires smoking.....	452
Non-residential number of minor fires total.....	453
Non-residential number of near miss fire incidents car fire.....	478
Non-residential number of near miss fire incidents cooking.....	479
Non-residential number of near miss fire incidents electrical.....	480
Non-residential number of near miss fire incidents hotworks contract or activity.....	481
Non-residential number of near miss fire incidents laboratory activity.....	482
Non-residential number of near miss fire incidents malicious.....	483
Non-residential number of near miss fire incidents naked flame.....	484
Non-residential number of near miss fire incidents not able to determine.....	485
Non-residential number of near miss fire incidents other.....	486
Non-residential number of near miss fire incidents smoking.....	487
Non-residential number of near miss fire incidents total.....	488
Non-residential number of other false fire alarm activations.....	502
Non-Residential number of people injured as a result of fires.....	506
Non-residential PFI or PPP.....	576
Non-residential portorage costs.....	571
Non-residential property costs.....	579
Non-residential rateable value.....	588
Non-residential rates paid.....	590
Non-residential repairs and maintenance costs grounds.....	595
Non-residential repairs and maintenance costs playing fields.....	596

Non-residential repairs and maintenance costs total.....	597
Non-residential scope 1 and 2 carbon emissions total.....	615
Non-residential scope 3 carbon emissions from waste.....	698
Non-residential scope 3 carbon emissions from water supply.....	704
Non-residential security costs.....	710
Non-residential sewerage costs.....	817
Non-residential space charging system.....	720
Non-residential staff FTE other.....	734
Non-residential staff FTE total.....	735
Non-residential tenure freehold.....	763
Non-residential tenure leasehold.....	764
Non-residential tenure licence.....	765
Non-residential tenure long leasehold.....	766
Non-residential volume of wastewater.....	779
Non-residential waste mass anaerobic digestion.....	784
Non-residential waste mass composting.....	785
Non-residential waste mass incineration.....	786
Non-residential waste mass landfill.....	787
Non-residential waste mass other.....	788
Non-residential waste mass recycled.....	789
Non-residential waste mass total.....	790
Non-residential waste mass used to create energy.....	791
Non-residential water and sewerage costs total.....	818
Non-residential water consumption.....	830
Non-residential water costs.....	819
Number of automatic detectors.....	370
Number of bed spaces - D23.....	374
Number of bed spaces health and safety.....	376
Number of buildings - D07.....	378
Number of car parking spaces - D71.....	382
Number of cycle spaces - D76.....	386
Number of external fires.....	388
Number of internal fires that did not sound the fire alarm.....	390
Number of major fires.....	392
Number of malicious fire alarms.....	427
Number of minor fires.....	431
Number of near miss fire incidents.....	466
Number of other false fire alarm activations.....	501
Number of other non-employees requiring hospital treatment for reportable injuries.....	368
Number of other persons at risk.....	561
Number of other persons directly exposed to fire or smoke.....	114
Number of other persons fatalities.....	214

Number of other persons injuries from an animal.....	305
Number of other persons injuries from another kind of accident.....	42
Number of other persons injuries from being drowned or asphyxiated.....	118
Number of other persons injuries from being exposed to fire.....	200
Number of other persons injuries from being exposed to or in contact with a harmful substance.....	204
Number of other persons injuries from being hit by a moving vehicle.....	284
Number of other persons injuries from being hit by a moving, flying, or falling object.....	288
Number of other persons injuries from being physically assaulted by a person.....	565
Number of other persons injuries from being trapped by something collapsing.....	772
Number of other persons injuries from contact with electricity or an electrical discharge.....	105
Number of other persons injuries from contact with moving machinery or material being machined.....	109
Number of other persons injuries from falling from a height.....	218
Number of other persons injuries from hitting something fixed or stationary.....	292
Number of other persons injuries from slipping, tripping, or falling on the same level.....	716
Number of other persons injuries while handling, lifting, or carrying.....	309
Number of other persons RIDDOR reportable injuries.....	609
Number of other persons specified major injuries.....	729
Number of people injured as a result of fire.....	505
Number of people injured as a result of fires car fire.....	507
Number of people injured as a result of fires cooking.....	508
Number of people injured as a result of fires electrical.....	509
Number of people injured as a result of fires hotworks contract or activity.....	510
Number of people injured as a result of fires laboratory activity.....	511
Number of people injured as a result of fires malicious.....	512
Number of people injured as a result of fires naked flame.....	513
Number of people injured as a result of fires not able to determine.....	514
Number of people injured as a result of fires other.....	515
Number of people injured as a result of fires smoking.....	516
Number of sites - D06.....	519
Number of staff at risk.....	562
Number of staff directly exposed to fire or smoke.....	115
Number of staff fatalities.....	215
Number of staff injuries from an animal.....	306
Number of staff injuries from another kind of accident.....	43
Number of staff injuries from being drowned or asphyxiated.....	119
Number of staff injuries from being exposed to fire.....	201
Number of staff injuries from being exposed to or in contact with a harmful substance.....	205
Number of staff injuries from being hit by a moving vehicle.....	285
Number of staff injuries from being hit by a moving, flying, or falling object.....	289
Number of staff injuries from being physically assaulted by a person.....	566
Number of staff injuries from being trapped by something collapsing.....	773
Number of staff injuries from contact with electricity or an electrical discharge.....	106

Number of staff injuries from contact with moving machinery or material being machined.....	110
Number of staff injuries from falling from a height.....	219
Number of staff injuries from hitting something fixed or stationary.....	293
Number of staff injuries from slipping, tripping, or falling on the same level.....	717
Number of staff injuries while handling, lifting, or carrying.....	310
Number of staff other injuries involving more than seven days incapacitation.....	535
Number of staff RIDDOR reportable injuries.....	610
Number of staff specified major injuries.....	730
Number of student fatalities.....	216
Number of student injuries from an animal.....	307
Number of student injuries from another kind of accident.....	44
Number of student injuries from being drowned or asphyxiated.....	120
Number of student injuries from being exposed to fire.....	202
Number of student injuries from being exposed to or in contact with a harmful substance.....	206
Number of student injuries from being hit by a moving vehicle.....	286
Number of student injuries from being hit by a moving, flying, or falling object.....	290
Number of student injuries from being physically assaulted by a person.....	567
Number of student injuries from being trapped by something collapsing.....	774

All occupational diseases

Type	entity
Short Name	AllOccupationalDiseases
Description	The field in this entity contains data about all occupational diseases.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>Employers are required to report cases of certain diagnosed reportable diseases which are linked with occupational exposure to specified hazards. The reportable diseases and associated hazards are set out below.</p> <p>Do not include such diseases occurring in commercially let space.</p> <p>Occupational diseases reportable under RIDDOR are:</p> <ul style="list-style-type: none"> • Carpal Tunnel Syndrome: where the person's work involves regular use of percussive or vibrating tools • Cramp of the hand or forearm: where the person's work involves prolonged periods of repetitive movement of the fingers, hand or arm • Occupational dermatitis: where the person's work involves significant or regular exposure to a known skin sensitiser or irritant • Hand Arm Vibration Syndrome: where the person's work involves regular use of percussive or vibrating tools, or holding materials subject to percussive processes, or processes causing vibration • Occupational asthma: where the person's work involves significant or regular exposure to a known respiratory sensitiser • Tendonitis or tenosynovitis: in the hand or forearm, where the person's work is physically demanding and involves frequent, repetitive movements <p>Further information on occupational diseases reportable under RIDDOR can be found on the RIDDOR website.</p>

Area cleaned - D15

Type	entity
Short Name	AreaCleaned
Description	The fields in this entity contain data about the internal and external area cleaned.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The area cleaned on a regular and routine by the HEP in non-residential buildings. This area should relate to that space for which cleaning costs have been provided under Non-residential cleaning costs total. Exclude any highly specialised cleaning (e.g. contamination areas). Exclude any areas cleaned within commercial space.</p> <p>The area figure should be split as follows:</p> <ul style="list-style-type: none"> • Gross internal area cleaned (sq.m) • External site area cleaned (hectares) <p>In line with Cleaning costs, external window cleaning would normally be included as part of Internal Area cleaned, as it relates to the cleaning of premises. The external area cleaned should only cover those areas where routine cleaning is undertaken, which may be less than the whole estate.</p> <p>The external site area should reflect only non-residential sites.</p>

Non-residential external site cleaned

Type	field
Short Name	SMNRESC
Description	This field describes the external site area cleaned for the non-residential estate of an higher education provider (HEP). The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Hectare (ha)
Notes	This figure is for the external site area cleaned for the non-residential estate only, measured in hectares. non-residential
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Area cleaned - D15
Field Length	8

Building condition assessment condition - D20a

Type	entity
Short Name	ConditionAssessmentDefinition
Description	The fields in this entity contain data about building condition definition.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>Report the percentage of GIA (excluding commercial space) which falls under the following headings:</p> <p>Condition A - As new condition - Typically features one or more of the following:</p> <ul style="list-style-type: none"> • typically built within the last five years or may have undergone a major refurbishment within this period, • maintained/serviced to ensure fabric and building services replicate conditions at installation, • no structural, building envelope, building services or statutory compliance issues apparent, • no impacts upon operation of the building. <p>Condition B - Sound, operationally safe, and exhibiting only minor deterioration - Typically features one or more of the following:</p> <ul style="list-style-type: none"> • maintenance will have been carried out, • minor deterioration to internal/external finishes, • few structural, building envelope, building services or statutory compliance issues apparent, • likely to have minor impacts upon the operation of the building. <p>Condition C - Operational but major repair or replacement needed in the short to medium-term (generally 3 years) - Typically features one or more of the following:</p> <ul style="list-style-type: none"> • requiring replacement of building elements or services elements in the short to medium-term, • several structural, building envelope, building services or statutory compliance issues apparent, or one particularly significant issue apparent, • often including identified problems with building envelope (windows/roof etc.), building services (boilers chillers etc.), • likely to have major impacts upon the operation of the building, but still allow it to be operable. <p>Condition D - Inoperable or serious risk of major failure or breakdown - Typically features one or more of the following:</p> <ul style="list-style-type: none"> • building is inoperable or likely to become inoperable, due to statutory compliance issues or condition representing a health and safety risk or breach, • may be structural, building envelope, or building services problems coupled with compliance issues, • the conditions are expected to curtail operations within the building (exclude very minor items which can be rectified easily). <p>The assessment should also relate to current year condition and state. Thus, if the building is currently assessed as condition C but the HEP is aware that it will soon change to condition D, it should still be assessed as condition C. Furthermore, a building which is undergoing refurbishment should be reported as the condition it is in</p>

	<p>as at the end of the HESA reporting period.</p> <p>Building condition assessment updates should be undertaken annually. A full condition survey should be carried out regularly (no more than a 5 year cycle) by an appropriately qualified and experienced professional (e.g. a specialist in condition surveys and legislative compliance who may be either in-house or an external consultant). Should the survey data not be up to date, the data should be returned as estimated. Any data returned must be supportable by audit.</p> <p>Figures are required for both the residential and non-residential estate for each of the five conditions. It is expected that HEPs carry out assessment of condition on a building by building basis.</p> <p>Good practice methodology</p> <p>The following methodology is provided as an example of best practice in carrying out building condition assessment; it is not a requirement that this method is used. However, it is expected that the assessment will be undertaken by an appropriately qualified and experienced professional using an objective assessment methodology.</p> <p>Each building can be given a condition grade based on the relationship between repair and rebuilding costs as follows:</p> <p>$X=R / IRV$ where R= net cost of all currently identified repairs at the point of the annual assessment update, and IRV = net replacement value of the building, based upon its current function (using BCIS published data). Repair costs should include those associated with ensuring legislative compliance (see Current cost of legislative compliance). To ensure comparability, both repair costs and rebuilding costs should be net, i.e. excluding all associated professional fees, statutory fees, contingencies and VAT etc. and should be at present day values, excluding inflation.</p> <p>As a general guide, where X is:</p> <ul style="list-style-type: none"> • < 5%, this indicates condition A (or where the building is less than 5 years old), • between 5% and 20% indicates condition B, • between 20% and 50% indicates condition C, • >= 50% indicates condition D. <p>The proportion of the overall estate which falls into each of the condition categories should be calculated by floor area.</p>

