Course

Type	entity
Short Name	Course
Description	A combination of subject and qualification that defines what a student is aiming for.
Applicable to	England
Coverage	Compulsory for all returns.
Notes	<p>Every instance must be linked to one (and only one) course. Course records can exist without links to any instances if it is easier for an institution to return all courses rather than just those that are active in the reporting year.</p> <p>The Course.COURSEID field is the primary key for the course entity. It also exists on the Instance as a foreign key.</p> <p>Where provision within the institution allows multiple possible qualification outcomes, institutions must return separate course records for each. Even where groups of students aiming for different qualification outcomes are taught in the same classes, each group must be returned on a different course with a different course aim.</p>
Reason Required	This entity exists to hold fields that describe courses - allowing them to be linked to multiple students efficiently.
Part Of	Provider
Minimum Occurrences	1
Maximum Occurrences	unbounded
Has Parts	Course identifier (COURSEID) Own course identifier (OWNCOURSEID) General qualification aim of course (COURSEAIM) Course title (CTITLE) Regulatory body for health and social care students (REGBODY) Teacher training course (TTCID) Course subject
Owner	HESA
Version	1.0

Course identifier

Type	field
Short Name	COURSEID
Description	This field records the provider's own unique internal identifier for the course. The Course identifier is the primary key for the Course entity and exists as a foreign key on Instance.
Applicable to	England
Coverage	All courses.
Notes	<p>Course identifiers will be allocated by the provider and should be unique for each course.</p> <p>The term 'course' in this context relates to the combination of subject and qualification that defines what a student is aiming for and which are described in fields Course.COURSEAIM and CourseSubject.SBJCA.</p> <p>For designated courses, providers will need to report the identifier that was submitted as part of the course designation process and the HEAPES return.</p> <p>The Course identifier links the course entity and the instance entity for the reporting period. There must be an entry in the course entity with a matching identifier in the instance entity to provide this link, and so give details about the student's study in the current year. Where a student changes course within an instance by changing either course aim (at the same level) or subject, the Course.COURSEID should be updated to reflect the course that is applicable at the end of the reporting period.</p> <p>Where the student continues on the same course, the same COURSEID should be kept for all years of the course. It is intended that in the future for some onward uses data from the student record should be aggregated to allow publication at a Course level. For the UNISTATS site, for example, information about entrants, continuation, outcomes and destinations will be published together. If the COURSEID is not consistent throughout the course it will not be possible to compile a complete set of statistics as relating to a single course. Course.CTITLE will not allow for this aggregation: it is a text field and not suitable for the necessary validation.</p> <p>Year-on-year linking will be undertaken by the UHN linking mechanism.</p> <p>Valid characters</p> <p>The valid character set available for this field follows the Data Standards in the HESA AP student record.</p> <ul style="list-style-type: none"> • The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. • All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007E, U+00A0 to U+024F and U+1E00 to U+1EFF. • Schemas are built in such a way that an individual project can further restrict the set if required.

	<p>The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.</p> <p>The Unicode charts that list each of the characters in this range can be found on the Unicode web site. The specific sets that are defined here are shown in the following PDF documents:</p> <ul style="list-style-type: none"> • Basic Latin • Latin-1 • Latin Extended A • Latin Extended B • Latin Extended Additional <p>Files must be encoded with UTF-8 and schema validation will be in place to ensure this. Providers must specify the encoding used in their XML files in the first line of the file (i.e. <?xml version="1.0" encoding="UTF-8" ?>) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.</p>
Reason Required	To identify courses for designation or linkage.
Part Of	Course Instance
Field Length	30
Minimum Occurrences	1
Maximum Occurrences	1
Schema Components	Element: COURSEID Data type: COURSEIDType
Owner	HESA
Version	1.1
Date modified	2015-04-30
Change management notes	Guidance added to the Notes section, stating that the entry returned in this field should match that previously returned by providers as part of the course designation process and the HEFCE HEAPES return.

Course title

Type	field
Short Name	CTITLE
Description	This field will be determined by the provider and in this context relates to the complete programme of study leading to the qualification aim referred to in Course.COURSEAIM and CourseSubject.
Applicable to	England
Coverage	All courses.
Notes	<p>Although a compulsory field, this field will not be subject to specific checks regarding its validity. The only validation checks will be that the field contains at least one character.</p> <p>It is intended that this field can be used by the provider as a cross-check to Course.COURSEAIM and CourseSubject.</p> <p>Valid characters</p> <p>The valid character set available for this field follows the Data Standards in the HESA AP student record.</p> <ul style="list-style-type: none"> • The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. • All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007E, U+00A0 to U+024F and U+1E00 to U+1EFF. • Schemas are built in such a way that an individual project can further restrict the set if required. <p>The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.</p> <p>The Unicode charts that list each of the characters in this range can be found on the Unicode web site. The specific sets that are defined here are shown in the following PDF documents:</p> <ul style="list-style-type: none"> • Basic Latin • Latin-1 • Latin Extended A • Latin Extended B • Latin Extended Additional <p>Files must be encoded with UTF-8 and schema validation will be in place to ensure this. Providers must specify the encoding used in their XML files in the first line of the file (i.e. <?xml version="1.0" encoding="UTF-8" ?>) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.</p>
Reason Required	To facilitate HESA cross-checking with HE Provider and to identify the title of courses in onward analyses. To aid in more detailed understanding of provision than can be

	gained from broad qualification and subject descriptors.

Notes	<p>Course aim describes the qualification that will be attained as a result of successful completion of the course.</p> <p>Overall framework and alignment with existing frameworks.</p> <p>The most relevant are the UK frameworks. For England, Wales and NI the HE qualifications framework identifies five levels (C/4, I/5, H/6, M/7, D/8) and these are aligned with the NVQ levels 4 to 8. The Scottish Credit and Qualifications Framework (SCQF), which is not HE-specific, is aligned with this except that the lower boundary of Scottish Level 7 is apparently slightly lower than the lower boundary of Level C / NVQ 4</p>

(this is the lower cutoff for what may be regarded as HE in England and Wales, but, significantly, Scottish Advanced Highers fall into Level 7), and Level I /NVQ 5 is split into two levels in Scotland, Level 8 and 9.

The ISCED framework is used for international reporting, and four levels within it are relevant, Levels 4, 5B, 5A and 6. The Bologna framework for European HE harmonisation is still in the process of development, but the current state may be summarised as recognising four levels: short-cycle, first-cycle, second-cycle, and third cycle.

HESA	SCQF	E/W/NI HE †		NVQ HE	ISCED

X	-	-	-	-

† Note that the QAA level descriptors in the Framework for Higher Education Qualifications in England, Wales and Northern Ireland (FHEQ) have changed in the 2008 version compared with the 2001 version. Full details are available from the QAA publication The framework for higher education qualifications in England, Wales and Northern Ireland published August 2009. Although the 2008 FHEQ qualification descriptor for level 6 states that this can be used as a reference for ordinary Bachelors degrees, for HESA purposes first degrees with honours should be coded at level H, and first degrees without honours should be coded at level I.

There is a summary of qualification levels in the UK and Ireland available from the QAA publication Qualifications can cross boundaries - a rough guide to comparing qualifications in the UK and Ireland.

This coding frame is designed to support the alignment of course qualifications with the frameworks, with the first letter indicating the level. Codes of similar type at different levels have the same two-digit suffix.

Additional guidance on specific codes:

M22 Integrated undergraduate/postgraduate taught Masters degree on the enhanced/extended pattern.

Use this code for MEng and similar. Such masters degrees comprise an integrated programme of study spanning several years. While the final outcomes of the qualifications meet the expectations for level M in full, these integrated qualifications have an additional period of study at lower levels (typically level H). Use code M22 only where code M26 or M28 are not applicable.

M26 Integrated undergraduate/postgraduate taught Masters degree on the enhanced/extended pattern leading towards eligibility to practice with a Health or Social Care or Veterinary statutory regulatory body

This code can be used for degrees in medicine, dentistry and veterinary science comprising an integrated programme of study and professional practice.

M28 Integrated undergraduate/postgraduate taught masters degree on the enhanced/extended pattern leading towards registration with the Architects Registration Board (Part 1 and Part 2 qualification)

This code should be used for programmes of study that integrate both of the Part 1 and Part 2 qualifications. Programmes of study that lead only to eligibility to register as Part 1 should use 'H18 First degree with honours leading towards registration with the Architects Registration Board (Part 1 qualification)'. Programmes that lead only to eligibility to register as Part 2 should use 'M88 Taught qualification at level M (where a qualification at level H is a pre-requisite for course entry) leading towards registration with the Architects Registration Board (Part 2 qualification)'.

M71 Postgraduate Certificate in Education or Professional Graduate Diploma in Education.

See H71 for Professional Graduate Certificate in Education. See Statement on the PGCE Qualification

H11 First degree with honours leading to QTS/registration with a GTC.

This code should only be used for BEd if it is at level H.

H61 Graduate Diploma/Certificate at Level H.

Use this code where a previous qualification at Level H is a pre-requisite for course entry; use H50 in preference if applicable.

H70 Professional qualification at Level H other than a first degree with honours.

Use H71, H72, H76, H88 in preference if applicable.

H71 Professional Graduate Certificate in Education.

See code M71 for Postgraduate Certificate in Education. See Statement on the PGCE Qualification.

H76 Post-registration health and social care qualification at Level H other than a first degree with honours.

This code includes Continuing Professional Development (CPD).

H81 Other qualification at Level H but where a previous qualification at Level H is a pre-requisite for course entry.

Use H50, H71, H72, H76 in preference if applicable.

I11 Ordinary (non-honours) first degree leading to QTS/registration with a GTC.

Code BEd here unless it is at level H.

I70 Professional qualification at Level I other than an ordinary (non-honours) first degree.

Use I76 in preference if applicable.

I76 Post-registration health and social care qualification at Level I other than an ordinary (non-honours) first degree.

This code includes Continuing Professional Development (CPD).

J76 Post-registration health and social care qualification at level J.

This code includes Continuing Professional Development (CPD).

Health and Social Care courses

Courses which lead to a qualification to teach nursing, midwifery or health visiting courses should be coded 2 in Course.TTCID.

Post-Registration health and social care codes ('_76') should be returned for post-registration health and social care students taking continuing professional updating modules. Post-registration health and social care students studying for other qualifications should be coded to the appropriate code for that qualification. For example, a post-registration health and social care student studying for a first degree should be coded 'H00' for First degree, rather than H76. Validation has been relaxed to allow regulatory body information to be returned for these post-registration students.

H16 'First degree leading towards obtaining eligibility to register to practice with a Health or Social Care or Veterinary statutory regulatory body' will be used in combination with the subject code or codes to identify those degrees which lead to eligibility to register to practice with a Health or Social Care or Veterinary statutory regulatory body.

Social work courses

HESA has been advised by the Department of Health that courses leading to eligibility to register to practice with a social care statutory regulatory body will not necessarily be coded with a '_16' code in this field. Providers offering courses leading to eligibility to register to practice with a social care statutory regulatory body should return regulatory body information in Course.REGBODY irrespective of the code used in this field.

Access courses

A recognised Access to HE course is one validated by an Authorised Validating Agency that has been licensed for the purpose by the Quality Assurance Agency for Higher Education (QAA), under the terms of the QAA Recognition Scheme for Access to Higher Education in England, Wales and Northern Ireland. Relevant Access courses are recorded on the Access to HE Courses Database.

Other guidance

The General qualification aim of course should be consistent with funding council Early Statistics (HEAPES).

	<p>Higher bachelors degrees at undergraduate level should be coded H50.</p> <p>J10 and J16, Foundation Degrees, are intended to cover those programmes which providers are running as Foundation Degrees which are consistent with the 'Statement of Design Principles' for Foundation Degrees issued by UUK and SCOP (now GuildHE).</p> <p>Where a student is following a programme of study leading potentially to two or more qualifications concurrently, and that combination is not specified under valid entries, please return the qualification code that is highest in level.</p> <p>Certificate in Further Education should be coded H80 if at undergraduate level.</p> <p>If a foundation course or year is integrated into another qualification e.g. a first degree, code H00 'First degree' should be returned in this field.</p> <p>Students entering with enhanced first degrees, that is qualifications that would be coded H22/M22/M26/M28 in the COURSEAIM field, should be recorded as having M2X in EntryProfile.QUALENT3. Enhanced first degree programmes typically include study equivalent to at least four years full-time, of which study equivalent to at least one full-time academic year is at masters level. Study at bachelor's level is integrated with study at master's level.</p>
Examples	To allow analysis of the student population by specific qualification aims beyond broad level descriptors. Used in a wide variety of calculations and analyses.
Reason Required	To allow analysis of the student population by level of study.

Version	1.1
Date modified	2014-08-28
Change management notes	Coverage amended to restrict the requirement for this field to the appropriate Course.COURSEAIMs only.

Teacher training course

Type	field
Short Name	TTCID
Description	This field is a one character field completed for students on courses that lead to teacher qualifications. The selection will determine the type of the teacher training.
Applicable to	England
Coverage	All courses.
Valid Entries and Labels	0 Not a teacher training course 2 On other initial teacher training course not leading to Qualified Teacher Status nor to registration as a school teacher with the General Teaching Council for Scotland 5 Inset course
Notes	Code 2 includes courses leading to Further Education Teacher Qualification and to Nursing and Midwifery Teacher Qualification. Code 5: HEFCE have given a working definition of an INSET course as follows: An INSET/In-service course is one for which the primary (but not necessarily the only) purpose is to improve the effectiveness of teachers, lecturers or trainers. In considering whether this is the purpose of particular course, providers may wish to consider the content of the course and course literature, including prospectuses and any other marketing material.
Reason Required	Used to identify and differentiate between different types of teacher training student in the analysis of ITT provision, assessing student support eligibility and setting and monitoring the student number control.
Part Of	Course
Field Length	1
Minimum Occurrences	1
Maximum Occurrences	1
Schema Components	Element: TTCID Data type: TTCIDCodeContentType
Owner	HESA
Version	1.1
Date modified	2015-01-29
Change management notes	Valid entry 1 'On initial or pre-service teacher training course leading to Qualified Teacher Status or to registration as a school teacher with the General Teaching Council for Scotland' removed as courses leading to QTS need not be returned through the AP student record, and the code is therefore redundant.

Course subject

Type	entity
Short Name	CourseSubject
Description	The subject descriptors for this course.
Applicable to	England
Coverage	All courses.
Notes	
Reason Required	This repeating element exists to allow a course to hold up to three sets of subject information.
Part Of	Course
Minimum Occurrences	1
Maximum Occurrences	3
Has Parts	Subject of course (SBJCA) Subject percentage (SBJPCNT)
Owner	HESA
Version	1.0

Subject of course

Type	field
Short Name	SBJCA
Description	This field describes the subject or subjects appropriate to the current course.
Applicable to	England
Coverage	All course subject records.

Notes	<p>The Joint Academic Coding System (JACS3) provides for all subjects to be coded according to a common, truly hierarchical, four-character subject code. JACS3 will be used substantially in subject representation across the sector. The full JACS 3.0 classification provides definitions for each JACS subject to assist in coding.</p> <p>Providers are required to make appropriate use of the full 4-digit JACS coding in all subject areas. This is needed to future-proof work on strategically important and vulnerable subjects, so that as the landscape changes, it will be possible to assess the past performance of newly important subjects. There will be some courses where it remains appropriate to code at principal subject level, but others where a more detailed code should be used. So for example, a general Biology course would continue to be</p>

	<p>coded as C100, but a specific course in Biodiversity would be coded C181. Similarly, a generic Religious Studies course would be V600, but a specific Islamic Studies course would be V622.</p> <p>The generic codes that consist of a subject group and letter (and Y000) can be used in this field to describe a truly interdisciplinary programme.</p> <p>For students entering through UCAS this information will be available from UCAS via the *J transaction.</p> <p>Dental courses</p> <p>Codes A200 and A400 must only be used for pre-clinical and clinical dentists: other courses must use either A900 (Others in medicine & dentistry) or B750 Dental nursing.</p> <p>Medical, Dental and Veterinary students</p> <p>For undergraduate medical and dental courses where students move from pre-clinical to clinical subjects in later years of the course, this should normally be recorded as one course for all years of the instance. SBJCA should in this case be coded as joint clinical/pre-clinical ie both A100 and A300 or both A200 and A400. It may, in some cases, be appropriate to code this as two separate courses where there is a clear separation between the two parts of the course.</p>
Reason Required	To allow analysis and monitoring of the student population by detailed subject of qualification aim including monitoring shortage or important subjects.
Part Of	Course subject

Subject percentage

Type	field
Short Name	SBJPCNT
Description	This field indicates the proportion of time allocated for each subject studied on a course. It should contain an integer between 1 and 100.
Applicable to	England
Coverage	All course subject records.
Notes	<p>This field allows providers to assign their own percentages for joint honours courses. It is not expected that these percentages will be derived from a detailed analysis of the contributions of subjects to individual students' programmes of study but will instead be based on a broad assessment of the relative contributions of each subject. It is therefore expected that most providers will apply the same percentages to all courses and only vary this where there is a substantially different expectation.</p> <p>For providers in England the listed standard percentages are recommended. Where broad assessment of the subject contributions markedly differs from these standard percentages alternative values can be returned.</p> <p>Balanced 50 for each of the two subjects Major - Minor 67 and 33 Triple 34, 33 and 33</p> <p>For each Course entity the sum of SBJPCNT must equal 100.</p> <p>The length of this field is 3 characters, however may be returned with or without leading zeros, e.g. 003 or 3.</p>
Reason Required	To allow analysis and monitoring of the student population by detailed subject of qualification aim including monitoring shortage or important subjects.
Part Of	Course subject

Entry profile

Type	entity
Short Name	EntryProfile
Description	This describes a student's academic and personal history as at the beginning of the instance.
Applicable to	England
Coverage	Compulsory for instances where Instance.COMDATE is in the current reporting year or where the instance has not been previously reported. Optional in cases where previously supplied EntryProfile data needs to be corrected.
Notes	<p>An entry profile is required for all entrants, that is instances with a Instance.COMDATE in the current reporting year or instances not previously reported to HESA.</p> <p>The Entry Profile and Qualification on Entry entities are only compulsory when a new instance is created. HESA will rely on UKPRN-HUSID-NUMHUS (UHN) linkage to link data from these entities to the instance in subsequent years and institutions should not routinely return entry profile data for continuing instances. Since the entry profile contains fields that describe information at the beginning of the instance, the information should not change in subsequent years, unless to correct identified errors or to provide previously unknown data. If an entry profile is returned for a continuing instances it must be complete i.e. all required fields must be completed and no previously returned data replaced by default or unknown values.</p>
Reason Required	This entity is defined to hold those fields that describe the student circumstances at the beginning of the instance.

