ADDITIONAL INFORMATION

An aggregation using the postcode (unit level) of institutional headquarters. Lookup tables derive county and then government office region using ONS data.

This field derives the Open University to South East. Although the Open University teaches throughout the UK, their administrative centre is located in South East England. (In HESA analyses the Open University is often displayed separately.)

The HESA Data Management STATIC_DATA.INSTHQPC_LOOKUP lookup table is updated with the Office for National Statistics (ONS) postcode load in May and November each year as yyNOV. However, HESA would not expect the Government Office Region allocated to a particular institution to be reported differently within a HESA reporting year. Consequently this specification is updated once per reporting year with the ONS postcode load in May each year as yyMAY.

Analysis of Government Office Region for DLHE is carried out by linking to XINSTG01 in the Student record (yy051).