Building condition assessment cost to upgrade - D20b

Type	entity
Short Name	ConditionAssessmentUpgradeCost
Description	The fields in this entity contain data about costs to upgrade building condition.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>This definition is based around the maintenance costs required to up-grade the whole estate (excluding any commercial space) to condition B.</p> <p>The costs should include ensuring legislative compliance (see Current cost of legislative compliance). Costs to upgrade should include professional fees, statutory fees, contingencies and VAT but should exclude inflation.</p> <p>Define the cost to upgrade all space in Condition D to Condition B, and the cost to upgrade all space in Condition C to Condition B.</p> <p>A building or proportion of building could be classed, for example, as Condition C relative to original condition gradings but would have the additional notation identifying costs necessary at today's figures to return the building to Condition B. This may result in the condition grade C-675,000 for example.</p> <p>This provides a summary of building condition through grading but also an indication of cost scale/magnitude to rectify. It also enables the difference between planned maintenance and overall 'backlog' works to be reconciled.</p>

Energy consumption - D38a

Type	entity
Short Name	EnergyConsumption
Description	The fields in this entity contain data about energy consumption.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>Energy consumption, defined in kilowatt-hours (kWh), including gas, liquefied petroleum gas, oil and electricity.</p> <p>Consumption figures should exclude any usage within commercial space.</p> <p>A breakdown should be provided as well as a total figure for a full year's consumption as at the end of the academic year.</p> <p>Note that the breakdown of energy consumption by fuel type should only be provided for the whole estate, and is not required split into non-residential and residential.</p> <p>The types of fuels reflect the types used for calculating carbon emissions. The Defra conversion factors and guidance provide the conversion factors as well as supplemental information. Return '0' if none of these fuel types are used.</p> <p>The following factors are the basis for converting oil and natural gas figures to kWh:</p> <ul style="list-style-type: none"> • litres of oil x 10.6 = kWh equivalent, • therms of natural gas x 29.31 = kWh equivalent. <p>There are difficulties with the measurement of consumption under certain circumstances, some of which are considered:</p> <p>Electricity</p> <p>Tariffs based on 'maximum demand' consumption may not provide actual kWh consumption. This figure should be requested from the local electricity board.</p> <p>Gas meters</p> <p>Readings should be made to the nearest 100 cubic feet or nearest cubic metre. Annual consumption figures should be modified pro rata if readings are not exactly one year apart. However, the readings must not be more than thirteen months apart or less than eleven months apart.</p> <p>Oil metering</p> <p>In cases where no oil meters are installed, the amount of oil consumed within a period will be logged using dip rods. For example:</p> <ul style="list-style-type: none"> • dip rod reading on last day of January: 1,050 litres,

- delivery of oil on second week in February: 3,000 litres,
- dip rod reading on last day of February: 2,500 litres,
- amount used in February: $(1,050+3,000)$ less 2,500=1,550 litres.

District heating

Systems which distribute steam or hot water to multiple buildings. District heating can be provided from a variety of sources. All sources of district heating purchased should be included under this category. This includes third parties external to the HEP who generate power away from the site (such as a local authority or using waste heat from external industrial processes), as well as HEP-owned third parties used to supply combined heating and power (CHP) energy. It will be important to ensure that there is no double-counting in the energy consumption of other fuels, such as gas. The distinction between energy consumption from combined heating and power will be important in relation to the energy emissions figure to be returned under Scope 1+2 carbon emissions (energy use).

Combined heat and power (CHP)

In order to avoid double-counting, consumption and emissions relating to a CHP unit will be accounted for as follows in accordance with Defra conversion factors and guidance.

Where an HEP uses all the outputs of a CHP unit:

- inputs (generally gas, but sometimes other types of solid or fossil fuels) will be included in the scope 1 and 2 CO₂ emissions but should be excluded from energy consumption totals,
- outputs (heat kWh and power kWh) will be excluded from the CO₂ emissions total but should be included in energy consumption totals (heat rejected from the CHP engine and not used on the site i.e. dump cooler, should be subtracted from the heat output figure of the CHP, because the energy cannot be utilised on site i.e. summertime).

If you purchase electricity or heat from a third-party CHP unit for your own consumption, you should report this consumption under grid electricity and steam/hot water. Defra greenhouse gas reporting guidelines state that the one year average factor should be used for electricity purchased from a third-party CHP unit.

If you export a proportion of electricity or heat from a CHP unit that you operate you should follow guidance in Annex D of the 'Environmental Reporting Guidelines' as part of the Defra conversion factors and guidance to attribute emissions and consumption between users.

To convert figures into kWh:

- multiply megawatt hours by 1,000,
- multiply gigajoule hours by 278,
- multiply tons of steam by 698,
- multiply Gcal by 1,163.

Liquified petroleum gas

Include figures for any LPG gas purchased and used directly by the HEP for cooking or heating purposes. Also include any LPG gas purchased for scientific laboratories. Exclude any LPG used by contract, cost or profit catering centres operated by external contractors.

LPG consumption should be provided by bills for refilling containers or providing new

	<p>containers. Assume that all LPG provided and paid for has been consumed. Therefore, take billing figures over a full calendar year.</p> <p>To convert figures into kWh:</p> <ul style="list-style-type: none"> • multiply litres by 7.0, • multiply kg by 13.9.

EU Emissions Trading Scheme - D80

Type	entity
Short Name	EU Emissions Trading Scheme
Description	The fields in this entity contain data about EU Emissions Trading Schemes.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The existence of an EU Emissions Trading Scheme together with the carbon allowance, the proportion of carbon allowance bought or sold and the cost of compliance with the scheme.</p> <p>Prior to the 2011/12 Estates Management Statistics record, the conversion factor used was based on carbon dioxide (CO₂) per unit. However, from the 2011/12 Estates Management Statistics record onwards, the alternative Defra measure of equivalent carbon dioxide (CO₂e) is used instead. This change accounts for additional Greenhouse Gases, including CH₄ and N₂O.</p> <p>Further information on the EU Emissions Trading Scheme can be found on the European Commission website.</p>
Mandatory for

EU Emissions Trading Scheme carbon allowance

Type	field
Short Name	ETSCABAL
Description	This field contains data about the carbon allowance as part of the EU Emissions Trading Scheme. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonnes of equivalent carbon dioxide (t CO ₂ e)
Notes	<p>Total carbon allowance in phase 3 (tonnes of CO₂e) for the whole estate.</p> <p>Launched in 2005, the EU Emissions Trading Scheme is now in its third phase, running from 2013 to 2020. A major revision approved in 2009 in order to strengthen the system means the phase 3 is significantly different from phases 1 and 2 and is based on rules which are far more harmonised than before. The main changes are:</p> <ul style="list-style-type: none"> • A single, EU-wide cap on emissions applies in place of the previous system of national caps • Auctioning, not free allocation, is now the default method for allocating allowances. In 2013 more than 40% of allowances will be auctioned, and this share will rise progressively each year. • For those allowances still given away for free, harmonised allocation rules apply which are based on ambitious EU-wide benchmarks of emissions performance. • Some more sectors and gases are included. • 300 million allowances set aside in the New Entrants Reserve to fund the deployment of innovative renewable energy technologies as well as carbon capture and storage through the NER 300 programme. <p>Further information on the EU Emissions Trading Scheme can be found on the European Commission website.</p>

Change management notes	The guidance has been amended in the notes section, explaining that the EU emissions trading scheme is now in its third phase, running from 2013 to 2020.

EU Emissions Trading Scheme carbon allowance bought or sold

Type	field
Short Name	ETSCCABS
Description	This field contains data about the carbon allowance bought or sold as part of the EU Emissions Trading Scheme. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonnes of equivalent carbon dioxide (t CO ₂ e)
Notes	<p>Total carbon allowance bought or sold in phase 3 (tonnes of CO₂e) for the whole estate.</p> <p>Launched in 2005, the EU Emissions Trading Scheme is now in its third phase, running from 2013 to 2020. A major revision approved in 2009 in order to strengthen the system means the phase 3 is significantly different from phases 1 and 2 and is based on rules which are far more harmonised than before. The main changes are:</p> <ul style="list-style-type: none"> • A single, EU-wide cap on emissions applies in place of the previous system of national caps • Auctioning, not free allocation, is now the default method for allocating allowances. In 2013 more than 40% of allowances will be auctioned, and this share will rise progressively each year. • For those allowances still given away for free, harmonised allocation rules apply which are based on ambitious EU-wide benchmarks of emissions performance. • Some more sectors and gases are included. • 300 million allowances set aside in the New Entrants Reserve to fund the deployment of innovative renewable energy technologies as well as carbon capture and storage through the NER 300 programme. <p>Further information on the EU Emissions Trading Scheme can be found on the European Commission website.</p>

Frequency rate - D16

Type	entity
Short Name	FrequencyRate
Description	The fields in this entity contain data about the frequency rate of the use of teaching rooms.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>Applies only to teaching space under teaching other, as appropriate to the coverage of the Space Utilisation Survey.</p> <p>It should be noted that the definitions and accompanying good practice guidelines are in accordance with the advice produced in the NAO report 'Management of Space in higher education Providers in Wales' (1996).</p> <p>The frequency rate is the number of hours a teaching room is in use as a proportion of total time available.</p> <p>The frequency should be measured on an hourly basis. As an example, if a room were used for 4 hours out of an 8 hour 'working day' then the frequency rate would be 50%.</p> <p>Instances where rooms require set-up by technicians before use should not be included in the frequency rate calculations.</p> <p>The preference is for a survey-based return. However, it may only be possible to make a return based on an analysis of room bookings or timetabled use. The method used needs to be specified under Frequency rate calculation.</p> <p>The measure of frequency that is required is as follows:</p> <ul style="list-style-type: none"> • it is necessary to base the measurement of frequency on a 'standard core working day.' This is based on what the HEP has indicated are core hours, • the year and month that the survey or room booking/timetable analysis was carried out should be specified in the data return. This should be the latest survey data, <p>The following comments are provided as general good practice guidance in carrying out the survey and analysis:</p> <p>The survey period used</p> <p>A full teaching week period should be used in collecting data and should form the basis of the return. Factoring-up the results of a one-day survey is not acceptable for the return.</p> <p>The time frame</p> <p>A survey count based on an hourly frequency should be used, rather than, say, one count in the morning and one count in the afternoon. This will produce more accurate and usable results. Only data based upon an hourly count should be returned.</p>

	<p>Scope of survey</p> <p>It may not be possible to survey all the teaching space identified under Teaching not offices NIA, as HEPs are likely to have various arrangements and management of space in place. However, it is recommended that both 'central' or 'pooled' space and 'local' or 'departmental' space is covered in a survey.</p> <p>The Teaching area covered by the Space Utilisation Survey should be the same space used in making the Occupancy rate return.</p> <p>Also enter the basis of calculation of Frequency rate - see Teaching not offices frequency rate calculation.</p>