Notes	<p>For students entering through UCAS this information will be available from UCAS via the *J transaction.</p> <p>HESA Guidance</p> <p>This coding frame is determined by the National Statistics Country Classification 2006 (NSCC), which is based on ISO 3166-1 Codes for the Representation of Names of Countries and their Subdivisions, and the United Nations' Standard Country or Area Codes for Statistical Use. In a small number of cases, the NSCC usage differs from the usage in ISO 3166 on which the NSCC is based. Where that happens, the ISO 3166 usage is given in brackets after the preferred UK usage, to facilitate cross-reference to the international standard. For example for code KR the description is Korea (South). The text in brackets, [Korea, Republic of], is the ISO 3166 description. Information in braces is provided by HESA to clarify usage, and is not derived either from NSCC or ISO 3166 lists of short country names, for example Spain {includes Ceuta, Melilla}.</p> <p>Where HESA publishes domicile and nationality data it does so using the National Statistics Country Classification 2006 (NSCC) code labels. HESA includes the ISO 3166-1 description [text in brackets] and additional information {text in braces} within the valid entry labels to ensure that labeling standards, both UK and international, are available only for cross-referencing. HESA does not insist that providers display these additional descriptions in their own output.</p> <p>Note: 'no settled inhabitants' means no inhabitants apart from military and scientific personnel, staff of contractors, and seasonal residents. Codes for countries with no settled inhabitants are referred to in the guidance but omitted from the valid entries list, for example, AQ Antarctica.</p> <p>GB, XF, XG, XH, XI, XJ, XK: United Kingdom</p> <p>For domicile the separate country codes XF, XG, XH, XI must be used, and if domicile is known to be United Kingdom but the individual country is not known, XK must be</p>

used. The code GB is invalid for domicile. For **nationality** the code GB must be used. The codes XF, XG, XH, XI, XK are invalid for nationality. The code XJ is invalid for both domicile and nationality. Note that the code UK is not in the NSCC list and is invalid for both domicile and nationality.

GG, JE, XL: Guernsey and Jersey (Channel Islands)

The Channel Islands are not part of the United Kingdom and not part of the European Union. United Kingdom codes must not be used for either domicile or nationality. The Bailiwicks of Guernsey (which includes the smaller islands of Alderney and Sark) and of Jersey must be treated separately, and the codes GG and JE must be used for both **domicile** and **nationality**. The code XL may be used for either domicile or nationality, but only for student instances from 2007/08 onwards that were already current in 2006/07, to avoid the need for re-coding.

IM: Isle of Man

The Isle of Man is not part of the United Kingdom and not part of the European Union. United Kingdom codes must not be used either for domicile or nationality. The code IM must be used for both **domicile** and **nationality**.

CY, XA, XB, XC: Cyprus

The following treatment does not imply any recognition that the *de facto* Turkish occupation and control of northern Cyprus is legitimate, but does deal with the practical need to record the source of students. The separate codes Cyprus (European Union) (XA) and Cyprus (non European Union) (XB) must be used for both **domicile** and **nationality**. The code XC may be used for either domicile or nationality, but only for student instances from 2007/08 that were already current in 2006/07, to avoid the need for re-coding, or for new entrants in 2007/08 who entered through UCAS. Note that an appropriate United Kingdom code should be used for both domicile and nationality for students from the British sovereign military areas on Cyprus. The code CY is invalid for both domicile and nationality unless and until there is any change in the political situation, in which case the coding arrangements will be reviewed.

FI, AX: Finland and the Åland Islands

The Åland Islands (Ahvenamaa) are an autonomous demilitarised region of Finland, and are part of the European Union subject to some derogations and special provisions. For **domicile** the code FI must be used only for Finland excluding the Åland Islands, and the code AX must be used for the Åland Islands. The passport held by Åland Islanders is an EU-style passport distinguished from the normal Finnish passport by the addition of the word 'Åland' below 'FINLAND', but this does not imply a separate nationality. Accordingly, for **nationality** only the code FI is to be used, and the code AX is invalid.'

FO, GL: Faroe Islands and Greenland

The Faroe Islands and Greenland must be treated separately, and the codes FO and GL must be used for both **domicile** and **nationality**. Note that, despite their relationship with Denmark, neither Greenland nor the Faroe Islands are part of the European Union.

FR, GF, GP, MQ, RE, YT, PM, PF, WF, BL, MF, TF and NC: French Republic

The French Republic comprises Metropolitan France (France Métropolitain) [including

Corsica], the four Overseas Departments (Départements d'Outre-Mer, or D.O.M.) of French Guiana (GF), Guadeloupe (GP), Martinique (MQ), and Réunion (RE), the six Overseas Collectivities (Collectivités d'Outre-Mer, or C.O.M.) of Mayotte (YT), St Pierre & Miquelon (PM), French Polynesia (PF) [also designated as a Pays d'Outre-Mer], and Wallis & Futuna (WF), St Barthélemy (BL), St Martin (French Part) (MF), the Overseas Territory (Territoire d'Outre-Mer, or T.O.M.) of the French Southern Territories (TF), and finally New Caledonia (NC) which has a special status similar to a T.O.M..

Metropolitan France and the four Overseas Departments are all part of the European Union. For **domicile**, the code FR must be used **only** for Metropolitan France, and other codes must be used with their natural meaning, except that there are no settled inhabitants in the French Southern Territories, so code TF is invalid. For **nationality** the code FR must be used throughout, and all the other codes in this group are invalid.

IT, VA: Italy and Vatican City (Holy See)

Italy and Vatican City must be treated separately, and the codes IT and VA must be used for both **domicile** and **nationality**.

NL, AW, CW, SX, BQ, AN: Kingdom of the Netherlands

The Kingdom of the Netherlands comprises the European country of The Netherlands (NL); the Caribbean country of Aruba (AW), and the former island territories of the Netherlands Antilles: Curaçao (CW); Sint Maarten (Dutch part) (SX); and the combined special municipalities of Bonaire, Sint Eustatius and Saba (BQ).

On October 10th 2010, the Netherlands Antilles (AN) was dissolved and its constituent island territories became constituent countries or special municipalities of the Kingdom of the Netherlands in their own right. Consequently, the Netherlands Antilles (AN) has ceased to be a valid code for entrants from 2011/12 onwards in DOMICILE, and has been superseded by the following codes:

CW Curaçao
SX Sint Maarten (Dutch part)
BQ Bonaire, Sint Eustatius and Saba

For **domicile**, the code NL must be used only for The Netherlands in Europe, and the codes AW, CW, SX, and BQ must be used with their natural meaning. For **nationality** the code NL must be used throughout, and codes AW, CW, SX, BQ and AN are invalid.

ES, IC, XD, XE: Spain and the Canary Islands

The Canary Islands are part of Spain, and hence of the European Union, but with some special derogations and provisions particularly relating to customs and fiscal matters. For **domicile**, the code ES must be used for mainland Spain and the code IC must be used for the Canaries. For **nationality**, the code ES must be used for both mainland Spain and the Canaries. The codes XD and XE, although in the NSCC list, are invalid for both domicile and nationality. No separate codes are provided in the NSCC list for the exclaves of Ceuta and Melilla on the coast of north Africa, and for both domicile and nationality purposes they should be regarded as part of mainland Spain.

NO, SJ, BV: Norway and Svalbard and Jan Mayen

Svalbard (Spitzbergen) is an inhabited Norwegian territory in the Arctic Ocean. for **domicile** the code SJ must be used for Svalbard, and the code NO must be used only for Norway excluding Svalbard. For **nationality** the code NO must be used throughout, and SJ is invalid. Jan Mayen Island is included with Svalbard under code SJ, but has no settled inhabitants. Bouvet Island (BV) is a Norwegian island in the South Atlantic Ocean, but has no settled inhabitants, so code BV is invalid for both domicile and nationality.

MA, EH; Morocco, Western Sahara

Western Sahara (EH) is a disputed territory occupied and administered by Morocco (MA). The code EH should be used where appropriate for both **domicile** and **nationality**.

PS: Occupied Palestinian Territories

This code description changed in 2008/09 to reflect the change in the National Statistics Country Classification. It must be used where appropriate for both **domicile** and **nationality**.

US, PR, VI, GU, MP, AS, UM, MH, FM, PW: United States, Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, American Samoa, United States Minor Outlying Islands, Marshall Islands, Micronesia, Palau

The Commonwealth of Puerto Rico is an Unincorporated Organized Territory of the United States; its current Commonwealth status grants it a measure of internal self-government, but the US Constitution reserves ultimate governance of the island to the US Congress and President. The Democratic Party 2008 Platform included an undertaking to resolve the permanent status of Puerto Rico by 2012, the principal alternatives being independence, US statehood, or a clarification of the present position. Puerto Ricans have been citizens of the United States since 1917. For **domicile** the code PR must be used. For **nationality** the code US must be used and the code PR is invalid.

The US Virgin Islands (the former Danish West Indies, purchased from Denmark by the United States in 1916) is an Unincorporated Organized Territory of the United States. US Virgin Islanders are citizens of the United States. For **domicile** the code VI must be used. For **nationality** the code US must be used and the code VI is invalid.

Guam (formerly part of the UN Trust Territory of the Pacific) is an Unincorporated Organized Territory of the United States. For **domicile** and **nationality** the code GU must be used.

The Commonwealth of the Northern Mariana Islands (formerly part of the UN Trust Territory of the Pacific) is an Unincorporated Organized Territory of the United States; its Commonwealth status grants it a measure of internal self-government. For **domicile** and **nationality** the code MP must be used.

American Samoa is an Unincorporated Unorganized Territory of the United States. For **domicile** and **nationality** the code AS must be used. The United States Minor Outlying Islands comprise Baker Island, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Atoll, Palmyra Atoll and Wake Island in the Pacific, and Navassa Island in the Caribbean. They are Unincorporated (Incorporated in the case of Palmyra Atoll) Unorganized Territories of the United States. They have no settled inhabitants and the code UM is accordingly invalid for both **domicile** and **nationality**.

The Marshall Islands (formerly part of the UN Trust Territory of the Pacific) are a self-governing state in free association with the United States. For **domicile** and **nationality** the code MH must be used.

The Federated States of Micronesia (formerly part of the UN Trust Territory of the Pacific) are a self-governing state in free association with the United States. For **domicile** and **nationality** the code FM must be used.

Palau (formerly part of the UN Trust Territory of the Pacific) is a self-governing state in free association with the United States. For **domicile** and **nationality** the code PW must be used.

The use of the code US for **domicile** is accordingly limited to the United States only.

CN, TW, HK, MO: China, Taiwan, Hong Kong, Macao

China (CN) should be used for both **domicile** and **nationality** where relevant in cases not covered by the following guidance. Taiwan (TW) - The United Kingdom acknowledges the position of the Chinese Government that Taiwan is a province of China and recognises the Chinese Government as the sole legal government of China. The United Kingdom does not recognise Taiwan as a state and does not have diplomatic relations with Taiwan. However, because the United Kingdom accepts passports issued by the Taiwanese Authorities for immigration purposes, it is necessary to use a separate country code TW for Taiwan in both the **domicile** and **nationality** fields. This has no bearing on the United Kingdom's position on Taiwan's status.

Hong Kong (Special Administrative Region of China) (HK) appears separately for historical and immigration reasons as this Special Administrative Region issues different passports from those of the PRC. This code is not regarded as having any implications for issues of nationality, but should continue to be used in both the **domicile** and **nationality** fields.

Macao (Special Administrative Region of China) (MO) appears separately for historical and immigration reasons as this Special Administrative Region issues different passports from those of the PRC. This code is not regarded as having any implications for issues of nationality, but should continue to be used in both the **domicile** and **nationality** fields.

AU, CX, CC, NF, HM: Australia, Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Heard Island and MacDonal Islands.

Christmas Island is a non-self-governing territory of Australia. For **domicile** the code CX must be used. For **nationality** the code AU must be used and the code CX is invalid.

Cocos (Keeling) Islands is a non-self-governing territory of Australia. For **domicile** the code CC must be used. For **nationality** the code AU must be used and the code CC is invalid.

Norfolk Island is a non-self-governing territory of Australia. For **domicile** the code NF must be used. For **nationality** the code AU must be used and the code NF is invalid.

Heard Island and MacDonal Islands are a territory of Australia with no settled inhabitants. The code HM is accordingly invalid for both **domicile** and **nationality**

The use of the code AU for **domicile** is accordingly limited to Australia only.

NZ, CK, NU, TK: New Zealand, Cook Islands, Niue, and Tokelau

The Cook Islands are a self-governing state in free association with New Zealand; they form part of the Realm of New Zealand and Cook Islanders are New Zealand citizens. Accordingly, for **domicile** the code CK must be used for the Cook Islands, but for **nationality** the code NZ must be used and the code CK is invalid.

Niue is a self-governing state in free association with New Zealand; it forms part of the Realm of New Zealand and Niueans are New Zealand citizens. Accordingly, for **domicile** the code NU must be used for Niue, but for **nationality** the code NZ must be used and the code NU is invalid.

Tokelau is a non-self-governing territory of New Zealand. A proposal for Tokelau to become a self-governing state in free association with New Zealand, on a basis similar to that of the Cook Islands and Niue, narrowly failed to achieve the required two-thirds majority at a second referendum on self-determination in 2007. Following that outcome, further consideration of any change in the status of the territory has been suspended sine die. Accordingly, for **domicile** the code TK must be used, but for **nationality** the code NZ must be used and the code TK is invalid.

The use of the code NZ for **domicile** is accordingly limited to New Zealand only.

IO: British Indian Ocean Territory (BIOT)

The Chagos Islands form the principal part of this territory, and these include the island of Diego Garcia which is leased to the United States of America as a major military base. The indigenous inhabitants of BIOT have been displaced elsewhere, and the territory accordingly has no settled inhabitants at present (on the above definition). Accordingly the code IO is invalid for **domicile**, but may be used as a **nationality** code for displaced indigenous inhabitants. IO will be made valid for domicile if at some point return of the indigenous inhabitants is permitted.

AQ: Antarctica

Since there are no settled inhabitants in Antarctica, code AQ is invalid for both domicile and nationality and is omitted from the list. See also code XX. Although there are a number of national territorial claims to parts of Antarctica, these have been in abeyance since the coming into force of the Antarctic Treaty in 1961.

XM, XN, XO, EU, XP–XX, XY, XZ, AA, ZZ: Obsolete Countries, Regions, Stateless, and Unknown

Codes XM, XN, XO, AA may not be used for **domicile**, for which they are invalid. The regional codes EU and XP to XX may be used if domicile is known only to this level of accuracy, in preference to using ZZ which should be a last resort. EU should be used in preference to XP if appropriate. For **nationality**, codes XM, XN, XO may be used only for students who hold these obsolete nationalities and no other, presumably because they emigrated at a time when the nationalities were current and they have never acquired any other nationality. Codes EU and XP to XX may not be used for nationality, for which they are invalid. Code XX may be used only in relation to Oceania, not Antarctica. Code AA should be used only when a student is known to be stateless, and code ZZ should be used when nationality is not known or when it is impossible from the available documentation to assign a nationality from the above list. Codes XY and XZ

	although in the NSCC list, are invalid for both domicile and nationality. Note that codes AA, EU and ZZ do not appear on the NSCC list.
Examples	
Reason Required	Understanding geo-demographic of student body. To obtain the numbers of students domiciled in particular EU countries and elsewhere abroad, and hence calculate participation rates. To forecast the demand for student allowances and grants. To record cross-border flows. To understand numbers eligible for student support.

