ADDITIONAL INFORMATION

The allocation of an institution to a geographical region relates only to the administrative centre of that institution. There may be students registered at institutions who are studying in regions other than that of the administrative centre of the institution.

This field derives the Open University as an English institution. Although the Open University teaches throughout the UK, their administrative centre is located in England. (In HESA analyses the Open University is often displayed separately.)

The HESA Data Management STATIC_DATA.INSTHQPC_LOOKUP lookup table is updated with the Office for National Statistics (ONS) postcode load in May and November each year as yyNOV. However, HESA would not expect the Country of institution to be reported differently within a HESA reporting year. Consequently this specification is updated only once per reporting year with the ONS postcode load in May each year as yyMAY.

Analysis of country of institution for DLHE is carried out by linking to XINSTC01 in the Student record (yy051).