Teaching not offices frequency rate percentage

Type	field
Short Name	SMTEFRP
Description	This field contains data about the percentage frequency rate of the use of teaching rooms (not offices). The value can be recorded to one decimal place and must be between 0 and 100.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Percentage (%)
Notes	<p>A percentage should be returned to one decimal place.</p> <p>The frequency rate is the number of hours a teaching room is in use as a proportion of total time available.</p> <p>The frequency should be measured on an hourly basis. As an example, if a room were used for 4 hours out of an 8 hour 'working day' then the frequency rate would be 50%.</p>

Fuel used in HEP owned vehicles - D38a

Type	entity
Short Name	FuelUsedInHEPOwnedVehicles
Description	The fields in this entity contain data about the fuel used in HEP-owned vehicles.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>This is fuel in litres used in vehicles owned or leased by the HEP.</p> <p>This is likely to relate to vehicles used, for example, by HEP facilities management services, a university bus service or a HEP vehicle provided to the vice-chancellor or principal. Vehicles should be interpreted in the widest sense and include for example tractors, ride on lawn-mowers, ships, planes, and racing cars.</p> <p>This should not include fuel used in hire cars, hired buses or private vehicles even if the cost is re-claimed from the HEP; nor fuel used for commuting or student travel in private vehicles. See Scope 3 carbon emissions from business travel for guidance on identifying scope 1 and scope 3 emissions from transport. To avoid double counting, electric vehicles should not be included here as the electricity used for charging these vehicles will be included under Energy consumption.</p>

Functional suitability - D21

Type	entity
Short Name	FunctionalSuitability
Description	The fields in this entity contain data about the functional suitability of HEP space.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>Functional suitability measures the capability of the space to support its existing function. If the space is vacant, the indicator will assume the last use of that space. If space is temporarily vacant (e.g. due to refurbishment), the same assumption applies.</p> <p>There is no best practice guidance as the assessment of functional suitability is inherently subjective but the collection of the data is considered to be important from a strategic point of view. Accordingly, HEPs are advised to use functional suitability data with caution for the purposes of comparison/benchmarking against other HEPs.</p> <p>The following are examples of factors that may need to be considered in setting the functional suitability grade for the room/building, although they should not be seen as prescriptive:</p> <ul style="list-style-type: none"> • : The internal room(s)/area(s) environment in terms of temperature, humidity, fresh air, clean air (if required), lighting levels, day-lighting, • : Layout of room(s)/area(s) relative to equipment used, ancillary and related room functions, furniture, circulation and access, • : The physical location of the room(s)/area(s) relative to the activities that need to use the space, and other spaces these activities need to use, • : Intrinsic ability of room(s)/area(s) to be altered, amended or changed in terms of size, environment and layout in response to changing demand - this will be a factor of structural and building services design, • : Ability of the room(s)/area(s) fittings, furniture and equipment to meet the identified business demands of the users, such as electrical capacity, data points, etc., • : The decorative, aesthetic and cosmetic qualities of the room/area from the perspective of users, • : The quality of external surroundings and settings. This could include factors such as footpath and lighting quality, security perception, building and site appearance, and signage. <p>Measure the proportion of total Gross Internal Area which is in each of the following four categories. (The sum of the four percentages will be the total Gross Internal Area for the HEP).</p> <p>Grade 1 Excellent - the room(s)/building(s) fully support current functions. There are no negative impacts upon the functions taking place in the space.</p> <p>Grade 2 Good - the room(s)/building(s) provides a good environment for the current function in all or most respects. There may be shortfalls in certain areas, but these have only a minor effect upon current functions.</p> <p>Grade 3 Fair - the room(s)/building(s) provides a reasonable environment for current functions in many respects, but has a number of shortfalls. These shortfalls may be causing mismatches between space and function that is having a more significant effect upon current functions than Grade 2 rooms.</p>

	<p>Grade 4 Poor - the room(s)/building(s) fail to support current functions and/or are unsuitable for current use. The operational problems associated with such space are major, and are constraining current functions in the space. Space in this grade may require alternative solutions, rather than straightforward improvements in particular features of the space.</p> <p>Functional suitability measures the capability of the space to support its existing function. If the space is vacant, the indicator will assume the last use of that space. If space is temporarily vacant (e.g. due to refurbishment), the same assumption applies.</p>

Gross Internal Area - D11

Type	entity
Short Name	GrossInternalArea
Description	The fields in this entity contain data about Gross Internal Area (GIA).
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>This definition is based around the definitions contained in the 'Code of Measuring Practice: A guide for Property Professionals' (Sixth Edition), published by The Royal Institution of Chartered Surveyors (RICS). Due consideration to the needs of the higher education sector have been made in putting this definition together.</p> <p>GIA is the total area of buildings owned or occupied or maintained by the HEP measured to the internal face of the perimeter walls at each floor level (i.e. the footprint of the building excluding the width of the outside walls). It includes areas occupied by Internal Areas and partitions. Sum of Net Internal Area (NIA) and balance area as defined in Net Internal Area.</p> <p>Note that the following are included:</p> <ul style="list-style-type: none"> • areas occupied by internal walls (both structural walls and temporary walls) and partitions, • GIA of student residential buildings, • GIA of housing for staff (including wardens' accommodation in residences), • accommodation on NHS sites which is maintained or paid for. <p>Excludes:</p> <ul style="list-style-type: none"> • derelict space. This is space that is currently unoccupied and incapable of occupation and no reinstatement is planned within the next year. Space that is currently not occupied due to refurbishment or other activities should not be classed as derelict space. Similarly, space that has been classed as Condition D in Building condition assessment condition • accommodation on NHS sites which is neither maintained nor paid for, • perimeter wall thickness and external projections, • any structure attached to the outside of the external wall of a building e.g. external open-sided balconies, covered ways, fire escapes and canopies, • investment properties used to derive an income (i.e. any property from which income is derived from a commercial or private tenant).

Version	1.0

Hazardous waste

Type	entity
Short Name	HazardousWaste
Description	The field in this entity contains data about hazardous waste.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The approximate annual mass (tonnes) of hazardous waste arising from HEP activities. Hazardous waste is defined as the types of waste that are harmful to human health, or to the environment, either immediately or over an extended period of time. Hazardous wastes are identified in the Environment Agency: European Waste Catalogue, a list of waste descriptions established by the European Commission.</p> <p>Hazardous waste includes:</p> <ul style="list-style-type: none"> • asbestos, • chemicals, • electrical and electronic equipment, • fluorescent light tubes and energy-saving light bulbs, • healthcare/clinical, • lead acid batteries, • oils, • pesticides, • refrigerators containing ozone-depleting substances, • solvents. <p>Further information on assessing and classifying hazardous waste can be found in the document 'Technical Guidance WM2' on the Environment Agency website.</p> <p>Hazardous waste needs to be tracked and inventoried throughout the HEP to meet regulatory requirements; therefore monitoring and reporting of the annual hazardous waste mass ought to be relatively straightforward.</p> <p>Although residential buildings will produce waste of a hazardous nature, this type of waste produced by households is not classified as hazardous waste under the Hazardous Waste Regulations 2005. Therefore, it is not necessary for HEPs to collate hazardous waste data from residential properties where it is collected by a local authority. Where HEPs do collate and monitor hazardous waste data from residential buildings this would represent best practice.</p>

Insurance replacement value - D24

Type	entity
Short Name	InsuranceReplacementValue
Description	The fields in this entity contain data about insurance replacement value (IRV).
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>This is the current cost of re-building the property to a standard similar to that of the existing, subject to appropriate allowances being made for any extra work which may be required as a result of physical conditions or statutory provisions, such as changes in building regulations. It does not record the value for which the property is insured.</p> <p>The figure should be adjusted to include demolition and site clearance, the effect of special site restrictions, professional fees and VAT. Exclude the value of contents. Exclude leasehold property where the landlord insures.</p> <p>Areas relating to commercial space should be excluded.</p> <p>The replacement value must be the actual cost to re-build and will not necessarily be the insured value for insurance purposes. When calculating, the HEP must assume the current rate of VAT regardless of the HEPs ability to reclaim. The Building Cost Information Service (BCIS) rebuilding costs should be used when determining IRV but should be adjusted accordingly to reflect local conditions. The evaluation for the cost to re-build should be updated on a regular basis and in any event the figure returned should have been calculated no more than 3 years ago.</p> <p>Integral fixtures and fittings e.g. chemical fume cupboards should be included in IRV.</p>

Internally-incurred property management costs - D35

Type	entity
Short Name	InternallyIncurredPropertyManagementCosts
Description	The fields in this entity contain data about Internally-incurred property management costs.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>Internally-incurred costs associated with all property management activities excluding any commercial space. This should include:</p> <ul style="list-style-type: none"> • Internally-incurred estate management costs: This category should include all costs (both 'high level' and other appropriate staff and associated costs for this activity) associated with estates strategy and planning, all landlord and tenant matters, acquisition and sales, rating, buildings insurance, energy, water and sewerage, and landscaping, repair and maintenance and internal moves. <p>In the case of estates strategy and planning, landlord and tenant matters, purchases and sales, rating and buildings insurance, these costs are likely to cover all staff. For energy, water and sewerage, landscaping, repair and maintenance, including major revenue projects and internal moves, costs are for 'high level' staff and associated costs. This should include all staff not responsible for supervising or undertaking these activities directly.</p> <p>Include legal costs of estate management work.</p> <ul style="list-style-type: none"> • Internally-incurred facilities management costs: This category should include all staff and associated costs that support the occupancy of the estate, other than the operational facilities costs. This will include the costs of management and administration (not supervision) of cleaning, security and portorage, reception services, post room and internal distribution services and help-desk management. (Note: this definition excludes other activities that may be classed as facilities management, such as telephone costs. These operational and management costs should therefore be excluded from this return). <p>Include legal costs of facilities management work.</p> <ul style="list-style-type: none"> • Internally-incurred project management costs: This category should include all the staff and associated costs required to plan for and justify capital and revenue projects (including capital bids) and designing and/or project managing the work. (This combination of costs should therefore cover all staff associated with this activity). <p>Construction costs should not be included here.</p> <p>Include legal costs of project management work. Note: the combination of management costs and operational costs (see security costs, portorage costs, central post room and internal central post room and internal distribution services costs etc.) should capture all relevant property management costs for the relevant category of activity. Thus, the costs of managing the activities listed under the 'estate management' heading need to be captured, along with the costs of the activities themselves. Apart from facilities management, therefore, coverage of costs should be comprehensive.</p> <p>Include the following costs for each category of management:</p>

- staff costs (salary, national insurance, pension contributions, and the value of other perquisites as presented to Inland Revenue). Include the staffing costs of those outside the estates department (but within the HEP) who do work of this kind,
- direct office running costs associated with relevant management functions (support staff, such as departmental secretaries, equipment, expenses, communications and consumables).

Interpretation guidance

The emphasis of Internally-incurred property management costs is to capture 'high level' internal property management costs. However, this is not appropriate for all categories of property management as it would result in certain costs not being captured. This guidance therefore sets out to make clear what staff costs should be captured in each category of 'management', as well as commenting on how they relate to operational costs.

As a general guide, the staff costs captured in Internally-incurred property management costs should relate through to the staff numbers captured under Property management staffing.

Below are a series of categories of 'management'. They are intended solely as a guide to the type of person/activity that might fall within these levels of management, and hence how they should be treated in terms of Internally-incurred property management costs. However, it will remain a matter of judgement by the HEP how to assign people to the various categories and so these notes should be treated as aiding that process rather than being prescriptive.

High level management

High level management is taken to include those staff charged with developing policy and/or strategic operational activities, and/or major staff management responsibilities. This is likely to include the Director of Estates/Facilities, Assistant Directors, Senior Specialists. This list is not exhaustive. This is the category of staff that are likely to form the sole or main input to the staff cost definition Internally-incurred property management costs, unless otherwise stated. Other staff costs should, as appropriate, be allocated elsewhere in the operational cost definitions, or Externally-provided property management costs.