	<p>Q51 14-19 Higher Diploma (level 2) Q52 Welsh Baccalaureate Intermediate Diploma (level 2) Q80 Other qualification at level 2 R51 14-19 Foundation Diploma (level 1) R52 Welsh Baccalaureate Foundation Diploma (level 1) R80 Other qualification at level 1 X00 Higher education (HE) access course, Quality Assurance Agency (QAA) recognised X01 Higher education (HE) access course, not Quality Assurance Agency (QAA) recognised X02 Mature student admitted on basis of previous experience and/or admissions test X04 Other qualification level not known X05 Student has no formal qualification X06 Not known</p>
Notes	<p>QVALENT3 records a student's highest qualification on entry to the instance. It should NOT be updated to reflect qualifications gained during the instance. Providers in England need to consider qualifications gained by students during the instance to establish ELQ status, but should not subsequently update QVALENT3.</p> <p>For guidance on the use of academic qualification codes in QVALENT3, providers should refer to the guidance for Course.COURSEAIM, as it was always intended that the two coding frames be closely linked. For guidance on the use of the vocational qualification codes, colleagues can refer to the Framework for Higher Education Qualifications QAA publication Qualifications can cross boundaries - a rough guide to comparing qualifications in the UK and Ireland.</p> <p>Providers may wish to seek advice from UK NARIC (www.naric.org.uk) about the relative level of qualifications awarded from abroad.</p> <p>No hierarchy is implied in level 3 qualifications. If a mixture of qualifications are relevant, then use code P92, P93 or P94 rather than any single qualification included, such as A/AS level. Please be aware that P92 may be used as a filter to exclude instances with no tariffable qualifications from calculations of UCAS tariff. P93 or P94 are acceptable as a general code for qualifications, or mixtures of qualifications, that are subject to tariff (the detail of qualifications should be returned in the QualificationsOnEntry entity).</p> <p>Code 'P92 Level 3 qualifications of which none are subject to UCAS Tariff' relates to the type of qualification. This code should not be used in cases where the student holds non-tariff bearing grades for a tariff-bearing qualification. In these circumstances the appropriate P code for the level 3 qualification or P93/P94 should be used in QVALENT3.</p> <p>Any level 3 qualification not featured in the coding frame should be coded to P92, P93 or P94.</p> <p>Please note that the Diploma in Foundation Studies in Art and Design is a qualification offered at both level 3 and level 4.</p> <p>Further guidance for specific codes:</p> <p>X00 'Higher education (HE) access course, Quality Assurance Agency (QAA) recognised', and X01 'Higher education (HE) access course, not Quality Assurance Agency (QAA) recognised':</p> <p>A recognised Access to HE course is one validated by an Authorised Validating Agency,</p>

	<p>licensed for the purpose by the Quality Assurance Agency for Higher Education (QAA) under the terms of the QAA Recognition Scheme for Access to Higher Education in England, Wales and Northern Ireland. Relevant Access courses are recorded on the Access to HE Courses Database. QAA does not licence any AVAs in Scotland.</p> <p>J10 'Foundation degree'</p> <p>Code J10 covers those programmes providers are running as foundation degrees, which are consistent with the 'Statement of Design Principles' for foundation degrees issued by UUK and GuildHE.</p> <p>X02 'Mature student admitted on basis of previous experience and/or admissions test'</p> <p>Code X02 should only be used where the student does not have any formal qualifications at level 3 or above. For students holding qualifications at level 3 or above who are admitted on the basis of APL or an admissions test, the relevant code for their level 3 or above qualifications should be used in preference to X02.</p> <p>X06 'Not known'</p> <p>Code X06 should not be used as a default. Providers are expected to seek and code the highest qualification on entry.</p> <p>Full information, where available should be reported in QualificationsOnEntry .</p> <p>Providers in England</p> <p>For students on designated courses it is expected that the highest qualification on entry will be known, as without these data it is not possible to determine whether or not the student falls under the ELQ policy.</p> <p>Some students are exempt from the ELQ policy, for example those on foundation degrees. Whilst the requirement for highest qualification on entry data for these students is less, HEFCE would still expect providers to make reasonable endeavours to ensure that these data are as precise as possible. This is because these students may move from an exempt to a non-exempt category, at which point their highest qualification would be relevant in determining their fundability. Notwithstanding the increased granularity in this field it is still not possible, in all cases, to fully determine whether or not a student is an ELQ solely using QUALENT3 and Course.COURSEAIM (e.g. where the student has gained a qualification since starting their instance this could lead to them becoming an ELQ, but would not be reflected in QUALENT3).</p> <p>For codes P93 and P94, HEFCE expect to see entries in the QualificationsOnEntry entity.</p> <p>P80 should only be used where no other code is appropriate. In particular students holding UK qualifications should not be allocated to P80 as another P code will normally be applicable. Students recorded as P80 will therefore typically be international students with non-UK qualifications.</p>
Reason Required	<p>This field gives information about a student's qualifications on entry to a course. It is also used to identify students with tariff-bearing qualifications and non-traditional qualifications for analyses. To calculate the National Statistic - Higher Education Initial</p>

	Participation Rate (HEIPR).

Schema Components	Element: PREVINST Data type: PREVINSTType
Owner	HESA
Version	1.4
Date modified	2015-06-25
Change management notes	Valid entry '9999' added to the field, permitting the return of an unknown PREVINST value in cases where the existing generic codes cannot be used.

Postcode

Type	field
Short Name	POSTCODE
Description	This field identifies the postcode of the student's permanent or home address prior to entry to the course. It is not necessarily the correspondence address of the student.
Applicable to	England
Coverage	All entrants where EntryProfile.DOMICILE = XF, XG, XH, XI, XK, XL, GG, JE, IM.
Notes	<p>UK domiciled, for the purposes of this field, means domiciled in England, Wales, Scotland, Northern Ireland, Channel Islands or Isle of Man.</p> <p>In the event that the full postcode is not known, providers must return at least the outward part. The first part of the postcode (the outward part) is essential for allowing HESA to do geographic analysis.</p> <p>For students entering through UCAS this information will be available from UCAS via the *J transaction</p> <p>Information about postcodes and postcodes for known addresses can be obtained from Postcodes Online at: www.royalmail.com.</p> <p>Country of domicile is collected in EntryProfile.DOMICILE.</p> <p>British Forces Post Office (BFPO) postcodes</p> <p>Where BFPO codes relate to UK locations, providers will need to locate the Royal Mail equivalent postcode for the base.</p> <p>There is further guidance on valid postcode formats at: http://webarchive.nationalarchives.gov.uk/+http://www.cabinetoffice.gov.uk/govtalk/schemasstandards The business rule structure validation will be slightly less strict than that described in UK Government Data Standards Catalogue, as not all parsers will support the full GDSC definition. All postcodes are validated against valid postcodes at exception.</p>
Examples	<p>A typical postcode such as GL50 3DA would be coded with a blank in the fifth character position. A postcode such as B1 6SR would have a blank in position 3. The part of the postcode before the space is known as the outward part of the postcode and can be 2, 3 or 4 characters long. The part of the postcode after the space is known as the inward part of the postcode and is a fixed length of 3 characters. The space between the outward and inward parts of the postcode must always be shown as part of the postcode.</p> <p>There is further guidance on valid postcode formats at: http://webarchive.nationalarchives.gov.uk/+http://www.cabinetoffice.gov.uk/govtalk/schemasstandards Validation is slightly less strict than that described in UK Government Data Standards Catalogue, as not all parsers will support the full GDSC definition. All postcodes are validated against valid postcodes at exception, using the Office for National Statistics Postcode Directory (ONSPD).</p>

Reason Required	To monitor student population and participation by local areas, especially in the widening participation context. Also used to support funding allocations and in policy analysis.

Student instance identifier

Type	field
Short Name	NUMHUS
Description	This field complements the HUSID field to identify the separate courses that individuals take. UKPRN Provider identifier + HUSID + NUMHUS together form a unique identifier known as UHN, an identification of the basic unit of 'a coherent engagement with the provider aiming towards the award of a qualification(s) or credit'.
Applicable to	England
Coverage	All entrants.
Notes	<p>Field length 20 is to allow providers to use an instance identifier already held internally. Where a instance identifier held internally is used, providers must continue to use this number even when transfers or natural progressions occur. As a consequence of this providers may find it easier to number student instances sequentially starting from 1 or A etc. A new instance number format can only be introduced for instances that have not been returned to HESA. This will be the case for new entrants and for continuing students commencing courses that have not previously been returned to HESA.</p> <p>Valid characters</p> <p>The valid character set available for this field follows the Data Standards in the HESA AP student record.</p> <ul style="list-style-type: none"> • The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. • All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007E, U+00A0 to U+024F and U+1E00 to U+1EFF. • Schemas are built in such a way that an individual project can further restrict the set if required. <p>The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.</p> <p>The Unicode charts that list each of the characters in this range can be found on the Unicode web site. The specific sets that are defined here are shown in the following PDF documents:</p> <ul style="list-style-type: none"> • Basic Latin • Latin-1 • Latin Extended A • Latin Extended B • Latin Extended Additional <p>Files must be encoded with UTF-8 and schema validation will be in place to ensure this. Providers must specify the encoding used in their XML files in the first line of the file (i.e. <?xml version="1.0" encoding="UTF-8" ?>) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.</p>

Reason Required	To distinguish - and between years, link - episodes of study by the same student at the same provider; a vital tool (through the generation of UHN) to support year-on-year linkage, for example to link entities in the HESA record and for Unistats. Used in the Higher Education Initial Participation Rate (HEIPR) calculation by BIS.

Instance

Type	entity
Short Name	Instance
Description	This records a coherent engagement with the institution aiming towards the award of a qualification(s) or credit.
Applicable to	England
Coverage	All students.
Notes	A student undertakes a course; the course being a combination of subject and qualification that define what the student is aiming for e.g. BSc degree in English Literature. A student on a course is referred to as an instance. Since it is possible for a student to undertake more than one course during the reporting year, there may be more than one instance for a student in a provider's return.
Reason Required	The instance is the central concept in the specification of the HESA AP student record, and describes the attributes of the interaction between the student and course in pursuit of a qualification or credit.
Part Of	Student
Minimum Occurrences	1
Maximum Occurrences	unbounded
Has Parts	Student instance identifier (NUMHUS) Course identifier (COURSEID) Provider's own instance identifier (OWNINST) Start date of instance (COMDATE) End date of instance (ENDDATE) HEAPES population (HEAPESPOP) Location identifier (LOCATION) Reason for ending instance (RSNEND) Expected length of study (SPLLENGTH) Units of length (UNITLGTH) Instance period
Owner	HESA
Version	1.0

Course identifier

Type	field
Short Name	COURSEID
Description	This field records the provider's own unique internal identifier for the course. The Course identifier is the primary key for the Course entity and exists as a foreign key on Instance.
Applicable to	England
Coverage	All instances.
Notes	<p>Course identifiers will be allocated by the provider and should be unique for each course.</p> <p>The term 'course' in this context relates to the combination of subject and qualification that defines what a student is aiming for and which are described in fields Course.COURSEAIM and CourseSubject.SBJCA.</p> <p>For designated courses, providers will need to report the identifier that was submitted as part of the course designation process and the HEAPES return.</p> <p>The Course identifier links the course entity and the instance entity for the reporting period. There must be an entry in the course entity with a matching identifier in the instance entity to provide this link, and so give details about the student's study in the current year. Where a student changes course within an instance by changing either course aim (at the same level) or subject, the Course.COURSEID should be updated to reflect the course that is applicable at the end of the reporting period.</p> <p>Where the student continues on the same course, the same COURSEID should be kept for all years of the course. It is intended that in the future for some onward uses data from the student record should be aggregated to allow publication at a Course level. For the UNISTATS site, for example, information about entrants, continuation, outcomes and destinations will be published together. If the COURSEID is not consistent throughout the course it will not be possible to compile a complete set of statistics as relating to a single course. Course.CTITLE will not allow for this aggregation: it is a text field and not suitable for the necessary validation.</p> <p>Year-on-year linking will be undertaken by the UHN linking mechanism.</p> <p>Valid characters</p> <p>The valid character set available for this field follows the Data Standards in the HESA AP student record.</p> <ul style="list-style-type: none"> • The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. • All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007E, U+00A0 to U+024F and U+1E00 to U+1EFF. • Schemas are built in such a way that an individual project can further restrict the set if required.

	<p>The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.</p> <p>The Unicode charts that list each of the characters in this range can be found on the Unicode web site. The specific sets that are defined here are shown in the following PDF documents:</p> <ul style="list-style-type: none"> • Basic Latin • Latin-1 • Latin Extended A • Latin Extended B • Latin Extended Additional <p>Files must be encoded with UTF-8 and schema validation will be in place to ensure this. Providers must specify the encoding used in their XML files in the first line of the file (i.e. <?xml version="1.0" encoding="UTF-8" ?>) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.</p>
Reason Required	To identify courses for designation or linkage.

Owner	HESA
Version	1.1
Date modified	2015-04-30
Change management notes	Guidance added to the Notes section, stating that the entry returned in this field should match that previously returned by providers as part of the course designation process and the HEFCE HEAPES return.

End date of instance

Type	field
Short Name	ENDDATE
Description	This field records the date the student left the student instance detailed in this return.
Applicable to	England
Coverage	All instances.
Notes	<p>All date fields in the AP student record must be completed using the ISO8601 format of YYYY-MM-DD. The specification of this field falls within the scope of the Aligned Data Definitions and follows the Data Standards in the HESA AP student record.</p> <p>This field is mandatory. If the instance has not ended, an empty element should be returned with neither characters nor spaces within it:</p> <p style="text-align: center;"><ENDDATE></ENDDATE></p> <p>A date is not required in cases where a student transfers from one course to another within the same student instance. Guidance on when a new student instance is required is given in Instance.NUMHUS. Normally where a student progresses from one course directly onto another at the same level (e.g. HND to Degree) a new student instance is not required and hence this field would not be completed.</p> <p>An entry in this field means that an entry in Instance.RSNEND will also be expected.</p> <p>Sometimes there will be a delay in knowing whether or not a student has left a course. Where the precise date of the student leaving is not known, the date of the end of the month, term or semester in which the student last attended should be given.</p> <p>For the purpose of HESA returns, completing an instance is defined as being the point at which the taught or structured part of the instance, including any formal writing-up period, is completed, i.e. once the student is no longer actively following the course, and not any later stage such as, for example, final confirmation of award. This may mean that Instance.RSNEND is completed using code 98 'Completion of course - result unknown'.</p> <p>Resit Exams and/or Results from Late Exam Boards</p> <p>Students who complete their instance by 31 July but who have resit examinations to take and/or whose final confirmation of award by exam boards may be after this date should be returned to HESA as leavers, with an ENDDATE in the reporting period ending 31 July. If their results are known before the AP student record data collection closes, these results should be included in the return. Records for such students will be included in the POPDLHE (assuming that they meet all other criteria and the institution is submitting data wholly or in part for publication on UNISTATS). However, if the results are not known before the AP student record data collection closes, a record should be submitted with a ENDDATE in the reporting period ending 31 July completed and code 98 'Completion of course - result unknown' in Instance.RSNEND. Once known, these results should be returned in the next reporting period. The date returned in ENDDATE must be the original ENDDATE and not be updated. Records returned in this way will not be included in the POPDLHE.</p>

	<p>Dormant students</p> <p>This field should reflect the date the student was last active on the instance and should not be updated.</p>
Reason Required	To determine whether to include a student in any particular population definition. To calculate the duration of a student's education. Used in analyses to determine students who are active in any given academic year.
Part Of	Instance
Field Length	10
Minimum Occurrences	1
Maximum Occurrences	1
Schema Components	Element: ENDDATE Data type: DateType

Owner	Information Standards Board - Aligned Data Definitions
Version	1.1
Date modified	2014-08-28
Change management notes	Additional guidance added to Notes, defining the completion of an instance.

Expected length of study

Type	field
Short Name	SLENGTH
Description	This field is used to indicate the normal elapsed time in the units indicated by Instance.UNITLGTH from the commencement of study, (the first learning/teaching week) to completion of the instance. This will normally include time for examinations. It does not purport to indicate the amount of study time, learning time or contact time.
Applicable to	England
Coverage	All student instances.
Notes	<p>This should be the length applicable to the instance as a whole and includes holiday time.</p> <p>Where there are both part-time and full-time students following a programme of study, the expected length of study should be the normal length applicable for the mode of study of the student.</p> <p>Cases where there is not a defined normal length for the programme of study, or where the programme of study is self-paced with an indefinite length, should have an empty element returned with neither characters nor spaces within it:</p> <p><SLENGTH></SLENGTH></p> <p>Validation will ensure that if this field is an empty string then Instance.UNITLGTH must be coded 9.</p> <p>It is not expected that the length of study be adjusted for individual students. However, where there are different options that students can take, for example, foundation years and sandwich placements, it is expected that the length reflects the options taken.</p> <p>Foundation years</p> <p>Where a student elects to take an integrated foundation year this should be reflected in the length of study. For example, where a student undertakes an integrated foundation year it is normally expected that the length be recorded as one year longer than if the student had just taken a stand-alone degree. Integrated foundation years are returned with InstancePeriod.YEARPRG = 0. It is important that the Instance.SLENGTH and InstancePeriod.YEARPRG are coded correctly to ensure that the student is included in the NSS population at the correct time. For example, a student studies Science with an integrated foundation year. The duration of the course is 4 years in total.</p> <p>In the AP student record they would be returned as follows:</p> <p>For providers submitting data either wholly or in part for the purpose of publication on UNISTATS the NSS population algorithm takes account of the foundation year through the YEARADJ calculation and the student will be surveyed in their final year of study.</p> <p>Sandwich courses</p>

	<p>Where the option of a sandwich course is available but it is not taken up by a student then Instance.SPLENGTH should be revised at the point where the student makes a decision not to take-up the sandwich option, normally by the end of their second year, to reflect the expected length excluding the sandwich year. For example students coded 4 in Instance.SPLENGTH and 1 in Instance.UNITLGTH in the first year should be recoded 3 in Instance.SPLENGTH at the end of the second year if they are not expected to take the sandwich option. This re-coding is required to ensure that the correct cohort of student is identified in the National Student Survey (NSS) target list.</p> <p>Intercalated courses</p> <p>The length of study for courses that include an intercalation should reflect the length of the individual course aim in each year rather than the length of the instance in total. For example, a student enrolls on a 5 year Masters in Medicine course. In the third year they intercalate to the third year of a Bachelor in Biotechnology before returning to complete the remaining years of the Masters programme.</p> <p>In the AP student record they would be returned as follows:</p> <p>* The coding of Instance.SPLENGTH in the intercalating year will depend on how the provider treats intercalated years. If they are viewed as one year courses the expected length would be one year but if they are considered direct entrants to the third year of a three year course then the expected length would be recorded as three years.</p> <p>The length of this field is 2 characters, however XML enables data to be returned with or without leading zeros, e.g. 03 or 3.</p>
Examples	An instance lasting for two and a half years would be coded 30 months.
Reason Required	To monitor the expected length of programmes and to determine whether a student is counted or not in a given year. Used to determine the National Student Survey target list and to monitor changing course lengths.

