

## 74714 IMPACTS OF A DISCRETE COLLECTION: MODULE INSTANCE AND MODULE OUTCOME

DOCUMENT VERSION: 1.0

DATE OF PUBLICATION: 9 SEPTEMBER

Please note, this document is accurate at the time of writing, but may not include all future model changes being considered.

### Background

In a continuous collection it was helpful to have the two separate entities for collecting module instance and module outcome, as a provider could add the outcomes of a module later. However, now we are a discrete collection, consideration should be given to whether these separate entities are required.

### Outcome

With the move to discrete collections it has been agreed that the ModuleOutcome and ModuleInstance entities will be combined into a single entity.

The following Module outcomes fields are to be moved to ModuleInstance:

- ModuleOutcome.LANPCNT
- ModuleOutcome.MODULEMARKS
- ModuleOutcome.MODULEOUTCOME
- ModuleOutcome.MODOUTENDDATE
- ModuleOutcome.MODULERESULT