Middle management

Middle management is taken to include staff with a responsibility for the implementation of policy and/or management of operations. There may, in addition, be functional staff management responsibilities, such as being responsible for a particular team or activity area. This is likely to include architects, engineers, surveyors, planners and administrative officers. Such staff would normally be included within the appropriate operational cost definition.

Thus, an mechanical and electrical engineer responsible for the minor works programme would be likely to have costs allocated under Repairs and maintenance costs.

The exceptions to this may be those staff who have a sole or proportionate engagement in estate strategy, landlord and tenant or similar activities. Unless these activities can be assigned to another operational cost definition, such as Repairs and maintenance costs then they will need to be captured under the appropriate staff management cost definition. For strategy and landlord and tenant work this would be Internally-incurred Estate management costs.

	<p>Direct management/supervisors</p> <p>Direct managers and/or supervisors are taken to be those staff which have day-to-day management of appropriate operational staff. These staff costs should be returned under the appropriate operational costs heading.</p> <p>Administrative support</p> <p>Administrative staff includes secretaries, clerical staff, technical staff, administrators etc. They are responsible for supporting the activities of the estate and facilities staff, be they managers or operational staff. They should be apportioned across estate management, facilities management, project management and operational costs, as far as considered appropriate.</p> <p>Operational staff</p> <p>Operational staff includes carpenters, electricians and building and maintenance personnel. This list is not exhaustive. This category of staff would normally be captured under the appropriate operational definition. As an example, cleaning staff costs (excluding managers and supervisors) would be captured under this definition.</p>

Listed building coverage - D70

Type	entity
Short Name	ListedBuildingCoverage
Description	The fields in this entity contain data about listed building coverage.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The total Gross Internal Area that is identified as being on the Statutory List of Buildings of Special Architectural or Historic Interest or a Scheduled Ancient Monument. Listing or categorising is as defined by the following key sources: Planning (Listed Buildings and Conservation Areas) Act 1990, Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997, and Northern Ireland Planning Order 1991.</p> <p>The data should include buildings in the following categories, but no separate return for each of the categories should be made. Instead, a single figure for all listed buildings should be returned, split between residential and non-residential:</p> <ul style="list-style-type: none"> • : Grade I (England and Wales), Grade A (Northern Ireland), Grade A (Scotland), • : Grade II* (England and Wales), Grade B+ (Northern Ireland), Grade B (Scotland), • : Grade II (England and Wales), (Grade B1) Northern Ireland, Grade C (Scotland). <p>The assessment should only relate to currently listed properties, rather than those which may be in the process of being listed. The properties should also only be those covered by the appropriate legislation, rather than by schemes such as local authority designated lists of historical buildings or equivalent.</p> <p>The return should only include the floor area directly associated with the listing. For a listed building frontage, the whole of the building floor area associated with the listed frontage should be returned, rather than just the area of the frontage area itself.</p>

Net Internal Area - D12

Type	entity
Short Name	NetInternalArea
Description	The fields in this entity contain data about Net Internal Area (NIA).
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>There are two alternative approaches for the return of data on NIA:</p> <ul style="list-style-type: none"> • NIA Royal Institution of Chartered Surveyors • NIA room area. <p>The NIA RICS definitions are contained in the 'Code of Measuring Practice: A Guide for Property Professionals', published by the RICS.</p> <p>Room area is NIA less the width of internal walls and partitions. Information is required for the same categories of space as NIA, with the same definitions applying apart from the measurement of space.</p> <p>HEPs should return data in the form that is most straightforward for them. However the NIA RICS definitions are preferred.</p> <p>NIA</p> <p>Net Internal Area is the usable area within a building measured to the internal face of the perimeter walls at each floor level. NIA covers all areas which are used for a specific purpose. It does not include those parts of buildings which enable them to function i.e. balance areas defined below.</p> <p>Includes:</p> <ul style="list-style-type: none"> • teaching and research rooms, • offices, • kitchens, • workshops, • built-in units, cupboards etc. occupying the useable area, • stores, • academic stores, • changing rooms and showers (e.g. within or as part of clean rooms, catering facilities, sports facilities), • porters' offices and kiosks, • first aid rooms, • staff common rooms, • internal partition walls (e.g. fixed walls, de-mountable re-moveable screens), • ramps of lightweight construction to false floors, • a floor area which contains a ventilation/heating grill, • area occupied by skirting and perimeter trunking, • areas served by internal non-structural walls, de-mountable partitions (whether or not permanent) etc. where the purpose of the division is partition of use (and not support) provided the area beyond is not used in common (by more than one occupier), • pavement vaults, • notional lift lobby and similar areas, where there are several functions using the

- area, such as meeting space, reception, or cafe,
- accomodation on NHS sites which is maintained or paid for,

It does not include those parts of buildings which enable them to function, such as corridors. These are classified as balance areas.

Balance area

Balance areas include the floor area planned or provided as part of the Gross Internal Area to enable the building to function, such as:

- corridors and other circulation areas of a permanent nature (e.g. fire corridors, smoke lobbies etc.),
- internal open-sided balconies or similar,
- internal structural walls, walls enclosing excluded areas, columns, piers, chimney berasts, vertical ducts, and other projections,
- stairways and stairwells (and voids over),
- entrance lobbies (where the function is solely or primarily for entry/circulation),
- foyers (where the function is solely or primarily for entry/circulation),
- atria with clear height above, measured at base level only (where the function is solely or primarily for entry/circulation),
- lifts,
- permanent lift lobbies, permanent lift rooms, liftwells, and lifts (and voids over),
- lavatories and toilet lobbies,
- cloakrooms,
- cleaners' stores,
- cleaners' cupboards (as defined in the RICS definition),
- covered areas (e.g. plant rooms, tank rooms, fuel stores which are housed in a structure of a permanent nature, whether or not above main-roof level,
- loading bays,
- ducts,
- permanent and continuous air-conditioning, heating, or cooling apparatus (as defined in the RICS definition),
- boiler houses,
- calorifier chambers,
- fuel stores.

Space otherwise considered as balance areas, such as foyers, may only be included in NIA where it meets the appropriate definition.

Exclusions

There are a number of items that should be excluded from space measurement, such as:

- accommodation on NHS sites which is neither maintained nor paid for,
- areas under the control of service or other external authorities including meter cupboards and statutory service supply points (as defined under the RICS definition),
- areas with a headroom of less than 1.5m (as defined under the RICS definition),
- commercial space i.e. space not used for HEP purposes.

Breakdown of NIA space

Where space is used for dual purposes, an attribution on the basis outlined under heading Method of space apportionment should be used. This will apply in particular to data returns under headings Teaching total and Research total.

In addition, any space such as storage space that may be attributable to either the

	'office' or 'core' element of teaching or research, should be assigned to either of these categories on the basis of their actual use. Thus, if a storage room opens into a teaching office and is used for storing student records, then it should be assigned to teaching office space. The same method must be used for all space allocation.

Net Internal Area commercial space

Type	entity
Short Name	NetInternalAreaCommercialSpace
Description	The fields in this entity contain data about the Net Internal Area (NIA) of space dedicated for commercial use.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The term 'commercial space/property' (also called investment or income property) refers to buildings (or part buildings) or land intended to generate a profit or strategic benefit to the HEP, which might be from capital gain, rental income or collaboration benefits i.e. intellectual property rights or other. The arrangements may be by licence, lease or other formal arrangement.</p> <p>In general, commercial space would be let to a third party, whose aims and objectives are not an integral part of the core function of the HEP. The floor area of any commercial space that is currently vacant, even if it has been let previously and may be again, should not be separately identified as 'commercial' if the costs associated with that space are included elsewhere within the HEP return.</p>

Net service charge and miscellaneous PFI and PPP costs - D30

Type	entity
Short Name	NetServiceChargeandMiscellaneousPFIandPPPCosts
Description	The fields in this entity contain data about net service charge and miscellaneous PFI (private financial initiative) and PPP (public/private partnership) costs.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The annual payments to an external landlord for the delivery of services under the terms of a lease less service charge income from external tenants/miscellaneous PFI (Private finance initiative)/PPP (Public/private partnership) costs, which cannot be allocated under any other Estates management cost category.</p> <p>Items included in the service charge vary according to lease terms but may include cleaning, heating, repairs etc.</p> <p>Wherever possible, PFI and PPP costs should be disaggregated and allocated along service lines and in all cases the PFI and PPP should be approached in the first instance to obtain a breakdown of their costs. However, where the provider is unable or unwilling to do so, perhaps because they are not contractually obliged to do so, any costs that cannot be broken down should be included under this heading in order to obtain an accurate picture of the Property costs.</p>

Residential number of major fires hot works contract or activity

Type	field
Short Name	IFRMAHC
Description	This field contains data about the number of major fires (hot works/contract or activity) that occurred on the residential estate.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	The number of major fires (hot works/contract or activity) that occurred on the residential estate.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Number of major fires
Field Length	3
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: IFRMAHC Data type: NUMBER3Type
Owner	HESA
Version	1.0

Residential number of major fires laboratory activity

Type	field
Short Name	IFRMALB
Description	This field contains data about the number of major fires (laboratory activity) that occurred on the residential estate.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	The number of major fires (laboratory activity) that occurred on the residential estate.
Mandatory for	
Reason Required	Sector use and benchmarking.

Number of minor fires

Type	entity
Short Name	NumberOfMinorFires
Description	The fields in this entity contain data about the number of minor fires.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The number of minor fires.</p> <p>A minor fire incident is defined as an incident involving smoke, heat and flames causing only localised damage to equipment or property.</p> <p>For minor fire incidents 'localised' may need to be determined. Using a simple rule of thumb: a maximum area directly affected by heat or smoke less than 0.5m² or damage confined to one small piece of equipment would be classified as 'localised'.</p> <p>Exclude those occurring in space not managed by the HEP.</p>
Mandatory for	
Reason Required	
Part Of	Incidents involving fire
Minimum Occurrences	0
Maximum Occurrences	1

Number of near miss fire incidents

Type	entity
Short Name	NumberOfNearMissFireIncidents
Description	The fields in this entity contain data about the number of near miss fire incidents.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The number of near miss fire incidents.</p> <p>A near miss fire incident is defined as an incident involving only smoke, without flames, which may or may not cause damage.</p> <p>Examples of near miss fire incidents include:</p> <ul style="list-style-type: none"> • some cooking incidents, which are restricted to burnt food, pans boiling dry, etc. generating smoke but no flames and/or damage but prompts occupants to operate a call point or actuation of the fire alarm, • an overheating fluorescent tube capacitor causing sufficient smoke to prompt occupants to operate a call point, but with virtually no damage occurring beyond the capacitor. <p>Fires are categorised by their cause and not their type. An overloaded socket caused fire damage to a building should be recorded as an electrical fire.</p> <p>Exclude those occurring in space not managed by the HEP.</p>

Number of sites - D06

Type	entity
Short Name	NumberofSites
Description	The field in this entity contains data about the number of sites.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The number of independent sites operated by the HEP.</p> <p>Sites should normally have a floor space of at least 1000 sq. m and would normally be at least 1km away from any other site. They should be physically and functionally severed from other sites and would not normally be single buildings. However, HEPs should return what they consider to be a site.</p> <p>Exclude sites held for investment or primarily income generation purposes (e.g. commercial farm not used for academic purposes, commercial property, etc.).</p> <p>If a site is shared between two HEPs then both HEPs should include the site, as long as it falls within the definition of a 'site'.</p>