HEAPES population

Type	field
Short Name	HEAPESPOP
Description	This field records whether the student instance meets the criteria for the HEFCE HEAPES return population.
Applicable to	England
Coverage	Compulsory for all student instances on designated courses or where designation is held at provider level. Optional for students submitted for UNISTATS.
Valid Entries and Labels	1 Student is within HEAPES population 2 Student is not within HEAPES population
Notes	If the instance meets the criteria for the HEFCE HEAPES population for the relevant reporting year, regardless of whether or not it was included in the HEAPES data collection to HEFCE, it should be coded '1' in this field. Further guidance may be found on the HEFCE website. For example, the 2014/15 AP student record would relate to the HEAPES14 return.
Reason Required	To set and monitor the student number control. Required as a transitional field due to lack of HESA data for previous years.

Change management notes	Guidance in the Notes section amended to clarify which HEFCE HEAPES survey is applicable to the C14054 record.

Location identifier

Type	field
Short Name	LOCATION
Description	This field records the identifier for the physical location in which the course was taught.
Applicable to	England
Coverage	Compulsory for all students on designated courses. Not required for students submitted for UNISTATS or for students at providers who hold blanket designation.
Notes	<p>A fifteen character (maximum) identifier for each location designated for the provision of a course is required to be submitted to HEFCE/BIS as part of the designation process. The unique combination of course identifier and location(s) defines a designated course. This identifier must be submitted to HESA in this field.</p> <p>A designated course may have multiple approved locations. Providers should submit each location associated with the relevant Instance. This field may be returned multiple times to allow for this.</p> <p>This field must not be completed where the associated course is not designated.</p> <p>Valid characters</p> <p>The valid character set available for this field follows the Data Standards in the HESA AP student record.</p> <ul style="list-style-type: none"> • The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. • All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007E, U+00A0 to U+024F and U+1E00 to U+1EFF. • Schemas are built in such a way that an individual project can further restrict the set if required. <p>The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.</p> <p>The Unicode charts that list each of the characters in this range can be found on the Unicode web site. The specific sets that are defined here are shown in the following PDF documents:</p> <ul style="list-style-type: none"> • Basic Latin • Latin-1 • Latin Extended A • Latin Extended B • Latin Extended Additional <p>Files must be encoded with UTF-8 and schema validation will be in place to ensure this. Providers must specify the encoding used in their XML files in the first line of the file (i.e. <?xml version="1.0" encoding="UTF-8" ?>) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be</p>

	problems when submitting these files for validation.

08	Written off after lapse of time																										
09	Exclusion																										
10	Gone into employment																										
11	Other																										
98	Completion of course - result unknown																										
99	Unknown																										
Notes	<p>Providers should only complete this field where they are completing a student instance. Guidance on when a new student instance is required is given in Instance.NUMHUS. Normally where a student progresses from one course directly onto another at the same level (e.g. HND to Degree) a new student instance is not required and hence this field would not be completed although the QualificationsAwarded fields may be.</p> <p>If a student gains a qualification after completing a course, but not the qualification they were aiming for, then they should be coded 01 'Successful completion of course'.</p> <p>Code 02 'Academic failure/left in bad standing/not permitted to progress' is considered to be different from simply dropping out, code 07, which may be more closely related to personal reasons. Code 02 is intended to be for a fail at any stage. It is the code to be used for those students who fail assessment at, for example, the end of the first or second year of a three-year course and therefore leave the course, as well as for those students who have unsuccessfully completed their qualification aim.</p> <p>Code 04 'Health reasons' must not be used for those returned for UNISTATS only.</p> <p>Code 08 'Written off after lapse of time': it is at the providers discretion whether to write-off an inactive student after a period of time.</p> <p>Code 09 'Exclusion' is the breaking of provider rules, either behavioural or financial.</p> <p>Code 98 'Completion of course - result unknown' implies that there will be further returns for the student - through a dormant record for example - to report results and reason for leaving.</p> <p>In onwards analysis Statutory Customers and HESA may group codes 03, 04, 06, 07, 08, 09, 10 and 11 into a single category of 'Other'.</p>																										

	An entry in this field means that an entry in Instance.ENDDATE will also be expected.
Reason Required	To monitor transfer/progression/completion.

Maximum Occurrences	1
Schema Components	Element: RSNEND Data type: RSNENDCodeContentType
Related Fields	ENDDATE
Owner	HESA
Version	1.0

Start date of instance

Type	field
Short Name	COMDATE
Description	This field indicates the date of the student's initial commencement of studies for this student instance and may relate to a date prior to the current academic/financial year. Exchange-in students should have the date they commenced their studies at the reporting provider.
Applicable to	England
Coverage	All instances.
Notes	<p>If a student transfers from one provider to another, the date they entered the current provider for this qualification aim should be returned in this field.</p> <p>All date fields in the AP student record must be completed using the ISO8601 format of YYYY-MM-DD. The specification of this field falls within the scope of the Aligned Data Definitions and follows the Data Standards in the HESA AP student record.</p> <p>Relationship with Instance.NUMHUS and InstancePeriod.YEARSTU:</p> <p>For a single student instance, the same Student instance number is kept. InstancePeriod.YEARSTU would be expected to increment each year. However there would be no updating of Instance.COMDATE nor of other fields in the Entry profile - an exception being, if, for example, an error had been found in the information provided in the previous year.</p> <p>With the commencement of a new student instance, a new Instance.NUMHUS would be allocated. InstancePeriod.YEARSTU would be expected to be 01. Instance.COMDATE should all be updated and a new Entry profile should be submitted.</p> <p>Where a student transfers from one course to another, the date should not be updated if the same Instance.NUMHUS is kept. For example, changes of subject without change of general qualification aim will not usually reset date of commencement of instance.</p> <p>Neither should the field be re-set where a student registers for an 'intermediate' qualification aim with the clear intention (acknowledged by both student and provider) that, subject to satisfactory performance, s/he will progress seamlessly (and usually without being awarded the intermediate qualification) onto a 'higher' qualification aim. For example, if a student registers first foundation degree then switches to a BA, and this is regarded as normal progression in the provider, such that the same student instance number is kept, the Instance.COMDATE should not be reset.</p>
Examples	<p>1. A student obtains a first degree in Business Studies and then enrolls on a HND in Marketing. . These are two distinct courses and therefore would have two Student instance numbers. In this case a new instance is created:</p> <ul style="list-style-type: none"> • Instance.COMDATE • InstancePeriod.YEARPRG • InstancePeriod.YEARSTU • EntryProfile.QVALENT3 • Instance.NUMHUS

	<p>2. A student transfers after two years from an HND course to the second year of a degree course (with or without being awarded the HND). This may be represented in two different ways, depending on how it is viewed by the provider.</p> <p>If within the provider this is regarded as a seamless continuation of studies, then it is the same student instance and the same Instance.NUMHUS is kept and Instance.YEARSTU increments by one year. In this case:</p> <ul style="list-style-type: none"> • Instance.COMDATE • InstancePeriod.YEARPRG • InstancePeriod.YEARSTU • EntryProfile.QUALENT3 • Instance.NUMHUS <p>However, if within the provider this is regarded as two student instances, then a new Instance.NUMHUS is allocated and Instance.YEARSTU re-sets to 01. In this case a new instance is created:</p> <ul style="list-style-type: none"> • Instance.COMDATE • InstancePeriod.YEARPRG • InstancePeriod.YEARSTU • EntryProfile.QUALENT3 • Instance.NUMHUS <p>When a provider does not have a clear preference between the two methods of reporting the progression to degree via study for an HND, it is recommended that the first method, using a single student instance, is used. This general guidance would also apply to other similar cases.</p>
Reason Required	To determine whether to include a student in any particular population definition; to calculate the duration of a student's education. Used in analyses to determine students who are active in any given academic year.

Student instance identifier

Type	field
Short Name	NUMHUS
Description	This field complements the HUSID field to identify the separate courses that individuals take. UKPRN Provider identifier + HUSID + NUMHUS together form a unique identifier known as UHN, an identification of the basic unit of 'a coherent engagement with the provider aiming towards the award of a qualification(s) or credit'.
Applicable to	England
Coverage	All instances.
Notes	<p>Field length 20 is to allow providers to use an instance identifier already held internally. Where a instance identifier held internally is used, providers must continue to use this number even when transfers or natural progressions occur. As a consequence of this providers may find it easier to number student instances sequentially starting from 1 or A etc. A new instance number format can only be introduced for instances that have not been returned to HESA. This will be the case for new entrants and for continuing students commencing courses that have not previously been returned to HESA.</p> <p>Valid characters</p> <p>The valid character set available for this field follows the Data Standards in the HESA AP student record.</p> <ul style="list-style-type: none"> • The general policy is to support all Latin-based characters for names, addresses and general text fields, but not non-Latin characters. • All Unicode code charts for Latin characters are supported. These are Basic Latin (excluding the C0 control characters), Latin-1 (excluding the C1 control characters), Latin Extended A, Latin Extended B and Latin Extended Additional. This set corresponds to Unicode code points U+0020 to U+007E, U+00A0 to U+024F and U+1E00 to U+1EFF. • Schemas are built in such a way that an individual project can further restrict the set if required. <p>The character set chosen will support Welsh and Gaelic languages as well as all European and most other languages using a Latin-based character set.</p> <p>The Unicode charts that list each of the characters in this range can be found on the Unicode web site. The specific sets that are defined here are shown in the following PDF documents:</p> <ul style="list-style-type: none"> • Basic Latin • Latin-1 • Latin Extended A • Latin Extended B • Latin Extended Additional <p>Files must be encoded with UTF-8 and schema validation will be in place to ensure this. Providers must specify the encoding used in their XML files in the first line of the file (i.e. <?xml version="1.0" encoding="UTF-8" ?>) and to ensure that their files are actually saved with that encoding. If XML files are edited with some text editors and the encoding is not specified or does not match the actual file encoding, there may be problems when submitting these files for validation.</p>

Reason Required	To distinguish - and between years, link - episodes of study by the same student at the same provider; a vital tool (through the generation of UHN) to support year-on-year linkage, for example to link entities in the HESA record and for Unistats. Used in the Higher Education Initial Participation Rate (HEIPR) calculation by BIS.

Instance period

Type	entity
Short Name	InstancePeriod
Description	This records a specific iteration of engagement within the student instance.
Applicable to	England
Coverage	All instances.
Notes	<p>Instance periods are usually analogous with the concept of an academic year within providers. It is recognised that not all providers use the same time frames for this concept. It is expected that providers will usually return the dates that align with their internal concept of an academic year.</p> <p>It is possible for more than one instance period to be present within a HESA reporting period - the presence of InstancePeriod.PERIODSTART and InstancePeriod.PERIODEND permit the analysis of progression in these cases.</p> <p>New instance periods are required where a student changes course in a way that influences designation. This would include, for example where:</p> <ul style="list-style-type: none"> • A student on a designated course changes their mode of study • A student transfers from a designated course to a non-designated course
Reason Required	The instance is the central concept in the specification of the HESA AP student record, and describes the attributes of the interaction between the student and course in pursuit of a qualification or credit. The instance period is designed to be analogous to the concept of academic year, allowing the return of cyclical data within the student experience.

notes

Additional guidance added to the Notes section describing the circumstances in which new InstancePeriod entities would be expected.

Disabled Student Allowance

Type	field
Short Name	DISALL
Description	This field identifies whether the student with a disability is in receipt of Disabled Students' Allowance (DSA) or not.
Applicable to	England
Coverage	Compulsory for all students on either designated courses or where designation is held at provider level, and StudentEquality.DISABLE is between 08 and 96 inclusive. Not permitted for students submitted for UNISTATS only.
Valid Entries and Labels	4 In receipt of Disabled Students' Allowance 5 Not in receipt of Disabled Students' Allowance 9 Information about Disabled Students' Allowance is not known/not sought
Notes	If StudentEquality.DISABLE is coded 08-96 indicating that the student has a disability, then this field should be coded 4, 5 or 9. Code 9 should be used for all cases where it is known that the student has a disability, but it is not known whether or not they are in receipt of Disabled Students' Allowance. Providers are expected to collect this information from students annually.
Reason Required	To permit disability-based analysis; for monitoring levels and trends in participation by particular groups of people; to monitor take-up of Disabled Students' Allowance as Disabled Students' Allowance is now not means tested.

Change management notes	Coverage statement rephrased to include providers who hold blanket designation, rather than course-specific designation.

Exchange programmes

Type	field
Short Name	EXCHIND
Description	To identify students involved in specific exchange programmes in order to include/exclude them in particular populations.
Applicable to	England
Coverage	All instances.
Valid Entries and Labels	1 Incoming exchange student 2 Outgoing exchange student 3 Not an incoming or outgoing exchange student
Notes	Those incoming exchange students who are registered at the reporting provider must be included in the HESA AP student record whilst attending the reporting provider, and flagged as incoming students in this field. Outgoing students must be included in the record throughout their programme of study. A student studying through distance learning should be coded '3'.
Reason Required	To identify students involved in specific exchange or visiting programmes in order to include/exclude them in particular populations.

Gross fee

Type	field
Short Name	GROSSFEE
Description	This field will capture the gross fee charged, that is before any financial support from the provider such as waivers are taken into account.
Applicable to	England
Coverage	Compulsory for all students on either designated courses or where designation is held at provider level, and InstancePeriod.EXCHIND is 2 or 3. Not required for students submitted for UNISTATS.
Notes	<p>The InstancePeriod.GROSSFEE returned should be the exact fee, e.g. £6,551 and not rounded.</p> <p>If a student leaves the provider part the way through the instance year, the annualised amount for the course should be returned in InstancePeriod.GROSSFEE.</p> <p>For instance periods which span HESA reporting years where it is not known which or how many modules the student will elect to take in HESA year two of the instance period, providers should return the fee based on modules started in the reporting year.</p> <p>For instance periods which span HESA reporting years the full fee for the instance period should be returned in the reporting year within which the instance period commences.</p> <p>Example: a one year full time MPhil course runs from October to October; the total cost of the course is £10,000.</p> <p>For courses that run for more the one year and charge the fees up front, the fees should be divided between the course years.</p> <p>Example: a two year part time postgraduate diploma course runs from October to October; the total cost of the course £12,000, which is charged up front.</p> <p>For outgoing exchange students the GROSSFEE should be the fee that the student is being charged for that year.</p> <p>For full year ERASMUS outgoing students the GROSSFEE should have no fees reported. For part year ERASMUS students the GROSSFEE should be returned with the fee that the student is being charged for that year.</p> <p>Where a student repeats a term or semester in an additional year to the agreed structure of the course, provider should report the additional fee in GROSSFEE.</p> <p>GROSSFEE is not required for incoming exchange students or dormant students.</p> <p>Instances where the NHS (or another body) pays a per-capita charge equivalent to a fee should be recorded in GROSSFEE. However, where the NHS (or another body) pays a single fee that is not linked to an individual student then zero should be returned.</p>

	For Welsh domiciled students in the UK, the GROSSFEE should be the fee charged before the fee grant is applied.
Examples	A fee of £9,000 would be returned as 9000. A fee of £7,545 would be returned as 7545.
Reason Required	To monitor the various fee levels, for example by subject, course type and student characteristics including their spread across the UK.

Change management notes	Guidance in the Notes section amended to remove text relating to the SLC, which was not relevant to the AP collection.