Occupancy rate - D18

Type	entity
Short Name	OccupancyRate
Description	The fields in this entity contain data about the occupancy rate of teaching space.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The Occupancy Rate represents the usage of teaching space as a percentage of total actual occupation. As an example, a room with a capacity of 20 may be occupied by 10 people during each hourly slot across the whole working day (as defined by the HEP), which would be an occupancy rate of 50%. If, however, no people were in the room for each hourly slot between 9.00 am and 1.00 pm, and 10 people were in the room for each hourly slot between 1.00 pm and 5.00 pm, then the occupancy rate would still be 50% over the working day as the period between 9.00 am and 1.00 pm is not included as part of the actual occupation.</p> <p>Applies only to teaching space under teaching other, as appropriate to the coverage of the Space Utilisation Survey.</p> <p>It should be noted that the definitions and accompanying good practice guidelines are in accordance with the advice produced in the NAO report 'Management of Space in higher education Providers in Wales' (1996).</p> <p>An updated review of utilisation called 'Review of Space norms' by SMG is also available.</p> <p>Because it is recognised that data generated from room bookings/time-tables is likely to be less accurate than that collected using the Survey-based approach, as the actual numbers in the room will not be known, nor will it be known whether the room was actually used when booked out or timetabled for use, HEPs are discouraged from using this approach to produce the data.</p> <p>In all cases, if there is a room that is not being occupied at a particular point in time during the survey but is still part of the survey, it should not form part of the analysis. Thus, if a room is occupied for half of one day, but not for the other half of the day, then the periods it is not in occupation should not be used in calculating overall occupancy.</p> <p>The year and month that the survey or room booking/timetabled analysis was carried out should be specified in the data return.</p> <p>The following comments are provided as general good practice guidance in carrying out the survey and analysis:</p> <p>The survey period used</p> <p>A full teaching week period should be used in collecting data and should form the basis of the return. Factoring-up the results of a one-day survey is not acceptable for the return.</p>

	<p>The time frame</p> <p>A survey count based on an hourly frequency should be used, rather than, say, one count in the morning and one count in the afternoon. This will produce more accurate and usable results. Only data based upon an hourly count should be returned.</p> <p>The occupancy rate should exclude time blocks when the occupancy is zero within either a 9-5 week, or the standard working week as appropriate.</p> <p>Counting method</p> <p>In terms of accuracy, a full headcount method will be the most accurate (i.e. counting all people in a room). If it is not possible to use this method, then the next most accurate method is to carry out a headcount up to a specified level (for example, 40 people) and estimate numbers beyond this point. A third method is to assess if the room is full/empty in proportionate terms (e.g. 25% full, 25-50% full etc.). Other methods are available, but the three previously mentioned indicate the range of options generally available. HEPs should choose an approach that suits their needs.</p> <p>The lecturer should not be included in the recording of room capacity.</p> <p>Scope of survey</p> <p>It may not be possible to survey all the teaching space identified under Teaching not offices NIA, as HEPs are likely to have various arrangements and management of space in place. However, it is recommended that both 'central' or 'pooled' space and 'local' or 'departmental' space is covered in a survey.</p> <p>The Teaching area covered by the Space Utilisation Survey should be the same space used in making the Occupancy rate return.</p> <p>Also enter the basis of calculation of Occupancy rate - see Teaching not offices occupancy rate calculation.</p>

Version	1.0

Residential occupancy rate percentage

Type	field
Short Name	SMORRP
Description	This field contains data about the occupancy rate of residential space. The value can be recorded to one decimal place and must be between 0 and 100.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Percentage (%)
Notes	<p>The residential occupancy rate is measured by the proportion of the total letting period that the HEP's bedspaces are paid for throughout the letting year for resident students of the HEP. Thus, if 1,000 beds are let out for 32,000 'bedweeks' over a 36 week year, the occupancy rate would equal $32,000/(1000 \times 36) = 88.8\%$.</p> <p>It is recognised that there may be different letting periods for different property and/or different types of student. It will therefore be necessary to provide a residential occupancy rate that is weighted to reflect these differences. The suggested method for providing this information is to divide the total number of 'bedweeks' sold by the total number of 'bedweeks' available over the academic letting period.</p> <p>A bedweek is defined as one bedspace that is occupied for one week. If a HEP has 1,000 beds each occupied/let for a 36 week year, this means that there are 36,000 bedweeks. Thus, by calculating a bedweek value for each space and summing them the total 'let' bedweeks per period can be seen. This should be expressed as a percentage of the total potential bedweeks, (i.e. assuming all the bedspaces are let for full year, or 36 weeks x 1,000 beds in this example). The academic year should exclude out-of-term periods and therefore any occupancy by overseas students in holiday periods should not enter into the calculation.</p>

Rateable value - D27

Type	entity
Short Name	RateableValue
Description	The fields in this entity contain data about the rateable value of space.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The current rateable value of all occupied space, excluding any commercial space, held at the end of the relevant year.</p> <p>Residential space is subject to rates in Northern Ireland, therefore higher education Providers in Northern Ireland should exclude Rateable value and Rates paid from their return on residential space.</p> <p>Include:</p> <ul style="list-style-type: none"> • rateable value of vacant space, • the effects of any rating appeals determined before the end of the financial year but ignore outstanding appeals. <p>Exclude rateable value on space let out to sub-tenants if the tenant pays the rates.</p> <p>Residential properties do not attract rates (unless used for lettings for more than 140 days/year) and therefore typically have no rateable value.</p> <p>Note: Rateable values are very important in the preparation of Key Estate Ratios since these are the only consistently available data item to use as a proxy for rent or for use of capital. Its chief advantage is that numbers are available across all property types (excluding residential) and for both freehold and leasehold tenures.</p>

Repairs and maintenance costs - D33

Type	entity
Short Name	RepairsandMaintenanceCosts
Description	The fields in this entity contain data about repairs and maintenance costs.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>All revenue expenditure costs associated with the on-going repair and maintenance of the estate, but excluding costs relating to the commercial estate (it may include costs that fall below a certain HEP-specific spending threshold). This will be for the HEP as a whole, not just the estates department. Include the costs of maintenance and repair on all buildings, roads, grounds and playing fields as follows:</p> <ul style="list-style-type: none"> • staff costs (salary, national insurance, pension contributions, and the value of other benefits as notified to Inland Revenue), • staff time associated with the direct supervision of repair and maintenance work but exclude the costs of 'top level' management time spent on budget setting and overall control, • direct support costs related to expenses, computing (excluding hardware), communications and consumables associated with maintenance and repair (rents, rates and service charges are not required), • costs of materials, • cost of legislative compliance, • costs of external consultants and contractors associated with maintenance work, • minor works expenditure where these are treated as revenue expenditure, and have not been included in the return of Capital expenditure buildings • actual expenditure associated with long-term maintenance plans. <p>Specifically exclude any costs included under the heading of internal estate management costs at internally-incurred property management costs and any depreciation on capital costs of equipment.</p> <p>The distinction between Capital expenditure buildings and maintenance revenue expenditure will be a matter for HEPs to determine, in line with the requirements of the Financial Reporting Group.</p> <p>However, under Capital expenditure buildings there is guidance on the break down required under this heading. For reference, it should be noted that the total figure for Capital expenditure buildings returned in the Estates management record should be the same as the return made in the HESA Finance Statistics Return (FSR) Table 8 'Capital expenditure'. This, along with the definition of maintenance under Repairs and maintenance costs, should ensure compatibility with HESA returns for the topics of maintenance and capital expenditure.</p> <p>It is important, however, that care is taken to avoid double-counting between Capital expenditure buildings and the Repairs and maintenance costs made here.</p> <p>The combination of Repairs and maintenance costs and Capital expenditure buildings should result in the total building works related expenditure for the HEP. It is recognised, however, that there may be some inaccuracies using these sources, but they should still give a reasonable picture of these elements of property costs over time.</p>

	<p>The figures for Non-residential repairs and maintenance costs total and Residential repairs and maintenance costs total should include buildings, grounds and playing field repairs and maintenance costs.</p> <p>Building maintenance definition</p> <p>Work undertaken to keep and restore every part of a building, its services and surrounds (including underground installations). This includes planned and reactive maintenance which are defined as:</p> <p>Planned building maintenance is any work done with forethought and control to a predetermined plan, even on a day-to-day basis. This includes:</p> <ul style="list-style-type: none"> • day to day or routine maintenance, • periodic or cyclical maintenance, • maintenance contracts (scheduled and condition based maintenance), • preventative maintenance (also planned preventative maintenance and forward maintenance), • regular statutory inspections, • painting/decorating programmes, • adaptation (such as re-location, change of use, alterations and minor refurbishment) that have not been included in part of Capital expenditure buildings • long term maintenance (irregular or backlog maintenance). <p>Cleaning of external brickwork should be included under Repairs and maintenance costs and not under Cleaning costs.</p> <p>Reactive building maintenance is carried out in response to unplanned breakdowns and emergencies. This includes:</p> <ul style="list-style-type: none"> • unplanned maintenance, • emergency or breakdown maintenance, • responsive maintenance. <p>With term maintenance contracts and total facilities management contracts, reactive maintenance costs are costs of unforeseen break downs and ad hoc occupier requests for building maintenance, under the direct control of the contractor.</p>

Scope 1 and 2 carbon emissions - D38c

Type	entity
Short Name	Scope1and2CarbonEmissions
Description	The fields in this entity contain data about scope 1 and 2 carbon emissions from Energy consumption and Fuel used in HEP owned vehicles.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>These are scope 1 and 2 emissions in total greenhouse gas emissions (kg CO₂e).</p> <p>Where possible HESA will calculate this metric by taking the energy consumption figures returned under Energy consumption and Fuel used in HEP-owned vehicles and convert to kilograms of carbon dioxide equivalents using the relevant Gross CV conversion factor. The energy consumption figures should exclude any usage within commercial space and thus will these emissions figures.</p> <p>Emission conversion factors</p> <p>Prior to the 2011/12 Estates Management Statistics record, the conversion factor used was based on carbon dioxide (CO₂) per unit. However, from the 2011/12 Estates Management Statistics record onwards, the alternative Defra measure of equivalent carbon dioxide (CO₂e) is used instead. This change accounts for additional Greenhouse Gases, including CH₄ and N₂O.</p> <p>The Defra conversion factors and guidance provide the conversion factors as well as supplemental information.</p> <p>Electricity supplied through 'green tariffs' will not be considered zero carbon and the average grid electricity carbon factor will be applied. An emission reduction will be applied for any renewable electricity that has been generated and exported to the national grid or a third party at the one year average factor.</p> <p>For treatment of CHP inputs and outputs see Energy consumption. The conversion factor for natural gas will be used for CHP inputs. However, if the input fuel is different please state the fuel and appropriate conversion factor.</p> <p>Scope 1 and 2 carbon emissions from vehicles must be excluded from both Non-residential scope 1 and 2 carbon emissions total and Residential scope 1 and 2 carbon emissions total. A vehicle should not be given a non-residential or residential distinction for the purposes of the Estates management record. This ensures that the scope 1 and 2 carbon emissions from vehicles are not double counted within Total scope 1 and 2 carbon emissions.</p>

Owner	HESA
Version	1.1
Date modified	2015-02-25
Change management notes	Additional guidance added to the Notes section, clarifying that a vehicle should not be given a non-residential or residential distinction for the purposes of the Estates management record. This ensures that the scope 1 and 2 carbon emissions from vehicles are not double counted within Total scope 1 and 2 carbon emissions (E12CET).

Non-residential scope 1 and 2 carbon emissions total

Type	field
Short Name	E12CENRT
Description	This field contains data about scope 1 and 2 carbon emissions for the non-residential estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Kilograms of equivalent carbon dioxide (kg CO ₂ e)
Notes	<p>This figure is for the scope 1 and 2 carbon emissions of the non-residential estate only.</p> <p>Scope 1 and 2 carbon emissions from vehicles must be excluded from both Non-residential scope 1 and 2 carbon emissions total and Residential scope 1 and 2 carbon emissions total. A vehicle should not be given a non-residential or residential distinction for the purposes of the Estates management record. This ensures that the scope 1 and 2 carbon emissions from vehicles are not double counted within Total scope 1 and 2 carbon emissions.</p> <p>HEPs will need to enter this figure (as the breakdown collected in Estates management record is not sufficient to enable HESA to calculate this).</p>
Mandatory for	England Northern Ireland Wales
Reason Required	For advice to Government, monitoring progress towards sector carbon targets and for use in producing Capital Investment Framework (CIF) metrics.
Part Of	Scope 1 and 2 carbon emissions - D38c

Scope 1 and 2 carbon emissions biofuels

Type	field
Short Name	E12CEBF
Description	This field contains data about scope 1 and 2 carbon emissions from biofuels. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Kilograms of equivalent carbon dioxide (kg CO ₂ e)
Notes	<p>Total scope 1 and 2 carbon emissions from biofuels (Kg CO₂ per litre) for the whole estate.</p> <p>If a figure was returned under Energy consumption biofuels (kWh), higher education providers (HEPs) will need to calculate the scope 1 and 2 emissions.</p> <p>The consumption figure returned by the HEP should be broken down by the type of biofuel, the component figures multiplied by the corresponding Defra conversion factors to produce the scope 1 and 2 carbon emissions. The sum of these should then be returned in this field.</p> <p>The Defra conversion factors and guidance to support HEPs in returning this field can be found in the downloadable Excel spreadsheet, under the 'Bioenergy' tab.</p>
Mandatory for	England Northern Ireland Wales
Reason Required	For advice to Government, monitoring progress towards sector carbon targets and for use in producing Capital Investment Framework (CIF) metrics.
Part Of	Scope 1 and 2 carbon emissions - D38c

Scope 1 and 2 carbon emissions vehicles liquefied petroleum gas

Type	field
Short Name	E12CEVLG
Description	This field contains data about scope 1 and 2 carbon emissions from liquefied petroleum gas used in HEP-owned vehicles. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Kilograms of equivalent carbon dioxide (kg CO2e)
Notes	<p>This conversion will be undertaken by HESA.</p> <p>Total scope 1 and 2 carbon emissions from liquefied petroleum gas (litres) used in vehicles owned or leased by the HEP.</p> <p>The Defra conversion factors and guidance provide the conversion factor that will be used for Fuel used in HEP owned vehicles liquefied petroleum gas as well as supplemental information.</p>
Mandatory for	England Northern Ireland Wales
Reason Required	For advice to Government, monitoring progress towards sector carbon targets and for use in producing Capital Investment Framework (CIF) metrics.
Part Of	Scope 1 and 2 carbon emissions - D38c
Field Length	12
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: E12CEVLG Data type: LENGTH12DECIMAL3Type

Total scope 1 and 2 carbon emissions

Type	field
Short Name	E12CET
Description	This field contains data about the total scope 1 and 2 carbon emissions for the whole estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Kilograms of equivalent carbon dioxide (kg CO2e)
Notes	<p>Total scope 1 and 2 carbon emissions for the whole estate.</p> <p>Scope 1 and 2 carbon emissions from vehicles must be excluded from both Non-residential scope 1 and 2 carbon emissions total and Residential scope 1 and 2 carbon emissions total. A vehicle should not be given a non-residential or residential distinction for the purposes of the Estates management record. This ensures that the scope 1 and 2 carbon emissions from vehicles are not double counted within Total scope 1 and 2 carbon emissions.</p> <p>Sum total of Scope 1 and 2 carbon emissions grid electricity, Scope 1 and 2 carbon emissions biofuels, Scope 1 and 2 carbon emissions burning oil, Scope 1 and 2 carbon emissions compressed natural gas, Scope 1 and 2 carbon emissions coal (industrial), Scope 1 and 2 carbon emissions fuel oil, Scope 1 and 2 carbon emissions gas oil, Scope 1 and 2 carbon emissions liquefied natural gas, Scope 1 and 2 carbon emissions liquefied petroleum gas, Scope 1 and 2 carbon emissions lubricants, Scope 1 and 2 carbon emissions natural gas , Scope 1 and 2 carbon emissions other petroleum gas, Scope 1 and 2 carbon emissions petroleum coke, Scope 1 and 2 carbon emissions biomass, Scope 1 and 2 carbon emissions onsite photovoltaic, Scope 1 and 2 carbon emissions onsite wind, Scope 1 and 2 carbon emissions steam and hot water, Scope 1 and 2 carbon emissions other onsite renewables, Scope 1 and 2 carbon emissions vehicles aviation spirit, Scope 1 and 2 carbon emissions vehicles aviation turbine fuel, Scope 1 and 2 carbon emissions vehicles biofuels, Scope 1 and 2 carbon emissions vehicles diesel, Scope 1 and 2 carbon emissions vehicles liquefied petroleum gas, and Scope 1 and 2 carbon emissions vehicles petrol.</p>
Mandatory for	England Northern Ireland Wales
Reason Required	For advice to Government, monitoring progress towards sector carbon targets and for use in producing Capital Investment Framework (CIF) metrics.
Part Of	Scope 1 and 2 carbon emissions - D38c
Field Length	12
Minimum Occurrences	0
Maximum Occurrences	1

Scope 3 carbon emissions from business travel

Type	entity
Short Name	Scope3CarbonEmissionsFromBusinessTravel
Description	The fields in this entity contain data about scope 3 carbon emissions from business travel.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>This is scope 3 emissions in total greenhouse gas emissions (tonnes) from business travel that is paid for by the HEP and undertaken by academic and support staff and by students. For example, this could include travel undertaken by academics to attend conferences or events, support staff meeting with suppliers or students travelling to fulfil course requirements.</p> <p>The emissions from business travel that is paid for by a third party should not be included within the HEP scope 3 travel emissions reporting. Similarly, business travel that is paid for by students independently should also be excluded.</p> <p>Identifying scope 1 and scope 3 travel emissions</p> <p>In order to avoid double counting, scope 1 travel emissions need to be identified and reported separately from scope 3 travel emissions. Scope 1 travel emissions should be provided under Scope 1 and 2 carbon emissions.</p> <p>Determining the scope of emissions from HEP travel will depend on a range of factors including:</p> <ul style="list-style-type: none"> • the type of travel being undertaken (e.g. if it is business travel or commuter travel) • whether the mode of transport is owned or leased by the HEP • how the transport asset has been accounted for by the HEP <p>Business travel emissions resulting from the use of any mode of transport that is not owned or leased by a HEP, and virtually all modes of commuter travel, should be recorded as scope 3 emissions.</p> <p>Scope 1 travel emissions may include those generated by academics, support staff or students travelling for business purposes using modes of transport that are owned or leased by a HEP. Modes of transport that are owned by an HEP and used for business travel should always be recorded as scope 1 emissions, whilst the scope of emissions from leased modes of transport used for business purposes will depend on how the asset has been accounted for. Leased modes of transport used for business purposes will be recorded as either scope 1 or scope 3 emissions.</p> <p>Emission conversion factors</p> <p>Prior to the 2011/12 Estates Management Statistics record, the conversion factor used was based on carbon dioxide (CO₂) per unit. However, from the 2011/12 Estates Management Statistics record onwards, the alternative Defra measure of equivalent carbon dioxide (CO₂e) is used instead. This change accounts for additional Greenhouse Gases, including CH₄ and N₂O.</p>

	<p>The Defra conversion factors and guidance provide the conversion factors as well as supplemental information. Furthermore, HEFCE scope 3 carbon emissions guidance was commissioned to help the higher education sector in measuring and reporting scope 3 carbon emissions.</p> <p>Calculating emissions</p> <p>To calculate emissions from different modes of travel multiply activity data (e.g. fuel used or distance travelled) by the appropriate conversion factor.</p> <p>Emissions can be calculated using fuel consumption data or distance travelled data. Distance travelled data uses average emission factors for different modes of transport and is not as accurate as fuel consumption data.</p> <p>For public transport (like rail travel) emissions are reported on a per passenger kilometre basis, rather than per vehicle kilometre (which is how emissions from motor cars or vans are reported). HEPs should use the most accurate emission conversion factors possible based on the data that they have available.</p>

Scope 3 carbon emissions from student commuting

Type	entity
Short Name	Scope3CarbonEmissionsFromStudentCommuting
Description	The fields in this entity contain data about scope 3 carbon emissions from student commuting.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>This is scope 3 emissions in total greenhouse gas emissions (tonnes) from students travelling to and from their home (term-time only) address to the HEP. Where students are on study/work placement the location of the placement should be used.</p> <p>It is anticipated that scope 3 commuter travel emissions data may not be readily available on an annual basis. It is therefore currently acceptable for HEPs to use travel survey data from within the previous two years.</p> <p>Identifying scope 1 and scope 3 travel emissions</p> <p>In order to avoid double counting, scope 1 travel emissions need to be identified and reported separately from scope 3 travel emissions. Scope 1 travel emissions should be provided under Scope 1 and 2 carbon emissions.</p> <p>Determining the scope of emissions from HEP travel will depend on a range of factors including:</p> <ul style="list-style-type: none"> • the type of travel being undertaken (e.g. if it is business travel or commuter travel), • whether the mode of transport is owned or leased by the HEP, • how the transport asset has been accounted for by the HEP. <p>Business travel emissions resulting from the use of any mode of transport that is not owned or leased by a HEP, and virtually all modes of commuter travel, should be recorded as scope 3 emissions.</p> <p>Scope 1 travel emissions may include those generated by academics, support staff or students travelling for business purposes using modes of transport that are owned or leased by a HEP. Modes of transport that are owned by an HEP and used for business travel should always be recorded as scope 1 emissions, whilst the scope of emissions from leased modes of transport used for business purposes will depend on how the asset has been accounted for. Leased modes of transport used for business purposes will be recorded as either scope 1 or scope 3 emissions.</p> <p>Emission conversion factors</p> <p>Prior to the 2011/12 Estates Management Statistics record, the conversion factor used was based on carbon dioxide (CO₂) per unit. However, from the 2011/12 Estates Management Statistics record onwards, the alternative Defra measure of equivalent carbon dioxide (CO₂e) is used instead. This change accounts for additional Greenhouse Gases, including CH₄ and N₂O.</p> <p>The Defra conversion factors and guidance provide the conversion factors as well as</p>

	<p>supplemental information. Furthermore, HEFCE scope 3 carbon emissions guidance was commissioned to help the higher education sector in measuring and reporting scope 3 carbon emissions.</p> <p>Calculating emissions</p> <p>To calculate emissions from different modes of travel multiply activity data (e.g. fuel used or distance travelled) by the appropriate conversion factor.</p> <p>Emissions can be calculated using fuel consumption data or distance travelled data. Distance travelled data uses average emission factors for different modes of transport and is not as accurate as fuel consumption data.</p> <p>For public transport (like rail travel) emissions are reported on a per passenger kilometre basis, rather than per vehicle kilometre (which is how emissions from motor cars or vans are reported). HEPs should use the most accurate emission conversion factors possible based on the data that they have available.</p>

Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for Total volume of wastewater (EVWWT), Total water supply grey water and rain water (EWSGWRWT) and Total water borehole extraction (EBHWET) to ensure that this mandatory field is calculated correctly.