Instance period end date

Type	field
Short Name	PERIODEND
Description	This field records the end date of the instance period.
Applicable to	England
Coverage	All student instances.
Notes	<p>All date fields in the AP student record must be completed using the ISO8601 format of YYYY-MM-DD. The specification of this field falls within the scope of the Aligned Data Definitions and follows the Data Standards in the HESA AP student record.</p> <p>Instance periods are usually synonymous with the concept of an academic year within providers. It is recognised that not all providers use the same time frames for this concept. Providers should return the dates that align with their internal concept of an academic year.</p> <p>It is possible for more than one instance period to be present within a HESA reporting period - the presence of InstancePeriod.PERIODSTART and PERIODEND permit the analysis of progression in these cases.</p> <p>The date recorded in this field should be consistent with HESA's position that the completion of an instance or instance period is defined as being the point at which the taught or structured part of the instance/instance period (including any formal writing-up period) is completed.</p> <p>Sometimes there will be a delay in knowing whether or not a student has ended their instance period. Where the precise date of the student ending is not known, the date of the end of the month, term or semester in which the student last attended should be given.</p> <p>Where the student is on their final instance period, the completion date of the instance in Instance.ENDDATE would be expected to be the same as in PERIODEND.</p> <p>Where instance periods cross reporting periods, they should be reported in both, with appropriate InstancePeriod.STULOAD values to indicate intensity of study. In such cases the start and end dates for the instance period should typically be consistent in both years in which it is returned.</p> <p>The end date of the instance period should reflect the actual pattern of study for the student where this is known as opposed to the expected date, and therefore if the end date of an instance period changes the latest position should be reported to HESA.</p>
Reason Required	Used to identify the date on which the instance period ended, which allows for the recording of non-standard academic years.

Major source of tuition fees

Type	field
Short Name	MSTUFEE
Description	This field indicates the major source of tuition fees for the student where this is known. The predominant source should be selected where there is more than one source of award or financial backing. The field relates to the current year of study.
Applicable to	England
Coverage	Compulsory for all students on designated courses or where designation is held at provider level. Not required for students submitted for UNISTATS.
Valid Entries and Labels	<p>01 No award or financial backing</p> <p>02 Award assessed by English or Welsh LEA & paid in full by LA or by the SLC (includes EU students assessed by SLC)</p> <p>03 Paid in full by Student Awards Agency for Scotland/Student Loans Company (SAAS/SLC); includes where fee is paid directly to provider</p> <p>04 Paid in full by DELNI/Northern Ireland Education & Library Boards (via Student Loans Company) (includes EU students in NI)</p> <p>05 Provider waiver of support costs</p> <p>06 Local Government - Channel Islands & Isle of Man/Scottish FE Bursaries</p> <p>07 Fee waiver under government unemployed students scheme</p> <p>08 British Academy</p> <p>09 Fees paid under part-time graduate apprentice study programme</p> <p>11 Biotechnology & Biological Sciences Research Council (BBSRC)</p> <p>12 Medical Research Council (MRC)</p> <p>13 Natural Environment Research Council (NERC)</p> <p>14 Engineering & Physical Sciences Research Council (EPSRC)</p> <p>15 Economic & Social Research Council (ESRC)</p> <p>17 Arts & Humanities Research Council (AHRC)</p> <p>18 Science & Technology Facilities Council (STFC)</p> <p>19 Research council - not specified</p> <p>22 International agency</p> <p>23 Cancer Research UK</p> <p>24 Wellcome Trust</p> <p>25 Other Association of Medical Research Charities (AMRC) charity</p> <p>26 Other charitable foundation</p> <p>31 Departments of Health/NHS/Social Care</p> <p>32 Departments of Social Services</p> <p>33 BIS</p> <p>34 Other HM government departments/public bodies</p> <p>35 Scholarship of HM forces</p> <p>36 Scottish Enterprise Network/Highlands & Islands Enterprise/Local Enterprise Companies (LECs)</p> <p>37 LEA training grants scheme</p> <p>38 Department of Agriculture & Rural Development for Northern Ireland (DARDNI)</p> <p>39 Scottish Local Authority - discretionary award</p> <p>41 EU Commission (EC)</p> <p>42 Overseas student award from HM government/British Council</p> <p>43 Overseas government</p> <p>44 Department for International Development</p> <p>45 Overseas provider</p> <p>46 Overseas industry or commerce</p> <p>47 Other overseas funding</p> <p>48 Other overseas - repayable loan</p> <p>49 ORSAS</p> <p>52 Mix of student & SLC (following assessment by English or Welsh LA, or SLC for EU students studying in England and Wales)</p>

	<p>53 Mix of student & Student Awards Agency for Scotland/Student Loans Company(SAAS/SLC)</p> <p>54 Mix of student & DELNI/Northern Ireland Education & Library Boards (via Student Loans Company)</p> <p>61 UK industry/commerce</p> <p>71 Absent for year</p> <p>81 Student's employer</p> <p>97 Other</p> <p>98 No fees</p> <p>99 Not known</p>
Notes	<p>Code 01 should be used for cases where the student pays the full fees upfront with no SLC/SAAS funding.</p> <p>Codes 02, 03 or 04 cover cases where the SLC/SAAS fund full fees through a grant, or SLC/SAAS fund full fees through a fee loan, or SLC/SAAS fund full fees through a mixture of SLC/SAAS grant and SLC/SAAS fee loan.</p> <p>Codes 52, 53 or 54 cover cases with a mixture of SLC/SAAS funding and student contribution (including cases where (i) the SLC/SAAS pays part fees and the student pays part fees, (ii) where the SLC/SAAS pays nil fees and the student pays part fees upfront and receives a fee loan for the remainder or (iii) the SLC/SAAS pays part fees, the student pays part fees and receives a part fee loan for the remainder.)</p> <p>Code 01: No award or financial backing, pay own fees. Students who are financially assessed by an LA/SAAS/DELNI/NI Education and Library Boards/SLC to pay the full fee themselves (i.e. no public support for fees) should be included here. This code should only be used where there is no award, fee loan or financial backing at all. Where there is some award, fee loan or financial backing, even if this is the minor source compared with the contribution of the student, then the coding should reflect the source of the award, fee loan or financial backing.</p> <p>Codes 02-04 includes those students whose fee is met in full by the body shown - through a grant and/or through a fee loan. In the case of payments by the SLC, students should be recorded against the body which made the financial assessment: code 02 for students from England and Wales and for EU students studying in England, code 03 for students from Scotland or code 04 for students from Northern Ireland. Where the financial assessment has resulted in the fee being partly paid by the public body shown in codes 02-04 and partly by the student or their families, the student should be included in either codes 52, 53 or 54 regardless of which contribution is the greater.</p> <p>Code 02 includes students aged under 19 who pay registration fees only. Code 02 excludes LA acting as employer.</p> <p>Students in exempt years from liability to pay fees should be coded 02, 03 or 04 as appropriate.</p> <p>Code 05 'Provider waiver of support costs' includes University Scholarships or awards of current provider.</p> <p>Code 07 'Fee waiver under government unemployment students scheme' is to cover the proposal that part-time students who are in employment at the start of a course but who become unemployed during it may have their fees waived - possibly subject to means testing. Providers will be able to reclaim from funding councils.</p> <p>Code 09 covers cases where fee remission is granted to employees of small and medium sized businesses who are studying part-time towards an HE qualification as</p>

	<p>part of a recognised Graduate Apprenticeship.</p> <p>Code 25 should be used when the charity paying the fees is listed as a member of Association of Medical Research Charities</p> <p>Code 31 'Departments of Health/NHS/Social Care'. Any student whose fees are directly paid by NAW should be included in code 34 'Other HM government departments/public bodies'.</p> <p>Code 41 'EU Commission (EC)' applies specifically to the EU Commission. In codes 42-48 'overseas' means 'non-UK'.</p> <p>Code 42 'Overseas student award from HM government/British Council' includes the Association of Commonwealth Universities.</p> <p>Code 49 identifies Overseas Research Student Award Scheme, and these awards are not included in Code 42.</p> <p>Code 81, 'Student's Employer' should be used in preference to other codes if it is known that the major source of tuition fees is the student's employer. Codes such as 61, 'UK industry/commerce' and 34, 'Other HM government departments/public bodies' therefore apply where these are the sponsor of the student rather than their employer.</p> <p>Incoming Erasmus, Tempus and other exchange students should be coded 98 'No fees'.</p> <p>The code closest to 05 should be returned if there is a 50/50 split on the source of tuition fees, with the exception of students funded 50/50 by a Research Council and another body, in which case the Research Council code should be returned.</p>
Reason Required	To provide understanding of the various sources of student fees and the extent to which various bodies are supporting students through payment of their fees.

Mode of study

Type	field
Short Name	MODE
Description	This field indicates the method by which a student is being taught their course.
Applicable to	England
Coverage	All instances.
Valid Entries and Labels	01 Full-time according to funding council definitions 02 Other full-time 23 Sandwich (thick) according to funding council definitions 24 Sandwich (thin) according to funding council definitions 25 Other sandwich course/programme 31 Part-time
Notes	<p>Where a student has changed their mode of study within the reporting period, the record should show the current or latest position. Instance.MODE would continue to reflect the mode of study prior to suspension. If a change in MODE occurs in the student's first year on the instance, the change must be recorded and two Instance Period records will be required; one reflecting the initial mode and the second the new mode of study. For example, a student commences the first year of a two year HND on a full-time mode of study. In January they elect to study the remainder of the programme on a part-time basis. The academic year runs from September to June. As the mode of study has changed in the student's first year, two instance periods would be returned for that reporting year:</p>  <p>The InstancePeriod.STULOAD is reduced to reflect the change in intensity in the second instance period and the fee information must not be double counted.</p> <p>Where a student suspends studies the InstancePeriod.NOTACT field must be completed.</p> <p>Full-time</p> <p>With reference to code 01, the definition of full-time is that course years must involve a minimum of 24 weeks study. HESA will apply the 24 week rule to its definition of full-time in publications i.e. full-time will be all those students coded 01 in this field, together with all those students coded 02 and whose expected length of study (fields Instance.SPLENGTH and Instance.UNITLGTH) is 24 weeks or more.</p> <p>Sandwich</p> <p>With reference to codes 23 and 24, these programmes are covered by the definition of sandwich under the award regulations as set out by HEFCE. Years of instance must involve a minimum of 24 weeks study/placement. HESA's definition of sandwich students will be all those students coded 23 or 24 in this field, together with all those students coded 25 and whose expected length of study (fields Instance.SPLENGTH</p>

	<p>and Instance.UNITLGTH) is 24 weeks or more.</p> <p>Code 23, Thick sandwich students are those for which an industrial (or other) placement causes a continuous absence from full-time study of at least one academic year. A record must be returned for every student enrolled on a sandwich course irrespective of whether they are in attendance at the provider or engaged in industrial (or other) training. Students should be coded as sandwich for every year of the course and not just those in which industrial (or other) experience takes place. The students who are actually out on placement can be identified via InstancePeriod.LOCSDY.</p> <p>InstancePeriod.LOCSDY valid entries (students in UK):</p> <ul style="list-style-type: none"> • D On industrial (or other) placement for the year as a whole • E On industrial (or other) placement for a proportion of the year <p>InstancePeriod.LOCSDY valid entries (students abroad):</p> <ul style="list-style-type: none"> • T Abroad for the whole year • U Abroad for a proportion of the year <p>Code 24, A thin sandwich must involve the student in an average of more than 21 hours study a week for a minimum of 24 weeks study/placement.</p> <p>Students who meet the definition of sandwich should be coded as either 23 or 24 irrespective of whether the year is spent abroad or whether it is optional/compulsory.</p>
Reason Required	To allow standard populations to be defined and financial calculations made.

Change management notes	Additional guidance added to Notes stating the requirements for this field should a student change mode during their studies.

Net fee

Type	field
Short Name	NETFEE
Description	This field will capture the net fee charged, that is after any financial support from the provider such as waivers are taken into account.
Applicable to	England
Coverage	Compulsory for all students on either designated courses or where designation is held at provider level, and InstancePeriod.EXCHIND is 2 or 3. Not required for students submitted for UNISTATS purposes only.
Notes	<p>This field captures the net fee; that is the fee charged after any financial support from the provider such as waivers are taken into account. For example; a student with an InstancePeriod.GROSSFEE of £9,000 who has had a fee waiver of £1,000 should be returned as 8000 in this field.</p> <p>The NETFEE returned should be the exact fee, e.g. £6,551 and not rounded.</p> <p>If a student leaves the provider part the way through the instance year, the annualised amount the student would have been charged should be returned in NETFEE.</p> <p>For instance periods that span HESA reporting years where it is not known which or how many modules the student will elect to take in HESA year two of the year of instance, providers should return the fee based on modules started in the reporting year.</p> <p>For instance periods that span HESA reporting years the full fee for the year of instance should be returned.</p> <p>Students who do not have any financial support will have the same value returned in both InstancePeriod.GROSSFEE and NETFEE.</p> <p>Where InstancePeriod.GROSSFEE exists NETFEE must also exist and be less than or equal to the value of Instance.GROSSFEE.</p> <p>Bursaries which offer non-cash support, such as free laptops, discounts on accommodation etc, should also not be used to reduce the value of NETFEE. If the bursary is given in cash directly to the student on the expectation that they hand it back to the provider to cover the fees, NETFEE should be reduced to account for this.</p> <p>Where the NHS or other body pays a per-capita charge equivalent to a fee this should be recorded in this field. However where the NHS pays a single fee that is not linked to individual students then zero should be returned.</p> <p>NETFEE is not required for incoming exchange students or dormant students.</p>
Examples	A student with a InstancePeriod.GROSSFEE of £9,000 who has had a fee waiver of £1,000 should be returned as 8000 in this field.

	Students who do not have any financial support will have the same value returned in both InstancePeriod.GROSSFEE and NETFEE.
Reason Required	To monitor the various fee levels and their spread across the UK. Used with GROSSFEE to monitor the actual fees paid by students and which student groups are charged reduced fees.

Not in active study

Type	field
Short Name	NOTACT
Description	This field indicates whether a student has suspended study and/or is no longer actively studying on this student instance.
Applicable to	England
Coverage	Compulsory for all instance periods where study is suspended and fields Instance.RSNEND and Instance.ENDDATE are not completed.
Valid Entries and Labels	1 Student is not in active study 2 DH/NHS student temporarily stepping-off Continuity Register
Notes	<p>This field is used to indicate either that a student was active during the instance period but has now suspended studies or has been inactive for the duration of the instance period.</p> <p>An entry in this field is not required if the student has completed/left the student instance (Instance.RSNEND and Instance.ENDDATE completed).</p> <p>Once a record has been returned with an entry in this field, a record with the same combination of UKPRN-HUSID-NUMHUS (UHN) will not be required in subsequent years unless the student returns to resume the instance or a record is being returned to end the instance (by completing (Instance.RSNEND, Instance.ENDDATE and QualificationsAwarded.QUAL (where relevant)).</p> <p>Code 2 DH/NHS student temporarily stepping-off Continuity Register</p> <p>The reasons for stepping-on and off are many and varied. The DH core definition of such stepping-off points would be: 'a student who takes a break in study, at an agreed appropriate time, and who plans to return to join a later cohort from the one with which they originally started'.</p> <p>This provides individuals with the ability to enter or leave a programme of education at a given point, providing maximum flexibility, thereby enabling an individual to consider alternative options of employment and education.</p> <p>For example, a particular nursing programme allows for stepping-off points at the end of Year 1 (following successful completion of the Common Foundation Programme) and throughout the course.</p> <p>Reporting students who temporarily suspend studies</p> <p>The InstancePeriod.NOTACT field is used to indicate where a student temporarily suspends study on the instance. If the student suspends study during the instance period the InstancePeriod.NOTACT flag must be returned and InstancePeriod.STULOAD should be reduced to reflect the fact that the student was not active for a proportion of the reporting period.</p> <p>For example a student is studying full-time on a programme. The academic year runs</p>

from early September to the end of June but at the end of March the student suspends their studies due to ill health. They intend to re-join the course in the following year:

In this scenario you would return the data as follows:

Where the student completes all required activity in the current reporting year but informs the provider that they will be taking a break in study in the next reporting year this can be reported in one of two ways:

- 1 If it is known prior to submission to HESA that the student will not be resuming study in the next reporting year or next instance period, providers can report the InstancePeriod.NOTACT flag on the latest InstancePeriod record. This will indicate to HESA that the student is not expected in the next return.
- 2 If it is not known prior to submission to HESA, in the year in which the suspension occurs the provider will need to return a full instance period record to HESA. Providers can choose either to resend the previous (last active) instance period record with InstancePeriod.NOTACT = 1 and InstancePeriod.STULOAD

Once the student has been reported to HESA as having suspended studies, a further record is not required until they resume on the instance.

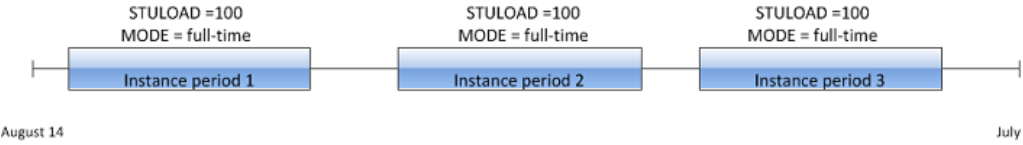

Reason Required	This field indicates whether a student has suspended study and/or is no longer actively studying on this student instance.

Date modified	2014-10-30
Change management notes	Valid entry 2 'DH/NHS student temporarily stepping-off HIN' relabelled to 'DH/NHS student temporarily stepping-off Continuity Register' in line with the name change from HIN Register to Continuity Register applied elsewhere in the manual. Additional guidance added to this field describing the method for returning students who temporarily suspend studies.