Scope 3 carbon emissions from water supply

Type	entity
Short Name	Scope3CarbonEmissionsFromWaterSupply
Description	The fields in this entity contain data about the scope 3 carbon emissions from water supply.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>This conversion will be undertaken by HESA.</p> <p>These are scope 3 emissions in total greenhouse gas emissions (tonnes) associated with the supply of water consumed by the HEP.</p> <p>HESA will calculate this metric by taking the water consumption figures returned under Water consumption and converting to tonnes of carbon dioxide equivalents using the relevant carbon conversion factor.</p> <p>Emission conversion factors</p> <p>Prior to the 2011/12 Estates Management Statistics record, the conversion factor used was based on carbon dioxide (CO₂) per unit. However, from the 2011/12 Estates Management Statistics record onwards, the alternative Defra measure of equivalent carbon dioxide (CO₂e) is used instead. This change accounts for additional Greenhouse Gases, including CH₄ and N₂O.</p> <p>The Defra conversion factors and guidance provide the conversion factors as well as supplemental information. Furthermore, HEFCE scope 3 carbon emissions guidance was commissioned to help the higher education sector in measuring and reporting scope 3 carbon emissions.</p>

Staff FTE - D05

Type	entity
Short Name	StaffFTE
Description	The fields in this entity contain staff full-time equivalent data.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>This entity identifies the percentage of a full-time equivalent (FTE) year being undertaken by staff according to their contract of employment over the course of the reporting period 1 August to 31 July. FTE is calculated using a population of staff who were active during the reporting period, not just on a given snapshot date. Where a staff member works across multiple functions, e.g. teaching and research, the FTE should be split pro rata between the appropriate data items.</p> <p>Staff are determined to be office based if the HEP has provided them with a workstation capable of being used as a permanent place of work.</p> <p>Staff employed by an external organisation working in a HEPs' space should not be included unless they occupy office space.</p> <p>Visiting academic staff that have no office requirement should be treated in terms of full-time equivalents. For example, a staff member who typically works seven hours each week on a 'standard' 35 hour week should be classed as 0.2 of an FTE.</p> <p>Staff that work in space embedded within hospitals should be excluded from the return. However, staff employed by the HEP should be included under the relevant classification, either on a full or joint contract basis.</p> <p>Distance learning staff should be allocated pro-rata. However, if the proportion of time spent on distance learning is low, all such staff should be included under Teaching staff FTE.</p> <p>The total FTE figure provided in these fields may not match that supplied in the HESA Staff record Contract.FTE field, as the return of non-academic atypical staff are optional from 2012/13 in the HESA Staff record.</p> <p>Further information regarding the definition of the HESA Staff record, and the definition of non-academic atypical staff, can be viewed in the Staff Coverage of the record documentation.</p>

Non-residential staff FTE other

Type	field
Short Name	SFNRO
Description	This field contains non-residential full-time equivalent data for staff other than those who are academic or support staff. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Full-time equivalent (FTE)
Notes	<p>The full-time equivalence (FTE) other staff are defined as those staff who are neither academic nor central support, but who are on the payroll of the HEP. This may include staff who are associated with the 'other' floor space activities described under Non-residential NIA other (e.g. art galleries and museums).</p> <p>Staff who are exclusively concerned with either distance learning students or franchised students (further education (FE) or higher education (HE)) should be returned in this field. Where time is also spent by staff on 'traditional' academic work, the allocation should be based on a pro rata basis.</p>

Research staff FTE

Type	field
Short Name	SFFTERE
Description	This field contains research staff full-time equivalent data. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Full-time equivalent (FTE)
Notes	<p>The full-time equivalence (FTE) of research staff (including academic support staff) are defined as those staff members involved in research. This includes academic research staff carrying out activities such as consultancy and third mission work (if carried out by this category of academic teaching staff).</p> <p>Academic support staff are those directly linked to the administration of academic departments (managers, secretaries, clerical and other support staff). The staff in this category will relate to those used to compile the HESA Finance Statistics Return (FSR) Table 7 'Expenditure by activity' Head 1 'Academic departments' and Head 6 'Research grants and contracts'.</p> <p>Academic staff associated with departmental libraries should be included under Teaching staff FTE or Research staff FTE and not under Support staff FTE total as would be required by using the HESA FSR. Include contracted-out staff only where office provision has to be made.</p> <p>Medical school staff who are funded or partially funded by the NHS or equivalent sources, but who are employed by the HEP in some form, should be included under Teaching staff FTE or Research staff FTE.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.

Part Of	Occupational injuries reportable under RIDDOR
Minimum Occurrences	0
Maximum Occurrences	1
Has Parts	<p>Number of staff injuries from being trapped by something collapsing (OSFTCOL)</p> <p>Number of student injuries from being trapped by something collapsing (OSTTCOL)</p> <p>Number of other persons injuries from being trapped by something collapsing (OOTTCOL)</p>
Owner	HESA
Version	1.0

Number of other persons injuries from being trapped by something collapsing

Type	field
Short Name	OOTTCOL
Description	This field contains data about the number of injuries to persons other than staff and students caused by being trapped by something collapsing.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	Total number of injuries to persons other than staff and students caused by being trapped by something collapsing. Figure for the whole estate.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Trapped by something collapsing
Field Length	3
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: OOTTCOL Data type: NUMBER3Type
Owner	HESA
Version	1.0

Number of staff injuries from being trapped by something collapsing

Type	field
Short Name	OSFTCOL
Description	This field contains data about the number of injuries to staff caused by being trapped by something collapsing.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	Total number of injuries to staff caused by being trapped by something collapsing. Figure for the whole estate.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Trapped by something collapsing
Field Length	3
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: OSFTCOL Data type: NUMBER3Type
Owner	HESA
Version	1.0

Number of student injuries from being trapped by something collapsing

Type	field
Short Name	OSTTCOL
Description	This field contains data about the number of injuries to students caused by being trapped by something collapsing.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	Total number of injuries to students caused by being trapped by something collapsing. Figure for the whole estate of the HEP.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Trapped by something collapsing
Field Length	3
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: OSTTCOL Data type: NUMBER3Type

Use of renewable energy generated onsite or offsite - D72e

Type	entity
Short Name	UseofRenewableEnergyGeneratedOnsiteorOffsite
Description	The fields in this entity contain data about the use of renewable energy sources generated on or offsite, either by the HEP independently or in partnership with others.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The approximate percentage contribution to annual energy consumption (Total energy consumption) from renewable sources. This contribution should exclude green tariffs.</p> <p>Figures are required for:</p> <ul style="list-style-type: none"> • percentage contribution where Renewables Obligation Certificates (ROCs) are retained or not claimed by the HEP, • percentage contribution where the ROCs are sold by the HEP. <p>For further information please refer to the Carbon Trust renewables obligation.</p>
Mandatory for	
Reason Required	
Part Of	Environment, energy, emissions and waste
Minimum Occurrences	0
Maximum Occurrences	1
Has Parts	<p>Use of renewable energy generated onsite or offsite where the ROCs are retained or not claimed (EROCRET)</p> <p>Use of renewable energy generated onsite or offsite where the ROCs are sold (EROC SOLD)</p>
Owner	HESA
Version	1.0

Use of renewable energy generated onsite or offsite where the ROCs are retained or not claimed

Type	field
Short Name	EROCRET
Description	This field contains data about the energy generated through renewable energy sources where Renewables Obligation Certificates (ROCs) are retained or not claimed by an HEP. The value can be recorded to one decimal place and must be between 0 and 100.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Percentage (%)
Notes	Percentage contribution where ROCs are retained or not claimed by an HEP for the whole estate.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Use of renewable energy generated onsite or offsite - D72e
Field Length	5
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EROCRET Data type: PERCENTType
Owner	HESA
Version	1.0

Use of renewable energy generated onsite or offsite where the ROCs are sold

Type	field
Short Name	EROCSOLD
Description	This field contains data about the energy generated through renewable energy sources where the Renewables Obligation Certificates (ROCs) are sold by an HEP. The value can be recorded to one decimal place and must be between 0 and 100.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Percentage (%)
Notes	Percentage contribution where the ROCS are sold by an HEP for the whole estate.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Use of renewable energy generated onsite or offsite - D72e
Field Length	5
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EROCSOLD Data type: PERCENTType

Volume of wastewater

Type	entity
Short Name	VolumeofWastewater
Description	The fields in this entity contain data about the volume of wastewater.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The volume, measured in m³, of wastewater.</p> <p>Where possible, data should be sub-divided to reflect the residential and non-residential estate. It is recognised that HEPs in Scotland will not be able to sub-divide Non-residential volume of wastewater and Residential volume of wastewater. Where this subdivision is not available, the Total volume of wastewater should be provided.</p> <p>Charges for the treatment of wastewater are usually based on a figure derived from a percentage of the total water consumption. Utilities typically apply a factor of 90-95% to calculate wastewater costs based on water consumption.</p> <p>To provide a figure for wastewater volume, HEPs should use the following data sources:</p> <ul style="list-style-type: none"> • meter readings from all meters on site related to wastewater volume and trade effluent, • if the water utility contracted by the HEP provides a factor to calculate the wastewater volume based on the water supply volume, use the factor provided by the water utility. Otherwise, water consumption figures returned under Water consumption can be multiplied by 95% (as a default value).
Mandatory for

Maximum Occurrences	1
Has Parts	Non-residential volume of wastewater (ENRVWW) Residential volume of wastewater (ERVWW) Total volume of wastewater (EVWWT)
Owner	HESA
Version	1.0

Non-residential volume of wastewater

Type	field
Short Name	ENRVWW
Description	This field contains data about the volume of wastewater for the non-residential estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Cubic metre (m ³)
Notes	This figure is for the volume of wastewater for the non-residential estate only.
Mandatory for	England Northern Ireland Wales
Reason Required	Part of the move to mandatory reporting of scope 3 carbon emissions.
Part Of	Volume of wastewater
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ENRVWW Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0

Residential volume of wastewater

Type	field
Short Name	ERVWW
Description	This field contains data about the volume of wastewater for the residential estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Cubic metre (m ³)
Notes	This figure is for the volume of wastewater for the residential estate only.
Mandatory for	England Northern Ireland Wales
Reason Required	Part of the move to mandatory reporting of scope 3 carbon emissions.
Part Of	Volume of wastewater
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ERVWW Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0

Total volume of wastewater

Type	field
Short Name	EVWWT
Description	This field contains data about the total volume of wastewater for the whole estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Cubic metre (m ³)
Notes	<p>Total volume of wastewater for the whole estate. Sum total of Non-residential volume of wastewater and Residential volume of wastewater.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total scope 3 carbon emissions from wastewater treatment is calculated correctly.</p>
Mandatory for	England Northern Ireland Wales
Reason Required	Part of the move to mandatory reporting of scope 3 carbon emissions.
Part Of	Volume of wastewater
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EVWWT Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total scope 3 carbon emissions from wastewater treatment (E3CEWWT) is calculated correctly.