Primary provider of teaching

Type	field
Short Name	PRIPROV
Description	This field records the identity of the provider providing the majority of the teaching for a course, where this is not the submitting provider, with a UK Provider Reference Number (UKPRN) from the UK Register of Learning Providers.
Applicable to	England
Coverage	All student instances where the primary provider of teaching is not the submitting higher education provider.
Valid Entries and Labels	4002 Other Non-UK provider 4003 Other public body in the UK 4004 Other private body in the UK
Notes	<p>This field need not be submitted where the provider delivering all or the majority of the teaching is the one submitting the record.</p> <p>The identifier for the primary provider of teaching entered in this field must be obtained from the UK Register of Learning Providers.</p> <p>Submitted UKPRNs will be verified against a valid list obtained from the UKRLP.</p> <p>If an appropriate UKPRN is not available, providers are able to use the generic codes:</p> <p>Generic codes:</p> <ul style="list-style-type: none"> • 4002 Other Non-UK provider • 4003 Other public body in the UK • 4004 Other private body in the UK <p>Code 4002 should be used for any body (educational or other) based outside the UK.</p> <p>If the provider is providing teaching at the workplace then no entry is required in this field. Where the provider is buying in teaching from another body, which could be the student's employer, these cases will be identified by the codes 4003 and 4004.</p> <p>This field need not be submitted where the provider delivering all or the majority of the teaching is the one submitting the record.</p>
Reason Required	Used to identify providers who have a majority of the teaching of a an instance period contracted out to another provider.
Part Of	Instance period
Field Length	8
Minimum Occurrences	0
Maximum Occurrences	1
Schema Components	Element: PRIPROV

	Data type: PRIPROVType
Owner	HESA
Version	1.1
Date modified	2014-08-28
Change management notes	Coverage amended to add the clause 'where the primary provider of teaching is not the submitting institution' to 'All student instances' to reflect the fact that this field is not applicable to all.

Student instance FTE

Type	field					
Short Name	STULOAD					
Description	This field holds the student FTE, representing the provider's best academic judgement of the full-time equivalence of the student (for this instance period) during the reporting year 1 August - 31 July. The value can be recorded to one decimal place and must be between 0 and 300.					
Applicable to	England					
Coverage	All instances.					
Notes	<p>Full-time, full year students would normally be returned as 100 and part-time students returned as a proportion of an equivalent full-time course. Comparisons and weightings of different full-time, full year courses are not expected. The proportion of part-time study can be estimated on either a 'time' or a 'credit' basis. The FTE should not be weighted to take account of any resourcing implications of different courses.</p> <p>All students following a course would initially be assumed to have the same FTE. An adjustment may need to be made at individual student level if a student did not actually follow the whole course academic year, e.g. because they left half way through. This individual student adjustment need only be at a very broad-brush level.</p> <p>The calculation of FTE therefore becomes a function of proportion (that the course represents of a full-time benchmark course) x time (amount of the course that the student followed in the HESA reporting year).</p> <p>It is recognised that this cannot be exact in all cases and a strict pro-rata model is not expected. The aim is to give a better approximation than the use of arbitrary conversion factors.</p> <p>Further detailed notes are available on reporting FTE.</p> <p>The length of this field is 5 characters, however XML enables data to be returned with or without leading zeros or the decimal place, e.g. '005.0' or '5.0' or '5'.</p> <p>Example 1</p> <p>In this example, the student is active for the duration of each term (September-June). They are studying on a full-time mode and therefore their STULOAD is returned as 100.</p>  <p>In the AP student record the data would be returned as follows:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">HESA reporting</th> <th style="text-align: left;">Instance period</th> <th style="text-align: left;">InstancePeriod. PERIODSTART</th> <th style="text-align: left;">InstancePeriod. PERIODEND</th> <th style="text-align: left;">InstancePeriod. STULOAD</th> </tr> </thead> </table>	HESA reporting	Instance period	InstancePeriod. PERIODSTART	InstancePeriod. PERIODEND	InstancePeriod. STULOAD
HESA reporting	Instance period	InstancePeriod. PERIODSTART	InstancePeriod. PERIODEND	InstancePeriod. STULOAD		

year				
2014/15	1	2014-09-10	2015-06-01	100
2015/16	2	2015-09-10	2016-06-01	100
2016/17	3	2016-09-10	2017-06-01	100

Example 2

In this second example a student commences a two-year programme on a full-time mode. In the second year they decide to reduce the intensity of their study and instead elect to continue on a part-time mode. The change in intensity means that their STULOAD will reduce and in this case they will need to study for an additional year in order to complete the course requirements.

In the AP student record the data would be returned as follows:

HESA reporting year	Instance period	InstancePeriod. PERIODSTART	InstancePeriod. PERIODEND	InstancePeriod. STULOAD
2014/15	1	2014-09-10	2015-06-01	100
2015/16	2	2015-09-10	2016-06-01	50
2016/17	3	2016-09-10	2017-06-01	50

The STULOAD for a part-time student will vary depending on the intensity at which they are studying and the point in the year at which they change mode.

Example 3

In this third example, the years of study are not contained within the HESA reporting period of 01 August-31 July.

In the AP student record the data would be returned as follows:

HESA reporting year	Instance period	InstancePeriod. PERIODSTART	InstancePeriod. PERIODEND	InstancePeriod. STULOAD
2014/15	1	2014-10-01	2015-09-30	85
2015/16	1	2014-10-01	2015-09-30	15
2015/16	2	2015-10-01	2016-09-30	85
2016/17	2	2015-10-01	2016-09-30	15

In the second HESA reporting year two instance periods would be reported to HESA and the STULOAD for the reporting year would be apportioned between the two

instance periods. It is important to remember that you are reporting on the STULOAD contained within the HESA reporting year and that the load for an instance period should not be double counted.

Across the whole of this two-year programme the STULOAD will sum to 200, but this will be split across three reporting periods and two instance periods.

Example 4

Where a programme is studied at an accelerated rate the STULOAD reported in each year will be greater than for an equivalent 'non-accelerated' programme.

For example, if a 3 year degree programme is condensed into two instance periods, both of which are contained within HESA reporting years the STULOAD returned in each year would be 150. Summed across the two years this would give 300 which would be equivalent to a standard 3 year programme.

HESA reporting year	Instance period	InstancePeriod. PERIODSTART	InstancePeriod. PERIODEND	InstancePeriod. STULOAD
2014/15	1	2014-09-10	2015-06-01	150
2015/16	2	2015-09-10	2016-06-01	150

Examples	<p>Example A student studying the equivalent of a three year course over five years would be returned as 60.</p> <p>A student studying 30 credits in the current year, in the case where 120 credits is the norm for a full-time student, would be returned as 25.</p>
Reason Required	To allow analysis by FTE, representing student load, rather than by headcount or apportioned numbers.

Student support eligibility

Type	field
Short Name	SSELIG
Description	This field indicates whether the student instance is eligible for student support, i.e. the student is eligible for support for the course for the academic year.
Applicable to	England
Coverage	All instances.
Valid Entries and Labels	1 Eligible to receive student support 2 Not eligible to receive student support
Notes	<p>This field indicates whether the student instance is eligible for student support for the course for the academic year. All student instances should be assessed for eligibility.</p> <p>Eligibility for student support is defined by the Education (Student Support) Regulations 2011, as amended. If a student meets the definition of eligibility given in these regulations, they should in general be returned as SSELIG = 1.</p> <p>Students studying for an ELQ do not, in general, qualify for student support and should be returned as SSELIG = 2, unless they are subject to one of the exceptions given in the regulations. ELQ students who qualify for DSA (but not for tuition fee loans, or maintenance loans or grants) should also be returned as SSELIG = 2.</p> <p>Some students may be eligible for student support, and yet not entitled to student support in a particular year (or possibly throughout their course), because of their study on a previous course. When this is the case, the students should be returned as SSELIG = 1. This allows better monitoring of potential take-up of student support, and is in keeping with the way the Student Number Control (SNC) has been set.</p> <p>The coding of SSELIG should change between instance periods only when a student's eligibility for student support has changed, typically because of changes to their nationality or residency.</p>
Reason Required	To analyse potential take-up of student support. To set and monitor the student number control.

Change management notes	Additional guidance added to the notes section, to assist in the coding of this field.

Year of course

Type	field															
Short Name	YEARPRG															
Description	This field indicates the year number of the course that the student is currently studying. This could be different from the year of student if the student has changed course or re-taken a year.															
Applicable to	England															
Coverage	All instances.															
Notes	<p>Both YEARPRG and YEARSTU relate to the concept of year with reference to the anniversary of the enrolment on the instance - the COMDATE. For example, if the student has passed the first anniversary of their COMDATE on the same course, the YEARPRG would increment to '2'.</p> <p>Providers may return code 99 if the course structure does not enable Year of course to be derived.</p> <p>In cases where foundation years are integral to degree programmes, the foundation year should be shown as Year 0 in this field and 'degree' in Instance.COURSEAIM. This will allow a clear distinction to be made between stand-alone Foundation courses and those which are integral to degree programmes. The relationship between this field and InstancePeriod.YEARSTU in these circumstances is shown in the table below.</p> <table style="margin-left: 40px;"> <thead> <tr> <th>Year</th> <th>YEARSTU</th> <th>YEARPRG</th> </tr> </thead> <tbody> <tr> <td>Foundation year</td> <td>1</td> <td>0</td> </tr> <tr> <td>First year</td> <td>2</td> <td>1</td> </tr> <tr> <td>Second year</td> <td>3</td> <td>2</td> </tr> <tr> <td>Third year</td> <td>4</td> <td>3</td> </tr> </tbody> </table> <p>This field should not increment for students who are writing-up, but Instance.YEARSTU would increment on the anniversary of their starting date.</p> <p>This field should be incremented for each year of a course a student studies. Therefore, where students do not repeat any studies, year of course will increment each reporting year. In particular, where students study full-time courses on a part-time basis the year of course should still increment every year. For example, if a student is studying a degree normally taken full-time over 3 years, over 6 years part-time, the year of course should start at 1 and increase each reporting year to 6.</p> <p>The length of this field is 2 characters, however XML enables data to be returned with or without leading zeros, e.g. 03 or 3.</p>	Year	YEARSTU	YEARPRG	Foundation year	1	0	First year	2	1	Second year	3	2	Third year	4	3
Year	YEARSTU	YEARPRG														
Foundation year	1	0														
First year	2	1														
Second year	3	2														
Third year	4	3														
Reason Required	To track student progression; used in conjunction with YEARSTU, for example, for the identification of direct entrants to later years of programmes, and to identify courses with a foundation year, to support entry qualification calculations, and to identify students for inclusion in the National Students Survey.

Year of student on this instance

Type	field
Short Name	YEARSTU
Description	This field indicates the year number that the student is in since enrolling for a course leading to the student's qualification aim (whether or not the intended subject or class has changed) i.e. number of years on this student instance. This could be different from the year of course if the student has changed course or retaken a year.
Applicable to	England
Coverage	All instances.
Notes	<p>Both YEARPRG and YEARSTU relate to the concept of year with reference to the anniversary of the enrolment on the instance - the COMDATE. For example, if the student has passed the first anniversary of their COMDATE on the same course, the YEARPRG would increment to '2'.</p> <p>Students whose first term is waived should be deemed to have started when that first term would have started.</p> <p>This field should not be incremented for periods of dormancy. For example, if a student becomes dormant after their first year of study, and remains out of the system for one year, on resuming their studies this field would be returned as 02.</p> <p>This field should be incremented for a sandwich placement year and both compulsory and optional years out.</p> <p>In cases where a student has to repeat a year, this field should be incremented.</p> <p>It is not expected that there would be many students where this field is greater than 10 years.</p> <p>For further details of the inter-relationship between YEARPRG and YEARSTU please see notes in InstancePeriod.YEARPRG.</p> <p>The length of this field is 2 characters, however XML enables data to be returned with or without leading zeros, e.g. 03 or 3.</p>
Reason Required	To track student progression; used in conjunction with InstancePeriod.YEARPRG to determine which is the current year of the student instance.

Provider

Type	entity
Short Name	Provider
Description	This describes the reporting provider.
Applicable to	England
Coverage	Every submission must include a single Provider element
Notes	
Reason Required	The provider entity contains the student elements and provides a home for any provider-wide attributes.
Part Of	
Minimum Occurrences	1
Maximum Occurrences	1
Has Parts	Record type indicator (RECID) Submission purpose (SUBPURPOSE) UK Provider Reference Number (UKPRN) Course Student
Owner	HESA
Version	1.0

Record type indicator

Type	field
Short Name	RECID
Description	The standard HESA record type identifier.
Applicable to	England
Coverage	All providers
Valid Entries and Labels	14054 2014/15 AP student record
Notes	A single record type covers all of the entities in the XML file.
Reason Required	To identify the type of data being submitted and to aid the processing and quality assurance of data.
Part Of	Provider
Field Length	5
Minimum Occurrences	1
Maximum Occurrences	1
Schema Components	Element: RECID Data type: RECIDCodeContentType
Owner	HESA
Version	1.0

Submission purpose

Type	field
Short Name	SUBPURPOSE
Description	This field records the purpose of submitting the record to HESA.
Applicable to	England
Coverage	All records.
Valid Entries and Labels	1 Submission for the purpose of course designation 2 Submission for the purpose of UNISTATS 3 Submission for the purposes of both course designation and UNISTATS
Notes	The valid entry used in this field should be reflective of the purpose of the whole record submitted by the provider and must be consistent with the provider's subscription to HESA.
Reason Required	To identify the purpose of the submission; used by HESA to validate and enforce the presence of other fields in the record.

UK Provider Reference Number

Type	field
Short Name	UKPRN
Description	This field records the UK Provider Reference Number which is the unique identifier allocated to providers by the UK Register of Learning Providers (UKRLP).
Applicable to	England
Coverage	All providers
Notes	A single register of learning providers is being developed, and the specification of this field falls within the scope of the Aligned Data Definitions and follows the Data Standards in the HESA AP student record. In the long-term it is anticipated that the UKPRN will replace the plethora of provider identifiers used by different organisations in the education sector.
Reason Required	To identify source of record; used by HESA to identify the higher education provider of the student.
Part Of	Provider
Field Length	8
Minimum Occurrences	1
Maximum Occurrences	1
Schema Components	Element: UKPRN Data type: UKPRNType
Owner	UK Register of Learning Providers
Version	1.0

Qualifications awarded

Type	entity
Short Name	QualificationsAwarded
Description	Qualification or credit obtained during – or at the end of – an instance
Applicable to	England
Coverage	Compulsory for all instances where Instance.ENDDATE is not null and Instance.RSNEND = 01. (Optional for all other instances.)
Notes	<p>Qualifications should be returned in the instance period in which they are awarded. Return of one or more qualifications does not indicate the end of an instance.</p> <p>Reporting late awards</p> <p>There may be cases where a student completes study in the reporting year but their results will not be known until the next reporting cycle. In these cases the Instance record should be reported as ended in the year in which the taught or structured part of the course is completed and Instance.RSNEND would be returned with code 98 'Completion of course - result unknown'. In the next reporting cycle the provider would resend the last reported InstancePeriod record with the qualification information updated.</p> <p>For example, if a student completed their first degree in July 2015 but the award was not known until late November 2015 the provider would need to report the instance period in 2015/16 with qualification information included:</p>
Reason Required	This entity is defined to hold information about the qualification(s) awarded.
Part Of	Instance period
Minimum Occurrences	0
Maximum Occurrences	2

Qualification awarded

Type	field	
Short Name	QUAL	
Description	This field records the qualification awarded.	
Applicable to	England	
Coverage	All qualification awarded records.	
Valid Entries and Labels	M22	Integrated undergraduate/postgraduate taught masters degree on the enhanced/extended pattern
	M26	Integrated undergraduate/postgraduate taught masters degree on the enhanced/extended pattern leading towards obtaining eligibility to register to practice with a health or social care or veterinary statutory regulatory body
	M28	Integrated undergraduate/postgraduate taught masters degree on the enhanced/extended pattern leading towards registration with the Architects Registration Board (Part 1 and Part 2 qualification)
	M71	Postgraduate Certificate in Education or Professional Graduate Diploma in Education
	H00	First degree with honours
	H11	First degree with honours leading to Qualified Teacher Status (QTS)/registration with a General Teaching Council (GTC)
	H16	Pre-registration first degree with honours leading towards obtaining eligibility to register to practice with a health or social care or veterinary statutory regulatory body
	H18	First degree with honours leading towards registration with the Architects Registration Board (Part 1 qualification)
	H22	First degree with honours on the enhanced/extended pattern but at level H
	H23	First degree with honours and diploma
	H41	Diploma at level H
	H42	Certificate at level H
	H43	National Vocational Qualification (NVQ) at level H
	H50	Postgraduate bachelors degree at level H
	H60	Graduate diploma/certificate at level H
	H61	Graduate diploma/certificate at level H but where a previous qualification at level H is a pre-requisite for course entry
	H62	Pre-registration graduate diploma/certificate leading towards obtaining eligibility to register to practice with a health or social care or veterinary statutory regulatory body
	H70	Professional qualification at level H other than a first degree with honours
	H71	Professional Graduate Certificate in Education
	H72	Professional qualification at level H for serving schoolteachers other than a first degree with honours
	H76	Post-registration health and social care qualification at level H other than a first degree with honours
	H78	Other qualification at level H (where other qualifications at level H are a pre-requisite for course entry) leading towards registration with the Architects Registration Board (Part 3 qualification)
	H79	Level 6 Diploma in Teaching in the Lifelong Learning Sector
	H80	Other qualification at level H
	H81	Other qualification at level H but where a previous qualification at level H is a pre-requisite for course entry
	H88	Qualification at level H (where another qualification at level H is a pre-requisite for course entry) leading towards registration with the Architects Registration Board (Part 2 qualification)
	H90	Credits at level H
	H91	Visiting students at level H, with formal or informal credit
	I00	Ordinary (non-honours) first degree