Waste mass - D73

Type	entity
Short Name	WasteMass
Description	The fields in this entity contain data about waste mass.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The approximate annual mass of waste arising as a result of the HEP's activities. The Estates management record seeks to capture all waste arising at HEP level including construction waste produced by contractors. Do not include waste taken in by the HEP to be processed. Exclude waste attributable to the day to day operating of any commercial space.</p> <p>HEPs, contracts and suppliers of management services should be able to provide mass equivalents.</p> <p>To convert from volume data to mass equivalent, the following guide and high level factor are recommended:</p> <p>Conversions</p> <ul style="list-style-type: none"> • volume (in m3) x factor = mass (tonnes), • volume (litres) / 1000 x factor = mass (tonnes), • volume (cubic feet) x 0.028 x factor = mass (tonnes). <p>Units should be tonnes (1000kg) waste.</p> <p>Factors</p> <p>The following documents will assist HEPs in converting volume data to mass equivalents:</p> <ul style="list-style-type: none"> • ,Environment Agency: Coding and classifying wastes • ,Environment Agency: European Waste Catalogue codes • .WRAP: A guide to volume to mass conversion factors <p>'Pay by weight' or survey based estimates can be used to improve the accuracy of data.</p> <p>The disposal methods categories remain the same for the non-residential and residential elements of the estate as well as other works to sum to a total waste mass figure:</p> <ul style="list-style-type: none"> • recycled - the annual mass of waste (tonnes) sent for recycling, • incineration - the annual mass of incinerated waste (tonnes), • composting - the annual mass of waste (tonnes) that is composted (either onsite or offsite), • anaerobic digestion - the annual mass of waste (tonnes) that is sent for anaerobic digestion (either onsite or offsite), • landfill - the annual mass of waste (tonnes) sent to landfill, • energy - the annual mass of waste (tonnes) that is used to create energy e.g. used for Biomass boilers or CHP. Exclude waste that is incinerated with no energy recovery,

	<ul style="list-style-type: none"> • other - other methods of disposal offsite. This may include mechanical biological treatment and offsite autoclave.

Other works waste mass total

Type	field
Short Name	EOWMT
Description	This field contains data about the total waste mass from all works of construction, demolition and excavation not elsewhere captured. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>Total waste mass all works of construction, demolition, and excavation not captured elsewhere. Sum total of Other works waste mass recycled, Other works waste mass incineration, Other works waste mass composting, Other works waste mass anaerobic digestion, Other works waste mass landfill, Other works waste mass used to create energy, and Other works waste mass other.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EOWMT Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass (EOWMT) is calculated correctly.

Other works waste mass used to create energy

Type	field
Short Name	EOWMENE
Description	This field contains data about the waste mass from all works of construction, demolition and excavation not elsewhere captured that is used to create energy. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>This figure is for the waste mass (tonnes) from all works of construction, demolition, and excavation not captured elsewhere that is used to create energy e.g. used for Biomass boilers or CHP. Exclude waste that is incinerated with no energy recovery.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass used to create energy is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EOWMENE Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass used to create energy (EWMENET) is calculated correctly.

Residential waste mass anaerobic digestion

Type	field
Short Name	ERWMADI
Description	This field contains data about the waste mass from the residential estate that is sent for anaerobic digestion. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>This figure is for the waste mass (tonnes) from the residential estate that is anaerobically digested (either onsite or offsite).</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass anaerobic digestion is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ERWMADI Data type: LENGTH11DECIMAL3Type
Owner	HESA

Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass anaerobic digestion (EWMADIT) is calculated correctly.

Residential waste mass composting

Type	field
Short Name	ERWMCOM
Description	This field contains data about the waste mass from the residential estate that is composted. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>This figure is for the waste mass (tonnes) from the residential estate that is composted (either onsite or offsite).</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass composting is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ERWMCOM Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass composting (EWMCOMT) is calculated correctly.

Residential waste mass incineration

Type	field
Short Name	ERWMINC
Description	This field contains data about the waste mass from the residential estate that is incinerated. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>This figure is for the waste mass (tonnes) from the residential estate that is incinerated.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass incineration is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ERWMINC Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass incineration (EWMINCT) is calculated correctly.

Residential waste mass landfill

Type	field
Short Name	ERWMLAN
Description	This field contains data about the waste mass from the residential estate that is sent to landfill. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>This figure is for the waste mass (tonnes) from the residential estate that is sent to landfill..</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass landfill is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ERWMLAN Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass landfill (EWMLANT) is calculated correctly.

Residential waste mass other

Type	field
Short Name	ERWMOTH
Description	This field contains data about the waste mass from the residential estate that is disposed of by other offsite methods. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>This figure is for the waste mass (tonnes) from the residential estate that is disposed of by other offsite methods. This may include mechanical biological treatment and offsite autoclave.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass other is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ERWMOTH Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass other (EWMOTHT) is calculated correctly.

Residential waste mass recycled

Type	field
Short Name	ERWMREC
Description	This field contains data about the waste mass from the residential estate that is sent for recycling. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>This figure is for the waste mass (tonnes) from the residential estate that is sent for recycling.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass recycled is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ERWMREC Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass recycled (EWMRECT) is calculated correctly.

Residential waste mass total

Type	field
Short Name	ERWMT
Description	This field contains data about the total waste mass from the residential estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>Total residential waste mass for the whole estate. Sum total of Residential waste mass recycled, Residential waste mass incineration, Residential waste mass composting, Residential waste mass anaerobic digestion, Residential waste mass landfill, Residential waste mass used to create energy, and Residential waste mass other.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total waste mass is calculated correctly.</p>
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Waste mass - D73

Total waste mass

Type	field
Short Name	EWMT
Description	This field contains data about the total waste mass for the whole estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>Total waste mass for the whole estate. Sum total of Non-residential waste mass total, Residential waste mass total, and Other works waste mass total.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for the fields Non-residential waste mass total, Residential waste mass total and Other works waste mass total to ensure that this mandatory field is calculated correctly.</p>
Mandatory for	England Northern Ireland Wales
Reason Required	For use in producing Capital Investment Framework (CIF) metrics and as part of the move to mandatory reporting of scope 3 carbon emissions.
Part Of	Waste mass - D73
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EWMT Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for Non-residential waste mass total (ENRWMT), Residential waste mass total (ERWMT) and Other works waste mass total (EOWMT) to ensure that this mandatory field is calculated correctly.

Total waste mass anaerobic digestion

Type	field
Short Name	EWMADIT
Description	This field contains data about the total waste mass for the whole estate that is sent for anaerobic digestion. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Tonne (t)
Notes	<p>Total waste mass (tonnes) for the whole estate that is sent for anaerobic digestion. Sum total Non-residential waste mass anaerobic digestion, Residential waste mass anaerobic digestion, and Other works waste mass anaerobic digestion.</p> <p>Please note that HEPs in England, Northern Ireland or Wales will need to return a value for the fields Non-residential waste mass anaerobic digestion, Residential waste mass anaerobic digestion and Other works waste mass anaerobic digestion to ensure that this mandatory field is calculated correctly.</p>
Mandatory for	England Northern Ireland Wales
Reason Required	For use in producing Capital Investment Framework (CIF) metrics and as part of the move to mandatory reporting of scope 3 carbon emissions.

Borehole water used for irrigation

Type	field
Short Name	EBHWI
Description	This field contains data about the percentage of borehole water used for irrigation for the whole estate. The value can be recorded to one decimal place and must be between 0 and 100.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Percentage (%)
Notes	% of borehole water used for irrigation and therefore not classed as wastewater.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Water borehole extraction - D77b
Field Length	5
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EBHWI Data type: PERCENTType
Owner	HESA
Version	1.0

Total water borehole extraction

Type	field
Short Name	EBHWET
Description	This field contains data about the total water borehole extraction for the whole estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Cubic metre (m ³)
Notes	Total water supply borehole extraction for the whole estate of the HEP. Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total scope 3 carbon emissions from wastewater treatment is calculated correctly.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Water borehole extraction - D77b
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EBHWET Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0
Date modified	2014-08-15
Change management notes	Additional guidance added to the notes section, clarifying that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total scope 3 carbon emissions from wastewater treatment (E3CEWWTT) is calculated correctly.

Water consumption - D38b

Type	entity
Short Name	WaterConsumption
Description	The fields in this entity contain data about water consumption.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The volume, measured in m3, of metered water consumed (exclude grey and recycled water), excluding usage within any commercial space. Where possible, data should be sub-divided to reflect the residential and non-residential estate. It is recognised that HEPs in Scotland will not be able to sub-divide Non-residential water consumption and Residential water consumption. Where this subdivision is not available, the Total water consumption should be provided.</p> <p>Water metering and billing arrangements vary significantly throughout the UK. Some HEPs do not pay for water consumption by volume, especially for residential use. These HEPs may not be able to provide data on this issue. Others pay a combination of rateable value and metered water consumption.</p> <p>Those HEPs that can provide data should use the following data sources:</p> <ul style="list-style-type: none"> • water bills, • meter readings from all mains water meters. <p>Include water consumption for arable land.</p>

Has Parts	Non-residential water consumption (ENRWCON) Residential water consumption (ERWCON) Total water consumption (EWCONTOT)
Owner	HESA
Version	1.0

Non-residential water consumption

Type	field
Short Name	ENRWCON
Description	This field contains data about the water consumption of the non-residential estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Cubic metre (m ³)
Notes	Figure for the water consumption of the non-residential estate.
Mandatory for	England Northern Ireland Wales
Reason Required	Part of the move to mandatory reporting of scope 3 carbon emissions.
Part Of	Water consumption - D38b
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ENRWCON Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0

Residential water consumption

Type	field
Short Name	ERWCON
Description	This field contains data about the water consumption of the residential estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Cubic metre (m ³)
Notes	Figure for the water consumption of the residential estate.
Mandatory for	England Northern Ireland Wales
Reason Required	Part of the move to mandatory reporting of scope 3 carbon emissions.
Part Of	Water consumption - D38b
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: ERWCON Data type: LENGTH11DECIMAL3Type
Owner	HESA
Version	1.0

Total water consumption

Type	field
Short Name	EWCONTOT
Description	This field contains data about the total water consumption of the whole estate. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Cubic metre (m ³)
Notes	Total water consumption for the whole estate. Sum total of Non-residential water consumption and Residential water consumption.
Mandatory for	England Northern Ireland Wales
Reason Required	Part of the move to mandatory reporting of scope 3 carbon emissions.
Part Of	Water consumption - D38b
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EWCONTOT Data type: LENGTH11DECIMAL3Type
Owner	HESA

Water supply grey water and rain water - D77a

Type	entity
Short Name	WaterSupplyGreyWaterandRainWater
Description	The field in this entity contains data about the water supply from 'grey water' and rain water.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Notes	<p>The annual volume (m3) of non-mains water supply for potable and non-potable use by the HEP from rainwater and 'grey water'.</p> <p>'Grey water' is defined as the wastewater produced from baths and showers, clothes washers, and lavatories. This can be recycled and reused if an appropriate system is installed. Rainwater recycling can also be installed to use the water which falls on the building in other systems such as watering the grounds or flushing toilets.</p> <p>Includes rainwater and 'grey water' capture for arable land, where this water is included in the consumption figure under Water consumption.</p> <p>Excludes mains supplied water.</p>
Mandatory for	
Reason Required	
Part Of	Environment, energy, emissions and waste
Minimum Occurrences	0
Maximum Occurrences	1
Has Parts	Total water supply grey water and rain water (EWSGWRWT)
Owner	HESA
Version	1.0

Total water supply grey water and rain water

Type	field
Short Name	EWSGWRWT
Description	This field contains data about the water supply from 'grey water' and rain water. The value can be recorded to three decimal places.
Applicable to	England Northern Ireland Scotland Wales
Coverage	All higher education providers (HEPs).
Unit	Cubic metre (m ³)
Notes	Total water supply 'grey water' and rain water for the whole estate. Please note that HEPs in England, Northern Ireland or Wales will need to return a value for this field to ensure that the mandatory field Total scope 3 carbon emissions from wastewater treatment is calculated correctly.
Mandatory for	
Reason Required	Sector use and benchmarking.
Part Of	Water supply grey water and rain water - D77a
Field Length	11
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: EWSGWRWT Data type: LENGTH11DECIMAL3Type