I11	Ordinary (non-honours) first degree leading to Qualified Teacher Status (QTS)/registration with a General Teaching Council (GTC)
I16	Pre-registration ordinary (non-honours) first degree leading towards obtaining eligibility to register to practice with a health or social care or veterinary statutory regulatory body
I60	Graduate diploma/certificate at level I
I61	Graduate diploma/certificate at level I but where a previous qualification at level I or H is a pre-requisite for course entry
I70	Professional qualification at level I other than an ordinary (non-honours) first degree
I71	Qualified Teacher Status (QTS)/registration with a General Teaching Council (GTC) only
I72	Professional qualification at level I for serving schoolteachers
I74	Teaching certificate (trained through the medium of Welsh)
I76	Post-registration health and social care qualification at level I other than an ordinary (non-honours) first degree
I79	Level 5 Diploma in Teaching in the Lifelong Learning Sector
I80	Other qualification at level I
I81	Other qualification at level I but where a previous qualification at level I or H is a pre-requisite for course entry
I90	Credits at level I
I91	Visiting students at level I, with formal or informal credit
J10	Foundation degree
J16	Foundation degree which on completion meets entry requirement for pre-registration health and social care qualification
J20	Diploma of Higher Education (DipHE)
J26	Diploma of Higher Education (DipHE) leading towards obtaining eligibility to register to practice with a health or social care or veterinary statutory regulatory body
J30	Higher National Diploma (HND)
J41	Diploma at level J
J42	Certificate at level J
J43	National Vocational Qualification (NVQ) at level J

Q50	GCSE at grade A*-C

	<p>Q56 Intermediate 2 (Scotland) Q57 Standard Grade Credit (Scotland) Q70 Professional qualification at level 2 Q80 Other qualification at level 2 Q90 Credits at level 2 R42 Certificate at level R R43 National Vocational Qualification (NVQ) 1 R45 Scottish Vocational Qualification (SVQ) 1 R50 GCSE at grade D-G R56 Intermediate 1 (Scotland) R57 Standard Grade General (Scotland) R70 Professional qualification at level 1 R80 Other qualification at level 1 R90 Credits at level 1 S42 National Vocational Qualification (NVQ) Entry level certificate S57 Standard Grade Foundation (Scotland) S80 Other qualification at further education (FE) access level S90 Credits at further education (FE) access level</p>
Notes	<p>For some students whose course qualification aim may be, for example, first degree but who terminate their studies after a successful second year, occasionally a different qualification such as an HND or DipHE may be awarded. It is the awarded qualification which must be coded here.</p> <p>This field records the qualification obtained by the student during the reporting year. If a student is awarded more than one qualification during the reporting year then the QualificationsAwarded element should be repeated. A qualification obtained is not assumed from Instance.RSNEND and Instance.ENDDATE</p> <p>Some professional awarding bodies do not currently release results information to providers. Where this is the case, providers should leave this field blank and complete field Instance.RSNEND with code 98 'Completion of course - result unknown'.</p> <p>Interim Awards: In most cases qualifications are obtained at the end of a course. Therefore typically where there is a QualificationsAwarded a reason for leaving and a date left would be expected. It is recognised, however, that there are a few courses where interim qualifications are actually awarded and so these fields may not be completed. Providers that award interim qualifications for students who are continuing on a course can return this information to HESA in the reporting year in which the interim qualification is awarded if they wish, in which case Instance.ENDDATE should not be completed in order to indicate that these students are continuing on the course. However records returned in this way will not be included in the POPDLHE. Alternatively providers can return interim qualifications when the student completes the course by completing the QualificationsAwarded fields and indicating the date the student completed the course in Instance.ENDDATE. Records returned in this way will be included in the POPDLHE (assuming that all other criteria are met).</p> <p>Resit exams and/or results from late exam boards: Students who complete their instance by 31 July but who have resit examinations to take and/or whose final confirmation of award by exam boards may be after this date should be returned to HESA as leavers, with a dateleft in the reporting period ending that 31 July. If their results are known before the data collection closes, these results should be included in the return. However, if the results are not known before the data collection closes, a record should be submitted with a end date in the reporting period ending that 31 July completed and code 98 'Completion of course - result unknown' in RSNEND. Once known, these results should be returned in the next reporting period by submitting a record with the appropriate dormant code in Instance.MODE. The date returned in Instance.ENDDATE must be the original end date and not be up-dated.</p> <p>Providers may wish to decommit their return late in the data collection period in order to</p>

	include results from late exam or re-sit boards.

Qualification year

Type	field
Short Name	QUALYEAR
Description	This field records the year in which qualification on entry to the instance was obtained.
Applicable to	England
Coverage	Optional for all Qualification on entry records.
Notes	<p>The awarding bodies have given their consent, via the Joint Council for Qualifications (JCQ), for some of the results data that they forward to UCAS to be shared with providers for admission purposes, to also be used in preparing student records.</p> <p>This data will be made available to providers by UCAS (through the *J transaction).</p> <p>Providers are encouraged to provide this information for other full-time undergraduate students, in order to contribute more complete statistical information for the sector.</p>

Version	1.0

Student

Type	entity
Short Name	Student
Description	This describes a person undertaking a course at a provider, i.e. a student
Applicable to	England
Coverage	All providers
Notes	<p>A student can only be included once on this entity. Student.HUSID is the primary key for this entity.</p> <p>Since it is possible for a student to undertake more than one course during the reporting year, there may be more than one Instance entity per Student entity in a provider's return. The information specific to the student (as contained in the Student entity) should only be returned once. Multiple instances can then be linked to the student.</p>
Reason Required	This entity exists to hold elements that describe the student and to hold the instances relating to the student.
Part Of	Provider
Minimum Occurrences	1
Maximum Occurrences	unbounded
Has Parts	HESA unique student identifier (HUSID) Provider's own identifier for student (OWNSTU) Date of birth (BIRTHDTE) Forenames (FNAMES) Student Support Number (SSN) Family name (SURNAME) Unique Learner Number (ULN) Entry profile Instance Student equality
Owner	HESA
Version	1.0

Date of birth

Type	field
Short Name	BIRTHDTE
Description	This field records the date of birth of the student.
Applicable to	England
Coverage	All students.
Notes	<p>All date fields in the AP student record must be completed using the ISO8601 format of YYYY-MM-DD. The specification of this field falls within the scope of the Aligned Data Definitions and follows the Data Standards in the HESA AP student record.</p> <p>This field is mandatory. If, in exceptional circumstances, the date of birth is not known, an empty element should be returned with neither characters nor spaces within it:</p> <p><BIRTHDTE></BIRTHDTE></p> <p>HESA monitors the number of unknown birth dates submitted by each provider.</p> <p>For students entering through UCAS this information will be available from UCAS via the *J transaction.</p>
Reason Required	To understand student demographics and facilitate record linkage across collections.

HESA unique student identifier

Type	field
Short Name	HUSID
Description	This field records the student identifier which is to be unique to each student. It is intended that the identifier is to be transferred with the student to each provider of higher education he or she may attend. The objective is that the use of this number will facilitate the accurate tracking of students throughout their experience within the sector for which HESA collects data.
Applicable to	England
Coverage	All students.
Notes	<p>Students included on a previous year's return must retain the previously used HUSID.</p> <p>Students entering a course of study should be asked whether they have a previous HESA unique student identifier, and if so this identifier should be used. This will commonly be the situation for new postgraduates moving on from undergraduate study. If students are unable to recall their student identifier, the HUSID look-up service should be used to determine any previously allocated HUSID.</p> <p>Students whose details have previously been returned to HESA by the reporting provider MUST keep the same unique student identifier in future returns. For students whose details have previously been returned to HESA by another provider, the same unique student identifier should be used if this is known. This is to facilitate the possibility of backward tracking within previous data sets. Where the previous number is not known, or there is any doubt about its accuracy, providers are NOT expected to seek student identifiers from previous providers but should use the HUSID look-up service.</p> <p>Once a number has been allocated it should never be re-used, even in the case of students who leave the provider without completing their studies.</p> <p>Students who move from one provider to another should keep their original student identifier. Where the previous HE student identifier is in direct entry format, the number must NOT be changed to reflect the current provider's identifier. This is to ensure that the student identifier remains unique and to allow tracking of the student through the use of the same unique student identifier.</p> <p>Linkage between different years of a student instance will be through the 'UHN'. The UHN is a combination of three main identifier fields, the Provider.UKPRN (provider), the Student.HUSID (person), and Instance.NUMHUS (instance), which uniquely identify a student on a course leading to a course aim.</p> <p>The structure of the HESA student identifier is created as follows:</p> <p>First 2 digits: Year of entry into provider (last 2 digits of year) Next 4 digits: HESA Provider identifier + 1000 Next 6 digits: 6 digit reference number internally allocated by provider. Last digit: Check digit.</p> <p>Calculation of Check Digit</p>

	<p>The check digit is calculated using the first 12 digits and provides a means of detecting errors of transcription. To calculate the check digit, each of the first 12 digits is multiplied by a weight which depends on its position in the number, and the resulting products added. The check digit is then obtained by subtracting the final digit of the resulting sum from ten.</p> <p>If the final digit of the sum of the products is 0, the check digit would be the final digit after the subtraction i.e. $10 - 0 = 10$, check digit is 0.</p> <p>The weights used are :</p> <table data-bbox="427 555 1161 622"> <tr> <td>Position</td> <td>1</td> <td>2</td> <td>3</td> <td>4</td> <td>5</td> <td>6</td> <td>7</td> <td>8</td> <td>9</td> <td>10</td> <td>11</td> <td>12</td> </tr> <tr> <td>Weight</td> <td>1</td> <td>3</td> <td>7</td> <td>9</td> <td>1</td> <td>3</td> <td>7</td> <td>9</td> <td>1</td> <td>3</td> <td>7</td> <td>9</td> </tr> </table> <p>For example, in October 2007 a student enters Poppleton University and is allocated the internal number 123456. The check digit calculation for the student's reference number, 071064123456, would be calculated as :</p> <table data-bbox="427 772 1161 873"> <tr> <td>Number</td> <td>0</td> <td>7</td> <td>1</td> <td>0</td> <td>6</td> <td>4</td> <td>1</td> <td>2</td> <td>3</td> <td>4</td> <td>5</td> <td>6</td> </tr> <tr> <td>Weight</td> <td>1</td> <td>3</td> <td>7</td> <td>9</td> <td>1</td> <td>3</td> <td>7</td> <td>9</td> <td>1</td> <td>3</td> <td>7</td> <td>9</td> </tr> <tr> <td>Product</td> <td>0</td> <td>21</td> <td>7</td> <td>0</td> <td>6</td> <td>12</td> <td>7</td> <td>18</td> <td>3</td> <td>12</td> <td>35</td> <td>54</td> </tr> </table> <p>The sum of the products is 175, the final digit being 5, so the check digit is $10 - 5$, or 5. The full identifier is therefore 0710641234565.</p>	Position	1	2	3	4	5	6	7	8	9	10	11	12	Weight	1	3	7	9	1	3	7	9	1	3	7	9	Number	0	7	1	0	6	4	1	2	3	4	5	6	Weight	1	3	7	9	1	3	7	9	1	3	7	9	Product	0	21	7	0	6	12	7	18	3	12	35	54

Student Support Number

Type	field
Short Name	SSN
Description	This field holds the Student Support Number assigned by Student Support Award Authorities (Northern Ireland Library Boards, Welsh Local Authorities, Student Awards Agency for Scotland (SAAS) and Student Loans Company (SLC)). It is the student identifier that is used in student finance communications between the Student Support Award Authorities, providers and SLC. The SSN is unique to each funded instance of engagement.
Applicable to	England
Coverage	Compulsory for all student instances for either designated courses or where designation is held at provider level, and the instance is in receipt of SLC funds. Not required for all student instances submitted for UNISTATS.
Notes	<p>The SSN is 13 characters long. The first four characters are alpha. The next 8 characters are numeric. The last character, which is a check character, is alpha.</p> <p>Where a student may be in possession of multiple SSNs from different loan providers, the SSN returned in this field should be the one relating to the loan made for the payment of tuition fees.</p> <p>Calculation of Checksum</p> <p>The algorithm for calculating the checksum is as follows:</p> <p>For positions 1 to 4 of the SSN:</p> <ul style="list-style-type: none"> • Convert each character to a number using the following values: • Multiply each number by the weighting factor, which is 14 minus the position (i.e. 13 for position 1, 12 for position 2 etc) <p>For positions 5 to 12 of the SSN:</p> <ul style="list-style-type: none"> • Multiply each value for positions 5 to 12 by the weighting factor, which is 14 minus the position (i.e. 9 for position 5, 8 for position 6 etc) <p>Calculate the check character:</p> <ul style="list-style-type: none"> • Divide the sum of the calculated values for positions 1 to 12 by 23 to get a remainder (i.e. if summed value was 475 then the remainder would be 15) • Subtract this remainder from 23 and convert this value to a character using the following values: • This is the check character, so if validating a captured SSN this should match position 13 of the SSN. <p>Note: characters I, O, Q are not valid characters in the SSN. Z is only valid in position 13.</p> <p>Worked example</p> <p>When the Student Support Number = WADM46891352A</p>

	<ol style="list-style-type: none"> 1 Convert the characters to numbers using the values, so W=19, A=0, D=3, M=11. 2 Multiply each number by the weighting factor. 3 For positions 5 to 12 (46891352) multiply the number by the weighting factor. 4 Sum the calculated values for positions 1 to 12. 5 Divide this number by 23 to get a remainder. 6 Subtract the remainder from 23 and convert this value to a character. <p>This is the check character and this matches position 13 of the SSN.</p>
Examples	<p>For example</p> <p>Student Support Number = WADM46891352A</p>
Reason Required	To enable robust linking between HESA data and the student finance data held by SLC.
Part Of	Student
Field Length	13

Schema Components	Element: SSN Data type: SSNType
Owner	SLC
Version	1.2
Date modified	2014-10-30
Change management notes	Coverage statement rephrased to include providers who hold blanket designation, rather than course-specific designation.

Unique Learner Number

Type	field
Short Name	ULN
Description	This field records a 10-digit numeric identifier.
Applicable to	England
Coverage	Optional for all students.
Notes	<p>The Unique Learner Number (ULN) is being developed, and the specification of this field falls within the scope of the Aligned Data Definitions and follows the Data Standards in the HESA AP student record. In the long-term it is anticipated that the ULN will replace the plethora of personal identifiers used by different organisations in the education sector.</p> <p>The ULN is a ten-digit number with a non-zero number in the first position and a check digit in the final position. Further information regarding the ULN can be found on the Learning Records Service web site. Since the ULN is issued by the Learning Records Service, a providers' only obligation will be to check the validity of the number by performing the checksum validation test below.</p> <p>The ULN checksum follows the same basic principles as the NHS number, but has been designed to ensure that there is no replication of ULN and NHS number. The checksum validation process is as follows:</p> <ul style="list-style-type: none"> • Check that the first digit is nonzero • Sum the product of the digits multiplied by the weights 10, 9, 8, 7, 6, 5, 4, 3, 2, 1 • Divide this number by 11 • The remainder should be 10. <p>(e.g. ULN 9276308686. $(9*10)+(2*9)+(7*8)+(6*7)+(3*6)+(0*5)+(8*4)+(6*3) + (8*2)+(6*1) = 296$. $296/11=26$, remainder 10)</p> <p>For additional information, an Excel spreadsheet showing how the final check digit (and leading digit for Scottish Candidate Number (SCN) based ULNs) is calculated can be downloaded.</p>
Reason Required	To facilitate linking between years of HESA data and between the AP student record and other data sources.

Student equality

Type	entity
Short Name	StudentEquality
Description	This entity describes personal attributes of the student.
Applicable to	England
Coverage	Compulsory for all students on designated courses or where designation is held at provider level. Optional for all other students.
Notes	It is expected that this entity will be returned to HESA in each reporting year in which the student is active, however there is no requirement for this information to be regularly surveyed. It is not anticipated that this information would be updated within the time the student engages with the provider unless the institution is informed of a change.
Reason Required	This entity exists to hold elements that describe the student for the purposes of monitoring equality.
Part Of	Student
Minimum Occurrences	0
Maximum Occurrences	1
Has Parts	Disability (DISABLE) Ethnicity (ETHNIC) Gender identity (GENDERID) Nationality (NATION) Religion or belief (RELBLF) Sex identifier (SEXID) Sexual orientation (SEXORT)
Owner	HESA
Version	1.1
Date modified	2014-10-30
Change management notes	Coverage statement rephrased to include providers who hold blanket designation, rather than course-specific designation.

Disability

Type	field
Short Name	DISABLE
Description	This field records the type of disability that a student has, on the basis of the student's own self-assessment.
Applicable to	England
Coverage	Compulsory for all students on designated courses or where designation is held at provider level. Not permitted for students submitted for UNISTATS only.
Valid Entries and Labels	<p>00 No known disability</p> <p>08 Two or more impairments and/or disabling medical conditions</p> <p>51 A specific learning difficulty such as dyslexia, dyspraxia or AD(H)D</p> <p>53 A social/communication impairment such as Asperger's syndrome/other autistic spectrum disorder</p> <p>54 A long standing illness or health condition such as cancer, HIV, diabetes, chronic heart disease, or epilepsy</p> <p>55 A mental health condition, such as depression, schizophrenia or anxiety disorder</p> <p>56 A physical impairment or mobility issues, such as difficulty using arms or using a wheelchair or crutches</p> <p>57 Deaf or a serious hearing impairment</p> <p>58 Blind or a serious visual impairment uncorrected by glasses</p> <p>96 A disability, impairment or medical condition that is not listed above</p>
Notes	<p>With the introduction of the Disability Equality Duty, and on the recommendation of the Equality Challenge Unit (ECU), HESA has introduced a version of the coding frame introduced by the Disability Rights Commission (DRC).</p> <p>This information will be available from UCAS via the *J transaction. Disability is recorded on the basis of the student's own self-assessment.</p> <p>Codes 51 and 53 are both types of learning disability/difficulty or cognitive impairment.</p> <p>Only serious visual impairments are covered by the Disability Discrimination Act (DDA). For example, a person whose eyesight can be corrected through the use of prescription lenses is not covered by the DDA; neither is a simple inability to distinguish between red and green.</p> <p>The same logic does not apply to hearing aids. If someone needs to wear a hearing aid, then they are likely to be covered by the DDA. However, both hearing and visual impairments have to have a substantial adverse effect on the ability to carry out normal day-to-day activities in order for a person to be covered by the DDA. For more information see the Secretary of State's Revised Guidance on the definition of disability.</p> <p>If this field is coded 08-96 indicating that the student has a disability, then InstancePeriod.DISALL should be coded 4, 5 or 9.</p>
Reason Required	To permit disability-based analysis; for monitoring levels and trends in participation by particular groups of people; to monitor take-up of Disabled Students' Allowance as Disabled Students' Allowance is now not means tested; to permit analysis based on type of disability.

Notes	<p>For students entering through UCAS this information will be available from UCAS via the *J transaction.</p> <p>Where a student has dual nationality including British, they should be coded as United Kingdom (GB). If a dual nationality, not including British, but including non-UK EU country then use relevant EU country code. If neither British or non-UK EU country then code as either nationality.</p>

HESA Guidance

This coding frame is determined by the National Statistics Country Classification 2006 (NSCC), which is based on ISO 3166-1 Codes for the Representation of Names of Countries and their Subdivisions, and the United Nations' Standard Country or Area Codes for Statistical Use. In a small number of cases, the NSCC usage differs from the usage in ISO 3166 on which the NSCC is based. Where that happens, the ISO 3166 usage is given in brackets after the preferred UK usage, to facilitate cross-reference to the international standard. For example for code KR the description is Korea (South). The text in brackets, [Korea, Republic of], is the ISO 3166 description. Information in braces is provided by HESA to clarify usage, and is not derived either from NSCC or ISO 3166 lists of short country names, for example Spain {includes Ceuta, Melilla}.

Where HESA publishes domicile and nationality data it does so using the National Statistics Country Classification 2006 (NSCC) code labels. HESA includes the ISO 3166-1 description [text in brackets] and additional information {text in braces} within the valid entry labels to ensure that labeling standards, both UK and international, are available only for cross-referencing. HESA does not insist that providers display these additional descriptions in their own output.

Note: 'no settled inhabitants' means no inhabitants apart from military and scientific personnel, staff of contractors, and seasonal residents. Codes for countries with no settled inhabitants are referred to in the guidance but omitted from the list, for example, AQ Antarctica.

GB, XF, XG, XH, XI, XJ, XK: United Kingdom

For **domicile** the separate country codes XF, XG, XH, XI must be used, and if domicile is known to be United Kingdom but the individual country is not known, XK must be used. The code GB is invalid for domicile. For **nationality** the code GB must be used. The codes XF, XG, XH, XI, XK are invalid for nationality. The code XJ is invalid for both domicile and nationality. Note that the code UK is not on the NSCC list and is invalid for both domicile and nationality. Students with British nationality should be coded GB (there are no separate nationality codes for British National (Overseas) and other forms of British nationality).

GG, JE, XL: Guernsey and Jersey (Channel Islands)

The Channel Islands are not part of the United Kingdom and not part of the European Union. United Kingdom codes must not be used for either domicile or nationality. The Bailiwicks of Guernsey (which includes the smaller islands of Alderney and Sark) and of Jersey must be treated separately, and the codes GG and JE must be used for both **domicile** and **nationality**. The code XL may be used for either domicile or nationality, but only for student instances from 2007/08 onwards that were already current in 2006/07, to avoid the need for re-coding.

IM: Isle of Man

The Isle of Man is not part of the United Kingdom and not part of the European Union. United Kingdom codes must not be used either for domicile or nationality. The code IM must be used for both **domicile** and **nationality**.

CY, XA, XB, XC: Cyprus

The following treatment does not imply any recognition that the *de facto* Turkish occupation and control of northern Cyprus is legitimate, but does deal with the practical need to record the source of students. The separate codes Cyprus (European Union) (XA) and Cyprus (non European Union) (XB) must be used for both **domicile** and **nationality**. The code XC may be used for either domicile or nationality, but only for student instances from 2007/08 that were already current in 2006/07, to avoid the need for re-coding, or for new entrants in 2007/08 who entered through UCAS. Note that an appropriate United Kingdom code should be used for both domicile and nationality for students from the British sovereign military areas on Cyprus. The code CY is invalid for both domicile and nationality unless and until there is any change in the political situation, in which case the coding arrangements will be reviewed.

FI, AX: Finland and the Åland Islands

The Åland Islands (Ahvenamaa) are an autonomous demilitarised region of Finland, and are part of the European Union subject to some derogations and special provisions. For **domicile** the code FI must be used only for Finland excluding the Åland Islands, and the code AX must be used for the Åland Islands. The passport held by Åland Islanders is an EU-style passport distinguished from the normal Finnish passport by the addition of the word 'Åland' below 'FINLAND', but this does not imply a separate nationality. Accordingly, for **nationality** only the code FI is to be used, and the code AX is invalid.'

FO, GL: Faroe Islands and Greenland

The Faroe Islands and Greenland must be treated separately, and the codes FO and GL must be used for both **domicile** and **nationality**. Note that, despite their relationship with Denmark, neither Greenland nor the Faroe Islands are part of the European Union.

FR, GF, GP, MQ, RE, YT, PM, PF, WF, BL, MF, TF and NC: French Republic

The French Republic comprises Metropolitan France (France Métropolitain) [including Corsica], the four Overseas Departments (Départements d'Outre-Mer, or D.O.M.) of French Guiana (GF), Guadeloupe (GP), Martinique (MQ), and Réunion (RE), the six Overseas Collectivities (Collectivités d'Outre-Mer, or C.O.M.) of Mayotte (YT), St Pierre & Miquelon (PM), French Polynesia (PF) [also designated as a Pays d'Outre-Mer], and Wallis & Futuna (WF), St Barthélemy (BL), St Martin (French Part) (MF), the Overseas Territory (Territoire d'Outre-Mer, or T.O.M.) of the French Southern Territories (TF), and finally New Caledonia (NC) which has a special status similar to a T.O.M..

Metropolitan France and the four Overseas Departments are all part of the European Union. For **domicile**, the code FR must be used **only** for Metropolitan France, and other codes must be used with their natural meaning, except that there are no settled inhabitants in the French Southern Territories, so code TF is invalid. For **nationality** the code FR must be used throughout, and all the other codes in this group are invalid.

IT, VA: Italy and Vatican City (Holy See)

Italy and Vatican City must be treated separately, and the codes IT and VA must be used for both **domicile** and **nationality**.

NL, CW, SX, BQ : Kingdom of the Netherlands

The Kingdom of the Netherlands comprises the European country of The Netherlands (NL); the Caribbean country of Aruba (AW), and the former island territories of the

Netherlands Antilles: the countries of Curaçao (CW) and Sint Maarten (Dutch part) (SX); and the combined special municipalities of Bonaire, Sint Eustatius and Saba (BQ).

For **domicile**, the code NL must be used only for The Netherlands in Europe, and the codes CW, SX, and BQ must be used with their natural meaning. For **nationality** the code NL must be used throughout, and other codes are invalid.

ES, IC, XD, XE: Spain and the Canary Islands

The Canary Islands are part of Spain, and hence of the European Union, but with some special derogations and provisions particularly relating to customs and fiscal matters. For **domicile**, the code ES must be used for mainland Spain and the code IC must be used for the Canaries. For **nationality**, the code ES must be used for both mainland Spain and the Canaries. The codes XD and XE, although in the NSCC list, are invalid for both domicile and nationality. No separate codes are provided in the NSCC list for the exclaves of Ceuta and Melilla on the coast of north Africa, and for both domicile and nationality purposes they should be regarded as part of mainland Spain.

NO, SJ, BV: Norway and Svalbard and Jan Mayen

Svalbard (Spitzbergen) is an inhabited Norwegian territory in the Arctic Ocean. for **domicile** the code SJ must be used for Svalbard, and the code NO must be used only for Norway excluding Svalbard. For **nationality** the code NO must be used throughout, and SJ is invalid. Jan Mayen Island is included with Svalbard under code SJ, but has no settled inhabitants. Bouvet Island (BV) is a Norwegian island in the South Atlantic Ocean, but has no settled inhabitants, so code BV is invalid for both domicile and nationality.

MA, EH; Morocco, Western Sahara

Western Sahara (EH) is a disputed territory occupied and administered by Morocco (MA). The code EH should be used where appropriate for both **domicile** and **nationality**.

PS: Occupied Palestinian Territories

This code description changed in 2008/09 to reflect the change in the National Statistics Country Classification. It must be used where appropriate for both **domicile** and **nationality**.

US, PR, VI, GU, MP, AS, UM, MH, FM, PW: United States, Puerto Rico, US Virgin Islands, Guam, Northern Mariana Islands, American Samoa, United States Minor Outlying Islands, Marshall Islands, Micronesia, Palau

The Commonwealth of Puerto Rico is an Unincorporated Organized Territory of the United States; its current Commonwealth status grants it a measure of internal self-government, but the US Constitution reserves ultimate governance of the island to the US Congress and President. The Democratic Party 2008 Platform included an undertaking to resolve the permanent status of Puerto Rico by 2012, the principal alternatives being independence, US statehood, or a clarification of the present position. Puerto Ricans have been citizens of the United States since 1917. For **domicile** the code PR must be used. For **nationality** the code US must be used and the code PR is invalid.

The US Virgin Islands (the former Danish West Indies, purchased from Denmark by the United States in 1916) is an Unincorporated Organized Territory of the United States. US Virgin Islanders are citizens of the United States. For **domicile** the code VI must be used. For **nationality** the code US must be used and the code VI is invalid.

Guam (formerly part of the UN Trust Territory of the Pacific) is an Unincorporated Organized Territory of the United States. For **domicile** and **nationality** the code GU must be used.

The Commonwealth of the Northern Mariana Islands (formerly part of the UN Trust Territory of the Pacific) is an Unincorporated Organized Territory of the United States; its Commonwealth status grants it a measure of internal self-government. For **domicile** and **nationality** the code MP must be used.

American Samoa is an Unincorporated Unorganized Territory of the United States. For **domicile** and **nationality** the code AS must be used. The United States Minor Outlying Islands comprise Baker Island, Howland Island, Jarvis Island, Johnston Atoll, Kingman Reef, Midway Atoll, Palmyra Atoll and Wake Island in the Pacific, and Navassa Island in the Caribbean. They are Unincorporated (Incorporated in the case of Palmyra Atoll) Unorganized Territories of the United States. They have no settled inhabitants and the code UM is accordingly invalid for both **domicile** and **nationality**.

The Marshall Islands (formerly part of the UN Trust Territory of the Pacific) are a self-governing state in free association with the United States. For **domicile** and **nationality** the code MH must be used.

The Federated States of Micronesia (formerly part of the UN Trust Territory of the Pacific) are a self-governing state in free association with the United States. For **domicile** and **nationality** the code FM must be used.

Palau (formerly part of the UN Trust Territory of the Pacific) is a self-governing state in free association with the United States. For **domicile** and **nationality** the code PW must be used.

The use of the code US for **domicile** is accordingly limited to the United States only.

CN, TW, HK, MO: China, Taiwan, Hong Kong, Macao

China (CN) should be used for both **domicile** and **nationality** where relevant in cases not covered by the following guidance. Taiwan (TW) - The United Kingdom acknowledges the position of the Chinese Government that Taiwan is a province of China and recognises the Chinese Government as the sole legal government of China. The United Kingdom does not recognise Taiwan as a state and does not have diplomatic relations with Taiwan. However, because the United Kingdom accepts passports issued by the Taiwanese Authorities for immigration purposes, it is necessary to use a separate country code TW for Taiwan in both the **domicile** and **nationality** fields. This has no bearing on the United Kingdom's position on Taiwan's status.

Hong Kong (Special Administrative Region of China) (HK) appears separately for historical and immigration reasons as this Special Administrative Region issues different passports from those of the PRC. This code is not regarded as having any implications for issues of nationality, but should continue to be used in both the **domicile** and **nationality** fields.

Macao (Special Administrative Region of China) (MO) appears separately for historical

and immigration reasons as this Special Administrative Region issues different passports from those of the PRC. This code is not regarded as having any implications for issues of nationality, but should continue to be used in both the **domicile** and **nationality** fields.

AU, CX, CC, NF, HM: Australia, Christmas Island, Cocos (Keeling) Islands, Norfolk Island, Heard Island and MacDonald Islands.

Christmas Island is a non-self-governing territory of Australia. For **domicile** the code CX must be used. For **nationality** the code AU must be used and the code CX is invalid.

Cocos (Keeling) Islands is a non-self-governing territory of Australia. For **domicile** the code CC must be used. For **nationality** the code AU must be used and the code CC is invalid.

Norfolk Island is a non-self-governing territory of Australia. For **domicile** the code NF must be used. For **nationality** the code AU must be used and the code NF is invalid.

Heard Island and MacDonald Islands are a territory of Australia with no settled inhabitants. The code HM is accordingly invalid for both **domicile** and **nationality**

The use of the code AU for **domicile** is accordingly limited to Australia only.

NZ, CK, NU, TK: New Zealand, Cook Islands, Niue, and Tokelau

The Cook Islands are a self-governing state in free association with New Zealand; they form part of the Realm of New Zealand and Cook Islanders are New Zealand citizens. Accordingly, for **domicile** the code CK must be used for the Cook Islands, but for **nationality** the code NZ must be used and the code CK is invalid.

Niue is a self-governing state in free association with New Zealand; it forms part of the Realm of New Zealand and Niueans are New Zealand citizens. Accordingly, for **domicile** the code NU must be used for Niue, but for **nationality** the code NZ must be used and the code NU is invalid.

Tokelau is a non-self-governing territory of New Zealand. A proposal for Tokelau to become a self-governing state in free association with New Zealand, on a basis similar to that of the Cook Islands and Niue, narrowly failed to achieve the required two-thirds majority at a second referendum on self-determination in 2007. Following that outcome, further consideration of any change in the status of the territory has been suspended sine die. Accordingly, for **domicile** the code TK must be used, but for **nationality** the code NZ must be used and the code TK is invalid.

The use of the code NZ for **domicile** is accordingly limited to New Zealand only.

IO: British Indian Ocean Territory (BIOT)

The Chagos Islands form the principal part of this territory, and these include the island of Diego Garcia which is a leased to the United States of America as a major military base. The indigenous inhabitants of BIOT have been displaced elsewhere, and the territory accordingly has no settled inhabitants at present (on the above definition). Accordingly the code IO is invalid for **domicile**, but may be used as a **nationality** code for displaced indigenous inhabitants. IO will be made valid for domicile if at some point

	<p>return of the indigenous inhabitants is permitted.</p> <p>AQ: Antarctica</p> <p>Since there are no settled inhabitants in Antarctica, code AQ is invalid for both domicile and nationality and is omitted from the list. See also code XX. Although there are a number of national territorial claims to parts of Antarctica, these have been in abeyance since the coming into force of the Antarctic Treaty in 1961.</p> <p>XM, XN, XO, EU, XP–XX, XY, XZ, AA, ZZ: Obsolete Countries, Regions, Stateless, and Unknown</p> <p>Codes XM, XN, XO, AA may not be used for domicile, for which they are invalid. The regional codes EU and XP to XX may be used if domicile is known only to this level of accuracy, in preference to using ZZ which should be a last resort. EU should be used in preference to XP if appropriate. For nationality, codes XM, XN, XO may be used only for students who hold these obsolete nationalities and no other, presumably because they emigrated at a time when the nationalities were current and they have never acquired any other nationality. Codes EU and XP to XX may not be used for nationality, for which they are invalid. Code SXX may be used only in relation to Oceania, not Antarctica. Code AA should be used only when a student is known to be stateless, and code ZZ should be used when nationality is not known or when it is impossible from the available documentation to assign a nationality from the above list. Codes XY and XZ although in the NSCC list, are invalid for both domicile and nationality. Note that codes AA, EU and ZZ do not appear on the NSCC list.</p>
Reason Required	To enable the UK contribution to the higher education of nationals of other countries to be determined; used to analyse this contribution. To meet EU and OECD requests for information.
